### San Jose State University

San Jose State University was established in 1857. It is an accredited university which provides both undergraduate and graduate instruction in liberal arts and sciences, applied fields and in the professions. The University is located on a 137-acre site in the City of San Jose and is currently master planned for an enrollment of 25,000 FTE students.

#### MAJOR PROJECTS

Modify existing elevators to meet safety code requirements.....	-	-	\$19,000 <sup>Wg</sup>
Funds for working drawings are requested in 1980-81. This project undertakes those modifications to ensure compliance with Title 8, California Administrative Code (California Elevator Code). The work includes counterweight derailment devices and emergency exit provisions required for seismic safety. Also, the project includes modifications for fire safety required by Elevator Safety Order 3041(c). The project is scheduled for completion in September 1981.			
Parking structure .....	-	-	5,850,000 <sup>i</sup>
Elevator safety project .....	-	-	120,000 <sup>i</sup>
Removal of architectural barriers to the physically handicapped .....	-	\$43,000 <sup>WCg</sup>	-

### Sonoma State University

Sonoma State University is a fully accredited institution with programs in the liberal arts, sciences and in the professional fields of teacher education and enterprise management. Its primary service area is Marin, Napa, Sonoma, and the southern parts of Lake, Mendocino, and Solano Counties. The university has occupied a 220-acre campus two miles east of Rohnert Park since August of 1966. This campus is currently master planned for an enrollment of 10,000 FTE students.

### California Polytechnic State University, San Luis Obispo

California Polytechnic State University, San Luis Obispo, provides accredited educational programs with emphasis on the applied fields of agriculture, engineering, business, and home economics, together with the closely related supporting fields of physical sciences, natural sciences, and mathematics. A program of required general education courses combines with the college's occupationally centered instruction to prepare graduates for citizenship, leadership, and constructive community living.

The university is located just outside San Luis Obispo at the foot of the Santa Lucia mountain range, 12 miles from the Pacific Ocean. The campus has been gradually augmented to its present 5,099 acres of which 374 acres compose the main campus and the balance is agricultural land. The campus is currently master planned for an enrollment of 15,000 FTE students.

### MAJOR PROJECTS

Robert E. Kennedy library .....	\$208,901 <sup>Cg</sup>	\$193,790 <sup>Cg</sup>	\$1,231,800 <sup>Eg</sup>
Funds for equipment are requested for 1980-81. This request is the initial and only phase of Group II (movable) equipment for the Library. The Library is scheduled for occupancy in September 1980.			
Convert science III .....	30,000 <sup>PWg</sup>	480,000 <sup>Cg</sup>	325,000 <sup>Eg</sup>
Funds for equipment are requested in 1980-81. This is the initial and only phase of Group II (movable) equipment for the conversion. The project involves the remodel and reequipping of five chemistry laboratories and related support rooms, vacated at the time the new biological sciences building was completed in Fall 1978. This project contains 37 laboratory FTE in approximately 9,900 assignable square feet. The project is scheduled for occupancy in September 1980.

**California State Polytechnic University, Pomona**

California State Polytechnic University, Pomona provides accredited educational programs at the university level in agriculture, arts, business, engineering, science, and in the preparation of elementary and secondary teachers.

The Pomona campus, originally founded by W. K. Kellogg as an Arabian horse ranch in 1925, was given to the State of California in 1949 for use by the California State Polytechnic College. Academic instruction began on the 1,098-acre campus in 1956, including 619 acres for agriculture. A master plan to accommodate 20,000 FTE students has been approved.

**MAJOR PROJECTS**

Faculty office building .....	—	—	\$165,000 <sup>PWg</sup>
Funds for preliminary plans and working drawings are requested for 1980-81. This project will provide faculty offices and related departmental offices. The project is scheduled for completion in July 1983.

## CALIFORNIA MARITIME ACADEMY

The California Maritime Academy was established in 1929 to educate officers of the United States Merchant Marine. Subsequently the program has been broadened, but it is still directed toward providing well-trained, college-educated officers for the maritime industry.

The four-year program of the Academy, which the student attends for 11 months of each year, includes an annual three-month dockside exercise and cruise aboard the training ship, Golden Bear. The students operate the ship under the supervision of the licensed merchant marine officers who comprise the majority of the faculty. These cruises enable midshipmen to meet U. S. Coast Guard regulations for time required at sea, and actual ship handling is learned under operating conditions.

The California Maritime Academy is under the direction of a Board of Governors appointed by the Governor, and the board adopted the following statement as the goal of the Academy:

"... To provide instruction in the nautical sciences, marine engineering and related fields, including all those necessary to provide the highest quality officer for the American Merchant Marine and California industries and licensing therein."

Inherent in the goal of the Academy are the following objectives:

1. To educate each midshipman in an accredited college program in nautical science, marine engineering and related fields.
2. To train each midshipman in the skills and knowledge essential to licensing in the American Merchant Marine.

### SUMMARY OF PROGRAM REQUIREMENTS

	1978-79	1979-80	1980-81

### I. INSTRUCTION

#### Program Objectives and Description

The instruction program provides general education classes and specialized courses to prepare students for careers as licensed officers in the merchant marine and the maritime industry. The curriculum provides for specialization in either nautical industrial technology or marine engineering technology. A list of options in related fields is available covering: Marine Business Management, Maritime Specialties, Computer Science, Instrumentation and Automation, Ocean Technology, Naval Architecture Technology, Nuclear Technology and Naval Science. Satisfactory completion of the academic program and successful performance on the U. S. Coast Guard license examination enables a student to graduate from the four-year program with a Bachelor of Science degree in one of the specialties. Graduates are eligible for reserve commissions in the U. S. Navy or U. S. Coast Guard and, after passing U. S. Coast Guard examinations, are licensed as third mates or third assistant engineers in the merchant marine.

The Academy has been granted academic accreditation by the Western Association of Schools and Colleges and professional accreditation by the Engineers' Council for Professional Development and the National Association of Industrial Technology.

b. Adult maritime education .....	2	4.1	4.1	90,332	107,776	107,781

#### a. Undergraduate Education

Undergraduate Education is described in the program objective and description above.

	78-79	79-80	80-81	1978-79	1979-80	1980-81
<b>Input</b> .....						
Expenditures .....	30.3	37.4	37.4	\$771,334	\$1,130,432	\$1,144,792

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

<sup>1</sup> Annual cost of tuition and fees for three full semesters. Tuition, room, board, linen, medical, athletic and cruise fees are \$2,931 for the 11-month, three-semester, school year; out-of-state tuition costs add an additional \$645 per year; student activity and insurance fees are \$60 per year.

<sup>2</sup> This is the average load for the school year (three semesters).

## CALIFORNIA MARITIME ACADEMY—Continued

## b. Adult Maritime Education

The Adult Maritime Education program provides a service to the members of the maritime industry and related businesses. Vocational courses are provided in specialized subjects not available in private or community colleges. Support for this program is generated entirely through fees paid by enrollees.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	2	4.1	4.1	\$90,332	\$107,776	\$107,781

## II. ACADEMIC SUPPORT

## Program Objectives and Description

To provide professional admissions and registration services in support of the Academy's instructional program. Support services also include operation of the library and routine maintenance of the training ship in port and at sea. A staff of skilled technical personnel instruct and assist midshipmen in performing the tasks required to operate and maintain the ship. *The California Maritime Academy proposes one Library Technical Assistant to meet additional workload generated by increases in the Academy's library holdings. Additionally, the Academy proposes one Marine Electrician to keep up with training ship electrical maintenance and repair.*

## Program Elements

a. Library .....	2.8	4	4	\$94,666	\$112,738	\$123,232
b. Ship operations .....	10	12	12	\$391,463	\$608,311	\$724,067

## a. Library

The library develops, obtains and makes available to students and faculty the bibliographical and informational resources necessary to carry out the primary function of instruction. The library is being expanded to meet the needs of increased enrollment and a broadened curriculum. *Funds are proposed to support one Library Technical Assistant which was previously covered by reimbursements.*

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	2.8	4	4	\$94,666	\$112,738	\$123,232

## b. Ship Operations

Ship operations provides the basis for practical seamanship, navigation and marine engineering instruction to all students. This includes daily operation and maintenance of the training ship, waterfront facilities, and all assigned small craft. An annual training-at-sea trimester is normally conducted in the months of January, February and March to provide the practical shipboard training necessary to meet Coast Guard licensing requirements. Annual shipyard overhaul and repair of the vessel is paid by the U.S. Maritime Administration (MARAD) and is not included in this budget.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	10	12	12	\$391,463	\$608,311	\$724,067

## III. STUDENT SERVICES

## Program Objectives and Description

Included in this program are financial aid, health support, housing, and food. These are needed to support students, all of whom are required to live on campus.

The Academy's daily routine provides residence facilities and meals for the midshipmen on nearly a year-round basis. This continuing requirement is interrupted three times during the year: Christmas recess (two weeks); spring recess (one week); and summer recess (three weeks). Third-class midshipmen remain on campus during the sea training trimester to receive additional academic instruction. *The Academy proposes an additional 0.8 Office Assistant II position to meet financial aid accounting workload which has increased due to the growth of the Federal funds available for student financial aid. This proposed position will be funded through Federal funds.*

c. Health service .....	1	1	1	21,731	43,312	46,094

## a. Financial Aid

Financial Aid includes financial counseling services, analyses of financial need, and administration, disbursement and collection of scholarships and loans to students.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures .....	1.3	2	2	\$523,090	\$463,491	\$467,175

## b. Student Support

This program element provides professional guidance and counseling services, leadership training and practical management experience, and food services.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures .....	20	27	27	\$733,502	\$803,276	\$842,181

## c. Health Service

This program element provides dispensary-type, outpatient medical services for all students. Costs are offset by student fees.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures .....	1	1	1	\$21,731	\$43,312	\$46,094

## IV. INSTITUTIONAL SUPPORT

## Program Objectives and Description

The institution requires executive management to direct the activities of the various departments. The administrative staff and plant operation personnel provide the necessary ancillary services in support of the training program provided for midshipmen. The 67-acre campus contains one classroom building, faculty office building, two residence halls, student commons building, engineering and laboratory building, combination auditorium/lecture hall, dining hall, gymnasium, seamanship building, library and administration building and a corporation yard, which require continuous maintenance and upkeep.

# CALIFORNIA MARITIME ACADEMY—Capital Outlay

STATE BUILDING PROGRAM EXPENDITURES	Actual 1978-79	Estimated 1979-80	Proposed 1980-81
<p>The California Maritime Academy was established in 1929 and is located on 67 acres adjacent to the north end of the Carquinez Bridge in Vallejo. In 1974, the Board of Governors developed an Academic Master Plan for the conversion to a four-year curriculum and achievement of full academic accreditation. Implementation of the Academic Plan required new physical facilities. A physical development plan was adopted by the Board of Governors. Recognizing the need for new facilities, the Legislature over the past four fiscal years, appropriated approximately \$8.4 million for residence halls, electrical distribution system, faculty office addition, administration addition, physical education facility, welding laboratory, library addition, corporation yard phase I and II, auditorium-lecture hall, kitchen and dining room alterations, repairs to the wharf and boathouse, site development, roads, walks, area lighting, parking, campus fire alarm system, and radar simulation-computer laboratory facility. All facilities are completed and in operation except the radar simulation-computer laboratory, which is scheduled for occupancy during the 1979-80 fiscal year. No expenditures are anticipated in 1980-81.</p>

# BOARD OF GOVERNORS OF THE CALIFORNIA COMMUNITY COLLEGES

The objectives of the Board of Governors of the California Community Colleges are:

1. To give direction, coordination, planning, and leadership to California's Community Colleges.
2. To promote quality education in community colleges.
3. To improve district and campus programs through informational and technical services on a statewide basis, while recognizing the community oriented aspect of California's network of 106 community colleges.
4. To seek adequate financial support while ensuring the most prudent use of public funds.

The Board of Governors of the California Community Colleges has 15 members appointed to four-year terms by the Governor with the advice and consent of the Senate. The Board's headquarters is in Sacramento, headed by a chancellor appointed by the Board. The agency operates with administrative, professional, and clerical staff and has one small regional office in Los Angeles.

The Board was established by Chapter 1549, Statutes of 1967, to provide statewide leadership to the public community college segment of California higher education.

## SUMMARY OF PROGRAM REQUIREMENTS

	1978-79	1979-80	1980-81

## SIGNIFICANT PROGRAM CHANGES

Program	Description	Dollars
I and II.	Unallocated for new Chancellor's priorities.....	\$295,817
II.	EOPS increased for aid to disadvantaged students.....	\$2,723,988
III.	Apportionments increased for inflation and ADA per AB 8.....	\$86,800,000

## I. EXECUTIVE

### Program Objectives and Description

The executive unit carries out the decisions of the Board of Governors, represents the interest of all California Community Colleges and informs State and local government as well as the public about status and goals of statewide planning.

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81
Continuing program costs.....	23	26.8	27.5	\$1,014,031	\$1,160,020	\$1,219,217
Workload Adjustments.....	-	2	2	-	84,797	387,284
<b>Totals, Executive.....</b>	<b>23</b>	<b>28.8</b>	<b>29.5</b>	<b>\$1,014,031</b>	<b>\$1,244,817</b>	<b>\$1,606,501</b>
<i>General Fund.....</i>	<i>813,947</i>	<i>1,095,800</i>	<i>1,454,315</i>			
<i>Reimbursements.....</i>	<i>200,084</i>	<i>149,017</i>	<i>152,186</i>			

### Program Elements

a. Board of Governors.....	2	1.9	2	\$93,058	\$106,224	\$113,133
b. Executive Office.....	9	9.6	9.8	320,544	381,238	693,001

d. Legislative and public affairs.....	3.4	3.7	3.8	112,343	148,250	156,914

### a. Board of Governors

The Board establishes policy direction for the Chancellor and his staff, the 70 Community College districts, and the 106 colleges they maintain. The Board's primary headquarters is in Sacramento, but its meetings are also held in other locations in the State.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	2	1.9	2	\$93,058	\$106,224	\$113,133

### b. Executive Office

The Chancellor reports to the Board of Governors, directs programs and staff operations, and represents the California Community Colleges in National Conferences and Communications.

For 1980-81 it is proposed to add \$95,817 of General Fund savings (attributable to reduction of a specialist in Innovative Programs and a specialist in Facilities Planning) to a \$200,000 unallocated General Fund augmentation for the new Chancellor to use in a plan of operation to be reviewed by the Department of Finance and the Legislature.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	9	9.6	9.8	\$320,544	\$381,238	\$693,001

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

BOARD OF GOVERNORS OF THE CALIFORNIA COMMUNITY COLLEGES—*Continued*

## c. Analytical Studies

The major purpose of this office is to collect and analyze data, to develop a central information system necessary for fiscal and program decisions, and to coordinate the development of a statewide educational plan.

*Effective early in 1979-80, one specialist position has been transferred from Program Evaluation and Approval for work on implementation of the information system, and one specialist has been transferred from Innovative Programs to work on long-term financing and related policy studies.*

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	8.6	13.6	13.9	\$488,086	\$609,105	\$643,453

## d. Legislative and Public Affairs

This unit maintains relationships with state and local government, monitors legislative activities, and releases information to the public.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	3.4	3.7	3.8	\$112,343	\$148,250	\$156,914

## II. PROGRAMS AND OPERATIONS

## Program Objectives and Description

The Programs and Operations functions include the development, implementation, and coordination of policies and procedures necessary to fulfill the goals established by the Board of Governors and the Chancellor.

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81

## a. Innovative Programs

This program provides grants and loans to community colleges engaged in projects of innovative and nontraditional methods of instruction as authorized by Chapter 714, Statutes of 1977. The program was initiated in the 1977-78 fiscal year as "instructional improvement project".

*In the current year one specialist has been transferred to Analytical Studies, and the other specialist position will be abolished July 1, 1980. The administrator of this element will borrow staff from other units to meet workload peaks.*

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	3.5	2.8	1.9	\$1,028,512	\$896,883	\$768,339

## b. Program Evaluation and Approval

This element concerns the approval of educational master plans and programs and guidance to community colleges in developing and implementing quality instructional programs to meet the wide range of needs of students throughout the State. The program includes occupational education projects and allocation of federal funds to districts in accordance with an interagency agreement with the State Department of Education, recipient of Federal Vocational Education Act funds.

*One specialist position has been transferred to Analytical Studies. To improve planning and evaluation of vocational education programs, the Department of Education has agreed to reimburse the Chancellor's Office for two professional positions plus \$60,000 of contract services; beginning in 1979-80, the annual expenditure level will be \$135,000 for this activity. Beginning in 1980-81 \$82,000 is proposed for partial support of the Academic Senate.*

<sup>1</sup> No expenditures; \$3,757 will revert to the General Fund.

BOARD OF GOVERNORS OF THE CALIFORNIA COMMUNITY COLLEGES—*Continued*

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	17.8	17.5	17.9	\$752,829	\$891,611	\$871,190

## c. (1) College Services

College services has two major functions: to plan and direct student personnel programs and to supervise the use of State and federal funds allocated to community colleges under Extended Opportunity Programs and Services (EOPS). As a result of the agency's reorganization, the allocations from subparts 2, 3, 4, and 5 of the Federal Vocational Education Act are also reviewed in this unit, in accordance with the interagency agreement with the State Department of Education.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	20.3	22	21.2	\$717,048	\$952,738	\$931,608

## c. (2) Extended Opportunity Programs and Services

California Community Colleges, because of their open-door policy and their geographic accessibility, draw a large proportion of students who need the special services of programs for the disadvantaged. These include community college EOPS and college opportunity grants, federally funded vocational education programs, work-study programs, educational opportunity grants, and locally-funded district programs for disadvantaged students.

Even though poverty is the outstanding problem of most disadvantaged students, grants alone are not the only solution. Campus-oriented services to students disadvantaged because of language, social, and cultural backgrounds are also important.

In order to meet these ends, the objectives of EOPS are:

1. To identify disadvantaged community college students and, with necessary financial aid and services, to help them acquire the training and education they need to succeed in college and later as productive employees.

2. To help disadvantaged students reach full potential and build persistence and grade-point averages sufficiently to enable them to compete equally with others for jobs or transfer to four-year institutions.

3. To add to leadership skills of campus EOPS staff through in-service training.

4. To assess requirements for State funding of campus EOPS and recommend funding levels, to process allocations and monitor programs for maximum efficiency.

5. To assist campuses in coordinating their EOPS with federally funded programs for disadvantaged students, with special emphasis on occupational education, to aid campuses in developing goals for EOPS projects, to evaluate strengths and weaknesses of such programs, to recommend on regulations, and to provide EOPS data to the Board of Governors, the Administration, and Legislature.

*In 1980-81, a \$1,057,297 augmentation will fund a ripple increase of 3,499 students to a new total of 67,890 students. An additional increase of \$1,666,691 will provide a 9 percent inflation factor for grants and services to students.*

Input	1978-79	1979-80	1980-81
EOPS Expenditures .....	\$17,389,919	\$20,472,092	\$23,196,080

Percent of total funds .....	2	1.9	1.8

## d. Facilities Planning

Facilities Planning maintains and annually updates the five-year capital outlay program for the 106 community colleges. The staff reviews plans and assists in programming and planning construction projects, reviews new campus site proposals and updates facilities inventories for all community colleges.

*In the current year the California Energy Commission has agreed to pay \$211,739 for developing and administering an energy auditor training program and to pay community college staff to teach the course in 16 colleges around the state. After training, the energy auditors will identify no-cost/low-cost methods of reducing energy usage in heating and lighting the 100,000 public buildings in California. During 1980-81, the California Energy Commission has committed \$221,872 for a specialist and a half-time typist to coordinate a training program and to pay community college instructors to train engineers in more sophisticated energy conservation methods and technology.*

*Effective July 1, 1980, one specialist position for review of new construction will be abolished pending further review of workload trends and resolution of current discussions on use of tideland oil revenues and state funding policy on district construction.*

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	10.7	9.1	8.9	\$405,917	\$514,464	\$517,628

## e. District Compliance and Affirmative Action

This program was started in the 1977-78 fiscal year within the former Administrative and Fiscal Services unit. The purpose is to provide guidelines to the community college districts for the development and implementation of policies and procedures to carry out affirmative action programs.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	1.4	1.3	1.4	\$52,045	\$51,772	\$54,022

# BOARD OF GOVERNORS OF THE CALIFORNIA COMMUNITY COLLEGES—Continued

## f. Fiscal Services

This element is mainly engaged in the administration of Community Colleges Apportionments. It was separated from the former Administrative and Fiscal Services unit as result of the agency's reorganization.

*Reimbursements from the Department of Education for \$20,000 of contract auditing services are proposed to assist districts in identifying and correcting problems of compliance with federal and state requirements for vocational education.*

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	10.1	11.4	11.7	\$302,412	\$393,457	\$405,255

## g. Budgeting and Accounting

The functions of this element include the preparation of the agency's budget, accountability of funds and administration of financial operations. These functions were included in the Administrative and Fiscal Services unit prior to the agency's reorganization.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	4.5	4.8	4.9	\$106,108	\$112,388	\$117,865

## h. Administrative Services

This element provides all necessary management and staff services for the Chancellor's Office. It was part of the Administrative and Fiscal Services unit prior to the reorganization.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	11.4	11.7	12	\$272,260	\$315,781	\$332,068

## i. Credentials Office

Administrators and teachers in California Community Colleges are required to obtain teaching credentials. The credentials office administers this program including application review, processing, revoking, and reinstatement of credentials. The fees collected are used only for the operating costs of this element. Due to inflationary increases in the cost of operations, the fee was raised from \$15 to \$20 per application, effective January 1, 1978. The credentials backlog project, funded by reimbursement from the Federal Public Works Employment Act of 1976, was terminated on June 30, 1979.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	21.5	12.7	12.7	\$446,832	\$416,809	\$389,220
Community Colleges Credentials Fund .....	21.5	12.7	12.7	347,493	416,809	389,220
Reimbursements.....	-	-	-	99,339	-	-

## j. Occupational Education

This program is conducted in accordance with an interagency agreement with the State Department of Education, recipient of Federal Vocational Education Act funds. The objectives are to plan, coordinate and service occupational and technical programs in the colleges and to administer allocations of federal funds to districts on an entitlement basis. As a result of the reorganization in the Chancellor's Office these functions are now carried out in the various related program units to enhance coordination. Positions and dollars are indicated as non-add figures to show the level of activity in occupational education.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	(26.7)	(29.1)	(29.1)	(\$1,238,173)	(\$1,323,052)	(\$1,339,737)

## k. Human Resources and Job Development

This element includes coordination of bilingual/bicultural activities and of job training programs sponsored by the Employment Development Department.

*Two specialists and a typist are proposed to coordinate increased community college participation in the CETA Program. Funding for this activity is reimbursed by the CETA Office in the Employment Development Department. In coordinating community college participation in the California Worksite Education and Training Act of 1979, it is proposed to add four specialists and a typist (reimbursed by EDD) to work closely with college staff, local prime sponsors, and staff of other state agencies to implement this multi-agency effort to reduce unemployment in California. This new State legislation is designed to complement the Federal Comprehensive Employment Training Act.*

*For 1980-81, it is proposed to add a specialist and a half-time typist to develop a program to eliminate biases about gender roles in vocational education and to assist community colleges in identifying and removing institutional barriers to full participation by women in all programs of the educational process. The \$53,516 cost of this activity will be reimbursed by the Department of Education.*

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	-	3.7	9.5	-	\$144,068	\$385,692

## l. Legislative Mandate

Chapter 1252, Statutes of 1976, exempts retroactively to January 1, 1976 certain nonresident students from tuition fees. The remaining balance of \$3,757 has not been expended and will revert to the General Fund.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures <sup>1</sup> .....	-	-	-	-	-	-

<sup>1</sup> No expenditures; \$3,757 will revert to General Fund.

BOARD OF GOVERNORS OF THE CALIFORNIA COMMUNITY COLLEGES—*Continued*

## III. COMMUNITY COLLEGE APPORTIONMENTS

## Apportionments of State Aid

This program includes the preparation of reports and the collection of a wide range of data from California Community Colleges for certification of the apportionments to be paid to each district. The largest apportionment of State funds is based on units of average daily attendance (ADA) of students in each community college district. An ADA in community colleges represents 525 hours of classroom or related instruction. Major State funding of community colleges is achieved through the transfer of funds from the General Fund to Section B of the State School Fund.

State aid for community colleges during 1978-79 was determined by SB 154 (Chapter 292, Statutes of 1978) "block grant" calculations which superseded the apportionment process established by SB 1641/76. The SB 154 process used target budgets for community college districts. The target budgets are the estimated revenues that would have been received by the districts if Proposition 13 had not been approved. State support of the target budgets was provided from \$535.3 million in apportionment funds and \$260 million from the General Fund surplus. The combined State aid in SB 154 in addition to property tax revenues and available district reserves allowed community college districts approximately 87 percent of their target budget revenues.

State aid for community colleges during 1979-80 and 1980-81 is determined by AB 8 (Chapter 282, Statutes of 1979) formula calculations which supersede the procedures established by Ch. 292/78 (SB 154). AB 8 substantially revises the procedures for funding community colleges. The new revenue levels of districts are determined primarily by formulas based on prior district revenues (1977-78 and 1978-79 fiscal years) and prior and current years' ADA (1977-78, 1978-79, and 1979-80 ADA). Baseline revenues are increased by a variable cost of living adjustment averaging 8.6 percent in 1979-80 which will tend to equalize revenues among college districts over time. Enrollment changes are funded at a marginal rate equal to two-thirds of the average statewide revenue per unit of average daily attendance. Special adjustments may be provided to individual districts by the "4% floor," "small district factor," "small college factor," and the "large district factor." No district in 1979-80 will receive revenues greater than 8 percent above its 1978-79 revenues plus its inflation and equalization adjustment and not more revenue per ADA than 15 percent above its 1978-79 revenues per ADA. No district in 1980-81 will receive less than its 1978-79 revenues plus 1 percent.

AB 8 appropriated \$976 million for the 1979-80 fiscal year and up to \$1062.8 million for the 1980-81 fiscal year.

## GENERAL ANALYSIS

There are 106 community colleges administered by 70 college districts serving the entire State of California from Eureka and Weed in the north to Chula Vista and Imperial in the south.

California's community colleges provide courses for students who will transfer to four-year institutions, training in vocations, general education and community services. Curricula and offerings are changed as required to be responsive to the needs of the community.

In prior years, money for state support of the Community College Capital Outlay Program came from voted bond issues 1965 through 1974-75 and the Capital Outlay Fund for Public Higher Education 1975-76 through 1979-80. Matching shares were raised by the districts through permissive taxes and local voted bonds or overrides. An effect of Proposition 13, approved by the electorate June 6, 1978, has been to virtually eliminate the ability of a district to raise its matching share of a project, and money to continue projects already begun has come from reserves or special legislation (Chapter 1266, Statutes of 1978). District funds for capital outlay are now generally exhausted. However, in view of existing State statutes, the request for limited State support of capital outlay for 1980-81 is being requested on the basis of the past practice of State and local shares.

Included in the 1980-81 budget are 28 districts with a total capital outlay program of \$16,821,700. This includes \$7,215,200 State and \$5,037,500 district funds based upon the traditional State and district matching basis. In recognition of the inability of some districts to raise their traditional matching share of a project as required by existing law, an additional appropriation of \$4,369,000 from the Capital Outlay Fund for Public Higher Education is proposed. The allocation of these funds is contingent upon the enactment of legislation which will be designed to amend the existing Community College Construction Act of 1967. The State participation for these projects will be on a varying percentage, based upon the ability of the districts to provide as much of the funds normally required for their matching share.

The 1980-81 Capital Outlay Program continues to meet the highest priority needs to protect the life and general safety, including the removal of the most critical architectural barriers to the physically handicapped for State-funded facilities; to make existing facilities operable, including equipment and necessary site development; to meet the most critical needs for instructional capacity space at existing campuses for general academic, science and vocational technology programs. It also includes an appropriation of \$200,000 to be directed to the development of a statewide energy conservation program for the Community Colleges. The funding for this program is contingent upon enactment of legislation establishing the Energy and Resources Fund in the State Treasury.

## MAJOR PROJECTS

Community Colleges, Systemwide .....	-	-	\$200,000
Energy conservation improvements, Step I .....	-	-	200,000 <sup>hP</sup>
This will provide funds for the preparation of planning documents, for various campuses within the system, to be allocated by the Chancellor's Office.			
Butte Community College District .....	-	-	18,600
Butte College .....			
Architectural barrier removal .....	-	-	18,600 <sup>gWC</sup>
This project will provide critically needed automatic door openers for the physically handicapped.			
Cabrillo Community College District .....	\$3,888 <sup>g</sup>	-	-

Compton Community College District .....	2,425,900 <sup>g</sup>	2,348,000 <sup>g</sup>	-
Contra Costa Community College District .....	-	-	46,500
Foothill-DeAnza Community College District .....	-	-	46,500
Foothill College			
Library addition .....	-	-	46,500 <sup>gW</sup>
This project will provide library study, stack, and processing areas, offices, a classroom, audio-visual service areas, and teaching laboratories for tutorial studies. Also includes the remodeling of 9,772 assignable square feet. The addition will contain 12,748 assignable feet.			
Gavilan Community College District .....	-	-	29,000
Gavilan College			
Handicapped and safety code compliance .....	-	-	29,000 <sup>gWC</sup>
This project will provide an elevator, critically needed automatic door openers, ramps, and modifications to restrooms, walkways, doors, and drinking fountains for the physically handicapped.			
Glendale Community College District .....	-	-	169,800
Glendale College			
Elevators for classroom, laboratory, and administration building and auditorium classrooms .....	-	-	169,800 <sup>gWC</sup>
This project will provide elevators for two buildings to meet the needs of the physically handicapped.			
Grossmont Community College District .....	1,066,500 <sup>g</sup>	242,500 <sup>g</sup>	-
Imperial Community College District .....	11,000 <sup>b</sup>	-	130,600
Imperial Valley College			
Removal of architectural handicapped barriers .....	-	-	130,600 <sup>gWC</sup>
This project will provide modifications of restrooms, showers, and drinking fountains, installation of automatic doors and handrails, and the resloping of walkways for the physically handicapped.			
Kern Community College District .....	83,300 <sup>g</sup>	109,900 <sup>g</sup>	131,800
Cerro Coso College			
Occupational laboratory building .....	-	-	115,300 <sup>gW</sup>
This project will provide offices and teaching laboratories for auto mechanics, small engines, welding, machine tool, general art, and ceramics. The building will contain 19,650 assignable square feet.			
Porterville College			
Remodel existing buildings .....	-	-	16,500 <sup>gE</sup>
This request will provide the initial and only phase of equipment for teaching laboratories for art, engineering, journalism, and photography. The remodeling will consist of 6,397 assignable square feet.			
Lassen Community College District .....	1,540,600 <sup>g</sup>	153,600 <sup>g</sup>	207,800
	54,500 <sup>a</sup>	-	-
Lassen College			
Remove architectural barriers .....	-	-	207,800 <sup>gWC</sup>
This project will provide ramps, drinking fountains, resloping of walks, and modifications to restrooms, doors, showers, and laboratory stations for the physically handicapped.			
Long Beach Community College District .....	-	-	1,917,600
Long Beach City College			
Architectural barrier removal .....	-	-	22,700 <sup>gWC</sup>
This project will provide chair lifts and ramps to meet the needs of the physically handicapped.			
Library addition (Liberal Arts Campus) .....	-	-	1,894,900 <sup>gWC</sup>
This project will provide library reading, study, stack, and processing areas, a television studio, media service areas, and offices. The addition will contain 37,124 assignable square feet.

## STUDENT AID COMMISSION

The Student Aid Commission, formerly known as the State Scholarship and Loan Commission, is composed of eleven members who are appointed by the Governor and confirmed by the Senate. Terms are for four years except for two student members whose terms are for two years.

Specific program responsibilities of the Commission include:

1. A grant program designed (a.) to enable needy students to attend the California college of their choice, (b.) to increase the availability of education in California colleges for disadvantaged students; and (c.) to provide grants for needy students to train in critical skilled occupations.
2. A fellowship program for needy graduate and professional students.
3. A college education aid program for needy children of law enforcement officers killed or permanently disabled in line of duty.
4. A grant program to prepare bilingual elementary and secondary classroom teachers.
5. A new program of guaranteeing federally reinsured loans to undergraduates, graduate, and professional students.

The Commission is also responsible for (1) collections under the State Guaranteed Loan Program, (2) providing grants for supervised clinical training to U.S. citizens who are graduates of foreign medical schools, (3) research to consolidate information on student aid, (4) a statewide program providing information dissemination about student financial aid, (5) reporting to the Legislature, the Governor, and postsecondary education institutions concerning certain aspects of student financial aid in California, and (6) developing with the segments a common application form for public funded student aid and approving institutional supplements.

Amount .....	\$445,000	\$500,000	\$500,000
Average .....	\$10,000	\$10,000	\$10,000

## I. CAL GRANT PROGRAM

## a. Scholarships

This program assists academically able, financially needy students to complete four years of college. It also assists students who wish to attend independent colleges but are not financially able to do so. The funds are distributed directly to schools in the names of the students.

The average State scholarship is estimated at \$1,441. The scholarships are coordinated with other awards, including Federal Basic Educational Opportunity Grants. Federal State Student Incentive Grant funds of \$6,691,448 are included in the budget.

Chapter 1270 Statutes of 1975, increased the number of new awards to a total of 14,900 and the maximum award from \$2,500 to \$2,700. Subsequently, Chapter 1215, Statutes of 1978, specified (1) a portion of additional federal money received for support of Cal Grant awards above the 1978-79 level be utilized to increase the maximum \$2,700 award commencing with 1979-80 and (2) annual review of the maximum award authorized commencing with the 1980-81 Governor's Budget. For 1980-81, a maximum Scholarship award amount of \$3,200 is proposed for both new winner and renewal recipients. In addition, funds are provided to adjust for increased educational costs and fees.

## b.(1) College Opportunity Grants

Over the years, the number of disadvantaged students in higher education has been disproportionately low. Cal Grant College Opportunity Grants program assists disadvantaged students who have a potential for college success and community leadership. Selection is made on the basis of need, grades, and student and school recommendations. Grants awarded include funds for tuition (after the first year) and living allowances (subsistence). Federal-State Student Incentive Grant funds of \$4,867,181 are included in the budget.

Chapter 343, Statutes of 1976, increased the number of college opportunity grants to provide 6,825 new grants annually with a maximum grant of \$3,600. Subsequently, Chapter 1215, Statutes of 1978, provided for (1) a specified portion of additional federal money received for support of Cal Grant awards above the 1978-79 level to be utilized to increase both the maximum amount of and number of College Opportunity Grant awards commencing with the 1979-80 fiscal year and (2) annual review of the maximum award authorized commencing with the 1980-81 Governor's Budget. For 1980-81, a maximum College Opportunity Grant award amount of \$4,100 (for new winner and renewal recipients) and an additional 170 new awards are proposed. In addition, funds are provided to adjust for increased educational costs and fees.

## (2) Student Opportunity and Access Program

Chapter 113, Statutes of 1978, authorized the Student Opportunity and Access Pilot Program (until June 30, 1983) to provide a minimum of five intersegmental pilot consortiums for purposes of increasing accessibility to postsecondary educational opportunities for financially disadvantaged high school students and to assist financially disadvantaged community college students to matriculate to four year institutions by (1) providing postsecondary educational information and (2) raising academic achievement levels. The first year of operation of the five intersegmental consortiums is 1979-80. For 1980-81, funds are proposed to continue support of this pilot program.

## (3) Student Financial Aid Training Program

The Student Financial Aid Training Program is a cooperative effort between the State and federal government to increase technical skills of student aid professionals on college campuses. Authorization has been provided for 1977-78, 1978-79 and 1979-80 pursuant to Section 28 of the respective budget acts. For 1980-81, this program is included in the Governor's Budget.

STUDENT AID COMMISSION—*Continued*

## c. Occupational Education and Training Grants

This Cal Grant program is designed to provide skilled workers for critical occupations by supplying postsecondary occupational education aid to needy and talented students. Grants up to \$2,000 for tuition and \$500 for related training costs may be awarded pursuant to Education Code Section 69542. Selection is made on the basis of need, grades, recommendation, and demonstrated skill. The budget includes Federal-State Student Incentive Grant funds of \$841,271.

Chapter 1215, Statutes of 1978, provides for (1) a specified portion of additional federal money received for support of Cal Grant awards above the 1978-79 level to be utilized to increase the number of Occupational Education and Training grants commencing with the 1979-80 fiscal year and (2) annual review of the maximum number of awards authorized commencing with the 1980-81 Governor's Budget. For 1980-81, an additional 37 new awards are proposed. Total award funding is at the level requested by the Commission.

## II. GRADUATE FELLOWSHIP PROGRAM

This program, established to assist needy graduate and professional students, emphasizes fields where there are manpower shortages. Chapter 375 Statutes of 1974 requires that consideration be given to academically able students who are disadvantaged and that the parents' income be a factor in determining need. As a result the program has been successful in identifying and assisting able students with financial need most of whom come from disadvantaged backgrounds. Fellowships are coordinated with awards made by colleges and private groups.

1978-79 Supplemental Language requested the Commission to develop a formula to determine loan assumption level of third and fourth year graduate students commencing with the 1979-80 fellowships awards with intent that any accrued savings be used to provide additional first and second year fellowship awards. For 1980-81, award funding is proposed at the 1979-80 level.

## STUDENT AID COMMISSION—Continued

## III. BILINGUAL TEACHER DEVELOPMENT GRANT PROGRAM

Chapter 978, Statutes 1976, provided funds for a bilingual teacher development program to be administered by the Student Aid Commission after consultation with the Commission for Teacher Preparation and Licensing. Grants may be used for tuition, fees, and are renewable for a total period not to exceed three academic years. The maximum grant is \$3,000 per academic year. This program was augmented in 1979-80 by \$762,800 (Budget Act of 1979-80, Item 318) to provide additional awards. For 1980-81, continuation of the legislatively authorized 1979-80 augmented funding level is proposed to provide support for a total of 466 awards.

A report, required by 1979-80 Supplemental Language, recommended that combining the Department of Education's Bilingual Teacher Corps Program and the Student Aid Commission's Bilingual Teacher Development Grant Program into a single program to be administered by the Student Aid Commission is feasible and desirable. Program consolidation would require legislative action.

## IV. LAW ENFORCEMENT PERSONNEL DEPENDENTS PROGRAM

This program provides college grants to needy dependent children of law enforcement officers killed or permanently disabled in the line of duty. Awards in amounts not to exceed \$1,500 per year cover the costs of tuition and living expenses. For 1980-81, an 0.2 managerial position administratively established in the current year for support of this program is proposed.

## V. SUPERVISED CLINICAL TRAINING PROGRAM

This program is designed to provide supervised clinical training to U.S. citizens who are graduates of foreign medical schools. Funds are awarded directly to public medical schools and, through students, to independent colleges' medical schools for students participating in clinical training programs. This program was modified by passage of Chapter 985 Statutes of 1976, to include the participation of independent colleges' medical schools and the number of grants was increased from 30 to 50. For 1980-81, an 0.2 managerial position administratively established in the current year for support of this program is proposed.

## VI. (a) GUARANTEED LOAN PROGRAM

The federal government has had direct control over the Guaranteed Loan Program since November 1967, leaving the State with the single responsibility of providing administrative services for collecting outstanding loans made before that date. Collection activities are performed by contract with a private collection agency and are funded from the reserve created by previous collections. For 1980-81 workload adjustments are included as requested by Commission.

## STUDENT AID COMMISSION—Continued

## VI. (b) STATE GUARANTEED STUDENT LOAN PROGRAM

Chapter 1201, Statutes of 1977, authorized the State Guaranteed Student Loan Program, a State guarantee agency for the Federal Guaranteed Student Loan Program pursuant to the Federal Education amendments of 1976. This program is funded entirely from available resources in the State Guaranteed Loan Reserve Fund including a \$2,000,000 General Fund loan made available for expenditure in fiscal years 1977-78, 1978-79 and 1979-80. This General fund loan (principal amount plus interest) is to be repaid by June 30, 1986.

An estimated \$100,000,000 in new student loan volume is anticipated to be guaranteed through this program in 1979-80, the first full year of operation of this program. For 1980-81, a conservative estimate of \$150,000,000 in new student loan volume is projected. Funds are proposed in 1980-81 to support the significant increase in student loan volume. The major increased cost is contract services for the processing of student loan applications. This cost is directly related to student loan volume. In addition, 6.8 new positions are proposed for support of this program.

## VII. STUDENT FINANCIAL AID INFORMATION PROGRAM

Chapter 1270, Statutes of 1975, assigned a new function to the Commission directing it to disseminate information about all institutional, state, and federal programs to potential applicants, with the primary focus on potential applicants with the greatest financial need. For 1980-81, existing funds will provide for continuation of a peer group counseling pilot project and visual aids development authorized in 1979-80.

## VIII. RESEARCH AND REPORT PROGRAM

a. The Research component furnishes the Governor, the Legislature and others with specific information and data on student aid. Primary areas of research involve the different types of student financial aid programs, educational opportunities for disadvantaged students, and patterns of payment of college costs.

b. The Report component collects and disseminates various data concerning student financial aid including reporting to the Legislature on or before January 1, 1978 and every two years thereafter, on the impact and effectiveness of state-funded programs. Reports will also be developed on the criteria utilized in distributing available student aid funds. In addition to the Legislature, this report will be made available to the Governor, postsecondary educational institutions, and the California Postsecondary Education Commission. For 1980-81, one Research Analyst position is proposed on workload basis.

## IX. ADMINISTRATION AND SUPPORT SERVICES

The departmental administration staff provides necessary services for all commission programs. Costs of administration are prorated among the programs. For 1980-81, workload adjustments are proposed and include an 0.2 consultant for purposes of studies relating to the common financial aid application form and single processor. In addition, the Commission anticipates producing a data processing feasibility study plan in 1979-80. Funding for DP implementation is not included in the 1980-81 budget and is contingent upon completion and approval of such plan.

## HIGHER EDUCATION STUDENT ASSISTANCE

The State of California plays a significant role in directing assistance to students who have the desire to continue their education beyond high school but who, without financial assistance, would find it difficult or impossible to continue. Through the State's many programs, which complement and supplement other resources, assistance is provided to students who attend private as well as public institutions at both graduate and undergraduate levels.

The various programs through which California provides higher education student assistance include:

### University of California:

Educational Opportunity Program  
Loans, including fee and tuition waivers  
Presidential Work-Study Program

### Board of Governors of the California Community Colleges:

Extended Opportunity Program and Services

### Board of Trustees of the State University and Colleges:

Educational Opportunity Program  
Fee and tuition waivers  
Work-Study Program

### Department of Veterans Affairs:

Educational Assistance Program

### Student Aid Commission:

State Scholarship Program  
College Opportunity Grant Program  
Graduate Fellowship Program  
Occupational Training Grant Program  
Bilingual Teacher Development Grants  
Educational Assistance to Dependents of Deceased or Disabled Peace Officers  
State Guaranteed Student Loan Program

In addition, the Federal Government is providing assistance for a variety of educational assistance programs in all segments of higher education, including private institutions.

Financial assistance is usually provided to individual students through "packages" of assistance, put together at the campus level. The Student Aid Commission and individual campuses coordinate awards to individual students to the extent possible to assure efficient utilization of funds. The assistance package is made up of a combination of grants, loans, work-study, and other aids appropriate to the individual's needs.

## PROGRAM HIGHLIGHTS

The State of California continues to make resources available that, when combined with federal, institutional and other funds, provide a balanced and diversified financial aid program to students. The 1978-79 Budget Act provided for a 13-member Student Financial Aid Policy Study Group for purposes of reviewing and making recommendations relative to student financial aid goals and policies in the State of California. A report by this group is to be presented to the Legislature, and the findings and recommendations of this group will presumably have a significant impact on the current student financial aid delivery system in California.

### *Cal Grant (a)—State Scholarships*

This component of the Cal Grant Program assists academically able, financially needy students to complete four years of college at institutions of their choice. Awards may be used for tuition and fees only.

### *Cal Grant (b)—College Opportunity Grants (COG)*

The College Opportunity Grant component of the Cal Grant Program is targeted to meet the needs of low-income disadvantaged students who have demonstrated a strong academic record while in high school. A subsistence allowance assists a COG student in meeting the costs of living away from home. A COG student who attended a community college may, in his or her last two years of undergraduate study, receive additional support for tuition costs at any accredited four-year college in California.

### *Cal Grant (c)—Occupational Education and Training Grants (OETG)*

Occupational Education and Training Grants are unique in that they assist students preparing for vocational or occupational careers. Awards are made to students electing public, private nonprofit and proprietary institutions. Students are enrolled in a wide variety of courses of study including, for example, such fields as surgical technician, correctional officer, and secretary.

### *Graduate Fellowships*

The Graduate Fellowship Program provides tuition grants for disadvantaged and talented graduate students. Students who are chosen as graduate fellows may use their fellowships at any accredited school in California.

### *Educational Opportunity Programs (EOP)*

While the State has emphasized freedom of student choice in its financial aid programs by leaving to the student the option of which institution to attend, the State has also provided assistance to students through institution-based programs. The various opportunity programs permit campuses of the three public segments and Hastings College of Law to recruit, counsel, and otherwise assist low-income disadvantaged students.

Prior to the 1960's, California's higher education systems served, in disproportionate numbers, a racially and economically stratified segment of the population. During the early part of the decade a nonminority student was twice as likely to become a college freshman as was a member of an ethnic minority.

Throughout the 1960's, individual colleges responded to this situation with localized programs for minority students. Special efforts were needed to finance these students admitted to colleges under special admittance standards, to integrate them into the campus, and to alleviate the deficiencies in educational preparation which precluded their regular admission. By 1968 both the university and the State university and colleges had begun substantial Educational Opportunity Programs, and in 1969 the Legislature formally authorized state-funded programs at CSUC (S.B. 1072, Chapter 1336) and the community colleges (S.B. 164, Chapter 1579).

Since 1969, minority enrollment in the public segments has increased significantly. This increase is not wholly attributable to EOP, and reductions in EOP funding would not necessarily result in proportionate declines in minority enrollments. Yet, Educational Opportunity Programs clearly have been major contributors to these changes.

HIGHER EDUCATION STUDENT ASSISTANCE—*Continued**State Guaranteed Student Loan Program*

Pursuant to Chapter 1201, Statutes of 1977, the Student Aid Commission has become the State student loan guarantee agency for federally reinsured student loans with no cost to the State. For 1979–80, the first full year of operation of this program, the Commission estimates \$100 million in new student loan volume will be guaranteed. For 1980–81, a conservative estimate of new student loan volume is \$150 million.

*Federal Programs*

In addition to the State and institutionally funded programs, California students also participate in the various Federal student aid programs. These programs play a significant role in extending educational opportunities to Californians. The Basic Educational Opportunity Grants (BEOG) provides assistance to financially needy students and has substantially increased the amounts of financial aid to Californians. All potentially eligible students applying for State financial aid are required to apply for BEOG. The amount of BEOG received is taken into account in "packaging" financial aid for the student. BEOG thus provides the State with the flexibility to allocate funds to more students or to increase the total financial aid package that a student receives.

## HIGHER EDUCATION STUDENT ASSISTANCE TABLE

The following table provides sources and amounts of financial assistance available to students attending postsecondary educational institutions in California for 1977–78 and 1978–79. This data is provided by the individual segments (except as noted) and represents their best estimates based on available data. It should be noted that student financial assistance programs are administered by a large number of agencies and institutions. Data contained in this table may not agree with other detailed reports depending upon data gathering techniques utilized.

# **YOUTH AND ADULT CORRECTIONAL AGENCY**

## DEPARTMENT OF CORRECTIONS

The principal objectives of the Department of Corrections are the control, care and treatment of men and women who have been convicted of serious crimes, or those admitted to the civil narcotic program, and committed to State correctional facilities. The department's objectives also include supervision of men and women who have been paroled from correctional facilities and returned to the community.

Headed by a director, the department is organized into five line divisions: Policy and Planning, Administration, Institutions, Human Services, and Parole and Community Services, with support of various staff service functions such as legislative liaison, personnel management and training, and public information. Within the Institutions Division and located throughout the State are 12 correctional institutions with three of these having reception centers.

Included within the budget are the separate entities of the Narcotic Addict Evaluation Authority, the Correctional Industries Commission, and the Board of Corrections.

67.7 personnel years will remain unfilled during 1979-80 in order to realize savings required by Section 27.2 of the 1979 Budget Act.

By Reorganization Plan No. 3, dated December 20, 1979, the Governor has proposed that a new agency be established to consolidate the State's youth and adult correctional programs. Three positions will be transferred from the Department of Corrections to partially staff the agency. The new agency will provide communication, coordination, and budget and policy direction for the Departments of Corrections and the Youth Authority and the Boards, Commissions, and Advisory Groups related thereto.

## SUMMARY OF PROGRAM REQUIREMENTS

## I. RECEPTION AND DIAGNOSIS PROGRAM

## Program Objectives and Description

A systematic method of intake, diagnosis, and classification recommendation is an integral part of the California correctional program. A personal history is compiled on each inmate, incorporating information principally from law enforcement agencies, courts, other correctional programs, the military, family, friends, and schools. This information is documented and used in diagnosing institutional custodial and program needs.

In addition to processing new commitments, 90-day diagnostic evaluations and 120-day evaluative reports on convicted offenders are provided to California courts at their request.

Reception centers are located at the California Medical Facility and California Institution for Men for male felon commitments, and the California Institution for Women for female felon commitments. Civilly committed narcotic addicts are received and processed at the California Rehabilitation Center.

To provide intake, diagnostic, counseling and supervision services for the increased number of commitments to the Department, a total of 5.2 positions are proposed for the reception centers at the California Institution for Men, California Medical Facility, and California Institution for Women.

To prepare and maintain inmate records for an increased number of felons committed to the Department, eight positions are proposed.

To comply with the Disparate Sentencing Review provisions of Penal Code Section 1170, Subsections D and F, a total of one position, reimbursed by the Board of Prison Terms, is proposed for the California Institution for Men and California Medical Facility to provide microfiche copying services.

## Authority

## II. INSTITUTION PROGRAM

## Program Objectives and Description

The Department of Corrections is required by statute to accept convicted felons and civilly committed nonfelon narcotic addicts from California courts when their sentence is imprisonment in a State correctional facility. It is the Department's responsibility to provide safe and secure detention facilities to protect society from further criminal activities and to provide necessary services such as feeding, clothing, medical care, and treatment programs, including academic and vocational education, and psychiatric and counseling services.

Gang-related violence among inmates has emerged as a significant factor in prison operations in the past few years. Rivalries drawn on ethnic lines, and attempts to control narcotic traffic, are the most notable factors. Group norms and loyalties prescribe violence for such things as unpaid debts, slights, or belonging to an opposing gang.

The Department of Corrections has taken steps to control gang activities through temporary lockdowns of institutions; segregation of gang-affiliated groups from the general population; establishment of protective housing and management control units; separate housing for known antagonists; and increased emphasis placed upon staff training to deal with violence and gangs.

Due to sentencing law changes within recent years, the Department is experiencing a dramatically increased intake of felons and decreased intake of civil addicts. Consequently, the Department began double-celling inmates during the 1978-79 fiscal year. To provide for the increased population, the Department is proposing an additional 175.6 positions for the necessary program and security services within state-operated and contractual institutions, local government and community facilities.

Due to unbudgeted population growth in 1979-80, supplemental funding in the amount of \$2,105,805 is proposed in a deficiency appropriation and 59.9 new positions were administratively established.

A deficiency in the amount of \$2,698,877 is proposed to fund claims for Workers Compensation which exceed the level budgeted for 1979-80.

<sup>4</sup> Direct cost includes case-carrying agents, unit supervisors, district administrators, and supporting clerical staff in field parole units.

## a. Security

California law requires that the Department of Corrections provide secure and safe facilities to house convicted felons and civilly committed nonfelon narcotic addicts for the term of their sentences. Inmates are housed in the appropriate units equipped with the degree of security needed, based on the inmate's escape risk, violence propensities, and history of assaultive behavior. Custodial personnel are assigned to posts and perform a variety of functions including supervision of inmates in housing units, dining areas, recreation areas, specialized security areas, and on work details.

There are special secure units in some institutions which house prison gang members and other violent prison offenders. These require additional staff for more intensive searches, supervision and general surveillance.

To reduce the problems within the special housing units at the Correctional Training Facility, and the California Institution for Women a total of 3.2 positions are proposed.

To enable the Department to effectively use existing resources to meet increased bed capacity and curtail the contraband smuggled into the institution, 8.5 positions and four new trailer dormitories are proposed for San Quentin's Minimum Work Crew Quarters and West Gate.

To adequately supervise an increasing inmate population within special housing units, 9.6 positions are proposed for San Quentin's North Block Management Control Unit.

To curb unauthorized inmate activities and provide for the safety of inmates and staff, 12.8 positions are proposed for the Correctional Training Facility-North housing and sallyport locations.

To provide safe and secure housing for an overcrowded inmate population that has special housing needs, 14.9 positions are proposed to operate four special security dormitories at the California Correctional Center.

To enable the Department to provide needed inmate, parolee, escape and discharge data to law enforcement agencies, 1.6 positions are proposed to operate a comprehensive 24-hour identification and information center at the California Medical Facility.

### Number of Beds in Special Housing Units During the 1979-80 Fiscal Year

	1978-79	1979-80	1980-81
Expenditures .....	\$100,044,766	\$111,171,950	\$124,817,712
Personnel years.....	4,281.1	4,221.9	4,360.1

## DEPARTMENT OF CORRECTIONS—Continued

## b. Inmate Support

The California correctional system has implemented rules, regulations, and practices which insure that inmates receive humane treatment and adequate support services, including food, clothing, housing, and medical care.

Input	1978-79	1979-80	1980-81
Expenditures .....	\$66,396,196	\$82,264,680	\$88,509,841
Personnel years .....	1,082	1,135.3	1,144.4

## b.1. Feeding

Three meals per day are served to the institution population, prepared by inmates on work assignment or participating in vocational programs under supervision of civil service instructors.

Each institution maintains communication with inmate representative groups regarding menu acceptability and quality of food.

Input	1978-79	1979-80	1980-81
Expenditures .....	\$18,660,238	\$22,019,789	\$24,119,410
Personnel years .....	180.5	192.5	192.7

## b.2. Clothing

Security considerations dictate that inmates wear distinctive clothing for easy identification both in the institution and outside in the event of escape.

The clothing operation provides clean and suitable clothing for the inmates appropriate to the climate at each institution and conducts vocational training in laundering and dry cleaning, sewing skills, and clothing distribution. Most of the basic clothing is made by Correctional Industries.

Input	1978-79	1979-80	1980-81
Expenditures .....	\$5,639,277	\$6,536,496	\$7,049,357
Personnel years .....	25.4	27.1	27.2

## b.3. Medical-Dental Services

The Department of Corrections maintains 503 medical-surgical beds and provides outpatient and inpatient care and treatment for nearly any medical-dental problem arising in the inmate population. The department's major surgical hospital is located at San Quentin. In addition, the hospitals at the California Men's Colony and California Medical Facility are used for medical and surgical referral patients. Outside medical facilities, as well as medical consultants, are utilized when required for highly specialized medical and surgical procedures.

## Medical

Output	1978-79	1979-80	1980-81
Total number of hospital or infirmary patients .....	8,251	8,532	8,712
Average daily sick line .....	1,096	1,221	1,256
Total complete physical examinations, inmates and staff .....	38,362	41,352	41,892
Total surgical operations .....	4,070	4,301	4,412

## Dental

Total surgery procedures .....	12,842	13,400	14,000
Total fillings .....	90,432	90,000	97,000
Total dentures, full and partial .....	4,439	4,500	4,900
Total repair of dentures .....	1,910	2,000	2,100
Total number of treatments .....	42,717	43,200	45,000
Total number of sittings .....	103,876	104,000	114,000

Input	1978-79	1979-80	1980-81
Expenditures .....	\$17,801,171	\$20,480,439	\$21,696,049
Personnel years .....	501.1	511.2	515.2

## b.4. Housekeeping

Housekeeping services provide the inmates with clean surroundings and personal care items to promote cleanliness and help instill improved personal habits. Most of the work is performed by inmates.

Input	1978-79	1979-80	1980-81
Expenditures .....	\$2,810,390	\$4,134,764	\$3,798,471
Personnel years .....	28.3	30.1	30.1

## DEPARTMENT OF CORRECTIONS—Continued

## b.5. Facilities Operations

Facilities operations include the furnishing of utilities, special repair projects, and maintenance. These functions are performed chiefly by inmates under the supervision of civil service trades foremen so they will gain meaningful experience and skill training to be useful after release.

To comply with wastewater discharge requirements, 2.2 positions are proposed at the California Correctional Center.

To abate pest control problems at the California Institution for Men and the California Institution for Women, one position is proposed by redirecting funds from Operating Expense and Equipment allocations.

Input	1978-79	1979-80	1980-81
Expenditures .....	\$21,485,120	\$29,093,192	\$31,846,554
Personnel years .....	346.7	374.4	379.2

## c. Treatment

The period of time an inmate is confined to a correctional facility provides an opportunity for attitude and behavior modification and personal development through the many rehabilitative programs available. These programs include psychiatric and counseling services, academic and vocational education, leisure-time activities, and religion and are designed to assure that treatment meets the needs of the individual inmates.

Input	1978-79	1979-80	1980-81
Expenditures .....	\$28,235,097	\$34,792,453	\$36,617,382
Personnel years .....	975.8	1,036.7	1,055.1

## c.1. Psychiatric Services

Many inmates committed to the Department suffer from serious emotional and mental problems which result in varying degrees of social disability. To aid in correcting such conditions, institutions utilize professional staff and programs, including psychiatric hospitalization for treatment of those with mental disorders. The major psychiatric program is provided at the California Medical Facility at Vacaville. In addition, the California Men's Colony at San Luis Obispo operates a psychiatric program to care for the increasing number of inmates in the system requiring treatment.

The California State Prison at San Quentin also provides limited but highly specialized psychiatric diagnostic and treatment services for the large number of high-security inmates at the institution.

A psychiatric staffing study assessing current and future program and staffing needs has been completed by the Department and submitted to the Joint Legislative Budget Committee. As a result of the study, the output data displayed below was changed. The Department is currently reviewing the needs suggested by this study. If appropriate, a proposal addressing these needs will be considered at a later date.

Output	1978-79	1979-80	1980-81
Daily average of patients receiving psychiatric hospital services .....	220	243	251
Total number of patient care days in psychiatric hospital program .....	31,511	35,049	35,893
Daily average number of patients receiving non-hospital psychiatric services .....	1,684	1,824	1,859
Total psychiatric examinations .....	19,628	20,485	20,885

Input	1978-79	1979-80	1980-81
Expenditures .....	\$5,497,695	\$7,023,080	\$7,285,594
Personnel years .....	182.5	200.7	203.6

## c.2. Counseling Services

Through their casework function counselors render a variety of services to the inmate, staff and others whose decisions or activities affect the inmate. All inmates are continuously evaluated by counseling staff as to their behavior, attitude, and progress in various programs. The counselor also continues to work with the inmate in preparation for his return to the community. The largest block of counselor time involves personal case contacts, report writing, and interviews for Board of Prison Terms hearings, parole field referral and administrative duties.

To maintain inmate records for an increased population, 4 positions and \$56,065 are proposed for the California Institution for Women and the Correctional Training Facility.

Output	1978-79	1979-80	1980-81
Number of inmate cases referred .....	27,727	29,047	30,500

Input	1978-79	1979-80	1980-81
Expenditures .....	\$9,851,222	\$12,226,567	\$12,868,566
Personnel years .....	459.9	474.4	483.8

## c.3. Academic Education

The average inmate committed to the Department has a tested grade placement slightly below the eighth grade level but many do not possess even the basic literacy. Academic education is provided on the premise that the inmate's earning potential is increased as is the inmate's awareness and understanding of his or her responsibilities and opportunities.

Primary emphasis is placed on providing the necessary services to eliminate illiteracy, better prepare inmates to function as adults and for on-the-job training entry, to achieve the eighth grade level, and to earn high school diplomas or equivalency certificates. College level courses are also available to qualified inmates.

To provide greater continuity within the academic instruction program for inmates, the Department is proposing to add one position at the California Correctional Institution by redirecting funds from operating expense and equipment allocations. This instruction was provided under contractual arrangements with the local school district during the 1978-79 fiscal year.

## DEPARTMENT OF CORRECTIONS—Continued

## Output

	1978-79	1979-80	1980-81
Average academic enrollment.....	6,015	6,200	6,300
Elementary diplomas/certificate.....	409	450	450
High school diplomas and equivalency certificates.....	1,047	1,100	1,100
Literacy certificate.....	295	350	350
Associate in arts/sciences.....	80	85	90
College courses completed.....	6,666	7,000	7,000
Number of college participants.....	1,500	1,550	1,600

## Input

Expenditures.....	\$5,388,005	\$6,723,676	\$7,155,325
Personnel years.....	113.3	129.6	132.8

## c.4. Vocational Education

Many inmates have unstable work records, few marketable skills, and little knowledge of how to use the skills they possess. To meet the need for vocational skills, training is conducted in 48 occupational areas, which provides approximately 2,500 work-training stations.

## Output

	1978-79	1979-80	1980-81
Average enrollment.....	2,300	2,300	2,400
Number of vocational training areas available.....	48	48	48
Number of vocational classes.....	125	120	128
Vocational certificates of achievement issued.....	2,125	2,150	2,200

## Input

Expenditures.....	\$5,668,397	\$6,707,518	\$7,106,151
Personnel years.....	165.2	177.8	179.5

## c.5. Leisure-Time Activities

Programs of physical fitness and leisure-time activities designed to improve an inmate's physical and emotional well-being are provided at all institutions. These activities occur mainly in the evenings and on weekends and holidays. Self-help activities in an institution, achieved principally through inmate activity groups, are another means of helping inmates use leisure time constructively.

## Input

	1978-79	1979-80	1980-81
Expenditures.....	\$954,604	\$1,053,663	\$1,115,926
Personnel years.....	23.6	23.2	24.3

## c.6. Religion

Full-time chaplains are located in each institution. They provide religious services for the major faiths, pastoral counseling, and coordination of the services rendered by visiting clergy representing many diverse faiths.

## Input

	1978-79	1979-80	1980-81
Expenditures.....	\$875,174	\$1,057,949	\$1,085,820
Personnel years.....	31.3	31	31.1

## d. Inmate Employment

Inmates have productive work assignments to minimize idle time and contribute toward the development of certain useful job skills. Inmate employment provides inmates with a source of limited income from Correctional Industries, conservation camp operations, or institution work assignments.

*In the budget year, \$269,500 is proposed to finance a 14.5 percent pay increase for inmates. This increase is consistent with previous practices.*

## Input

	1978-79	1979-80	1980-81
Correctional Industries:			
Expenditures.....	\$20,912,023	\$23,845,120	\$26,244,008
Personnel years.....	234.4	255.7	253.9
Work Projects—Cooperating Agencies:			
Expenditures.....	\$4,397,991	\$4,511,052	\$5,418,688

Expenditures.....	\$1,408,743	\$1,441,921	\$1,916,816
Totals, Inmate Employment:			
Expenditures.....	\$26,718,757	\$29,798,093	\$33,579,512
Personnel years.....	385.7	376	405.5

## d.1. Correctional Industries

The objectives of Correctional Industries are to provide constructive work for inmates to reduce idleness, improve work habits and skills of inmates to better prepare them for employment after release, and provide reduced cost of maintaining the prison system through the sale of products and services. There are 25 major industrial and seven agricultural enterprises operating at ten institutions. Financial support is through the Correctional Industries Revolving Fund, which is maintained by revenues from the sale of products and services provided to public agencies.

The average amount earned during the 1978-79 fiscal year was about \$334 per inmate.

*To adequately supervise and administratively support new and expanded factory operations 13.5 positions and \$337,244 are proposed.*

## Output

	1978-79	1979-80	1980-81
Average inmate population.....	21,412	23,760	25,040
Average number of inmates employed.....	2,230	2,300	2,350
Percentage of total population.....	10.4	9.7	9.4

## DEPARTMENT OF CORRECTIONS—Continued

## Input

	1978-79	1979-80	1980-81
Expenditures (Correctional Industries Revolving Fund) .....	\$20,912,023	\$23,845,120	\$26,244,008
Personnel years .....	234.4	255.7	253.9

## d.2. Work Projects—Cooperating Agencies

The increasing public use of State and federal natural resources has created a demand for available inmate labor to assist primarily in wildfire suppression and to perform allied forestry projects and maintain and protect the natural resources of the State. These work projects involve cooperation with both State and federal agencies. The conservation program consists of 14 Department of Forestry camps and 5 baseline camps operated by the Department of Corrections in conjunction with Department of Forestry.

To provide the supervision needed for the safe operation of camp programs with larger inmate populations, 14 positions and \$292,257 are proposed to add one staff member for each of the Sierra Conservation Center's fourteen outlying camp operations.

## Output

	1978-79	1979-80	1980-81
Hours worked in fire suppression .....	392,960	431,960	438,325
Regular project assignment hours .....	2,160,960	2,408,064	2,562,824
In-camp work project hours .....	229,712	230,000	231,000

## Input

Expenditures .....	\$4,397,991	\$4,511,052	\$5,418,688
Personnel years .....	151.3	120.3	151.6

## d.3. Work Assignment—Support

Operation of the various institutions provides many meaningful work assignments for inmates. Feeding, laundry, housekeeping, maintenance, hospital, grounds care, and similar tasks are performed by inmate workers supervised by civil service employees.

## Output

	1978-79	1979-80	1980-81
Total number of inmates in work assignments .....	9,726	9,906	10,500
Number of paid positions .....	7,241	7,764	7,764

## Input

Expenditures .....	\$1,408,743	\$1,441,921	\$1,916,816
--------------------	-------------	-------------	-------------

## e. Inmate Welfare Fund

The Inmate Welfare Fund (IWF) was created in 1945 as a special trust fund for the benefit, education, and welfare of the inmates. IWF is a self-supporting fund totally dependent upon its generated revenues. The largest IWF operations are the inmate canteens. While these are the major single source of revenue, income is also derived from photo projects, handicraft sales, and interest on invested surplus IWF and inmate trust funds. Income from IWF is used to provide certain inmate benefits such as the canteens, movie rentals and fiction library books.

To maintain a continuing level of service for an increased population, four positions are proposed for canteen operations at four locations.

## Output

	1978-79	1979-80	1980-81
Purchase for inmate benefits .....	\$182,981	\$198,127	\$194,838
Inmates employed by inmate welfare fund .....	375	345	345

## Input

Expenditures .....	\$6,087,183	\$6,951,539	\$7,137,052
Personnel years .....	44.1	43	46.9
Resources .....	\$7,692,888	\$8,419,543	\$8,512,655

## DEPARTMENT OF CORRECTIONS—Continued

## f. Institution Operations—Administration

Effective administrative leadership, guidance, and support are essential to administer and coordinate all institution program activities. To assure the efficient utilization of available resources, it is imperative that institutions are operated within the framework of departmental goals at the most reasonable cost to the State.

To make necessary services available to employees and provide employment for inmates, with no cost to the General Fund, the Department has assumed employee service operations at locations where no appropriate organization exists. In doing so, 12.1 positions are proposed for the Department's twelve institutions, funded through reimbursements.

To provide support and administrative services for the Department's inmates who are assigned to the Department of Forestry's camp operations and for county inmates temporarily assigned to the Department for medical treatment, 5.4 positions are proposed for the Sierra Conservation Center and the California Medical Facility, funded through reimbursements.

Input	1978-79	1979-80	1980-81
Expenditures .....	\$20,369,854	\$18,698,966	\$20,221,142
Personnel years .....	368.1	393.8	399.3

## g. Inmate Benefits

Commencing with January 1, 1977, and pursuant to Labor Code Sections 3370 and 3371 and Penal Code Section 5069, the Department has been required to provide workers' compensation benefits to inmates injured while performing assigned work in departmental institutions. Included in the program, is the cost to maintain proper records, provide medical care and other related costs. In accordance with Chapter 1149/77 (SB 224) qualified inmates are eligible for unemployment benefits upon release.

Input	1978-79	1979-80	1980-81
Expenditures .....	\$1,213,492	\$2,779,000	\$2,018,300

## h. Narcotic Addict Evaluation Authority

The Narcotic Evaluation Authority consists of four part-time board members.

When a male or female addict in the Civil Addict Program shows significant progress as a result of treatment and demonstrates the potential to abstain from narcotic drug use, the superintendent of the California Rehabilitation Center, where such commitments are confined, certifies this progress to the Narcotic Addict Evaluation Authority for release consideration.

In addition, the Authority considers the cases of outpatients who violate their conditions of release and determines whether these individuals should be returned to inpatient status for further treatment. A revocation hearing is held as soon as possible after an outpatient's return to the California Rehabilitation Center.

Output	1978-79	1979-80	1980-81
Narcotic Addict Evaluation Authority:			
Institution cases heard .....	3,615	2,724	2,071
Outpatient revocation cases heard .....	8,345	7,124	6,055
Final discharge hearings .....	492	410	349
Revocation hearings conducted .....	290	251	199
Oral orders granted not included in total .....	1,535	1,288	1,096
Totals, Cases Heard .....	12,742	10,509	8,674

Input	1978-79	1979-80	1980-81
Expenditures .....	\$143,020	\$198,653	\$206,749
Personnel years .....	5.6	5.8	5.8

## III. COMMUNITY CORRECTIONAL PROGRAM

## Program Objectives and Description

The primary objective of the Community Correctional Program, consistent with the public's safety, is to increase the rate and degree of successful transitions of adult offenders released to the jurisdiction of the Parole and Community Services Division. This is done by providing supportive services and controls, and by enlisting community understanding and assistance.

Chapter 582/79 (SB 1057) which became effective January 1, 1979, lengthens parole supervision up to three years (formerly one year) for inmates released from determinate sentences, and up to five years (formerly three years) for inmates released from life terms. Reconfinement cannot exceed 12 months. The California Supreme Court has ruled that SB 1057 cannot be applied retroactively and that such legislation applies only to those persons paroled on or after January 1, 1979. As a result, approximately 2,300 felon parolees were discharged from supervision between October 22, 1979 and December 31, 1979. Projections indicate that beginning January 1, 1980, parole population will then begin to rise and continue the trend through the 1980/81 fiscal year.

In contrast, the non-felon (civil addict) population has continued to decline; i.e. from July 1, 1978 and June 30, 1979, the non-felon population dropped from 5,217 to 4,406 (15.5%).

## Authority

## a. Supervision—Case Services

The primary objective of this element, consistent with the public's safety, is to increase the rate and degree of successful transitions by adult offenders under jurisdiction of the Parole and Community Services Division through providing effective supervision and case services.

The element is composed of five components which are: (1) felon supervision for male and female felons with parole agents supervising caseloads averaging 50 cases; (2) nonfelon supervision for male and female civil addicts with parole agents supervising caseloads averaging 32 cases, including cases within 60 days of institutional release and cases where the addicts have been returned for short-term treatment; (3) work furlough supervision for male and female inmates released shortly before established parole dates, with parole agents supervising caseloads averaging 35 cases; (4) Interstate Unit supervision for other states' parolees in California, and California parolees in other states; and (5) field administration to provide administrative leadership, guidance, direction, and technical and clerical support.

Effective May 1, 1979, the Parole and Community Services Division implemented a major revision in its method of supervising paroled felons and narcotic addict outpatients. The new model of parole supervision resulted from a three-year comprehensive examination, conducted by the Parole and Community Services Division of its policies, programs, procedures and organizational structure. The new model of parole is part of a continuing attempt to improve the overall effectiveness of the parole process. Basic to the new model of parole is differential supervision. Selected parolees will be provided supervision with a control emphasis intended to prevent, detect or interrupt criminal behavior. Other parolees will be provided supervision with a services emphasis intended to help parolees adjust to life in the community. Parolees considered to pose little or no risks to the community will receive minimum supervision. As a parolee's situation changes, reclassification from one level of supervision to another is initiated.

To adequately supervise an increased parole population, a net seventeen positions were administratively established in the current year, and a total of 48 positions are proposed in 1980-81 for the four regional offices.

To help coordinate the Department's efforts in placing inmates within community pre-release centers, local jails and federal prison facilities, 7 positions and \$170,665 are proposed.

## a.1 Felon Supervision

	1978-79	1979-80	1980-81

Expenditures .....	\$6,991,236	\$8,789,671	\$9,366,035
Personnel years .....	291.1	274.6	292.5

## b. Community Correctional Centers

The primary objective of the Community Correctional Centers is to increase the probability of successful parole outcome. The Centers provide residence in a controlled environment. The Centers also provide counseling, employment and education for selected inmates and parolees committed to the Department of Corrections. Because parolees and inmates without adequate resources are prone to become involved in new criminal activities, the Community Correctional Centers provide a heavily structured supervision program for a short period of time following release from prison, or in lieu of return to prison.

## DEPARTMENT OF CORRECTIONS—Continued

Expenditures.....	\$921,724	\$764,084	\$790,420
Personnel years.....	29.6	18.4	18.4

## c. Psychiatric Outpatient Services

The objective of Psychiatric Outpatient Services is to reduce the occurrence of psychiatrically related incidents among suspected or identified psychiatrically disturbed offenders by diagnosing psychiatric problems and providing appropriate treatment services.

Following institutional psychiatric treatment, inmates with a history of aggravated assaultive crimes and/or serious sex offenses are often required to participate in additional psychiatric treatment while on parole. Over 95 percent of parolees receiving psychiatric treatment do so pursuant to a special condition of parole imposed by the parole boards.

Required psychiatric services are supplemented by additional diagnostic and psychiatric services for parolees who require them because of occasional serious mental health problems which may or may not be associated with new criminal acts. It is estimated that approximately 15 to 20 percent of the parole population requires these services.

## Output

	1978-79	1979-80	1980-81
Patient average daily population.....	1,226	1,185	1,094

Expenditures.....	\$1,089,403	\$1,298,144	\$1,329,068
Personnel years.....	22.8	26.4	26.7

## d. Special Narcotic Services

Successful parole programming requires the implementation of the most effective techniques to detect and deter the use of opiates by parolees and thereby reduce their incidence of readdiction. Urinalysis, routine physical examinations, and methadone maintenance are used to deter and/or detect opiate and controlled substance abuse.

Urinalysis testing of parolees with histories of controlled substance abuse and other drug addiction is performed by a contract laboratory. The parole division has shortened the response time on negative test results through the use of enzyme multiplying immuno assays (EMIT). The division operates two EMIT machines, one in Los Angeles and one in Sacramento.

Approximately 1,000 parolees participate in methadone maintenance programs conducted by public or private agencies and organizations. The Department closed its state-operated Central Testing Clinic in Los Angeles, effective June 30, 1979. However, through the use of grant funds three private methadone clinics are continuing to provide methadone maintenance services.

To continue the EMIT process, the Department proposes the redirection of 3.2 positions to Special Narcotic Services from Work Furlough Supervision.

## Output

	1978-79	1979-80	1980-81
Number of addicts supervised.....	6,988	6,513	6,163

Personnel years.....	92.7	46.1	46

## DEPARTMENT OF CORRECTIONS—Continued

## IV. ADMINISTRATION

## Program Objectives and Description

The Department of Corrections, in order to successfully achieve the responsibilities charged to it by California law, operates with an administrative organization consisting of the office of the director, five line divisions, and several staff services functions.

The director and chief deputy director have overall administrative and program responsibility. The administrative assistant coordinates the day-to-day activities of the office of the director.

The Institutions Division is responsible for all field operations including institutions, classification, medical, education, records, and related program services.

The Administration Division is responsible for the business affairs of the department including budgeting, feeding, construction, and maintenance, and advises the director on the status of fiscal affairs.

The Policy and Planning Division is responsible for research and statistics, and guidance and assistance in planning, development, and operation of departmental programs.

The Human Services Division is responsible for all personnel matters of the department, including human relations and training.

The Parole and Community Services Division is responsible for the parole supervision program, but is not an organizational unit of the Administration program.

The staff services functions include public information, legislative liaison, human relations, and personnel management and training. These offices are responsible for providing advice and counsel to the director and line administrators in their specialty areas.

With the enactment of the Determinate Sentencing Law and reporting requirements associated thereto, adjustments that were not previously anticipated were required in the development of the Corrections Decision Information System (CDIS). A one-year extension of the development period was provided with 17 positions and \$362,322 during 1979-80. These positions will be abolished on June 30, 1980.

To give adequate health care to inmates and manage the Department's current health treatment resources, 3.0 positions are proposed to continue a health care planning unit that had only temporary authorization.

To provide security at the new headquarters building location in downtown Sacramento, 1.5 positions are proposed.

To adequately develop and oversee the Department's major and minor capital outlay, special repairs, and maintenance programs, 1.0 position is proposed, funded from operating expense and equipment allocations.

Seven positions are deleted from the Department's budget and transferred to the Board of Prison Terms. The Department was previously reimbursed by the Board for services relating to the Disparate Sentence Review process.

Two positions are deleted from the Dept. of Corrections budget and transferred to the Department of the Youth Authority to meet training needs. Due to the consolidation of training programs at the Corrections' Southern Training Center, the Department of the Youth Authority has elected to provide its own training.

To continue the Department's grant funded programs, 45.8 positions are reflected for the 1979/80 fiscal year with 44.8 positions proposed for the 1980/81 fiscal year. All costs are fully reimbursed by grants awarded to the Department.

On July 1, 1978 a total of 13.6 positions were abolished in accordance with Section 20 of the Budget Act. Most of these positions had been vacant for reasons such as recruiting or classification problems, and disability leave. Several of the positions were filled at the time, and most are needed due to increased inmate population. In order to alleviate these problems 11.6 positions were administratively established in the current year, and are proposed for continuation in 1980-81.

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81

Reimbursements .....				4,324,988	4,376,449	5,167,789

V. SPECIAL ITEMS OF EXPENSE<sup>1</sup>

## Program Objectives and Description

California law provides for the reimbursement to local jurisdictions for expenditures incurred in providing services related to persons who have been committed to the Department of Corrections. Counties are entitled to reimbursement for the following four principal types of expenditures: (1) transportation of prisoners and parole violators; (2) returning fugitives from justice; (3) court costs and county charges; and (4) detaining State parolees. Special appropriation items provide the funds.

The amount counties may charge for detention of parolees has been altered by several factors: (1) charges may be made for first day only as opposed to first and last day; (2) no charges will be allowed when the parolee has been arrested on a new criminal charge; and (3) the costs of detention shall include the same cost factors as are utilized by the Department of Corrections in determining the cost of prisoner care in state correctional facilities, as provided by Chapter 1136/79 (AB 1088).

For the purpose of improving the performance of local corrections and probation officers Chapter 1148/79 (SB 924) requires the Board of Corrections to adopt rules establishing minimum standards for the recruitment, selection and training of all local corrections and probation officers. The legislation also establishes a Corrections Training Fund, which is funded until July 1, 1982, with 15% of the penalty assessments collected for traffic offenses, to provide state aid in the form of grants to any county or city which adheres to the selection and training standards established by the Board.

Three distinct functional areas of responsibility can be identified within the mandates of Chapter 1148: (1) operations functions; (2) assistance to cities and counties; and (3) administration of the program.

The operations function will conduct detailed research analyses of tasks associated with all local corrections and probation positions, establish recruitment and selection standards, establish training standards, and coordinate efforts to increase effectiveness by stimulating the development of education and training courses to meet identified needs.

Assistance to cities and counties will be provided to encourage and assist local corrections and probation agencies to comply with the minimum selection and training standards. Each local jurisdiction participating in the program will be reimbursed from the Corrections Training Fund in proportion to the number of corrections or probation officers trained and to the extent funds are available.

The administrative function will provide direction and control over the local assistance program so that the overall objective may be realized in the most efficient and economical manner possible. This function will include close supervision of training to maintain quality control, certifying training attendance and completion, processing local government claims for payment, and establishing equivalencies for training requirements.

## Summary of Population and Rated Capacity

Additional beds made available by conversion of departmental space to temporary usable housing or the contracting with other jurisdictions are reflected in the capacity tables. Only the physical design capacity will be shown. The additional staff capacity necessitated by the current overcrowding of facilities is not reflected in this table.

<sup>1</sup> Capacity increased by 85 to reflect temporary housing during the period of overcrowding.<sup>2</sup> Capacity includes raising each departmental camp quota to 80, and contracting with Los Angeles County for two camps of 80 each.<sup>3</sup> The inmate population increase necessitates the placement of felons at the California Rehabilitation Center. Also, the Department is involved in Community/Contracted Housing to alleviate overcrowding conditions within existing facilities.

## DEPARTMENTAL ADMINISTRATION

The Department of Corrections, headquartered in Sacramento, operates a system of 12 separate institutions. These institutions have a total bed capacity of nearly 24,000 and total acreage of nearly 10,500. During 1980-81 the Department will continue to emphasize sanitation and sewage facilities improvement to meet environmental and health requirements. Funds are budgeted for conversion of existing housing units at San Quentin and Deuel Vocational Institution to meet the Department's special housing needs. Other projects include security and control projects, water system improvements, electrical system modification, and the other physical plant improvements common to a major institutional program. Chapter 789, Statutes of 1978 (Senate Bill 1342) appropriates \$7.6 million for preliminary planning for maximum security facilities, the razing of San Quentin and possibly Folsom, renovating five facilities, site evaluation and expansion of community placement. Chapter 1135, Statutes of 1979 (Senate Bill 196) appropriates \$11,474,300 to the Department of Corrections, of which \$9,000,000 is for continued planning for new institutions, site acquisition, and the first phase of a series of projects necessary to accommodate the serious level of overcrowding. The balance is to repair inmate caused damage at the California Correctional Center, Susanville, and to provide curbs, sidewalks, gutters and storm drains at the California Institution for Men, Chino. In the current year, the Department will be contracting with other governmental jurisdictions to provide additional bed capacity that is available and suitable. Since the Department of Corrections is experiencing continued institutional population growth, it is imperative to move ahead with the process of planning and constructing new prisons to meet this need. This budget appropriates \$100 million for the construction and equipping of new facilities. In addition, \$20 million is proposed for rehabilitation and expansion of existing facilities to accommodate the increasing inmate population. Specifics for both appropriations will be provided to the legislature.

## BOARD OF PRISON TERMS

## Program Objectives and Description

The Community Release Board was established with the enactment of Chapter 1139/76 (SB 42), July 1, 1977. Subsequently its name was changed to the Board of Prison Terms effective January 1, 1980 with the enactment of Chapter 255/79 (SB 281). The Board considers parole release and establishes the length and conditions of parole for all persons sentenced to prison under the Indeterminate Sentence Law, persons sentenced to prison for a term of less than life under Penal Code section 1168 (b), and for persons serving a sentence for life with possibility of parole. The Board also reviews the sentences of all determinately sentenced (DSL) prisoners and may recommend to the court that the sentence be recalled and the prisoner resentenced.

The Board may suspend or revoke the parole of any prisoner who has violated parole. The Board determines the necessity for rescission or postponement of parole dates for persons sentenced to prison for life, persons sentenced under Penal Code section 1168, and persons sentenced to prison under the Indeterminate Sentence Law. The Board may waive parole for any prisoner and may discharge any prisoner prior to the expiration of the statutory maximum parole period. Upon request of persons determinately sentenced, the Board reviews the length and conditions of parole imposed by the Department of Corrections and the Department's denial of good time credit, and may modify the Department's decision. The Board also advises the Governor on applications for clemency.

The Board is composed of nine members appointed by the Governor and confirmed by the Senate for terms of four years each. The terms are staggered and members are eligible for reappointment. A chairperson of the Board is designated by the Governor.

Hearing representatives are employed by the Board in civil service positions. Their duties include hearing and deciding cases.

An executive officer is appointed by the Board, who is responsible for the ongoing operation of the Board in accordance with Board policies. Other civil service staff include management, investigative, stenographic and clerical personnel to facilitate the performance of the Board of Prison Terms duties. The Board of Prison Terms maintains its headquarters in Sacramento.

Beginning with Fiscal Year 1978-79 the Board of Prison Terms has been displayed as a separate budget, reflecting its autonomous relationship to the Department of Corrections. Seven positions were transferred from Corrections in the current year to establish a *Data Processing and Management Information System* which provides a review of variant sentences and conducts studies of judicial sentencing patterns. The budget year provides a temporary help blanket of 0.7 person years for workload relief when Board Hearing Representatives are injured or disabled.

By Reorganization Plan No. 3, dated December 20, 1979, the Governor has proposed that a new agency be established to consolidate the State's youth and adult correctional programs. The new agency will provide communication, coordination, and budget and policy direction between the Governor and the Departments of Corrections and the Youth Authority and the Boards, Commissions, and Advisory Groups related thereto pursuant to Chapter 1252, Statutes of 1977 (SB 363).

## YOUTHFUL OFFENDER PAROLE BOARD

The Youthful Offender Parole Board is mandated by statutes to make decisions as to persons committed to the Department of the Youth Authority. These decisions involve setting a date for the person's next appearance before the Board; the person's readiness for return to the community on parole; conditions relating to the person's conduct on parole; violation and revocation of parole; return to the committing court for redispotion by the court; and discharge of the person from jurisdiction of the Youth Authority.

Chapter 860, Statutes of 1979 separated the Youth Authority Board from the Department of the Youth Authority and renamed the Board to the Youthful Offender Parole Board. The separation from the Department of the Youth Authority was effective January 1, 1980. The transfer was achieved without any change in policy or program. Support services for the Board, such as budgeting, accounting, personnel, business services, etc., will continue to be provided by the Department of the Youth Authority. The 1978-79 fiscal year expenditures for the Board and those for the first half of the 1979-80 fiscal year are reported and included in the Department of the Youth Authority budget, but for comparative purposes are shown in this budget in parenthesis.

The objectives of the Youthful Offender Parole Board are:

1. To protect the public.
2. To assure the rehabilitation of the youthful offender.

By Reorganization Plan No. 3, dated December 20, 1979, the Governor has proposed that a new agency be established to consolidate the State's youth and adult correctional programs. The new agency will provide communication, coordination, and budget and policy direction between the Governor and the Departments of Corrections and the Youth Authority and the Boards, Commissions, and Advisory Groups related thereto pursuant to Chapter 1252, Statutes of 1977 (SB 363).

### Authority:

Welfare and Institutions Code, Article 2.5 (commencing with Section 1716).

U.S. Supreme Court decisions *Morrissey vs. Brewer* and *Gagnon vs. Scarpelli* and California Supreme Court decisions *In re: Valrie*, *In re: LaCroix*, and *Gee vs. Brown* which afford due process protection for Youth Authority wards.

### Percentage of Wards to Total Population Designated Full Board and Special Service

<i>As of</i>	<i>Full Board</i>	<i>Special Service</i>
June 30, 1973 .....	16.4%	9.9%
June 30, 1974 .....	19.3%	10.6%
June 30, 1975 .....	24.3%	13.7%
June 30, 1976 .....	25.7%	15.2%
June 30, 1977 .....	30.7%	17.9%
June 30, 1978 .....	40.0%	20.5%
June 30, 1979 .....	46.2%	15.3%

The full Board (three-Board-member panel) is hearing an increasing percentage of cases. There is a growing percentage of parole cases which require intensive supervision.

## DEPARTMENT OF THE YOUTH AUTHORITY

The primary objective of the Youth Authority is "to protect society more effectively by substituting for retributive punishment, methods of training and treatment directed toward the correction and rehabilitation of young persons found guilty of public offenses." The Department carries out this mandate to protect the public by: (1) providing residential and community rehabilitation programs which will help persons committed to the Youth Authority to become useful and productive citizens, and (2) accumulating a body of knowledge relative to the causes of delinquency and the treatment and control of those who engage in illegal behavior.

The mission of the Department of the Youth Authority is to protect society from criminal and delinquent behavior by children and youth.

24.4 positions will remain unfilled during 1979-80 in order to realize savings required by Section 27.2 of the 1979 Budget Act.

## Goals

Youth Development: *Increase opportunities for all children and youth* to participate as contributing members of society.

Delinquency Reduction: *Reduce probability of illegal behavior* by children and youth not yet involved in the justice system, but who have exhibited antisocial characteristics.

Offender Rehabilitation: *Reduce continuing illegal behavior* by offenders.

Research: *Systematically develop knowledge* about delinquency reduction, youth development, and offender rehabilitation.

The Department is organized into five branches: Institutions and Camps; Parole Services; Prevention and Community Corrections; Planning, Research, Evaluation and Development; and Management Services. Programs are managed by the branches under direction of the Director of the Youth Authority.

*By Reorganization Plan No. 3, dated December 20, 1979, the Governor has proposed that a new agency be established to consolidate the State's youth and adult correctional programs. One position will be transferred from the Department of the Youth Authority to partially staff the agency. The new agency will provide communication, coordination, and budget and policy direction between the Governor and the Departments of Corrections and the Youth Authority and the Boards, Commissions, and Advisory Groups related thereto pursuant to Chapter 1252, Statutes of 1977 (SB 363).*

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

## I. PREVENTION AND COMMUNITY CORRECTIONS

## Program Objectives and Description

The objective of the prevention and community corrections program is to enable local communities to reduce the incidence and severity of delinquent and criminal behavior.

The prevention and community corrections program works with county probation and other governmental and private agencies and organizations concerned with corrections, juvenile law enforcement, and delinquency prevention on the local level. The major responsibilities of this program include standard setting, technical and financial assistance, and consultation. These responsibilities are divided into three major program areas: financial aid; information; and juvenile detention facilities regulation.

c. Juvenile Detention Facilities Regulation .....	18.5	18.5	17.6	866,017	1,022,408	1,000,665

## a. Financial Aid

The financial aid program administers funding for the maintenance, operation, and construction of juvenile homes, ranches, and camps, special probation supervision programs and delinquency prevention programs of public and private agencies. These programs attempt to reduce the occurrence of delinquency and/or to strengthen local community resources in such a way as to reduce the number of cases penetrating into the criminal justice system.

Forty counties are subsidized up to \$1,000 of the administrative expenses of each county delinquency prevention commission. In addition, matching funds are used for demonstration delinquency prevention projects sponsored by local communities.

This budget provides for six positions including two positions redirected from the Youth Training School. These positions will be funded from the statewide County Justice System Subvention Program. These positions have been added to provide technical assistance and consultation, to monitor local programs, and to prepare the required legislative reports. This budget also provides a cost-of-living increase of \$5,232,356 (9 percent) for the County Justice System Subvention Program.

DEPARTMENT OF THE YOUTH AUTHORITY—*Continued*

## b. Information

The information program provides training and develops and disseminates information about crime, delinquency, administration of programs and the problems of youth, to individuals and public and private agencies. The Department's efforts have resulted in increased activities on the part of delinquency prevention commissions, juvenile justice commissions and other citizens, groups concerned with delinquency prevention.

Expenditures.....	26.7	26.4	25.4	\$1,248,640	\$1,474,126	\$1,442,776

## c. Juvenile Detention Facilities Regulation

## Output

The Department has statutory responsibility to develop standards for: Juvenile halls; the confinement of minors in jails, camps, ranches, and schools; probation duties; county justice system subvention program; and other community-based prevention and correctional programs. In conjunction with these standards, the Department is required to inspect and evaluate programs to be certain that they are meeting minimum standards and delivering effective services. In addition, consultation and technical assistance are provided to local components of the criminal justice system by disseminating and explaining standards, encouraging the development of crime and delinquency prevention projects, and assisting communities to develop new and improved correctional programs.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	18.5	18.5	17.6	\$866,017	\$1,022,408	\$1,000,665

## II. INSTITUTIONS AND CAMPS

## Program Objective and Description

The objective of this program is to reduce the incidence and severity of delinquent and criminal behavior of juveniles and youthful offenders under Youth Authority jurisdiction in institutions. This is achieved by:

1. Accurately evaluating referrals and commitments.
2. Providing appropriate care, custody and treatment programs consistent with ward needs and civil rights.

## Trends—Youth Authority Population:

1. Ethnic group composition of wards first committed to the Youth Authority has undergone a significant change in recent years. In 1970, minority group members constituted 45 percent of Youth Authority's commitments. In 1977, 61 percent of the total first commitments were from minority groups. Present trends indicate minorities will increase to 65 percent of the YA population in 1984.

2. Commitments for serious crimes have been increasing. For example, males with a first commitment offense in the category of "offenses against persons" now comprise 42 percent as compared to 15.5 percent of the total male commitments in 1965. This figure is projected to increase to 45 percent in 1984.

3. Since 1965, the juvenile court-criminal court "mix" of first commitments to the Youth Authority has shifted significantly. Criminal court commitments have increased as a percentage of the total. The 1965 ratio was 75.1 percent juvenile and 24.9 percent criminal court commitments. The 1978 ratio was 58 percent juvenile and 42 percent criminal court cases. 1984 projections indicate juvenile court commitments will increase to 60 percent.

4. The age of youths first commitments to the Youth Authority is increasing. The median age of all wards committed in 1965 was 16.9 years while in 1978 it was 17.4 years. The median age of those housed in Youth Authority facilities has increased. The median age on June 30, 1965 was 17.6 while on June 30, 1978 it was 18.5.

5. There has been a marked increase in violent behavior by Youth Authority wards in institutions. A comparison of 1965-66 to 1978-79 shows attacks on staff up from 24 to 101 and attacks by wards on other wards up from 22 to 468.

6. First commitments to the Youth Authority have decreased from 6,190 in 1965 to 3,788 in 1978. The number of more serious offenders has increased length of stay, from an average of 9.4 months in 1965 to 11.3 months in 1978.

Youth Authority institution populations for 1977-78 through 1979-80 fiscal years are shown in the table entitled Statement of Population—Institution.

## a. Case Planning

Case planning within the Youth Authority operates to assist wards in their eventual reintegration into the community by evaluating and assessing ward needs and assisting wards to obtain appropriate programming which prepares them for their release. The case planning process begins at the time a youthful offender is first referred to the Department and continues throughout his institutional stay, culminating in reentry planning at the time of release. There are four programs included within the case planning category. These are: case services; need determination; goal setting and evaluation; and reentry planning.

## DEPARTMENT OF THE YOUTH AUTHORITY—Continued

## b. Program Operations

Program operations has responsibility for the routine day-to-day operations of institutions and camps, and providing wards with appropriate care and opportunities for rehabilitation. In keeping with the Department's mandate for and commitment to rehabilitation, each ward is assigned to programs based on his/her individualized needs.

A wide range of rehabilitative services are made available to wards including counseling, therapy, academic education, vocational training, work experience, religious services, and recreational and cultural activities. In addition, wards are provided a nutritious, well-balanced diet, appropriate clothing, personal care items and medical and dental care as needed. There are seven programs in the program operations category. They are: counseling and therapy; education; vocational training; work experience; personal and social development; feeding and personal care; and medical services. The Youth Authority has identified wards who need psychiatric treatment services. These emotionally disturbed, often violent, youth create severe problems for the treatment programs in which they are placed and jeopardize the safety of staff and wards. The Youth Authority presently has 115 beds providing psychiatric services and 105 specialized counseling beds.

Currently the medical/psychiatric program at the Southern Reception Center and Clinic is funded on a contractual basis between the Department of Mental Health, which contributes approximately two thirds, and the Youth Authority which contributes approximately one third. Each year contractual problems have arisen. This budget transfers \$709,000 from the Department of Mental Health to simplify the funding process, reduce unnecessary paperwork, remove restrictions limiting the number of out-of-county cases to be placed in the program, and provide for consistency in the funding of medical/psychiatric programs within the Youth Authority.

Included in this budget is \$100,000 for replacement of outdated vocational education equipment to help bring the Youth Authority's vocational education program up to current industry standards.

This budget contains 2.4 positions and \$62,800 that are justified for educational services at El Paso de Robles School by existing staffing formulas and were erroneously omitted from the Department's 1979-80 Budget request. In addition the positions at the Youth Training School were reduced by 2.5 person years to provide support services for the County Justice System Subvention Program. Institutions have filled their vacant units and in some institutions there are units that are chronically overcrowded. The characteristics of the wards have changed—wards are more criminally sophisticated, show a higher incidence of violent behavior, and are more likely to be involved in violent prison gang activity. To help relieve these security problems at various locations, this budget provides an additional 6.8 positions and \$151,500.

Based on current population projections, the Department projects a need for an additional 149 beds in the budget year. The Department plans to implement new regulations on the acceptance criteria as related to each ward's amenability to treatment and rehabilitation. It is estimated that at least 100 cases per year will be rejected for acceptance and commitment. This budget also reflects conversion of one living unit at Ventura from a reception program to a regular institution program. This will create an additional 49 beds. The increase in available beds will require 4.6 positions and \$117,000 to be added to the Youth Authority budget.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	1,538.9	1,581.7	1,581.8	\$42,602,616	\$50,817,843	\$51,983,909

## c. Custody and Surveillance

The custody and surveillance program has responsibility for maintaining appropriate security in all institutions and camps. Security measures include perimeter fencing, interior and exterior lighting, personal alarm security systems, ward movement accountability, security sound systems, periodic shakedowns of the grounds and wards for contraband, electronic screening devices, temporary detention of wards who are in need of immediate confinement, and a special transportation unit to transport wards. There are three programs in the custody and surveillance category. They are: institutional security; detention; and transportation. Additionally, \$455,500 was provided in the department's 1979-80 Capital Outlay Program for security renovation projects at various institutions. These projects presently underway consist of upgrading and renovating the security sound/alarm systems at various institutions.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	812.5	835.1	835.7	\$22,529,849	\$26,874,260	\$27,519,613

## d. Facilities Safety and Maintenance

Facilities safety and maintenance is a support function designed to increase the efficiency and effectiveness of all institutions and camps programs. This budget provides one-time funds in the amount of \$735,000 to provide for special repairs and maintenance of physical plant.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	394.1	405	405.3	\$10,910,191	\$13,014,046	\$13,327,069

## f. Program and Management Support

Program and management support is a support function designed to increase the efficiency and effectiveness of all institutions and camps programs.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81

## III. PAROLE SERVICES

## Program Objectives and Description

The objective of this program is to protect the public from further criminal activity by Youth Authority wards and to increase the likelihood of their successful reintegration into the community. The major activities of the Parole Services Program are individual and community assessment on new commitments, supervision and surveillance of wards after release on parole, intervention to prevent violation behavior, taking corrective actions when necessary, liaison with community agencies, the operation of two residential programs, the purchase or contracting of services for wards on parole, and administering the interstate compacts.

Youth Authority parole caseloads for 1978-79 through 1980-81 fiscal years are shown in the table entitled Statement of Parole Caseload.

## DEPARTMENT OF THE YOUTH AUTHORITY—Continued

c. Interstate Services .....	6.8	7	7	183,236	208,601	205,900

## a. Ward Program Services

The ward program services program has primary responsibility for assisting wards in making a successful reintegration back into the community after their institutional release. Beginning at the time of commitment, ward program service works with wards until their discharge from parole. As soon as a ward is accepted for commitment to the Youth Authority, the local parole office is sent the case file, the parole agent makes a visit to the ward's family, and prepares a community assessment report for use by clinic staff in the diagnostic process.

For the first 90 days after a ward is released, intensive reentry services are provided. The parole agent has frequent contact with the ward and provides needed brokerage with community agencies. Direct and brokerage services continue to be offered after the reentry period, however, the level and intensity gradually diminishes as the ward becomes increasingly self-sufficient.

Parolees with medical, psychiatric, vocational, educational and personal needs can be provided financial help if other resources are not available and if such assistance is required to implement a parole plan or to assure a successful reintegration into the community. *This budget contains one additional position funded by savings in operating expenses to provide required maintenance at Park Centre.*

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures .....	194.2	190	181.4	\$7,098,055	\$8,080,646	\$7,976,006

## b. Public Protective Services

The emphasis of this program is the protection of the public from further criminal behavior by Youth Authority parolees. This is accomplished through preventive actions which focus on solving problems before a law violation occurs and corrective actions which focus on ward accountability after a violation has occurred. The activities of the violation process include investigations, searches, possible arrest (or detention if already under arrest by another agency), probable cause/detention hearings and violation/disposition hearings. *This budget provides \$203,000 to fund fifty percent of a gang violence reduction project to work with gangs in the East Los Angeles area. The remaining fifty percent of the funds is to be provided by a local entity. The parole services component of the project adds 8.6 positions, and one position is added in the research component of the budget to provide project evaluation. The intent of this project is to reduce the incidence of gang related violence and gang related homicides in the target area. The program has been in operation since November, 1976 under federal funding which will terminate in June, 1980. The project has shown some reduction of homicides and violent crimes and a continued reduction could result in a monetary savings to state and local government.*

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures .....	226	221	223.8	\$8,259,688	\$9,508,823	\$9,845,944

## c. Interstate Services

The interstate services program is a specialized parole unit that has responsibility for administration of interstate compacts on juveniles and adults which provides for prior notification of possible parole releases among the various states, investigation of plans and mutual arrangements for supervision, reporting and return of violators.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures .....	6.8	7	7	\$183,236	\$208,601	\$205,900

DEPARTMENT OF THE YOUTH AUTHORITY—*Continued*

## IV. PLANNING, RESEARCH, EVALUATION AND DEVELOPMENT

## Program Objectives and Description

The objective of this program is to enhance effective policy and program decision making on the part of Youth Authority managers.

The main services provided by this program are:

1. Planning and program analysis and evaluation
2. Research
3. Obtaining grant funding

## Authority

Welfare and Institutions Code.

The Division of Research has two major areas of responsibility. One is the operation of the departmental information system, and a second is to provide research services to ongoing programs and to special demonstration projects.

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81
Continuing program costs.....	70.5	62.3	65.4	\$1,804,757	\$2,299,388	\$2,389,508

Federal funds .....				60,170	266,717	266,717
Reimbursements .....				317,355	71,558	59,650

## Program Elements

a. Planning and Program Assessment .....	24.7	23.6	22.4	\$632,774	\$814,627	\$844,743
b. Research and Management Information .....	36.8	35.7	35.8	942,783	1,213,807	1,285,980
c. Program and Resources Development .....	9	8	8.1	229,200	295,087	305,996

## a. Planning and Program Assessment

The planning and program assessment program has responsibility for designing and managing an effective planning process, conducting analysis of problems, issues, and proposed program changes, and maintaining and monitoring the departmental plan. Also, this program is responsible for conducting short-term program and policy reviews and recommending whether such programs should be terminated or continued and facilitating the development of monitoring and evaluation systems for all programs operated by the Department.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	24.7	23.6	22.4	\$632,774	\$814,627	\$844,743

## b. Research and Management Information

The research and management information program has responsibility for conducting research in eight major program areas. These are prevention, diversion, community corrections, education, institutional management special treatment programs, residential re-entry, and parole. Additionally, this program operates the Offender Based Institutional Tracking System (OBITS) which contains information on the characteristics, movement, and performance of CYA wards.

*This budget adds 1.5 positions including 0.5 position redirected from the Youth Training School. These positions will assist in the research related to the statewide County Justice System Subvention Program. This budget also provides an additional position for continued research and evaluation of the gang violence reduction project. As discussed in parole services, the project works with gangs in the East Los Angeles area in an attempt to reduce the number of gang related incidences of homicide and violent crimes.*

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	36.8	35.7	35.8	\$942,783	\$1,213,807	\$1,285,980

## c. Program and Resources Development

The program and resources development program is responsible for obtaining resources from external funding for new projects and for monitoring and coordinating all grant projects which are funded.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	9	8	8.1	\$229,220	\$295,087	\$305,996

## V. YOUTH AUTHORITY BOARD

## Program Objectives and Description

The Youth Authority Board was mandated by statutes to make decisions as to persons committed to the Youth Authority. These decisions involve setting a date for the person's next appearance before the Board; the person's readiness for return to the community on parole; conditions relating to the person's conduct on parole; violation and revocation of parole; return to the committing court for redispotion by the court; and discharge of the person from jurisdiction of the Youth Authority.

*Chapter 860, Statutes of 1979 (AB 1421) abolishes the Youth Authority Board within the Department of the Youth Authority and establishes the Youthful Offender Parole Board as a separate entity effective January 1, 1980. Effective this date 41.7 positions and associated costs are transferred to the new board. This budget reflects funding of the former Board for six months in the current year.*

## VI. ADMINISTRATION

## Program Objectives and Description

All of the Department's operational and program areas require overall leadership, coordination, and administrative support to assist in reaching the Department's objectives, which are to:

1. Provide leadership and coordination for departmental programs.
2. Ensure the most efficient and effective use of the available manpower and resources.
3. Provide administrative, business, and other services necessary for the efficient operation of the Department's programs.

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81
Continuing program costs.....	197.9	192.2	206.5	\$6,289,029	\$7,336,390	\$9,020,421

## Program Elements

a. Executive .....	23.5	22.7	23.9	\$745,250	\$873,247	\$1,085,218
b. Support services .....	174.4	169.1	181.6	5,543,779	6,494,929	8,064,603

## a. Executive

The Director of the Youth Authority is the chief administrative officer of the Department.

The Office of the Director, including the Chief Deputy Director, combines with the Branch Deputy Director to constitute the central administrative core within which the responsibility for all major policy determinations, program planning, and evaluation is centered.

The Director personally carries the responsibility for coordinating policy and procedure between the program operation arms of the Department and the case decision making authority of the Youthful Offender Parole Board. A mutually supportive relationship between these two entities is essential to the effective operation of both.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	23.5	22.7	23.9	\$745,250	\$873,247	\$1,085,218

## b. Support Services

General administrative services are provided to support the various program operations of the Youth Authority. Staff services for fiscal management, management analysis, data processing, facility construction and maintenance, safety, food and nutrition, and business services are provided by the Administrative Services Division. Staff services for personnel and training are provided by the Division of Personnel Management and the Division of Training.

Population management is a chronic and serious problem for all correctional organizations. Shifts in the size and type of the institutional population are very difficult to deal with. Based on conservative estimates for the next five years, the Youth Authority must develop and implement plans for an additional 800 wards over present bed capacity by 1983-84. *This budget provides four positions and \$160,000 to establish a unit whose primary function is to develop and implement alternative solutions for the population problem.*

## Output

All of the support services are performed at the request of managers involved in the program areas. There are few output measures other than the relationship of administrative costs compared to total program costs.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81

## INSTITUTIONAL REVIEW BOARD

The Institutional Review Board was established by Chapter 1250, Statutes of 1977 to review and grant approval of behavioral and biomedical research projects involving the participation of prison inmates in the research. The Board consists of seven members, one member is an inmate representative. The Board members receive no compensation but are reimbursed for reasonable expenses incurred in the performance of their duties.

The Board has the responsibility to promulgate rules and regulations for the effective administration of the law; promulgate rules and regulations regarding grievances concerning the operation of any particular research program; evaluate the impact of research on human subjects approved and conducted in accordance with the law, including any adverse reactions, and; make biannual reports to the Legislature containing a review of each research program which has been approved and conducted.

Staff support was initially provided by the Department of Corrections. However, two new positions and a separate budget are proposed for 1980-81 in order to avoid the potential for conflict of interest since the Board is charged with review of Correctional programs.

By Reorganization Plan No. 3, dated December 20, 1979, the Governor has proposed that a new agency be established to consolidate the State's youth and adult correctional programs. The new agency will provide communication, coordination, and budget and policy direction between the Governor and the Departments of Corrections and the Youth Authority and the Boards, Commissions, and Advisory Groups related thereto pursuant to Chapter 1252, Statutes of 1977 (SB 363).

# GENERAL GOVERNMENT

# FAIR POLITICAL PRACTICES COMMISSION

## Program Objectives and Description

The Fair Political Practices Commission has primary responsibility for the impartial, effective administration and implementation of the Political Reform Act of 1974. To fulfill this responsibility the Commission adopts, amends and rescinds rules and regulations to carry out the purposes and provisions of the act; issues opinions to persons who request them with duties under the act; prescribes forms for reports, statements, notices, and other documents under the act; prepares and publishes manuals and instructions to facilitate compliance with and enforcement of the act; explains the duties of persons and committees under the act; provides assistance to agencies and public officials in administering the provisions of the act; investigates possible violations of the act; conducts hearings and applies sanctions provided by the act; provides technical assistance to State and local agencies in the preparation of conflict of interest codes; reviews and approves the codes of State agencies, county boards of supervisors, city councils, and all local government agencies with jurisdiction in more than one county.

## POLITICAL REFORM ACT OF 1974

## General Description

Chapter 10, Statutes of 1976, requires the Department of Finance, in preparing the State budget and the Budget Bill submitted to the Legislature, to include in the budget item dealing with the support of the Political Reform Act of 1974 (Proposition Nine): (1) the additional amounts to be appropriated to other agencies to carry out their duties under the act, which amounts shall be in augmentation of the support items of such agencies; (2) the additional amounts required to be appropriated by the Legislature to the Fair Political Practices Commission to carry out its duties; and (3) in parentheses, for informational purposes to show the continuing appropriation of \$1,000,000 adjusted for cost-of-living changes made to the Commission by the Political Reform Act during each fiscal year.

The Political Reform Act detail for each affected agency will be found under their respective program budgets as identified in the following table. In the current year, support for the Political Reform Audits Division of the Franchise Tax Board has been reduced \$752,569 pursuant to Section 27.2, Budget Act of 1979. In addition, support for the Political Reform Audits Division has been reduced \$637,686 in the current year and \$1,245,871 in the budget year to reflect the impact of Chapter 1411, Statutes of 1978, which provides for random audits and increases the statute of limitation from two years to four years.

### AGRICULTURAL LABOR RELATIONS BOARD

The objective of the Agricultural Labor Relations Board (ALRB), which was created by the Agricultural Labor Relations Act of 1975 (Chapter 1), is to ensure peace in the agricultural fields of California by bringing stability in labor relations through the guarantee of secret ballot elections to determine collective bargaining representation and the identification and elimination of unfair labor practices by employers and unions. The ALRB is patterned after the National Labor Relations Board and is divided into two major programs: (1) Board Administration of the Agricultural Labor Relations Act, and (2) General Counsel Administration of the Agricultural Labor Relations Act.

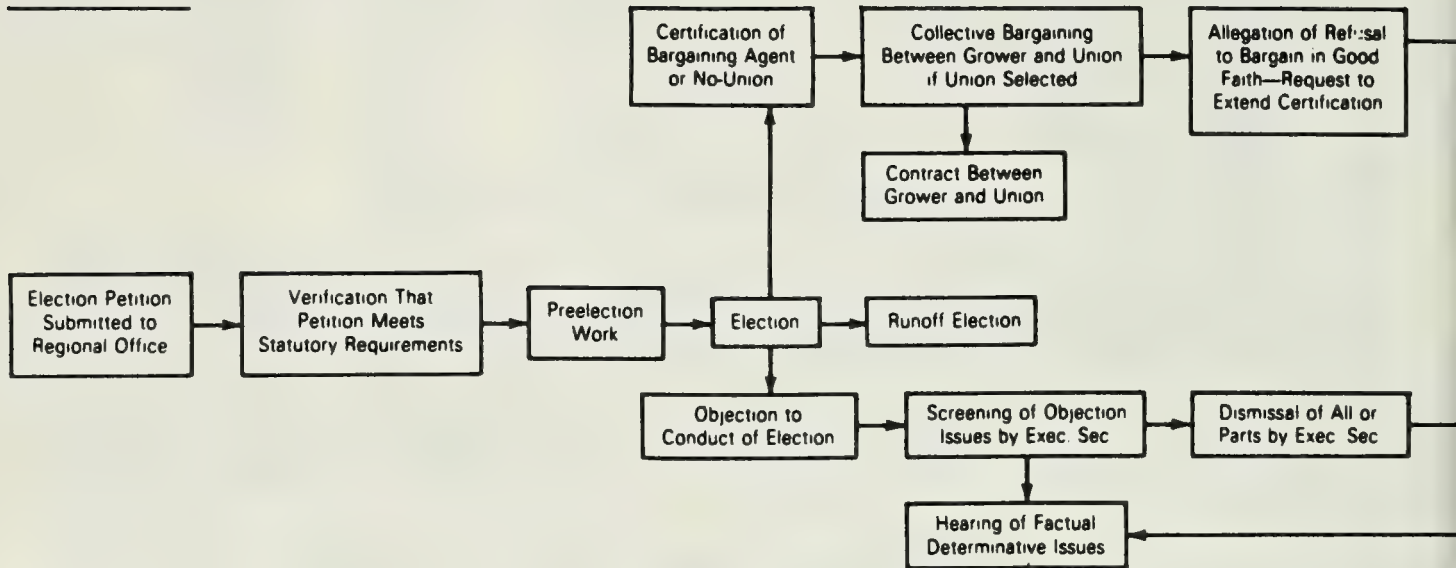

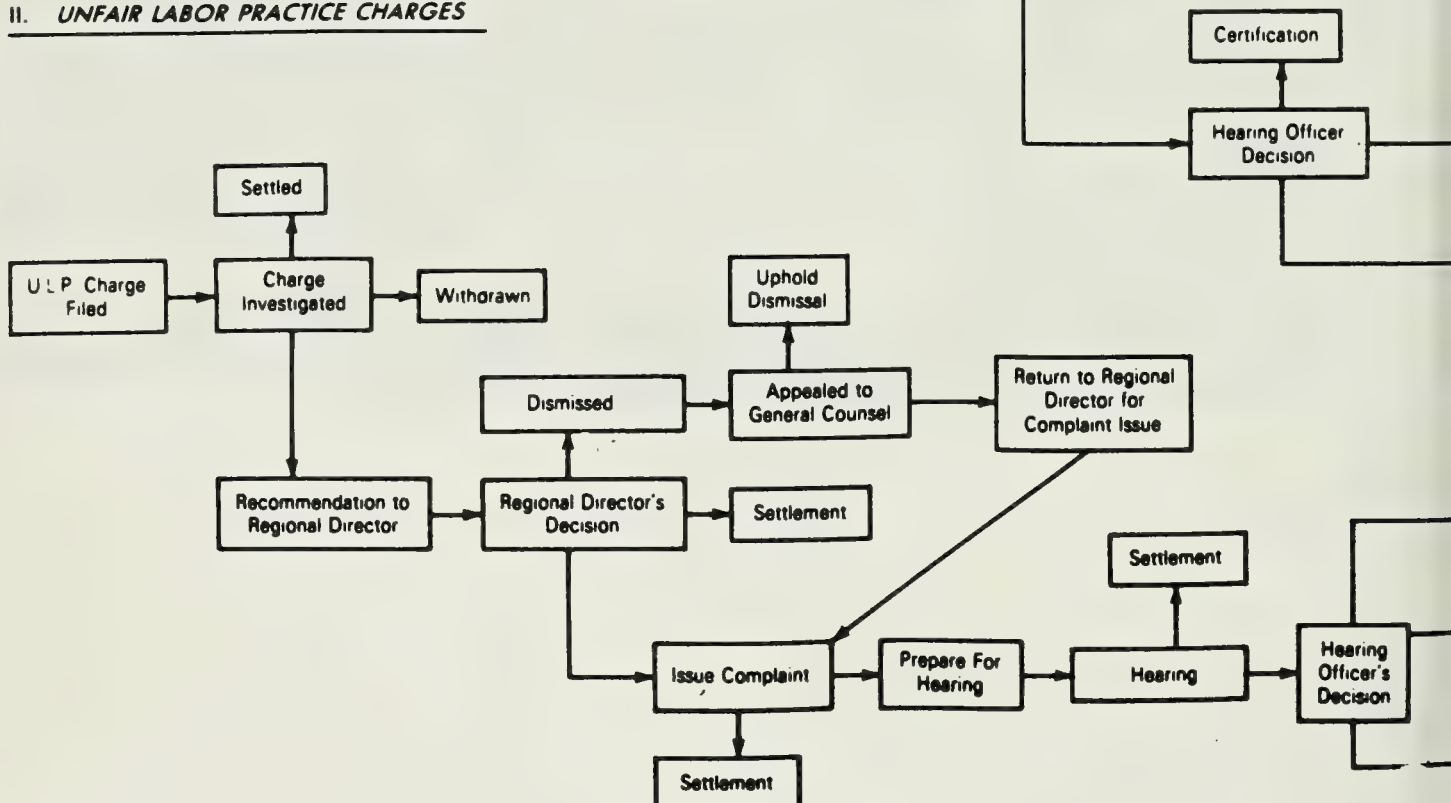

Due to lack of precedent in the area of agricultural labor relations and the higher than anticipated number of elections and unfair labor practice charges, the 1975-76 budget of \$1.3 million was insufficient. The only other similar program, the National Labor Relations Board, held 35 elections its first year while the ALRB held 429 its first five months of operation. Objections to elections were initially estimated at 30 percent, whereas over 80 percent of the elections had objections filed. An emergency loan of \$1,250,000 allowed the board to continue full operation only until February 6, 1976, at which time the regional offices were closed and most of the staff laid off. An additional \$130,000 emergency fund allocation was provided to allow the board to close down in an orderly manner. On April 1, all remaining funds were expended or committed and with no additional funds available, the last few staff members were laid off and the board ceased all functions. Due to the unanticipated cessation of activities and to assure orderly operation in 1976-77, the board had a staged start-up and did not begin full operation until December 1976. Therefore, the first full fiscal year of operation of the ALRB was 1977-78.

Since almost all work of the ALRB is reactive and dependent upon the number of representation petitions and unfair labor practice charges filed, the number of elections objected to, the willingness of parties to settle unfair labor practice charges and complaints, the number of hearings necessary, and the number of appeals to the board from these hearings, and since in almost all cases the board has no discretion but to respond to these requests for elections, objections, changes, requests for hearings, and appeals, workload cannot as yet be projected with the accuracy desirable. Until such time as some experience has been gained by both the ALRB and the farm workers, growers, and unions, the demands upon the agency may vary considerably from what is projected. Exhibit I on the following page provides a graphic display of the Board's operation.

## I. BOARD ADMINISTRATION

## Program Objectives and Description

The objective of the Board Administration program is to ensure that all parties concerned with agricultural labor are guaranteed their full rights under the Agricultural Labor Relations Act (ALRA) and other applicable statutes. To accomplish this, the five-member board establishes policies and procedures for all activities related to the conduct of elections, the identification and resolution of unfair labor practices, and the conduct of hearings on elections and unfair labor practices. It also conducts and/or reviews these hearings on elections, determines whether the results of such elections should be certified, and adjudicates complaints issued in unfair labor practices.

The State of California has over 250,000 farm workers working either permanently or intermittently on approximately 60,000 farms, 30,000 of which employ 50 or more people at some time of the year. The initial years of implementation of the ALRA will see a large continuing education process of all aspects and effects of the ALRA on the part of the Board, unions, growers, farm workers, and the general public. This educational process will focus on the areas of public involvement in determining the policy and procedures, as well as on the review of the conduct of elections and complaints of unfair labor practices. Until a body of decision in these areas is established to adequately define what does and does not constitute unfair labor practices and proper elections, a large volume of cases can be expected.

Reimbursements .....	-	-	-	10,365	-	-

## Program Elements

a. Policies and procedures .....	2.9	3.6	4.6	\$134,788	\$170,495	\$181,594
b. Hearings and board review .....	53.1	62.4	62.4	2,457,293	3,108,247	3,310,603

## a. Policies and Procedures

Board Administration is responsible for the overall policy direction of the agency. This involves the conduct of public meetings at which policy regarding the organization and operations of the agency is discussed and decisions made. Such policy decisions require input from the general counsel, executive secretary, chief of administration, the Board's own legal staff, and comments from growers, labor unions, and the general public as well.

The establishment of procedures for the agency involves the development and promulgation of regulations required to implement, interpret, and make specific the provisions of the Agricultural Labor Relations Act. This process involves the conduct of public hearings throughout the State to facilitate public comment on the regulations, analysis of regulations by Board members and their staff, the development of recommendations for Board discussion, and the final adoption of regulations under procedures set forth in the Government Code. Because the act has been in effect for a short period of time, the Board's regulations and their impact on the program area must be reviewed and evaluated on an ongoing basis in order to assure accomplishment of the purposes of the act.

*This element is being increased in the budget year by one attorney position that will assist the Chairman of the Board in preparing the Board's position on issues of law or policy, including policy issues between the five member board and the General Counsel.*

## Output

Output consists of the rules and regulations needed to guide and direct all parties in the conduct of fair agricultural labor relations.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures .....	2.9	3.6	4.6	\$134,788	\$170,495	\$181,594

## b. Hearings and Board Review

The primary role of the Board is to exercise the adjudicatory functions of the agency. The Agricultural Labor Relations Act assigns the Board the function of hearing objections to election cases, challenges, and complaints of unfair labor practices.

Hearings are conducted by the Board or its agents to determine whether particular union representation elections are to be certified, and must be held in all cases where a substantive objection has been made. There are several possible bases for an objection to an election case. The Board rules on the merits of objections and whether or not the facts of the case warrant decertification or certification of elections. In order to refine the process so that certification or decertification is not unduly delayed, the executive secretary's office screens all objections to assure that hearings are limited to only those points and issues which are pertinent to the case and which have not previously been held to be nonobjectionable. The Board acts as an appellate body to which any of the parties involved may appeal the decision of a hearing officer and the Board must consider all appeals.

Hearings are also conducted on charges of unfair labor practices. The Agricultural Labor Relations Act defines unfair labor practices and authorizes the Board, if the preponderance of the evidence taken warrants such a decision, to issue orders to prevent or remedy such practices. The Board acts as a court of appeals for unfair labor practice cases brought to it by either the parties in the dispute or the general counsel, and must consider all cases appealed to it. The Board is empowered to hear the disputes out of which unfair labor practices arise, decide on what constitutes a fair adjustment of the dispute, and seek compliance with its decisions. In these unfair labor practice cases, the Board has the power to petition the courts for appropriate temporary relief or restraining orders, and for enforcement of its decisions.

AGRICULTURAL LABOR RELATIONS BOARD—*Continued*

The general ministerial responsibilities of the Board include overall calendar control which includes setting and coordinating the hearing dates for all regional offices, selecting and notifying the hearing officer, determining the need for selecting and notifying the interpreter, assisting with site procurement, and answering all inquiries pertaining to all of the above responsibilities.

The Board has established the internal administrative structure to receive, log, and act in a timely manner upon all appeals, motions and requests made by the parties in the cases.

In order that clear, consistent precedents in all areas of objections and unfair labor practices be established, it is expected that most decisions by the hearing officers will be appealed to the Board for decision. It is the five member board, appointed by the Governor and confirmed by the Senate, who establishes consistent policy in this field of labor relations and not individual hearing officers. The Board expects a high rate of appeal to it in both the current and proposed year.

## II. GENERAL COUNSEL ADMINISTRATION

## Program Objectives and Description

The objectives of the General Counsel Administration are to provide fair, secret ballot elections; to identify and bring resolution or prosecution in unfair labor practices; to defend the Board in all court cases resulting from challenges to the act, or challenges of policies and procedures and decisions of the Board, and to enforce decisions of the Board. The General Counsel is responsible for implementing the provisions of the act and rules and regulations of the Board in the conduct of elections, challenges to ballots, objections to elections, and investigation, issuance of complaints and prosecution before the Board in unfair labor practice charges. The General Counsel is also responsible for representing the Board in all court cases in which it is involved. The immediate staff of the General Counsel are primarily responsible for this latter activity while the staff of the regional offices have primary responsibility, under the direction and coordination of the General Counsel, for the activities related to elections and unfair labor practices.

## a. Representation Cases

One means of bringing peace and stability in labor relations is to allow farm workers the right to organize and bargain collectively. In order to assure that workers may exercise this right if they so choose, free, fair secret ballot elections must be available to them. Under this program the ALRB provides these elections.

Upon the filing of a petition for election in a regional office, the petition is investigated and, if appropriate, election arrangements are made and the election conducted within seven days of the date of filing. An investigation is conducted to determine whether the petition meets all the requirements of the act and the Board's rules and regulations. If the petition meets all requirements of sufficiency and if there is reasonable cause to believe that a bona fide question of representation exists, arrangements must be made with the participating labor organization(s) and with the employer to conduct an election. If no choice on the ballot receives a majority of the ballots cast, a runoff election is conducted. If the election cannot be certified, another election may be held.

Additional elements may be required in the investigation of petitions during the seven days subsequent to filing including determining whether a valid election was conducted among the employees of the employer within the 12 months immediately preceding filing, whether a labor organization is currently certified as the exclusive collective bargaining representative of the employees affected, and whether the petition is barred by an existing collective bargaining agreement negotiated by a certified labor organization and an employer. In addition to the filing of petitions for certification by labor organizations, the statute also permits the filing of petitions for decertification by an agricultural employee or group of agricultural employees. The same additional elements may also be required in the investigation of such petitions during the seven days subsequent to filing.

During an election, a board agent or an observer of any party may challenge the eligibility of any person to cast a ballot. The ballots of challenged voters are set aside and if upon completion of the election, the tally of ballots discloses that the challenged ballots are sufficient in number to affect the results of the election, an investigation may be conducted to determine the challenged voters' eligibility and a report issued containing recommendations and conclusions. In the alternative, a hearing may be held on some or all of the challenged ballots.

In the initial five months of operation in 1975-76, this program conducted 423 elections and it was estimated that with 60,000 farms in California subject to organizing efforts, the volume would approximate 1,000 a year. However, the experience of 1976-77 through 1978-79 and additional review has caused this estimate to be substantially reduced. The budget now estimates 85 elections for 1979-80 and 105 elections for 1980-81. However, it should be pointed out that this is a new and volatile field, subject to constant changes, and the agency is in a completely reactive posture in that it must conduct elections when, where, and in the volume requested by parties. Therefore, it is expected that these estimates will continue to fluctuate.

<sup>1</sup> Includes procedural motions, unit clarification cases, and challenged ballots.

Expenditures.....	11.8	11.8	11.8	\$420,363	\$500,687	\$525,305

## b. Unfair Labor Practices

An unfair labor practice charge may be filed by an individual, an employer, or a labor organization alleging that an agricultural employer or a labor organization is engaging in an unfair labor practice in violation of Sections 1153, 1154, or 1155 of the act. The charge is filed in a regional office and a copy is served on the charged party. The charge is then assigned to a board agent in the regional office to conduct an investigation of the charge. Initially, declarations are taken from the charging party's witnesses and where it appears that there is evidence of a violation, the charged party is requested to provide witnesses relevant to the investigation. After sworn declarations have been taken from all relevant witnesses, the regional office determines whether the investigation has established sufficient evidence to warrant issuance of a complaint. If the determination is made to issue a complaint, the charged party is contacted and requested to enter into a settlement agreement to resolve the alleged unfair labor practices. In the absence of settlement, the matter is set for hearing before an administrative law officer. An attorney in the regional office then prepares the appropriate witnesses for trial and litigates the case. These hearings have ranged from one day to several months in duration. A legal brief is ordinarily written by the trial attorney or an attorney in the general counsel's office and submitted to the administrative law officer after the close of the hearing. Exceptions to the administrative law officer's decision may be taken by filing with the board. In this circumstance another legal brief, arguing the points on review by the board, is prepared by the trial attorney or an attorney in the general counsel's office.

## c. Court Litigation

ARLB court litigation falls into three categories:

### 1. Suits Against the Agency.

This litigation involves suits against the agency by employers and labor organizations seeking to enjoin the agency from conducting elections, counting ballots, proceeding with unfair labor practice trials and attempting to obtain judicial review of a regional director's showing of interest determination or bargaining unit determination. These suits are in the nature of petitions for declaratory and injunctive relief, writs of mandate, and writs of prohibition and usually necessitate the agency appearing on a few hours' notice to defend against the issuance of a temporary restraining order and then perhaps a week later appearing in an order to show cause hearing on a request for a preliminary injunction. These suits have also resulted in appellate litigation where it has been necessary to seek extraordinary appellate review in the appropriate District Court of Appeals or the California Supreme Court in order to stay the effect of an adverse ruling in a superior court.

### 2. Petitions for Injunctive Relief Filed by the Agency and contempt proceedings.

Section 1160.4 of the act provides that the agency may seek injunctive relief to enjoin the commission of an unfair labor practice after a complaint has been issued. This provision is discretionary and is only utilized in the instance where the alleged unfair labor practices are extremely serious, involve acts or threats of violence, or irreparable destruction of rights guaranteed by the ALRA. Contempt proceedings are initiated when a court injunctive order is violated.

Section 1160.6 requires the agency to seek injunctive relief whenever there is reasonable cause to believe there is a violation of Sections 1154(d) (1), (2) or (3), 1154(g) or 1155.

### 3. Enforcement of ALRB Decisions.

Section 1160.8 of the act provides for judicial review of Board orders in unfair labor practice decisions. In those cases where a respondent seeks judicial review in the appropriate court of appeals, attorneys in the General Counsel's office appear on behalf of the Board and defend its decisions. If the respondent has not filed a petition for review but refuses to comply with the Board's order, the agency will seek enforcement of the Board's order in the appropriate superior court.

## III. ADMINISTRATIVE SERVICES

### Program Objectives and Description

The administration program provides the full range of staff services including personnel, accounting, budgeting, management analysis, collection of statistics, and service and supply to the two headquarters offices and the four regional offices. It also provides centralized xeroxing service and an intermittent clerical pool for the headquarters unit.

## PUBLIC EMPLOYMENT RELATIONS BOARD

The Board was created by Chapter 961 of the Statutes of 1975 and called the Educational Employment Relations Board. It was renamed the Public Employment Relations Board by Chapter 1159 of the Statutes of 1977. The PERB has jurisdiction over 450,000 school employees (K-14), 150,000 state civil service employees, and 130,000 higher education employees (UC, CSUC and Hastings College of Law).

Under the Educational Employment Relations Act (EERA) (Chapter 961 of 1975), the State Employer-Employee Relations Act (SEERA) (Chapter 1159 of 1977), and the Higher Education Employer-Employee Relations Act (HEERA) (Chapter 744 of 1978) the Board is charged with direct supervision and regulation of employer-employee relations for the State of California. The three member Board serves as an administrative, regulatory, and quasi-judicial body. The Board's basic functions are: (1) to conduct secret ballot elections to determine exclusive representatives for employer-employee relations; (2) to prevent and remedy unfair practices by employers or employee organizations; (3) to oversee and establish procedures whereby negotiations between employers and employee organizations result in agreement; (4) to assure that the public is afforded sufficient information and time to register its opinion regarding negotiations; (5) to monitor the financial activities of employee organizations.

*In November, 1979, the Board issued its decision delineating appropriate bargaining units for State employees under SEERA. During the current year and possibly the budget year the Board will be issuing decisions regarding appropriate bargaining units under HEERA. Pursuant to these "unit determination" decisions, the Board will be involved in conducting representation elections and other activities to implement SEERA and HEERA.*

*Although the Board will attempt to fully implement both SEERA and HEERA in the current year, it is not known if this is possible. For this reason it is proposed that the availability of \$1,238,070 appropriated for allocation by the Director of Finance be continued through June 30, 1981 by reappropriation language.*

*The 1980-81 budget proposes 18 additional positions. Of these, 15.5 positions are included in the 1979-80 budget but limited to June 30, 1980, and 2.5 are new. To facilitate the unit determination decision under SEERA, 1.2 personnel years of temporary help were approved for the current year, but will not be continued into the budget year.*

### SUMMARY OF PROGRAM REQUIREMENTS

### Authority

Chapter 961, Statutes of 1975; Chapter 1159, Statutes of 1977; Chapter 744, Statutes of 1978.

## I. BOARD OPERATIONS

### Program Objectives and Description

The Public Employment Relations Board is a quasi-judicial body empowered to settle disputes arising under the Education Employment Relations Act (EERA), the State Employer-Employee Relations Act (SEERA), and the Higher Education Employer-Employee Relations Act (HEERA). The Board is responsible for promulgation of regulations, issuance of decisions, and resolution of appeals arising from representation and unfair practice matters.

*In response to a backlog of cases awaiting board-level decisions, three attorneys are proposed through June 30, 1982. Additional workload pursuant to SEERA and HEERA necessitate the addition of one staff services analyst and one clerical position as permanent staff. All of these positions were previously approved through June 30, 1980.*

*1.2 personnel years of temporary help approved for 1979-80 to provide specialized assistance for unit determinations under SEERA will not be needed in the budget year as the SEERA unit decision has been issued.*

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81
Continuing program costs.....	25.5	37.4	31.2	\$777,630	\$1,332,437	\$970,829

<b>Totals, Board Operations .....</b>	<b>25.5</b>	<b>37.4</b>	<b>36.2</b>	<b>\$777,630</b>	<b>\$1,332,437</b>	<b>\$1,154,670</b>

## II. REGIONAL OFFICE OPERATIONS

The Board has created three geographical regions with offices in San Francisco, Sacramento and Los Angeles. Under supervision of the Executive Director, the regional directors have been delegated all decision-making authority relating to the representation cases, including showing-of-interest issues, unit modifications, proof of majority issues, consent elections, directed elections, decertification elections, and organizational security elections.

Where a dispute exists as to the appropriate unit for negotiating purposes, staff conducts the necessary hearing. Upon the close of the hearing a board agent will draft a proposed decision unless the Board itself has chosen to render the decision. Unless appealed to the Board within twenty days, the Board agent's decision will become the order of the Board.

Mediation and factfinding are included in the process in the EERA and HEERA to facilitate settlement of negotiations disputes. The SEERA provides only for mediation. The appointment of mediators and factfinders is one of the most important functions performed at the regional level. Their purpose is to assist the parties in resolving impasses arising from contract negotiations. If a mediator cannot settle the controversy and declares that factfinding is appropriate, either party may request that their differences be submitted to a tripartite factfinding panel.

*To offset workload increases in the Regional offices, three regional representatives and two clerical positions are proposed as permanent in the budget year. Of these positions two regional representatives and two clerical positions were previously approved through June 30, 1980.*

PUBLIC EMPLOYMENT RELATIONS BOARD—*Continued*

## III. GENERAL COUNSEL

The objectives of this element are to hold formal hearings in disputed cases, to provide resolution of unfair practice charges, to renew specific unfair practice charge and determine if the Board should seek injunctive relief, to defend the Board in all court cases resulting from challenges to the acts or policies, and to seek enforcement of orders of the Board.

An unfair practice charge may be filed by an employee, an employer, or an employee organization alleging that an employer or an employee organization is engaging in an unfair practice. The charge is then assigned to an attorney in the General Counsel's office. Efforts are made to obtain settlements through an informal conference. In the absence of such a settlement, the matter is set for hearing. After the close of the hearing, the attorney in the General Counsel's office who conducted the hearing will draft a recommended decision. If this is not appealed to the Board on a timely basis, it will become the order of the Board.

For the Board itself to seek injunctive relief a specific unfair practice charge is evaluated on: (1) the likelihood that the charge would prevail when heard, and (2) the potential for irreparable harm should the injunctive relief not be sought.

Three hearing officers and 1.5 clerical positions previously approved through June 30, 1980, are proposed as permanent in the budget year. In addition one new hearing officer and 0.5 clerical are proposed in the budget year to offset workload. Two limited term clerical positions are proposed as permanent in Administration for preparation of transcripts, decisions and other related materials.

## IV. ADMINISTRATION

## Program Objectives and Description

To provide central leadership and services essential for successful administration of the agency and its program.

Two clerical positions previously approved through June 30, 1980 are proposed as permanent in the 1980-81 budget to continue the preparation of transcripts, decisions and other related materials associated with administering public sector collective bargaining. These positions are reflected in the General Counsel program.

## DEPARTMENT OF FINANCE

By statute the director serves as the Governor's chief fiscal policy advisor with emphasis on the financial integrity of the State and maintenance of a fiscally sound and responsible Administration.

The objectives of the Department of Finance are:

1. To prepare, present and support the annual financial plan for the State.
2. To serve as the Governor's chief fiscal policy advisor.
3. To assure responsible and responsive State resource allocation within resources available.
4. To foster efficient and effective State structure, processes, programs and performance.
5. To establish integrity in State fiscal and program performance data bases and systems.

## SUMMARY OF PROGRAM REQUIREMENTS

	1978-79	1979-80	1980-81

IV.	Continuation of State Census Data Center .....	2	232,266
	Redirection of Staff from Program Evaluation Unit .....	2	69,982

A major responsibility of the department is to assist the Governor in the development and administration of the annual financial plan so that it utilizes State resources in the most effective and efficient way possible. The Program Budget units are the focal points in achieving this goal. It has become increasingly difficult for these units to respond quickly, accurately and effectively to the demands placed upon them. To alleviate this problem, without requesting an increase in staff or funding, 13 staff have been redirected from the Program Evaluation Unit to the Program Budget Units. The programs affected by this redirection are as shown above.

The Governor's Reorganization Plan #2 proposes to consolidate various State entities, including functions which are currently the responsibility of the Department of Finance. Because the Reorganization Plan is still undergoing legislative and administrative review, specific organizational changes have not been reflected in the Governor's Budget.

Chapter 1162, Statutes of 1979 required the transfer of positions and funding to the newly created Commission on State Finance. The current year includes the transfer of 8 positions and \$126,843 to meet this requirement.

DEPARTMENT OF FINANCE—*Continued*

## I. PREPARATION AND ENACTMENT OF THE ANNUAL FINANCIAL PLAN

## Program Objectives and Description

The Department of Finance develops and assists the Governor in the enactment of the annual financial plan for the effective allocation of the State's resources.

Program budget units act as the focal point to generate expenditure planning estimates; make recommendations for use in the executive decision process; analyze, review, and coordinate budget submissions to ensure compatibility with the Governor's policies; compile the Governor's Budget and Budget Bill and publish the Governor's Budget; supply information to the Legislature on items in the Budget Bill and on the fiscal impact of other legislation; provide estimates of revenues and expenditures and special studies for use by the executive branch; assist the Legislature in its review of legislation; and compile a summary of the annual financial plan as enacted.

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81

Reimbursements .....				143,564	229,890	154,006

## Program Elements

a. Development of the annual financial plan..	37.3	45.5	45	1,026,737	1,341,483	1,401,858
b. Legislative process .....	29.2	30.5	33.5	762,713	1,006,516	1,124,637
Executive distribution .....	4.4	5	5	160,688	199,441	215,110

## a. Development of the Annual Financial Plan

The Expenditure Planning Estimate is developed by the Department of Finance to provide those in the executive branch with fiscal, economic, and demographic data for the past, current, and proposed fiscal year so that alternatives may be weighed, priorities established, and resources allocated prior to the actual preparation of the Governor's Budget. The allocation planning takes into consideration the revenues and expenditures necessary to maintain currently authorized program levels on a sound financial basis.

The plan must be adjusted to reflect the impact of legislation in the current year, economic conditions, and the distribution of resources that have previously been authorized by the Legislature without specific departmental designation. With these considerations in view, the Department of Finance prepares an expenditure planning estimate for each department of State government. Each department then compares its budget with the planning estimate.

A Department which wishes to change its program or level of support must initiate a decision document to secure the reaction and approval of the appropriate Agency Secretary, the Department of Finance and the Governor.

The Department of Finance reviews and coordinates budget submissions from each of the State departments to verify that the decisions already made have been reflected and that the budget proposals are consistent with statutes and the Governor's policies. Problems which become apparent at this stage are analyzed and resolved or referred to the Administration for decision.

The Department of Finance enters changes in the plan to reflect the adjusted expenditure projections for both the current and budget years. If a gap exists between available revenue resources and expenditure requirements, the Department of Finance recommends alternatives for additional revenue sources and/or expenditure reductions.

In addition to review and coordination of the annual financial plan for all State agencies, the Department of Finance provides State agencies with information which pertains to State funding of local costs incurred for program mandates occurring through enactment of legislation or executive regulations.

The fiscal impact of legislation to be proposed in support of the Governor's annual financial plan must be analyzed and recommendations prepared. Two personnel years and \$63,471 funded from Title II, have been included in 1979-80 and will be continued until January 31, 1981 at a cost of \$44,066 for 1980-81. This funding will be used for the development of a computerized system to monitor projections of Medi-Cal expenditures. This project was previously reported to the Legislature.

Four and one half student intern personnel years and \$54,021, funded from Title II, have been included in the current year for various special projects. This project was previously reported to the Legislature.

Two personnel years and \$66,560 in the current year and four personnel years and \$139,962 in the budget year, have been transferred from the Program Evaluation Unit to the Program Budget Units to assist with the increasing demands in the development of the annual financial plan.

## Output

The Governor's Budget, Budget Bill, and proposals for special legislation prepared in accordance with the Governor's policy.

Information services to the Governor and the Legislature, and to other levels of government.

Revenue estimates and forecasts of the economic pattern anticipated during the period covered by the Budget and the translation of these into revenue under current tax laws.

Current and long-range population estimates of the State and its counties.

Analysis of the population composition.

Current and long-range estimates of enrollments in the State's educational institutions.

Revenue-related and demographic estimates for agency workload and caseload projections.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	37.3	45.5	45	\$1,026,737	\$1,341,483	\$1,401,858

DEPARTMENT OF FINANCE—*Continued*

## b. Legislative Process

Representatives of the Department of Finance, agencies, and departments appear before fiscal and revenue and taxation committees of the Legislature to present the Governor's program. The staff provides additional information requested by legislators or legislative committees and the public to explain the Administration's programs.

Bills introduced in the Legislature are reviewed for fiscal and program implications and analyses of these bills, including local mandated cost estimates, with recommendations, are submitted to the Governor's legislative assistant. Representatives of the Department of Finance appear before fiscal and revenue committees of the Legislature while they are considering bills. Data and information regarding the legislation are presented and assistance is provided in the preparation.

New or proposed expansion of existing programs are analyzed to ascertain additional costs mandated on local government and appropriate criteria are developed for reimbursement of those costs by the State Controller's Office.

At the time of budget enactment, revenue estimates are prepared to reflect the latest economic forecasts and recent legislation. This information is related to anticipated expenditures in order that a balanced budget may be developed. The staff brings fiscal and program implications of enrolled bills to the attention of the Governor.

*One and one half personnel years and \$49,922 in the current year and three personnel years and \$104,970 in the budget year, have been transferred from the Program Evaluation Unit to the Program Budget Units to assist with the increasing demands of the Legislative process.*

## Output

Weekly Change Books, and Final Change Book.

Analyses and recommendations on bills, constitutional amendments, and resolutions.

Appearances before legislative committees.

Financial Legislation Report, summarizing the annual financial plan and including revised revenues and authorized expenditures.

Annual report on chaptered legislation with State mandated local program implications.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	29.2	30.5	33.5	\$762,713	\$1,006,713	\$1,124,637

## II. SUPPORT AND DIRECTION OF THE ANNUAL FINANCIAL PLAN

## Program Objectives and Description

State programs must be administered in accordance with the authorized annual financial plan. Controls are placed upon appropriation items in the Budget Act and other statutes which may require specific action by the Department of Finance.

All situations which require a variation from the approved financial plan must be examined carefully to ascertain the effects on programs and the financial position of the State. If justified and within approved policy and legislative intent, revisions may be allowed to the extent permitted by law. Some situations, by legal definition or because of importance, are reported to appropriate legislative committees for their consideration.

The cash condition of the General Fund reflecting the proposed annual financial plan is a major consideration in the budgeting process. Expenditure and revenue programs must be matched to assure sufficient cash for current operations and year-end cash balance. Cash flow statements are required and are essential to the needs of management. The amounts and sources of borrowable resources must be known in the event temporary loans are needed. Cash flow statements are included in the budget for Payment of Interest on General Fund Loans.

*One and one half student intern personnel years and \$16,760, funded from Title II, have been included in the current year for various special projects.*

*This project was previously reported to the Legislature.*

*Two personnel years and \$66,560 in the current year and four personnel years and \$139,962 in the budget year, have been transferred from the Program Evaluation Unit to the Program Budget Units to assist with the increasing demands in the support and direction of the annual financial plan.*

## Output

Revisions to the approved programs are reviewed and acted upon.

Estimated cash flow statements.

Comparative statements of cash flow reporting actuals with previous estimates.

## III. ASSESSMENT AND OPTIMIZATION OF STATE-ADMINISTERED AND STATE-FINANCED PROGRAMS

## Program Objectives and Description

With the large number of continuing programs, the Department of Finance has initiated a systematic review process to evaluate the efficiency and effectiveness of State-administered and State-financed programs, including statewide EDP. This review is made to ascertain the need for changes in program or the level of support and to propose workable alternatives which can more effectively satisfy identified needs.

Review and evaluation includes the accounting systems necessary to provide accurate and timely recording and reporting of financial transactions. It is essential that the programs of the State are administered with reliability and integrity. The accounting systems to give this assurance must receive the necessary maintenance and improvement effort.

## a. Program Analysis, Organizational and Financial Management Studies, and Follow-Up Activities

Program analysis looks critically at State programs, policies, resources, organization and management, and suggests ways of improving productivity, efficiency, and effectiveness. Analyses are made to help the Director of Finance, the Governor, Agency Secretaries, department directors, and the Legislature in allocating resources, formulating policies, and making decisions.

Four personnel years and \$126,057 have been included in 1980-81 fiscal year to refine and maintain California Fiscal Information System performance measures. These costs will be reimbursed by CFIS.

One student intern personnel year and \$12,836, funded from Title II, have been included in the current year for various special projects. This project was previously reported to the Legislature.

Six and one half personnel years and \$216,322 in the current year and 13 personnel years and \$454,876 in the budget year, have been transferred from the Program Evaluation Unit to the Program Budget Units. This transfer was made to assist the Program Budget Units with increasing demands without requesting an increase in staff or funding. The programs affected by this transfer are reflected in the Significant Program Changes.

## Output

Recommendation of ways to increase the effectiveness and efficiency of State programs or assurance that current conditions are acceptable. Recommendations designed to improve the allocation of State resources to programs.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	90	80.5	76	\$2,480,909	\$2,616,922	\$2,566,892

## b. Fiscal Management Audits

The Fiscal Management Audit Unit currently performs Fiscal Compliance Audits, Grant, and Statutory Audits. This current structure and emphasis does not provide the Executive Branch with an adequate and effective means for operational and budgetary control, or for performance accountability. A major portion of the audit effort has been connected with performing reimbursable audits of Federal funds received by various State departments. Since departments have been provided with their own auditing staff it is not necessary to use Finance resources for such audits.

Effective July 1, 1980, a redirection of the current functions is proposed to Performance Accountability, Audit Advisory Services, and Supervision and Coordination of Executive Branch Internal Auditing. To achieve this redirection 26 reimbursed personnel years and \$974,671 will be eliminated in 1980-81 and the remaining staff will assume the new functions. The new objectives and emphasis will be as follows:

1. Performance Accountability Analysis which determines:
    - a. the adequacy and effectiveness of the State's system of operational and budgetary control.
    - b. the quality and effectiveness of performance in carrying out assigned responsibilities.
    - c. the quality and effectiveness of fiscal programs and policies.
  2. Audit Advisory and Support Services will assist the Executive Branch management in meeting their audit responsibilities by providing audit advisory and support services.
  3. Supervision and Coordination of Executive Branch Internal Auditing will improve the effectiveness of internal auditing within the Executive Branch by providing centralized statewide auditing policy, planning, supervision, coordination, and monitoring.
- Several audit functions are mandated by statute but otherwise do not contribute to the objectives of the Department of Finance. Legislation will be introduced to alleviate the responsibility for conducting these audits.

As a result of Legislative action 34 personnel years were transferred from the Department of Finance to the Office of the Auditor General. Prior to July 1, 1979, the Joint Legislative Audit Committee and the Department of Finance jointly audited State expenditures pursuant to Federal Revenue Sharing requirements. This function is now being performed totally by the Office of the Auditor General. The Department of Finance budget was reduced effective July 1, 1979 by \$907,844 as a result of this action.

Two personnel years and \$61,713 in Title II funding have been included in the 1979-80 fiscal year to develop Federal program auditing standards for the school district audit standards and procedures manual.

Chapter 1162, Statutes of 1979, required the transfer of positions and funding to the newly created Commission on State Finance. The current year includes the transfer of eight positions and \$126,843 to meet this requirement.

## DEPARTMENT OF FINANCE—Continued

## Output

- The number and timeliness of audits made.
- Dollar magnitude of the expenditures audited.
- Number of recommendations generated.
- Percentage of recommendations implemented.
- To the extent possible and appropriate, dollar values are assigned to recommendations.

## Input

	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	116.6	68.6	52.7	\$4,102,264	\$2,968,506	\$2,497,577

## c. Office of Information Technology

The State Data Processing Management Office has been retitled. The State Office of Information Technology (SOIT) monitors the acquisition and utilization of State electronic data processing resources: equipment, personnel, and data systems whether through lease or purchase. Excluded from control are the State Legislature, University of California, State Compensation Insurance Fund, and the Community Colleges.

Prudent utilization of the technologies offered by electronic data processing and information systems can increase the efficiency and effectiveness of state government. SOIT is working to streamline the procedures whereby new systems are implemented. While the Department of Finance will continue to provide centralized direction and assistance, a system of earned autonomy will be instituted whereby departments may have authority delegated to them.

## Output

- Coordinated plans for information systems and EDP facilities.
- Procurement and contracting procedures for EDP resources.
- Management and development plans for EDP personnel.
- Equipment management systems for inventory, maintenance and utilization.
- A manual of statewide EDP policies, procedures and standards.

Expenditures.....	14.7	14	14	\$368,036	\$456,696	\$496,084

## IV. DEVELOPMENT OF SUPPORTIVE DATA

## Program Objectives and Description

The Department of Finance provides a centralized source for official relevant data and analyses for economic, revenue, tax, and demographic information and data required by the Administration, the Legislature, and State agencies and requested or purchased by county and local government, the federal government, academic institutions, school districts, and private firms.

Data processing systems are used to assist the budget staff in the preparation and administration of the Governor's Budget. The computer systems provide information on the budget and enrolled bills having financial implications.

## Authority

Government Code Sections 13073, et seq., and Revenue and Taxation Code Sections 2227, et seq; and 11005.6.

DEPARTMENT OF FINANCE—*Continued*

## a. Economic Research

The Economic Research Unit prepares economic forecasts to provide the basis for revenue estimates. Reports and reviews of the national and California economies are prepared so that all branches of State government may be kept currently informed of changes in the economic situation or outlook in both the national and California economies. Economic advice and technical assistance are provided as requested by State agencies, the Administration, and the Legislature. The unit also prepares the Economic Report of the Governor, California Statistical Abstract, and Economic Indicators.

Collection of data for research requires cooperation with government and private research groups to facilitate the exchange of information and analyses. New or extended research methodologies are developed to improve forecasts and analytic procedures.

*One student intern personnel year and \$10,342, funded from Title II, have been included in the current year for various special projects. This project was previously reported to the Legislature.*

## Output

Economic data.  
Economic analyses and estimates.  
Statistical compilations.  
Special studies.  
Economic reports and reviews.  
Technical assistance.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	8.2	9	8	\$210,647	\$253,380	\$248,565

## b. Revenue Estimating and Tax Research

The Financial Research Unit maintains a basic and applied research function to support the revenue estimates required in preparation of the State financial plan, the analysis of financial legislation and the evaluation of any financial developments of importance to the State. In addition, major studies, task forces, and special requests or projects initiated by the Administration, the Legislature, or State agencies require specific research into State revenue sources, including the use of samples and surveys.

The objectives of the Financial Research Unit also require cooperation with various State agencies, local governments, private consultants, firms, research groups, and comparable revenue units in other states to develop data and improve estimating methodologies.

Research projects also provide the basis for policy recommendations for the Administration. These may involve tax programs, the impact of various tax changes and the long-term projection of potential revenue sources.

New or extended research methodologies are developed to improve forecasts and analytical procedures.

## Output

Revenue estimates for the Governor's Budget.  
Monthly analyses of the revenue situation on an accrual basis.  
Special studies.  
Statistical analysis.  
Long-term projections used to support policy recommendations or analyses as requested.  
Technical assistance.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	11.9	13	13	\$297,745	\$391,026	\$410,873

DEPARTMENT OF FINANCE—*Continued*

## c. Demographic Research

Demographic data and analyses are required for research and planning purposes by users in State agencies, county and local governments, the federal government, academic institutions and school districts, and private firms. This unit provides the single source for official data.

The Population Research Unit carries out a basic and applied research function directed primarily at the production of population figures which underlie the caseload estimates of virtually all State agencies. The unit secures information from all levels of government and from the private sector in the development of its estimates and projections. Provides annual estimates of city—county population for local tax limitations.

*Development of the State Census Data Center, started in 1978-79 with Title II funding, is being continued in 1979-80. A total of \$226,488 and 1.5 personnel years in Title II funding have already been reported to the Legislature. The Title II funds were made available for the Establishment of the State Census Data Center. For continuation of the Center a General Fund increase is proposed for two personnel years and \$227,266. It is anticipated \$5,000 in reimbursements will be obtained for additional support of this project.*

*One student intern personnel year and \$11,589, funded from Title II, have been included in the current year for various special projects. This project was previously reported to the Legislature.*

## Output

Analyses and projections of enrollments in public schools, colleges, and universities.

Basic data and statistical compilations.

Local (city and county) population estimates for tax distribution, tax rate limitation, special survey design, and supervision.

Designs and tests research methodologies.

Annual estimates of state population and its composition.

Short and long range population projections.

Advisory services to State agencies, other levels of government, and the business community.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	20.3	21.5	22	\$683,945	\$864,176	\$871,859

## d. Computer Support

The computer support operation assists the budget staff and departments in the preparation, enactment and direction of the annual financial plan through the use of data processing systems. Legislative action on the Budget Bill and other enrolled bills with a financial impact are maintained by the computer system in order to maintain current information on the fiscal impact of this type of legislation. These computer files are available to and used by the Legislature and its staff.

There are currently six subsystems: (1) budget posting—summary schedule generation, (2) appropriation control accounting, (3) Schedule 10 generation, (4) budget changes and enactment, (5) budget planning, and (6) financial legislation.

*Two student intern personnel years and \$20,684, funded from Title II, have been included in the current year for various special projects. This project was previously reported to the Legislature.*

*One personnel year and \$33,280 in the current year and two personnel years and \$69,982 in the budget year, have been transferred from the Program Evaluation Unit to Computer Support. This staff will be utilized to strengthen departmental EDP efforts. Activities such as cash management, employee compensation costing, position monitoring system, position planning estimates, economic and revenue forecasting among others will be automated.*

## Output

Budget summary Schedules 3, 6, 7, and 8.

Supplemental schedules of appropriations—Schedule 10.

Lists of executive change requests and legislative changes to Assembly and Senate Budget Bills.

Final list of changes to the Governor's Budget.

Financial Legislation Report.

Planning Estimate Report.

Special reports and analyses using the appropriation data base.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	7.3	11	10	\$181,630	\$299,034	\$338,548

## V. EXECUTIVE

## Program Objectives and Description

The Director of Finance provides active leadership in maintaining a fiscally sound State government. The Director serves as the Governor's chief fiscal policy advisor to provide guidance on matters of financial policy. The Director also serves as a member on many boards and commissions as required by law, including the Franchise Tax Board, the Pooled Money Investment Board, the State Lands Commission, the Housing Bond Credit Committee, the California Fiscal Advisory Board, and the State Public Works Board. The Director and staff provide executive leadership and policy direction required for the successful achievement of departmental program objectives.

<sup>1</sup> Eleven positions limited to June 30, 1980. Previously reported to the Legislature via Section 28. (PWEA-Special Project—Student Interns.)

<sup>2</sup> One and one-half positions limited to June 30, 1980. Previously reported to the Legislature via Section 28. (PWEA-Demographic Data Center.)

<sup>3</sup> Two positions limited to June 30, 1980. Previously reported to the Legislature via Section 28. (PWEA-School District Audits.)

<sup>4</sup> Current year includes transfer of 8 positions to the Commission on State Finance. Budget year includes reduction of 26 reimbursable audit positions.

<sup>5</sup> Includes redirection of 13 positions from Program Evaluation to Budget Operations.

<sup>6</sup> Two positions limited to January 31, 1981. Previously reported to the Legislature via Section 28. (PWEA-Medical Estimates Project.) Budget year includes 2 positions for Medical estimates, 2 positions for continuation of Census Data Center, and 4 positions for maintenance of CFIS performance measures.

## Department of Finance CALIFORNIA FISCAL INFORMATION SYSTEM

### Project Description and Objectives

Over the past several years, the Department of Finance and other State executives and legislators have expressed concerns that the State's accounting and budgeting systems do not fully meet management's fiscal information needs. The Department contracted with the firm of Deloitte Haskins & Sells to further define these concerns and to recommend an approach to meet the needs of decision-makers.

The study identified a need to provide a total spending plan, to make revenue and expenditure information more easily accessible to decision-makers, and to develop a central data base to facilitate forecasting, modeling and monitoring of revenues and expenditures. Subsequent to the recommendations of Deloitte Haskins & Sells, the Legislature enacted Assembly Bill 3322 (Chapter 1284, Statutes of 1978). This bill established in law changes in the State's budgeting and accounting systems and provided for the creation of a centralized fiscal information system. These system change requirements parallel the recommendations of Deloitte Haskins & Sells as a means of meeting the needs expressed by members of the Legislative and Executive branches of government.

To implement the requirements of AB 3322 and the recommendations of Deloitte Haskins & Sells, the Department of Finance is developing an on-line fiscal information system called the California Fiscal Information System (CFIS). CFIS will provide timely and uniform fiscal data, reported in both tabular and graphics format, for State expenditures by line item, program, governmental unit, and fund source. CFIS will provide the capability for modeling and forecasting. The Department will issue guidelines for the preparation of program budgets to reflect each agency's activities, based on various goals and objectives, and will develop performance or workload measures for State agencies.

The CFIS Task Force was formed within the Department to achieve these objectives. The Task Force is being guided by the California Fiscal Advisory Board, established pursuant to AB 3322, and is being assisted by several advisory committees in its review of issues central to the development of the information system.

The Program Evaluation Unit of the Department of Finance is charged with the responsibility for the initial identification and collection of performance or workload measures for each State agency. The Financial and Economic Research Unit is developing economic models. Existing resources in the Department of Finance are being used for these activities.

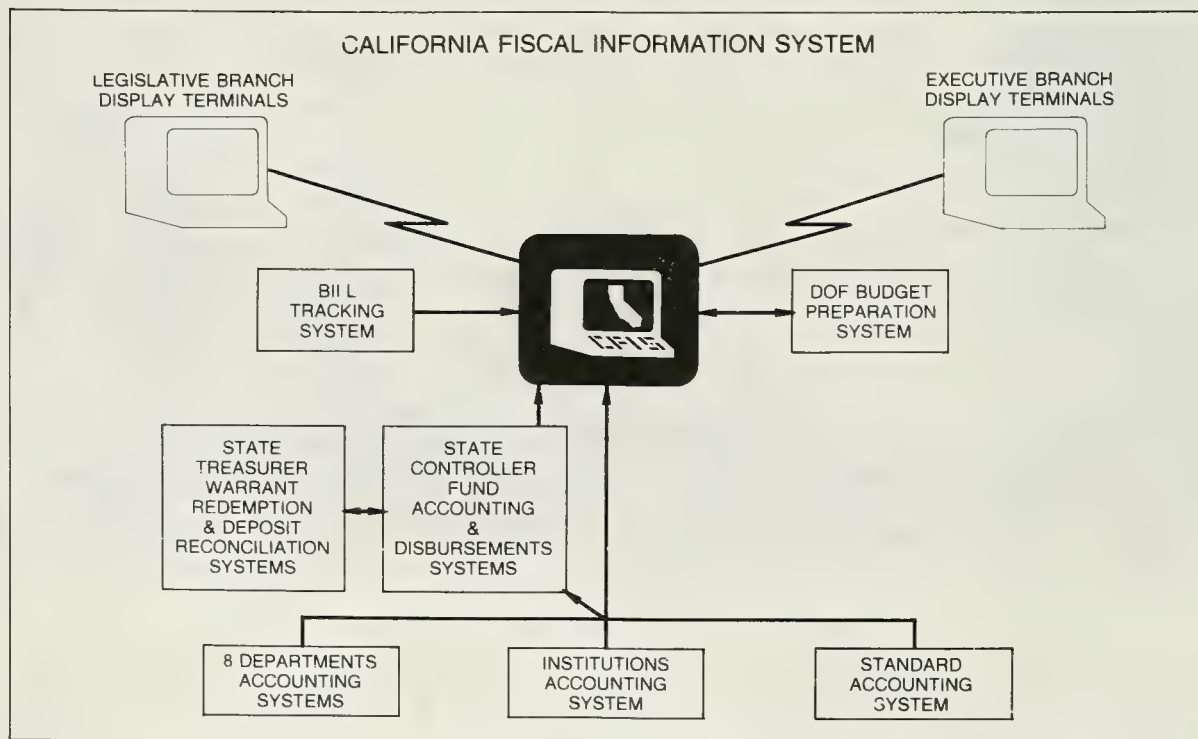

Funds are included in the CFIS budgets to provide for the reimbursement of additional expenditures and staff, as required, related to the modification of the State Controller's Fiscal System, the creation of the Institution and Standard Accounting Systems and other activities that are over and above existing resources of departments. The CFIS Budget also includes funds for payment of the charges due to the acquisition of CFIS terminals for departments as their accounting systems are upgraded and they begin contributing to the information system.

# Department of Finance CALIFORNIA FISCAL INFORMATION SYSTEM—*Continued*

## Recent Accomplishments

The development of CFIS and related changes in the State's budgeting and accounting systems are planned over a period of several years, with specific developments to be accomplished each year.

In the past year, the Legislature was provided on-line access to Bill Tracking (Legislation) and Budget Bill Tracking (Change Book) information. The State's Chart of Accounts was modified and an initial Common Codes Manual was developed to relate budgeting and accounting data for line item objects of expenditure, programs, organizations, and fund sources. A total State Spending Plan was included in the 1979-80 Governor's Budget as Schedule I-C, and all Federal funds were reflected in the 1979 Budget Bill.

In June 1979 a contract was awarded for the computer software and consultant assistance to create the CFIS data base. Two software packages were acquired: 1) to manage the data base, and to provide tabular and graphics reporting capabilities, and 2) to provide for the statistical and forecasting/modeling uses of CFIS.

In the current year, the software packages have been installed at the Teale Data Center and the video graphics terminals installed in the offices of the Interim CFIS users. Interim CFIS data base files have been designed and are currently being established which will include data from the eight departments and the State Controller. The time line for completion of interim CFIS has been extended to mid 1980. Extensive unanticipated work was required to identify and complete the systems modifications, because of the wide disparity in program cost accounting capabilities and systems designs present in the eight departments. An Interim CFIS Codes Manual has been developed for the collection and retrieval of this data. A procurement document has been issued proposing to contract for U.S. and California economic data, and it is anticipated that an award will be made in the current year. Training sessions are being conducted for Interim CFIS users (staff from Finance, State Controller, State Treasurer, the eight departments, and the Legislature).

The Federal Trust Fund has been established and an accounting of Federal receipts for each State agency started. Alternatives have been developed for a revised Governor's Budget and Budget Bill for 1981-82, and it is anticipated that formats will be selected and the Department's Budget Preparation System modified to accommodate these changes in the current year.

The Program Evaluation Unit has identified and started collecting performance measures for the first eight departments in CFIS. Work will be started in the current year to identify measures for the programs of another thirty-five departments. A Statewide Program Structure has been devised which will provide the framework for the aggregation of departmental program data (fiscal and performance) into statewide program categories on the basis of common objectives. This structure will identify similar program activities being performed by different entities.

Changes required in the State Controller's Fiscal System have been defined, and a contract has been awarded to implement these changes.

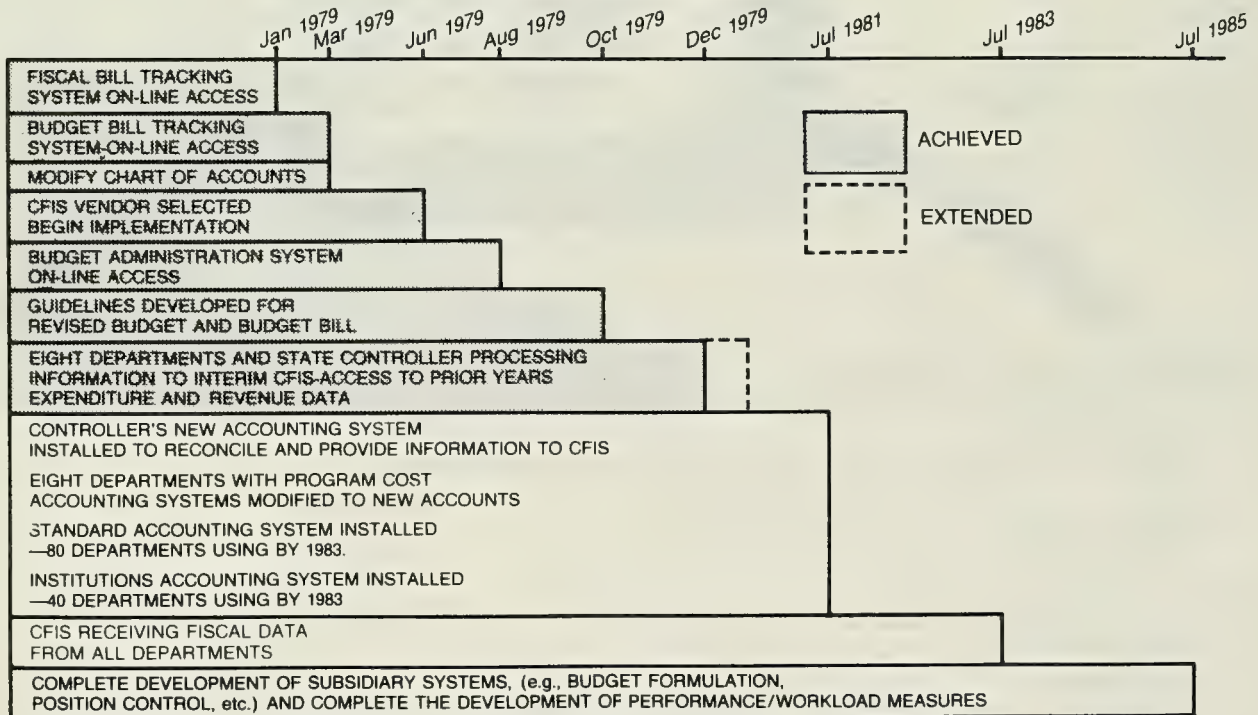

A joint "Request for Proposal" has been issued to solicit appropriate computer software proposals to satisfy the needs for the Standard and Institution Accounting Systems. Vendor selection is anticipated in March 1980.

## Budget Year Goals

In the budget year, the Standard and Institution Accounting Systems will be developed and implementation started for 17 departments. CFIS terminals will also be acquired and installed in these departments. Development of the new State Controller's Fiscal System will be continued in the budget year, and modifications to the State's Payroll System will be undertaken to conform to the new common code structures. The State Treasurer's systems will be modified in the budget year to accommodate the same standard account coding scheme as other State systems. Modifications will be undertaken to the accounting systems of the eight departments, currently providing data to CFIS on an interim basis, to meet the final CFIS design requirements.

Funding is proposed to establish four positions in the Program Evaluation Unit, Department of Finance, for the refinement, maintenance and utilization of performance data previously identified for collection from the first eight departments to be in CFIS. Performance measures will be identified and collection started for 35 additional departments utilizing existing Department of Finance resources.

## PROJECT MILESTONES

**Department of Finance**  
**CALIFORNIA FISCAL INFORMATION SYSTEM—Continued**

**Interim CFIS Data Base**

The implementation of CFIS is planned over a period of several years in a modular building block approach. In the interim implementation period, CFIS will provide monitoring capability for approximately 50 percent of the State budget. The data base files now being established to accomplish this are intended to provide reasonably accurate and timely data which will be useful to decision-makers. The data in the interim system is, of necessity, only a partial picture of the State's total fiscal activities. It will be gradually expanded to include revenue, expenditures, and performance measures for all departments, as well as other fiscal information needed by statewide decision-makers.

**Revenues and Expenditures**

Planned and actual revenues, budgeted expenditures, planned and actual monthly expenditures, and performance measures for CSUC, Caltrans, EDD, Education, Health Services, Motor Vehicles, Social Services, and Water Resources.

Actual local government fiscal relief expenditures, and budgeted, planned and actual property tax relief, shared revenues and state-mandated local program expenditures from the State Controller's Fiscal System.

**General Fund Cash Flow**

Actual monthly cash receipts and disbursements compared to the Governor's Budget and updated Department of Finance estimates.

**Federal Trust Fund**

Federal authorizations, receipts, disbursements, and authorizations yet to be received, for funds to be deposited in the Federal Trust Fund (established by AB 3322).

**Bill Tracking (Legislation)**

Summary information on bills in the Legislative process from introduction to enactment. Input to the system comes from the Governor's staff, Department of Finance, and legislative history reports. The system contains a brief bill summary, subject by CFIS Statewide Program Structure, author, Governor's Office position, and applicable revenue and cost estimates by the Department of Finance and Legislative Analyst's Office.

**Budget Bill Tracking (Change Book)**

Recordation and reporting of both Houses, and Conference Committee changes to the Governor's Budget in program and traditional line item detail.

**Budget Administration**

Budget authorizations (appropriations), revisions, allocations, etc. for the 1979-80 fiscal year.

**Budget Preparation**

Governor's Budget plan of expenditures for the 1980-81 fiscal year.

**Historical Data**

Five years of actual revenues, expenditures, and personnel-year data for all departments and most funds. Selected summary data will be available for longer time periods.

**Economic Data**

Selected U.S. and California economic data, along with other revenue data used by the Department of Finance.

**Revenue Models**

Equations and models used by the Department of Finance in modeling the State's economy and estimating major revenues.

**Position Control**

Authorized positions and personnel-years, and actual usage.

## DEPARTMENT OF FOOD AND AGRICULTURE

The objectives of the Department of Food and Agriculture are:

To serve the citizens of California by promoting and protecting California agriculture in the interests of public health, safety and welfare.

To maintain a viable food system which assures delivery of an abundant supply of wholesome food to domestic and export markets.

To provide leadership in the development of policy on issues important to California food and agriculture.

To preserve and protect use of the State's natural resources to meet the present and future requirements for food and fiber.

To provide effective and uniform administration of the Food and Agricultural Code and other laws over which the Department has jurisdiction.

To serve the citizens of California by assuring that equity prevails in the commercial exchange of goods where value is determined by weight or measure.

## SUMMARY OF PROGRAM REQUIREMENTS

	1978-79	1979-80	1980-81
I. Agricultural Pest and Disease Prevention .....	\$17,879,526	\$22,753,957	\$21,588,898

VI.	Increase in auditing for pesticide mill tax .....	3	100,189
X.	Expansion of pesticide regulatory program .....	91	8,438,177
X.	Urban information program .....	2.9	128,298

## I. AGRICULTURAL PEST AND DISEASE PREVENTION

## Program Objectives and Description

Infestations of harmful pests and diseases seriously affect the ability of the agricultural industry to produce adequate supplies of food and fiber of high quality at a reasonable cost to the citizens of California. Animal diseases which are transmissible to man endanger the health of the State's populace. Plant pests and diseases threaten the safety and welfare of California citizens through detrimental effects on the environment.

The objective of this program is to protect the citizens of the State against unfavorable economic, social, or environmental impact by preventing the introduction or spread of harmful plant and animal diseases, weeds, insects, and other pests. This is accomplished by:

1. The establishment and enforcement of quarantines to exclude such diseases and pests whenever possible;
2. The detection of diseases and pests now established or about to become established in California and, through identification, analysis, and evaluation after detection, making recommendations for action;
3. The formulation and enactment of plans of action to eradicate or control such diseases and pests. Quarantines, detection, identification, evaluation, and eradication or control of diseases and pests are activities carried out by the Department of Food and Agriculture, either directly or with the county agricultural commissioners.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

## a. Exclusion and Detection of Plant Pests and Diseases

Exclusion and detection of plant pests and diseases keep California's environment free from the introduction and establishment of new pests, delay the spread of established pests, detect the spread of pests, certify plant products are free from pests, and direct, assist, train, and evaluate county plant pest exclusion and detection programs.

In addition, the following departmental roles and missions are partially met with this element's border station system: To inspect out-of-state fruit and vegetable shipments for compliance with quality control standards, to monitor out-of-state apiary shipments and associated equipment for compliance with apiary regulations, to report movement of out-of-state shipments of certain fresh fruits and vegetables, to report movement of out-of-state shipments of poultry, eggs, and livestock, and to monitor out-of-state shipments of wild animals and birds for compliance with Fish and Game and Public Health regulations.

Other government agencies are assisted in meeting their missions and roles at border stations by observing and recording weather data, reporting out-of-state Christmas tree shipments, reporting forest fires, reporting highway conditions, cooperating with other law enforcement agencies, and conducting traveler surveys.

With 16 inspection stations operating along its northern and eastern borders, California enforces 29 State exterior quarantines and 12 federal domestic quarantines designed to prevent the introduction of plant pests. Since 1972, the Department has contracted with the State of Arizona for joint protection through Arizona's stations. The State provides planning, training, coordination, supervision, and evaluation to county agricultural commissioners for uniform statewide enforcement of 56 State exterior, interior, and federal domestic quarantines regulating shipments of plants and other specified articles arriving in California.

State pest detection is cooperatively conducted by state staff and county agricultural commissioners. State staff is responsible for planning, training, coordinating, supervising, and evaluating the county and state programs. Pest detection is conducted by systematic trapping and visual survey techniques in specific areas of the State. Pest detection activities include remote sensing which utilizes new techniques ranging from satellite and aircraft pictures to computer photo interpretation. *Output figures below display past year actual data for exclusion and detection activities. The budget year reflects an increase of five personnel years associated with termination of salary savings for Section 27.2 of the Budget Act of 1979 and a decrease of 2.2 personnel years associated with termination of a pilot urban pest detection project funded through PWEA Title II reimbursements.*

*The budget year also includes \$30,500 in increased funding to meet the unusually high maintenance costs incurred by the border agricultural inspection stations.*

## Output

	1978-79	
	Internal	Border
1. Number of border and internal inspections of a plant pest or disease exclusion nature:		
a. Commercial.....	101,787	648,600
b. Noncommercial.....	305,422	9,289,900
2. Dollar value of commercial shipments examined for plant pests and diseases.....	\$300,000,000	\$500,250,000
3. Number of shipments prevented entry or movement under quarantine action:		
a. Commercial.....	712	304
b. Noncommercial.....	2,146	52,000
4. Dollar value of commercial shipments prevented entry or movement under quarantine action:	N/A	\$4,430,000
5. Number of certificate actions to safeguard the movement of restricted plant and product items:		
a. Certificates issued.....	65,285	144,400
b. Certificates examined in transit.....	81,370	5,146
6. Number of new plant pest infestation detections:		
a. Within parameters.....	24 (86%)	N/A
b. Exceeding parameters.....	4 (14%)	N/A

## b. Control and Eradication of Plant Pests and Diseases

The purpose of this element is to minimize the undesirable economic, social, and environmental impacts on the agricultural industry and the public from identified infestations of vertebrate or invertebrate plant pests, plant diseases and noxious weeds, and from predatory animal damage. In addition, this element has the responsibility to maintain apiary quality.

This element achieves its objectives by employing effective control or eradication measures whenever feasible, and by providing training and advisory services to county agricultural commissioners' staffs. Certain projects in this element are financed wholly or in part by industry assessments.

In the current year, the Pink Bollworm Program has been reduced by \$630,449 but increased by 2.5 personnel years as a result of a program change from the treatment phase to the detection phase for the pest. In the budget year, \$153,121 is restored to the program to fund 10.5 personnel years of temporary help to continue detection efforts.

The budget year also includes: an increase of \$582,383 and 5.9 personnel years to continue efforts to eradicate the Hydrilla plant pest at Lake Murray and the All-American Canal. Expenditure of State funds for the All-American Canal will require matching expenditures by the federal and local governments.

In addition, the budget year reflects an increase of 0.2 personnel years associated with termination of salary savings for Section 27.2 of the Budget Act of 1979 and a decrease of 4.9 personnel years resulting from termination of the Guayule Rubber Project funded through PWEA Title II reimbursements.

Output	1978-79	1979-80	1980-81
Pink Bollworm Control/Eradication:

## c. Laboratory Services

The five laboratories included in the Laboratory Services element are Botany, Entomology, Nematology, Plant Pathology, and Seed Taxonomy/Germination. These laboratories provide accurate and prompt identification service to plant protection units within the Department and to additional agencies listed below. Up to one-third of the Seed Laboratory expenses are currently paid from seed industry assessments.

Laboratory Services also maintains an operations center which manufactures and ships supplies and assures a constant source of indicator plants necessary for identification of plant diseases. Laboratory Services is responsible for the Cooperative Plant Pest Report and technical communications services.

The budget year reflects an increase of five positions associated with termination of salary savings for Section 27.2 of the Budget Act of 1979.

Output	1978-79	1979-80	1980-81

DEPARTMENT OF FOOD AND AGRICULTURE—*Continued*

## d. Nursery Service

The Nursery Service element initiates and maintains programs to coordinate and supervise county agricultural commissioners' enforcement of State laws which regulate the growing, handling, and distribution of nursery stock. Persons selling nursery stock are licensed to enable effective enforcement work.

The unit provides uniformity in regulation enforcement and leadership in pest detection programs while ensuring sufficient freedom of movement of nursery stock to keep the nursery trade from becoming involved in restrictive quarantines and to assure orderly marketing. Nursery Service also engages in cooperative research to solve nursery-related pest problems and provides voluntary registration and certification programs as a means of producing and marketing plants relatively free of virus diseases, disorders, and plant pests.

The nursery services are supported entirely by fees collected for licenses and services performed in nursery stock registration and certification activities.

## Output

	1978-79	1979-80	1980-81
1. Value of nursery stock produced in California .....	\$644,000,000	\$660,000,000	\$680,000,000
2. Value of nursery stock certified.....	14,066,970	13,739,500	14,863,300
3. Number of nursery inspections and reinspections.....	12,825	10,000	9,000
4. Number of licenses issued to operate nurseries.....	9,205	9,500	9,800
5. Number of nurseries authorized to use origin certificates .....	1,500	1,550	1,550

<i>Reimbursements</i> .....	—	—	—	1,512	8,874	8,882

## e. Seed Potato Certification Service

California's seed potato certification program commenced in 1915 when it became evident that potatoes could no longer be produced commercially unless seed, meeting strict standards of pest cleanliness and varietal purity, was available for planting.

The fitness of potatoes to qualify for certification is determined by inspection and testing of plants and tubers for serious pests, grade standards, and varietal purity.

Approximately 2,500 acres of seed potatoes are entered for certification annually. This acreage is grown and harvested over a 12-month period throughout the State. The service is supported entirely by acreage and test plot fees.

## Output

	1978-79	1979-80	1980-81
Value of certified seed produced .....	\$1,650,000	\$1,250,000	\$1,250,000
Value of seed exported .....	150,000	150,000	150,000

<i>Reimbursements</i> .....	—	—	—	2,326	1,923	1,126

## f. Animal Health

This element is concerned with an organized statewide preventative veterinary medical service program designed to assist with insuring an adequate, wholesome food supply, and aid in protecting the public health. These responsibilities are met by detection, control, eradication, and prevention of animal disease in the State. Detection activities include surveillance, examination, testing, and autopsies performed both in the field and in the laboratories.

Disease control is accomplished through vaccination, testing, and elimination of infected animals; cleaning and disinfection of trucks and premises; and restriction of animal movement by hold orders, quarantines, or controlled destination movement permits for animals with disease, exposed to disease, or contaminated with deleterious substances.

Disease eradication efforts are accomplished through state and national programs to break the cycle of infection by test and removal of infected animals, sterilization of garbage fed to swine, sanitation of hatching eggs, and herd treatment for external parasites. Owners of animals removed are in some cases indemnified for a portion of the animal's value.

Preventive activities are directed against the entry of diseases which do not currently exist in California. This is accomplished by destroying ship and aircraft garbage, inspecting imported animals, disease monitoring and educational efforts, and quarantines when applicable.

DEPARTMENT OF FOOD AND AGRICULTURE—*Continued*

## Output

	1978-79	1979-80	1980-81
1. Number of animals tested:			
a. Livestock .....	1,300,000	1,000,000	1,000,000
b. Show or sale horses .....	1,650	2,000	2,000
2. Number of vaccinations .....	340,000	350,000	350,000

Federal funds .....	—	18	18	20,000	396,000	396,000

## g. Veterinary Laboratory Services

Laboratory assistance is provided to animal related programs by five laboratories strategically located at Petaluma, San Gabriel, Turlock, Fresno, and Sacramento. These laboratories conduct tests, perform autopsies, and provide diagnostic support for State and federal animal health regulatory veterinarians, veterinary practitioners, poultry men, State Meat Inspection, Milk and Dairy Food Control, and University and extension veterinarians. A fee is charged for all diagnostic work performed by the laboratories.

## Output

	1978-79	1979-80	1980-81
Serological tests on all diseases .....	1,084,756	1,100,000	1,100,000

## h. Special Items of Expense

- Chapter 176, Statutes of 1977, provided an amount of \$925,000 to eradicate the infestation of Hydrilla plants in the Marysville Lake area. The project is carried out by the city of Marysville under the supervision and guidance of the Division of Plant Industry.
- Chapter 788, Statutes of 1978, provided \$110,000 for retroactive increases in indemnity payments for Bovine Brucellosis.
- Chapter 1147, Statutes of 1979, provided \$500,000 for projects and research regarding specific questions related to DBCP, and \$500,000 for the eradication of Hydrilla in the All American Canal and the water system of the Imperial Irrigation District.

## II. FOOD AND AGRICULTURAL STANDARDS AND INSPECTION SERVICE

## Program Objectives and Description

This program is responsible for:

Assurance to consumers that meat and meat food products (except for those inspected by the federal government), milk, milk products, and products resembling milk products are wholesome, properly labeled, and in compliance with adequate standards;

Enforcement of laws relating to pesticide usage including: regulating pesticide residues and pest control activities for the protection of the environment, agriculture, agricultural workers, and general public from harmful effects of pesticides and other chemicals used in agricultural production; regulating commercial fertilizers, livestock remedies, and pesticides to assure accurate labeling so that consumers can be assured that products they purchase are as represented by the label and can safely be used for production of crops, livestock, and poultry when directions are followed; and providing consumer protection by removing food and agricultural products failing to meet minimum quality standards from channels of trade;

Protection of consumers by providing regulatory services assuring accuracy of measure and count of consumer goods, labeling and advertising of petroleum products, training and licensing of weighmasters, and standardizing weight and measurement devices in a cooperative program with county sealers of weights and measures.

### Authority

## Program Requirements

## Program Elements

### a. Meat Inspection

In meeting program objectives, the Bureau:

Reviews and approves inspection programs provided by city, county, State, or foreign countries to prevent the shipment into California of uninspected domesticated pigeons, squabs, quail, pheasants, and rabbits from sources which have not been approved.

## Output

## DEPARTMENT OF FOOD AND AGRICULTURE—Continued

## b. Milk and Dairy Foods Control

The principal objectives of the Bureau of Milk and Dairy Foods Control are to ensure that the California consumer can purchase and consume milk, milk products, and products resembling milk products from any retail outlet in the State with the assurance that the products they receive will be pure, wholesome, truthfully labeled, and that tests for basis of payment between milk producers and the buyer are accurate. Objectives are accomplished by enforcing the provisions of the Food and Agricultural Code dealing with the standards of composition, purity, and truthful labeling as they apply to the production, processing, and distribution of such products.

The program also includes the enforcement of laws and regulations that control weighing, sampling and testing of milk where such measurements determine the value of the product, and participates in the interstate milk shippers program, which includes the inspection and certification of dairies, milk plants, dairy laboratories, and milk-container fabricators for interstate sale and sale to federal installations in California.

The program enforces the laws, and regulations that require ingredient and nutritional labeling of milk, milk products, and products resembling milk products.

The bureau provides milk product plant inspections, and supervision of the grading and packaging of butter, cheese, margarine, and dry milk for the U. S. Department of Agriculture on a reimbursable basis.

The inter and intra-agency relationships include supervision of 26 local Approved Milk Inspection Agencies (AMIS), a program of pesticide control in milk products, and collaboration with State and Federal agencies on radiological surveillance, and with the Water Quality Control Board on environmental conditions existing on dairies. *The current year reflects the addition of two positions for increased workload in State inspection of dairies. These positions continue in the budget year.*

## Output

	1978-79	1979-80	1980-81
1. Pounds of milk produced in California per year.....	11,832,014,000	12,068,654,000	12,310,027,000

## c. Fruit and Vegetable Quality Control

The purpose of this element is to inspect fruits, nuts, vegetables, and honey to assure compliance with minimum legal standards of quality, packaging, and labeling.

Inspections are performed at production, wholesale, and retail levels by county agricultural personnel who are trained and supervised by State personnel. In addition, State personnel operate highway inspection stations to monitor commodities and verify certificates.

The element is also responsible for inspecting avocados to ensure that those offered for sale are certified as meeting minimum standards of quality and maturity. This mandatory inspection and certification is supported by a fee charged on each container of avocados.

## Output

	1978-79	1979-80	1980-81
1. Containers of fruits, vegetables, nuts, and honey inspected at:			
a. Production, wholesale and retail levels.....	239,980,917	240,000,000	240,000,000

## DEPARTMENT OF FOOD AND AGRICULTURE—Continued

## d. Quantity and Quality Assurance

To provide a basis of value comparison for consumers and fair competition for industry, the Division of Measurement Standards is responsible for providing: the use of commercial weighing and measuring equipment; quantity verification of both bulk and packaged sales of goods and commodities; quality standards and advertising of most petroleum products as well as labeling of packages. Approximately \$96 billion of commerce is regulated by these activities:

1. *Metrology*—Maintain, in concert with the National Bureau of Standards, the basic standards which form the basis for all California commercial transactions involving weight or measure.

2. *Devices*—Examine and approve all commercial weighing and measuring equipment and periodically test commercial devices to determine if they are being lawfully utilized and maintained.

3. *Quantity Control*—Verify sales of goods and commodities sold directly over weighing and measuring devices or in packaged form as well as enforcing package labeling requirements and method of sale of some products.

4. *Weighmaster Enforcement*—Verify transactions of goods or services sold upon the basis of a Weighmaster Certificate on weight, measure or count. Establish box, bin and pallet tares and verify tares established by Weighmasters for agricultural commodities.

5. *Petroleum Enforcement*—Verify minimum quality standards for most automotive products (gasoline, diesel fuel, motor oil, brake fluid, antifreeze and automatic transmission fluid) sold in California, and regulate advertising of gasoline and oil.

6. *Metrics*—Coordinate with and assist State and local government, industry, consumers, and the U.S. Metric Board in the voluntary conversion to the metric system of measurement. Provide staff assistance to the California Metric Conversion Council and report metric conversion progress annually to the Legislature and the Governor.

The division works closely with County Weights and Measures officials who, under the direction and supervision of the Director, carry out the majority of the local weights and measures enforcement requirements. In addition, the division is responsible for intercounty enforcement and coordination with other states and the federal government. *The budget year reflects the addition of 5 personnel years associated with termination of salary savings for Section 27.2 of the Budget Act of 1979.*

## Output

## e. Commercial Fertilizer Control

Approximately four million tons of fertilizing materials are used annually by the producers of food and fiber crops and the home gardner, representing a value of about \$400,000,000.

This element provides protection to the buyers and users of plant food, soil amendments, agricultural minerals and auxiliary soil chemicals.

Users depend upon complete label information for purchase decisions and proper application instructions. Further, the user relies on label integrity to achieve the lowest unit production cost. Mislabeling or adulteration can result in serious economic loss to the user.

Intensive inspection and sampling are used to determine product compliance with State labeling requirements. These activities are supported by registration fees and a tonnage tax.

## Output

	1978-79	1979-80	1980-81
1. Annual tonnage of fertilizer materials .....	4,535,000	4,600,000	4,600,000

Reimbursements .....	—	—	—	7,517	5,106	5,204

## DEPARTMENT OF FOOD AND AGRICULTURE—Continued

## f. Feed and Livestock Drugs Control

This element provides protection to producers of livestock and poultry through product registration and label enforcement activities. Complete labeling is necessary so that producers can select and use products with confidence and efficiency to maximize production. Inspection, sampling, and laboratory testing assures that commercial feeds and feed additives will not cause illegal drug and pesticide residues or other contaminants in food products purchased by consumers and that such products will be safe and wholesome.

Livestock drugs require registration and proper labeling so that livestock and poultry producers can depend on these products to control disease problems safely and effectively. Random monitoring of the user is performed to ensure that label directions are being followed to prevent the possibility of illegal residues in meat, milk and eggs.

An intensive inspection program supports labeling requirements and conformance with required regulations. It is supported by license fees and tonnage tax assessments.

Output	1978-79	1979-80	1980-81
1. Annual tonnage of commercial feeds:.....	10,801,037	9,000,000	9,000,000
2. Annual dollar value of:			
a. Commercial feeds .....	1,000,000,000	950,000,000	1,000,000,000

## g. Seed Service

This element provides protection to growers by ensuring that commercial seed is free from primary noxious weed seeds and properly labeled with regard to quality statements and fungicide treatments. Objectives are accomplished through coordination and supervision of inspection, enforcement, and seed certification done by county agricultural commissioners. State responsibility in seed certification includes training as well.

The industry supports the total enforcement cost of the California Seed Law and up to one-third of the associated laboratory costs. Seed laboratory expenses for service and quarantine samples are being displayed in the Laboratory Services element.

The element also administers the One-Variety Cotton Districts Act, revised and amended by Chapter 592, Statutes of 1978. This Statute establishes an elected Acala Cotton Board and expands the non-approved variety testing program. The Board is authorized to approve those cotton varieties which meet Fiber Quality Standards, thus assuring the growth of the most profitable and uniform cotton varieties. Funding for the 1979-80 fiscal year and subsequent years is provided by an assessment upon cottonseed sold for planting within the One-Variety Cotton District at a rate not to exceed seventy-five cents (.75¢) per hundredweight of undelinted cottonseed. *The budget year includes 0.8 positions and \$28,288 to initiate a cotton variety testing program funded through industry fees.*

Output	1978-79	1979-80	1980-81			
1. Pounds of seed planted in California .....	280,000,000	280,000,000	280,000,000

DEPARTMENT OF FOOD AND AGRICULTURE—*Continued*

## h. Chemistry Laboratory Services

This element provides laboratory services for consumer and industry protection by:

Analyzing meat products, dairy products, feeds, fertilizers, livestock remedies and pesticides for label guarantees; analyzing milk, meat, produce, plant material, and agricultural commissioners' samples for pesticide residues; analyzing meat and milk for antibiotic and drug residues; analyzing feeds for toxins resulting from mold; and performing on location analyses of preharvest food samples and crop foliage to ensure workers' safety, and safety of food crops, and performing environmental pesticide monitoring utilizing two mobile laboratories which are on call for emergency pesticide situations anywhere in the State.

The budget year includes 13.8 positions to carry out additional workload under new departmental pesticide regulations. Several of these positions begin mid-year; therefore, 2.5 positions of salary savings are reduced from the budget year. The remaining 11.3 positions have all been distributed to other programs, so that the net positions for the chemistry laboratory remain the same.

## Program Effectiveness Measurements for Dairy Laboratory

Goal: All routine Dairy Laboratory samples are to be completed one week after receipt (eight days).	1978-79	1979-80	1980-81
Routine dairy completed within goal.....	95%	96%	97%

DEPARTMENT OF FOOD AND AGRICULTURE—*Continued*

## III. AGRICULTURAL MARKETING SERVICES

## Program Objectives and Description

California agriculture produces 200 different crops which enter state, national, and international commerce for human consumption and use. These commodities are faced with a myriad of potential problems in movement through the various trade channels. The objectives of this program are to assure orderly marketing, reduction of economic waste, adequate supply, consumer protection, and fair pricing practices. Agricultural Marketing Services fulfills its objectives by collecting and disseminating marketing and economic information, identifying and helping to resolve marketing problems, assisting the milk industry to maintain stability, and reviewing and helping to mediate problems between producers and handlers.

## Authority

Food and Agricultural Code, Division 18, Chapter 1; Division 20, Chapters 1, 6, 7; Division 21, Part 1, Chapters 1, 2, Part 2, Chapters 1, 2, Part 3, Chapters 1, 2, 3; Division 22, Chapters 1, 2, 3. U.S. Agricultural Marketing Act of 1946.

## a. Market News

The Market News element is operated jointly with the United States Department of Agriculture as the Federal-State Market News Service.

Agricultural marketing data is collected by telephone and by personal contact from farmers, buyers, dealers, shippers, auction sales companies, and others involved in the marketing process. All data is given to Market News representatives on a voluntary basis including confidential information such as an individual's or firm's selling prices, volume sold, volume processed, shipments, and market conditions. Information from the many sources is consolidated into Market News reports and disseminated to the public by telephone, teletype, radio, TV, printed reports, newspapers, and trade journals.

California markets the largest food and agricultural production of any state, with a large portion shipped to eastern consuming centers. The exchange of current marketing guidelines nationwide gives California the timely information needed to economically market several billion dollars worth of perishable food commodities each year. The unbiased third-party information provided by the Federal-State Market News Service assists in creating a better economic balance between buyer and seller, thereby benefiting both the producing and consuming public. *The budget year includes 1.7 personnel years associated with termination of salary savings for Section 27.2 of the Budget Act of 1979.*

## Output

	1978-79	1979-80	1980-81
Number of commodity prices reported.....	490,000	490,000	490,000

Reimbursements.....	—	—	—	1,028	—	—
Federal funds.....	—	—	—	103,850	119,476	119,476

## b. Agricultural Statistics

The California Crop and Livestock Reporting Service is a federal-state entity supported under a cooperative agreement between the Department of Food and Agriculture and the United States Department of Agriculture's Economics, Statistics, and Cooperatives Service. Funding is approximately two-thirds federal and one-third State. The responsibility of this office is to prepare and distribute statistics on California agriculture. These statistics are used as a basis for production and marketing decisions by those in agriculture and allied industries. The growing complexity of California agriculture has expanded the need for "farm facts" and increased the demand for their precision.

The statistical series provide estimates of acres planted and harvested, production, stocks, and utilization of crops. Forecasts of yield and production are issued monthly during the growing season. Also prepared and published are statistics covering inventory numbers, production, and prices of livestock and poultry and their products, and periodic reports of weather, crop and range conditions.

Newer sampling techniques and improved estimating procedures provide forecasts of production with greater precision than in past years. The improved estimating procedures include objective cotton and fruit counts, probability list sampling, area frame sampling, multiple frame sampling, and the use of aerial photography.

**c. Milk Marketing Program**

The Milk Marketing Program is authorized to establish the minimum prices paid to producers by handlers under standards established by the Legislature. The program also has responsibility for controlling unfair practices in the milk industry. These responsibilities include the filing of prices on dairy products and the prohibition against sales below cost which undermine competitive forces in the industry. After a public hearing and a finding that it is necessary, the Director may also establish minimum wholesale or minimum retail prices, or both, for a period of ninety days. The Director can extend such 90-day period, after public hearing, by one or more successive 90-day periods.

Another major responsibility is determining statewide dollar values of commercial uses of market milk. Under the standards of the Milk Pooling Act, this value is assigned monthly to producers based on their individual entitlements. Under the equalization standards of the Act, adjustments are made to producer entitlements from growth in the class one market.

A continuing audit program is maintained to verify uniform and impartial treatment to all parties subject to the program.

**d. General Marketing Services**

General marketing services include (1) identifying and analyzing agricultural marketing problems, attending and participating in industry meetings, counseling and recommending alternative procedures or solutions, stimulating and organizing industry efforts, making special reports, assisting in the formation of marketing commissions and responding to correspondence, inquiries, and requests from the general public, business, the Director's Office, and other governmental agencies; (2) assisting agricultural industries in analyzing their marketing problems and in preparing programs to meet these needs; (3) providing information and personnel to assist the Department in nutrition and food-related matters; (4) explaining to consumers and the general public the agricultural condition and the reasons certain activities, including those under marketing orders, are undertaken.

## DEPARTMENT OF FOOD AND AGRICULTURE—Continued

## e. Market Enforcement

Through licensing provisions of the Food and Agricultural Code, this element exercises control upon the activities of middlemen and processors of farm products to ensure fair marketing practices prevail.

Mandatory provisions require investigation and settlement procedures when complaints against handlers are received from producers or other suppliers of farm products. In the event that settlement negotiations are not successful, the authority provides for formal hearings where disposition of the complaint may be either by dismissal or disciplinary action against the licensee in the form of probation, suspension, or by revocation of his license. This activity is handled by a field staff under the supervision of regional administrators.

Preventive and deterrent effects are achieved through examination of licensee's records to assure that the licensee is conducting his business in an acceptable manner. This part of the activity is handled by auditing licensees.

Output	1978-79	1979-80	1980-81
Licenses issued .....	11,065	11,500	12,000

## f. Direct Marketing

The goal of the Direct Marketing program element is to encourage the establishment of additional marketing outlets that concentrate on the direct marketing of produce between the farmer and consumer. The activities of the program include: (1) assisting in the development of certified farmers' markets; (2) disseminating information pertaining to the program's activities via a monthly newsletter; (3) encouraging the formation of farm trail organizations; (4) providing information on the establishment of roadside stands; (5) bringing consumers and farmers together through a toll-free "hot line"; and (6) cooperating with other departments to further direct marketing activities. *The budget year includes two positions offset by 0.1 positions salary savings to implement a new program to encourage the development of farmers' markets in inner cities. These markets are intended to alleviate food distribution problems in urban areas which lack adequate market services.*

Output	1978-79	1979-80	1980-81

## g. Grain and Commodity Inspection

This element provides inspection and grade certification services for grains, rice, beans, peas, hops, hay, safflower, and certain processed commodities in cooperation with the United States Department of Agriculture. Authority is derived from the United States Grain Standards Act, Agricultural Marketing Act, and California law. An additional activity is supervision of or official weighing of grains shipped from and received by export elevators.

Grade and weight certificates issued by the Grain and Commodity Inspection element are generally accepted as proof of quality and quantity and are used as a basis for the export trade of grain and other commodities. Inspection offices are located throughout California wherever demand for services is sufficient. Except for export grain inspection and weighing activities, the services are voluntary. All services are completely supported by user fees.

Output	1978-79	1979-80	1980-81

## DEPARTMENT OF FOOD AND AGRICULTURE—Continued

## IV. FINANCIAL SUPERVISION OF LOCAL FAIRS

## Program Objectives and Description

The Division of Fairs and Expositions oversees the operation of 79 district, county, and citrus fairs. Approximately 10 million people attend these fairs during scheduled fair time yearly and 15 million use the facilities during the interim. A board of directors for each fair is charged with the responsibility for budgeting and orderly dispersal of funds with the approval of the Director of Food and Agriculture.

The program's objectives are: To assure that the operations are responsive to the needs and aspirations of the respective communities by working with the boards of directors; to assure that boards are exercising fiscal responsibility by reviewing fair budgets and contracts; to assure that all California citizens have the opportunity to participate in or attend a fair by constantly reviewing the changes in population and transportation patterns; and to assure that these objectives will be accomplished with the minimum expense of public funds.

## V. ASSISTANCE TO COUNTIES FOR AGRICULTURAL PURPOSES

The objectives of this program are to:

Secure more adequate and uniform enforcement of the provisions of the Food and Agricultural Code through sharing in the payment of salaries of county agricultural commissioners;

Participate in the preservation of prime agricultural lands under the authority of the Land Conservation Act of 1965; and

Partially reimburse counties for carrying out agricultural programs authorized by the Food and Agricultural Code under the supervision of the Department of Food and Agriculture.

Program Requirements	1978-79	1979-80	1980-81
Continuing program costs .....	\$2,282,439	\$3,309,065	\$2,756,703
<i>General Fund</i> .....	368,816	369,726	371,376
<i>Agriculture Fund</i> .....	1,913,623	2,939,339	2,385,327

## Program Elements:

a. Salaries of county agricultural commissioners.....	\$368,816	\$369,726	\$371,376
b. Payments to counties for agricultural programs .....	1,913,623	2,939,339	2,385,327

## a. Salaries of County Agricultural Commissioners

To secure more adequate and uniform enforcement of the provisions of the Food and Agricultural Code, the State participates in the payment of salaries of the county agricultural commissioners as provided by Sections 2221 through 2224 of the Food and Agricultural Code. Participation is limited to the lesser of \$6,600 per year or two-thirds of the salary of each commissioner. Fifty-eight counties are participating in this program in 1978-79.

Input	1978-79	1979-80	1980-81
Direct program costs ( <i>General Fund</i> ) .....	\$368,816	\$369,726	\$371,376

## b. Payment to Counties for Agricultural Programs

Section 8352 of the Revenue and Taxation Code provides for the annual transfer of gasoline taxes applicable to agricultural use from the Motor Vehicle Fuel Account, Transportation Tax Fund to the Department of Agriculture Fund (i.e. Agriculture Fund). Section 224(3) of the Food and Agricultural Code provides that of the funds transferred each year, the amount in excess of \$1,500,000 is to be paid to counties as partial reimbursement for county expenses incurred in carrying out agricultural programs authorized by the Food and Agricultural Code that are supervised by the Department of Food and Agriculture. These payments are apportioned to the counties by the Director of Food and Agriculture in the percentage relationship that each county's expenditures for the preceding fiscal year for such agricultural programs bear to the total amount expended by all counties.

Section 12112 of the Food and Agricultural Code provides that 50 percent of the moneys collected from licensing pesticide dealers shall be paid to counties for enforcement and administration of Chapter 7 of the Food and Agricultural Code. These payments are made to the county that the applicant indicates as his principal address at the time of payment of such fees.

Section 12539 of the Business and Professions Code provides that five-eighths of the moneys collected from licensing device repairmen shall be paid to the counties for enforcement of Division 5 (commencing with Section 12001) and Division 8 (commencing with Section 18400) of the Business and Professions Code. *Payments to counties pursuant to Section 12844 of the Food and Agricultural Code are now reported under Program X(d) (Pesticide Regulatory Program—Local Assistance).*

Input	1978-79	1979-80	1980-81
Direct program costs:			
Section 224(3) .....	\$1,865,000	\$2,890,796	\$2,336,784
Section 12112 .....	22,348	18,543	18,543
Section 12539 .....	26,275	30,000	30,000
Total Costs ( <i>Agriculture Fund</i> ) .....	\$1,913,623	\$2,939,339	\$2,385,327

DEPARTMENT OF FOOD AND AGRICULTURE—*Continued*

## VI. EXECUTIVE MANAGEMENT AND ADMINISTRATIVE SERVICES

## Program Objectives and Description

The objectives of this program are to provide active leadership to meet current and future agricultural problems, and to coordinate and provide major administrative, housekeeping, and business management services for all the programs of the Department.

Executive Management includes the executive leadership of the Director's office and the staff services associated with it. The Director's office sets policies and priorities which recognize and meet the current and long-range needs of the agribusiness community of this State and which help protect the health and welfare of its people. The Director's office interprets and explains to the public and the Legislature, the Department's decisions and actions which are developed to anticipate and meet the ever-changing needs of the agricultural industry and its impact on consumers and the environment.

Administrative Services includes the staff, management, and housekeeping services necessary for the effective operation of this Department. *The budget year includes 13 positions added with 0.6 positions of salary savings to assist in the administrative workload associated with the Pesticide Regulatory Program. In addition, 0.5 positions are added to reflect termination of salary savings associated with Section 27.2 of the Budget Act of 1979.*

## VII. UNCLAIMED GAS TAX AUGMENTATION

The purpose of this program is to provide contingency funds for agricultural emergencies in the budget year.

Section 8352 of the Revenue and Taxation Code provides for the annual transfer of unrefunded gasoline taxes applicable to agricultural use from the Motor Vehicle Fuel Account Transportation Tax Fund, Motor Vehicle Fuel Account to the Agriculture Fund.

Section 224(1) of the Food and Agricultural Code provides that of the funds transferred each year, \$500,000 is appropriated for reimbursement for charges for State administrative costs and for departmental and divisional overhead expense apportioned to the Agriculture Fund. The Agriculture Fund supports elements under both annual appropriation and continuing appropriations.

The portion of the \$500,000 applicable to the elements supported by annual appropriation is shown in the individual elements within this budget.

Section 224(2) of the Food and Agricultural Code provides that of the funds transferred, \$1,000,000 is appropriated for emergency detection, eradication, or research. If not used for the purpose in the year of transfer, the balance of any transfer is appropriated for payment in the following year to counties as reimbursement for their expenses in carrying out agricultural programs authorized by the Food and Agricultural Code.

In 1978-79, \$500,000 of the \$1,000,000 was allocated for Japanese Beetle detection activities at several California airports.

Within the program budget, this expenditure is included in the input cost of the program element (I.a.) administering the emergency project.

Program Requirements	1978-79	1979-80	1980-81

## DEPARTMENT OF FOOD AND AGRICULTURE—Continued

## VIII. SUPPLEMENTAL INFORMATION

The program elements outlined below are exempt from budgetary review under the provisions of Section 221 of the Food and Agricultural Code. The figures detailed in this program are being displayed for information only and are not included in overall budget totals. The Livestock Identification, Egg and Poultry Quality Control, Shipping Point Inspection, Canning Cling Peach Inspection, Canning Tomato Inspection, Wine Grape Inspection, and Onion and Garlic programs are supported by industry assessments and are subject to continuing appropriation as defined in the Food and Agricultural Code. The Marketing Trust program is supported by marketing trust monies collected by the Department under authority of the Marketing Act of 1937 and, as such, is subject to the controls of specific agricultural commodity groups and the various marketing advisory boards.

Program Elements	78-79	79-80	80-81	1978-79	1979-80	1980-81
a. Livestock Identification .....	93.5	88.8	88.8	\$1,980,149	\$2,361,686	\$2,378,861
b. Egg and Poultry Quality Control .....	55.8	62.8	62.8	1,986,859	2,482,226	2,592,764
c. Shipping Point Inspection .....	183.9	202	202	4,706,715	5,887,794	6,066,513
d. Canning Cling Peach Inspection .....	3.4	4.1	4.1	107,774	131,857	139,995

Total .....	546.5	575.1	575.1	\$11,884,683	\$16,145,201	\$16,550,739

## a. Livestock Identification

This activity protects livestock owners in California against loss of animals by theft or straying by: (1) registration of livestock brands, (2) inspection of cattle for ownership prior to transportation, sale or slaughter, and the recording of the information obtained by such inspection, and (3) giving assistance to local law enforcement officials with investigations and prosecutions involving cattle theft.

Livestock owners pay the total cost of the program including overhead charges. The primary sources of revenue are inspection and brand registration fees.

Output	1978-79	1979-80	1980-81
1. Value of theft deterrent factor .....	\$10,000,000	\$10,000,000	\$10,000,000

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures .....	93.5	88.8	88.8	\$1,980,149	\$2,361,686	\$2,378,861

## b. Egg and Poultry Quality Control

This element assures consumers that only wholesome products are marketed and that eggs being offered for sale are of the size and quality marked. Part of this activity is mandated by the Federal Egg Products Inspection Act. All processing plants producing liquid, frozen, or dried eggs must meet the facility, equipment and sanitary standards of the United States Department of Agriculture and operate under continuous inspection. This activity is fully reimbursed by USDA Certification of shell eggs and poultry to USDA standards is reimbursed fully from industry paid fees. The enforcement of California's shell egg standards is achieved through county agricultural commissioners. This activity is paid for through a mill tax on each dozen eggs sold.

Output	1978-79	1979-80	1980-81
1. Dozens of eggs inspected under California standards .....	30,809,337	31,000,000	31,000,000
2. Dozens of eggs rejected .....	2,959,280	2,800,000	2,850,000
3. Eggs graded under U.S.D.A. standards (dozens) .....	158,050,490	159,000,000	159,500,000
4. Pounds of egg products inspected for wholesomeness .....	119,082,166	119,900,000	120,000,000
5. Pounds of poultry graded under U.S.D.A. standards .....	343,151,704	343,200,000	343,200,000

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures .....	55.8	62.8	62.8	\$1,986,859	\$2,482,226	\$2,592,764
Agriculture Fund .....				1,468,584	1,769,594	1,899,335
Federal fund .....				518,275	712,632	693,429

## c. Shipping Point Inspection

The objective of this element is to fill a need in the marketing system for unbiased inspection certification by furnishing third party inspection service when requested by industry and approved by the Director. This service provides applicants with a certificate that, based on federal, State, or industry standards that accurately describes the quality, condition, grade and size of fresh fruits, nuts and vegetables grown in California and destined for commercial resale or processing usage.

The major benefits are the establishment of an orderly marketing condition, assurance of maximum protection to the allied segments of the agricultural industry, and minimization of losses to producer, processor, buyer, receiver and carrier. Further residual benefits are received by the consumer. Through quality control and economical marketing, both better acceptance and monetary savings are realized.

Shipping Point Inspection is funded by fees charged for inspection and certification of California produce.

Output	1978-79	1979-80	1980-81
1. Pounds of fresh products inspected (1000 lbs.) .....	4,407,900	4,500,000	4,500,000

Expenditures .....	183.9	202	202	\$4,706,715	\$5,887,794	\$6,066,513

## DEPARTMENT OF FOOD AND AGRICULTURE—Continued

## d. Canning Cling Peach Inspection

The purpose of this element is to inspect each load of cling peaches destined for processing for quality; assure the Processors' Cling Peach Advisory Board, which operates under a State marketing order program, that quality information is accurate; assure that inspection procedures are uniformly applied statewide; and provide these services economically, efficiently, and safely.

The major benefit of this program is the protection and assistance given to the producer and processor by an impartial third party by providing accurate and uniform analysis of all loads and issuance of an inspection certificate which provides a communicative link between producer and processor used as a basis for payment.

The cost of the program is borne solely from processor assessments levied on a tonnage fee basis.

Output	1978-79	1979-80	1980-81
1. Number of tons inspected .....	614,158	700,508	650,000
2. Number of loads inspected .....	83,439	91,357	85,000
3. Percent of loads rejected .....	0.7%	0.3%	0.5%

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures .....	3.4	4.1	4.1	\$107,774	\$131,857	\$139,995

## e. Canning Tomato Inspection

The purpose of this element is to inspect each load of tomatoes destined for processing for quality and color; assure industry that grade and color information is accurate; assure that inspection procedures are uniformly applied statewide; and provide this service economically, efficiently, and safely.

The major benefit of this program is the protection and assistance given to the producer and processor by an impartial third party by providing accurate and uniform analysis of every load of canning tomatoes and issuance of an inspection certificate which provides a communicative link between producer and processor used as a basis for payment.

The program is entirely self supporting. The inspection fee is shared equally by the producer and processor.

Output	1978-79	1979-80	1980-81
1. Tons of tomatoes inspected .....	5,504,152	6,700,000	6,500,000
2. Loads of tomatoes inspected .....	226,118	268,000	260,000
3. Soluble solids and peelability tests (loads) .....	50,424	59,000	57,000
4. Soluble solids only .....	99,062	125,960	122,000

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures .....	156.8	158.1	158.1	\$2,198,113	\$3,854,595	\$3,902,394

## f. Wine Grape Inspection

The purpose of this element is to inspect loads of wine grapes destined for processing for quality and foreign material; test for soluble solids (sugar content) when grapes are sold on the basis of soluble solids; assure industry that grade and soluble solid information is accurate; assure inspection procedures are uniformly applied statewide; and provide these services economically, efficiently, and safely.

The major benefit of this program is the protection and assistance given to vintners and grape growers by an impartial third party by providing accurate and uniform analysis for each vintner requesting this service and issuance of an inspection certificate which provides a communicative link between producer and vintner which may be used as a basis for payment.

The total cost of the program is paid through inspection fees charged vintners requesting the service.

Output	1978-79	1979-80	1980-81
1. Tons of wine grapes inspected for soluble solids .....	1,784,365	1,962,801	2,000,000
2. Number of loads inspected .....	89,986	98,000	100,000
3. Number of wineries .....	36	35	37

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures .....	19.1	21.7	21.7	\$334,564	\$437,046	\$454,630

## g. Marketing Trust

The Department provides administrative, marketing, accounting and investment services to a varying number of marketing order programs (31 this current year). Activities currently carried on under the marketing orders include the establishment of quality regulations with inspection, prohibition of unfair trade practices, market development through advertising and sales promotion, and research for various farm products at a cost of \$31 million in 1977-78.

The major benefit of this program is the protection provided to the consumer by assuring an adequate supply of pure and wholesome food products at a fair and reasonable price. The total cost of promoting an orderly marketing program is paid by the producers and processors through fees and assessments. There are approximately 463 exempt advisory board employees involved in the various phases of the program of which 258 are hired on a seasonal basis for a two-month period. The personnel years and dollars shown below reflect the civil service employees within the Department that are involved in the centralized administration of the various advisory boards. These services are paid for by the boards.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures .....	24.3	25.5	25.5	\$498,634	\$711,827	\$731,972

DEPARTMENT OF FOOD AND AGRICULTURE—*Continued*

## h. Onion and Garlic Inspection

The purpose of this element is to inspect all sale or contract deliveries of onions and garlic destined for dehydration. This program element is exempt from budgetary review under the provisions of Section 221 of the Food and Agricultural Code.

The program assures that grade standards are applied uniformly and accurately statewide and that the inspection is done economically, efficiently, and safely.

The primary benefit of the program is the accurate and uniform analysis of every load requiring inspection and the issuance of an inspection certificate which provides a communicative link between the grower and dehydrator for payment purposes.

The program is entirely self-supporting. The inspection fee is shared equally by the grower and dehydrator. *This program was implemented in 1978-79 as a result of Chapter 887, Statutes of 1978. 1979-80 figures represent the full year costs of implementation.*

Output	1978-79	1979-80	1980-81
1. Loads of onions inspected .....	3,918	13,500	13,500
2. Loads of garlic inspected .....	487	4,000	4,000
<b>Input</b>	<b>78-79</b>	<b>79-80</b>	<b>80-81</b>
Expenditures .....	9.7	12.1	12.1
	1978-79	1979-80	1980-81
	\$71,875	\$278,170	\$283,610

## IX. RURAL AND MIGRANT AFFAIRS

In conformance with Executive Order B-17-76, the Health and Welfare Agency, through the Rural and Migrant Affairs Coordinator, is undertaking a comprehensive review of all services to the rural and migrant populations. This Department provides services to a segment of the clientele group and is identifying resources expended for them as an informational (non-add) item in this budget. The estimated expenditures are included in the Pesticide Control Element of the Food and Agricultural Standards and Inspection Service Program.

The Department, through its pesticide control program, regulates chemicals sold for pest control to assure that the use of these products will not lead to adverse effects on the population or the general environment. One of the specific objectives of this program is the protection of agricultural workers who regularly apply pesticides, cultivate, or harvest treated crops. This objective is accomplished by establishing reentry times, performing field worker reentry safety studies, investigating pesticide related illness, measuring and restricting toxicity levels, and environmental monitoring.

The expenditures shown below represent a current estimate of the Department's involvement in pesticide activities which are related to rural and migrant affairs. These amounts may vary as other departmental programs are reviewed for impact on these populations.

Input	1978-79	1979-80	1980-81
Vocational education .....	(\$19,633)	(\$20,627)	(\$20,600)
Occupational health investigations .....	(145,000)	(145,000)	(145,000)
Senior Environmental Aide Program .....	(60,000)	(100,000)	(100,000)
Totals, Expenditures .....	(\$224,633)	(\$265,627)	(\$265,600)

## DEPARTMENT OF FOOD AND AGRICULTURE—Continued

## X. PESTICIDE REGULATORY PROGRAM

## Program Objectives and Description

The Department of Food and Agriculture's Division of Pest Management, Environmental Protection and Worker Safety is responsible under existing State law and under delegations of authority by the Environmental Protection Agency for registering all pesticides prior to sale for use in California as well as regulating and controlling pesticide use. This responsibility requires close liaison with county agricultural commissioners, Federal agencies, universities and private industry to establish and effectively enforce regulations, to monitor agricultural productivity, to determine environmental contamination associated with the use of pesticides, and to protect worker safety, and to promote integrated pest management. California is one of the most diverse agricultural areas in the world; the State's unique pest control problems necessitate a regulatory program which allows both maximum production levels and preservation of the environment, public health and safety.

The Division of Pest Management, Environmental Protection and Worker Safety was created in 1977 from various existing programs and staff to strengthen the Department's pesticide program. This reorganization was intended to 1) give more emphasis to protecting farm workers and the public from pesticide hazards, 2) reduce reliance on toxic pesticides by fostering non-chemical methods of pest management, including biological controls, and 3) balance the pesticide needs of agriculture with protection of the environment. The Division is comprised of four units: Pesticide Enforcement, Pesticide Registration (both reported under the program "Pesticide Control"), Environmental Monitoring and Pest Management, and Worker Health and Safety.

In 1977, the Attorney General's Office ruled that an environmental impact report (EIR) was required prior to an agricultural application of a pesticide to assure compliance with the California Environmental Quality Act (CEQA). Recognizing that this requirement could cripple agriculture, the Legislature proposed a compromise solution in Chapter 308, Statutes of 1978: the Department of Food and Agriculture was instructed to construct a statewide pesticide regulatory program which would safeguard public health and the environment without placing unreasonable restrictions upon farmers.

The Department solicited input from both agricultural and environmental protection groups and drafted its proposed program in cooperation with other State departments. On November 1, 1979, the Pesticide Regulatory Program was submitted to the Secretary of the Resources Agency for certification under CEQA as required by Chapter 308, Statutes of 1978.

The new program is a combination of existing, revised, and totally new regulations which together establish State policy regarding safe and effective pesticide use. Enforcement of the regulations will be carried out cooperatively by State and local government staff. At the local level, county agricultural commissioners are charged with limiting pesticide use to that which is economically necessary and environmentally safe (see Program X(d) for costs associated with county pesticide regulatory activities).

At the State level, pesticide registration activities will become significantly more controlled. A pesticide will be registered or reregistered for sale in California only after a favorable review has been made of all impact data generated by the manufacturer or the Department, or submitted for review by the public.

Implementation of the new and revised features of the Pesticide Regulatory Program will require major increases in resources. Increased funding for State operations is being proposed from a combination of General Fund monies (\$3,690,169) and a \$2,600,000 increase in pesticide registration fees (the latter will require legislation). Increased funding for county activities is proposed entirely from the General Fund (\$4,880,461). Current year implementation of only the revised registration procedures is being proposed from within the Department's existing resources.

## a. Pesticide Control

Over 25 million acres of agricultural cropland plus a great number of gardens, industrial areas, and stored products are treated annually with pesticides. In calendar year 1978, \$523 million worth of pesticides were reported sold in California. This element's goal is to protect consumers, farm workers, and the environment from dangers inherent with the improper or uncontrolled use of pesticides through its registration, licensing, monitoring, and inspection activities.

California annually registers pesticides prior to sale. The registration process requires thorough and continuing evaluation of each product label claim for clarity, technical accuracy, and compliance with federal and State laws and regulations. Inspection, sampling and testing of pesticide products are performed to assure that they are registered, properly labeled, and that ingredients conform to label statements. Unlabeled, misbranded, or deficient products are quarantined from sale and subject to further enforcement actions.

Applicants for agricultural pest control operator, pesticide dealer, agricultural pest control adviser licenses, and agricultural pilot and commercial applicator certificates must demonstrate competency by written examinations. If successful, they are licensed to operate. Regulations are developed and adopted to establish operating standards for users of pesticides.

Farm commodities used as food or feed are sampled and laboratory tested for pesticide residue. Products found with illegal residues are quarantined and removed from sale. Follow-up investigations are made to correct possible improper practices.

Coordination is maintained with county agricultural commissioners, the Departments of Health Services and Industrial Relations, the US Food and Drug Administration, and the US Environmental Protection Agency in pesticide regulatory activities. Assistance is given to county agricultural commissioners in developing and executing local programs for regulation of pesticides.

*New pesticide registration procedures under the Pesticide Regulatory Program are being implemented in the current year within existing resources. These new procedures will require favorable review of more comprehensive impact data before a pesticide is registered or reregistered for sale in California. The budget year includes 20 positions for pesticide enforcement activities and 26 positions for pesticide registration to carry out additional workload required under new departmental pesticide regulations. Several of these positions will begin mid-year in 1980-81; therefore, 8.2 positions in salary savings are included in the budget year. The budget year also includes 5 positions associated with the termination of salary savings for Section 27.2 of the Budget Act of 1979.*

## DEPARTMENT OF FOOD AND AGRICULTURE—Continued

## b. Pest Management and Environmental Monitoring

The purpose of this element is to integrate environmental considerations in the execution of departmental objectives which ensure abundant quantities of wholesome food while ensuring the public health, safety, and welfare.

The program meets its responsibility through the following activities:

Developing and establishing the best scientific integrated pest management techniques through use of biological, cultural, chemical and varietal methods of control, including the optimum use of biological controls in pest eradication programs for which the Department has present responsibility; Developing methods for accurately determining crop losses due to air pollution, developing the capability to predict such losses, and identifying air pollution sensitive plant varieties;

Monitoring limited environmental sites by collecting and analyzing samples of air, water, vegetation and other media to detect the level of any pesticide residues that may be present, and evaluating the significance of the findings;

Evaluating the adequacy and uniformity of county standards in the permit process for possession and use of restricted pesticides, evaluating the pest control licensing standards in terms of the division's mission and goals, and providing recommendations for improving the program.

*The budget year includes 20 positions for environmental monitoring and integrated pest management activities to carry out additional workload required under new departmental pesticide regulations. Several of these positions will begin mid-year in 1980-81; therefore, 5.6 positions in salary savings are included in the budget year.*

*In addition, three positions are added in the budget year with 0.1 positions of salary savings to implement a pilot urban pesticide information project supported by the California Environmental Protection Fund.*

Output	1978-79	1979-80	1980-81

	-	-	128,298
	50,172	35,286	35,069

## c. Worker Health and Safety

There are over 300,000 agricultural workers who may be exposed to pesticides used in California either through incidental exposure where residues accumulate on foliage and plant surfaces or directly in mixing and handling pesticides. The goal of this element is to provide increased protection for workers and the public in general from the potentially harmful effects of pesticide products in their environment. In meeting this goal, the program performs the following activities in cooperation with the Department of Health Services and the Department of Industrial Relations:

Reviews toxicological and human experience data concerning the hazards of pesticides proposed for use or in use and recommends appropriate actions.

Conducts tests of pesticide residues on plant surfaces in soil, in water, and in the air, establishes worker reentry standards, and prepares regulations and recommends registration actions to establish requirements for safe working conditions;

Evaluates adequacy of medical supervision provided by employers and responds to requests for sources of medical information;

Reviews and investigates reported pesticide-related exposures and compiles informative summaries to determine the courses and remedial action necessary in terms of packaging, labeling, handling, applicator techniques, registrations actions and regulation changes.

The program also assists county agricultural commissioners with investigations of pesticide-related accidents of all kinds and cooperates in a sponsorship role with a HEW program to assist in a related effort (Program IX).

*The budget year includes 39.5 positions for worker health and safety activities to carry out additional workload under new departmental pesticide regulations. Many of these positions will begin mid-year in 1980-81; therefore, 15 positions in salary savings are included in the budget year.*

*In addition, the budget year reflects the replacement of federal funding for the Volatile Pesticide Monitoring Program with General Funds and an increase of 1.9 positions.*

## DEPARTMENT OF FOOD AND AGRICULTURE—Continued

## d. County Pesticide Regulatory Activities

The Pesticide Use Enforcement program primarily involves the County Agricultural Commissioner's staff enforcing the day-to-day use of pesticides at the application site, with the State providing coordination, supervision, training, and overview controls necessary to keep the program uniform.

The Commissioners receive financial assistance for county enforcement of State pesticide regulations through Section 12844 of the Food and Agriculture Code. Payments are apportioned to the counties in the percentage relationship that each county's expenditures bear to the total amount expended by all counties for such payments.

Under the proposal submitted to the Secretary of the Resources Agency on November 1, 1979, to comply with Chapter 308, Statutes of 1978, the new pesticide enforcement regulations will greatly increase the workload for the county agricultural commissioners. Under the program, farmers will be required to submit for each crop a pest management plan detailing planned pesticide use and consideration of alternative methods of pest control. In calendar 1980, this plan constitutes a use permit in all but environmentally sensitive areas, and subsequent pesticide use under this plan requires only a 24-hour advance "notice of intent" from the farmer to the county agricultural commissioner. In areas designated by the commissioner as environmentally sensitive, each use of a pesticide will require a separate permit which identifies the time and site of pesticide application.

In calendar 1981, the program intensifies by requiring a site/time-specific permit for every application of a pesticide. In effect, the whole State will be designated as environmentally sensitive. The program also immediately extends the commissioner's responsibility to regulate nonagricultural pesticide use and mandates on-site inspections of pesticide application.

It is estimated that these new responsibilities will increase staff for county agricultural commissioners by 143 personnel years (local) in 1980-81. The funding for additional county regulatory activities is being proposed from the General Fund (\$4,880,461) and will be distributed to counties under a subvention program.

Transfers from Motor Vehicle Fuel Account, Transportation Tax Fund.....	3,365,000	4,390,796	3,836,784
Totals, Resources .....	\$38,153,739	\$45,086,359	\$48,740,413
Expenditures:			
Support .....	14,002,340	18,856,232	21,724,282
Appropriations prescribed by Section 224(1) and (2) of the Food and Agricultural Code.....	929,236	1,500,000	1,500,000
Local Assistance:			
Pesticide dealers license fees .....	22,348	18,543	18,543
Pesticide mill tax assessments.....	2,619,983	3,187,500	3,500,000
Measuring devices .....	26,275	30,000	30,000
Unclaimed gas tax (Section 224(3)).....	1,865,000	2,890,796	2,336,784
Totals, Expenditures <sup>1</sup> .....	\$19,465,182	\$26,483,071	\$29,109,609
Accumulated Surplus, June 30 .....	\$18,688,557	\$18,603,288	\$19,630,804
Surplus available for appropriation .....	15,650,594	15,647,975	16,758,141
Investment—Department of Agriculture Building Fund .....	3,037,963	2,955,313	2,872,663

<sup>1</sup> Does not agree with Controller's financial statement as this report does not include revenues or expenditures under provisions of Sections 221 and 27554, Food and Agricultural Code.

<sup>2</sup> A \$2,600,000 proposed increase in pesticide registration fees included in the revenue for the Agricultural Fund requires legislation.

<sup>1</sup> Position starts January 1, 1981.<sup>2</sup> Position starts October 1, 1980.

For list of standard (lettered) footnotes, see the end of the Governor's Budget.

## FINANCIAL ASSISTANCE TO LOCAL FAIRS

This program is designed to provide financial assistance for:

- a. The encouragement of 80 county, district, and citrus fruit fairs on the basis of need;
- b. Fair projects involving public health and safety, major and deferred maintenance, vocational education, emergencies, physical changes to the fair site, protecting the fair property, and acquisition or improvement of any property or facility that will serve to enhance the operation of the fair;
- c. Permanent improvements of real property and equipment for fair purposes;
- d. Exhibition of the State's industries, resources, and products with a view toward improving, encouraging, and stimulating them.

California's fairs derive their State support from horseracing license fees. These fees are deposited in the Fairs and Exposition (F&E) Fund and are distributed by the Department of Food and Agriculture through a series of allocations, specific statutory appropriations, and loans.

Chapter 952 of the Statutes of 1979 revised the revenue structure of the F&E Fund by permitting all money deposited with the Fund to be allocated, with no reversion of unexpended funds to the General Fund. New appropriation language ties the growth in total appropriations for fairs' financial assistance to the growth rate for parimutuel betting. Support allocations, which previously had been a maximum of \$65,000 per fair, have been raised to an \$85,000 maximum.

Chapter 952 took effect January 1, 1980, but failed to provide a transition from previous funding statutes. Without corrective legislative action, the F&E Fund will receive and appropriate horseracing revenue under both the new and old statutes in the current years, totalling approximately \$14.4 million more than what would have been allocated had Chapter 952 been in effect during the entire fiscal year. This budget proposes the reversion of that one time availability of \$14.4 million. Current year expenditures for fairs' financial assistance are therefore higher than the budget year due only to prior year balances carried forward.

### Program Requirements

	1978-79	1979-80	1980-81
Financial assistance to local fairs.....	\$14,423,990	\$19,547,238	\$15,392,224

Totals, Expenditures .....	\$15,951,985	\$21,607,627	\$17,322,680
Accumulated surplus, June 30 .....	\$6,803,031	\$1,575,373	\$1,575,373

<sup>1</sup> This revenue deposit in the current year includes amounts for operation of the Horse Racing Board, California State Fair, fairs' financial assistance, unemployment insurance, and the Division of Fairs, Food and Agriculture.

<sup>2</sup> Revenue to General Fund in the current year reflects proposed Budget Act language to revert surplus monies in excess of amounts which fairs would have received had Chapter 952, Statutes of 1979, been in effect throughout 1979-80.

<sup>3</sup> The transfer to the General Fund of the principal and interest due from loans reflects proposed Budget Act language.

## DEPARTMENT OF INDUSTRIAL RELATIONS

The objective of the Department is to foster, promote, and develop the welfare of the wage earners of California, improve their working conditions, and advance their opportunities for profitable employment. The Department is continually working toward the realization of this objective by enforcing the compulsory Workers' Compensation Insurance Law and adjudicating workers' compensation insurance claims, by preventing industrial injuries and deaths; by promulgating and enforcing laws relating to wages, hours, and conditions of employment; by promoting apprenticeship and other on-the-job training; by preventing discrimination in employment and housing; by assisting in negotiations with parties in dispute when a work stoppage is threatened; and by analyzing and disseminating statistics which measure the condition of labor in the State.

*The Governor's Reorganization Plan No. 1 abolishes the Division of Fair Employment Practices within the Department of Industrial Relations and creates the Department of Fair Employment and Housing within the State and Consumer Services Agency and the Fair Employment and Housing Commission within the Department. Detail discussion of existing programs to prevent discrimination in employment and housing will be found in the new Fair Employment and Housing Department budget presentation. Reported in this presentation is the summary information of the Department's operation for the 1978-79 fiscal year.*

### SUMMARY OF PROGRAM REQUIREMENTS

	1978-79	1979-80	1980-81
I. Regulation of Workers' Compensation Self-Insurance Plans.....	\$451,126	\$718,216	\$925,595

### SIGNIFICANT REORGANIZATION/PROGRAM CHANGES

Program	Description	Personnel years		Dollars	
		1979-80	1980-81	1979-80	1980-81
IIIa.	Adjudication of workers' compensation disputes. Establishment of 22 positions in budget year for the conference program and to reduce backlog .....	-	22	-	\$574,451
III d.	Supervising the rehabilitation of disabled workers—increased workload .....	-	19	-	367,419
IVa.	California Occupational Safety and Health: Cal/OSHA—establishment of 5 positions in the current and budget years to provide staff for a technical and research development unit .....	5	5	-	212,496
IVa.	California Occupational Safety and Health: CAL/OSHA—establishment of 8 positions for the control, monitoring, and emergency response to conditions relating to toxic substances .....	-	14	-	569,414
VIa.	Promotion, development, and administration of apprenticeship and on-the-job training: establishment of 10 positions in the current and budget years to increase the training program for youth and the economically disadvantaged .....	10	10	140,000	281,544
VIII.	The prevention and elimination of discrimination in employment and housing program transfers to the new Fair Employment and Housing Department .....	-241	-171	-4,816,806	-

### I. REGULATION OF WORKERS' COMPENSATION SELF-INSURANCE PLANS

#### Program Objectives and Description

An employer may meet the statutory requirement of providing workers' compensation benefits for his employees by obtaining a certificate of consent to self-insure. A certificate is issued after the employer has proved to the satisfaction of the Director of Industrial Relations. That it has the financial ability to pay normal and catastrophic losses over a long term, maintain an effective safety program and provide prompt and competent delivery of benefits. A security deposit is required and the amount of the deposit is revised periodically. The benefit delivery systems of self-insurers are audited on a three-year cycle to make certain all benefits are paid promptly and in full. A part of this three-year audit is a reevaluation of the self-insurer's financial strength. Program advice and education are provided to self-insurance plan administrators.

DEPARTMENT OF INDUSTRIAL RELATIONS—*Continued*

## Authority

Labor Code, Sections 129, 3700 through 3705 inclusive.

General Fund .....				19,364	227,653	279,948
Reimbursements .....				431,762	490,563	645,647

## Program Elements

a. The review and analysis of self-insurance plans .....	8.6	9.7	15.5	\$242,545	\$277,000	\$442,272
b. The determination of ability to self-insure and the maintenance of security deposits .....	7.8	7.8	8	189,217	221,606	225,504
c. Claims Audits, Public Entities .....	.7	2.8	3.7	19,364	219,610	257,819

## a. The Review and Analysis of Self-Insurance Plans

To make certain that benefits are paid promptly and in full, the Labor Code mandates that all self-insured employers shall be audited within a three-year cycle.

Each year, there is an increasing number of agencies competing for the business of adjusting claims as well as a large turnover in the approximately 500 persons administering self-insurance. Each change requires a determination by written test as to the competency of the administrator. Instruction in workers' compensation laws and procedures is given to these individuals to raise the standard of quality of self-insurance plans.

Four field representatives and two office assistants II (typ) are proposed in the budget year for increased workload for a cost of \$155,084 (reimbursements). The salary savings expected from these positions is 0.4. Because reductions made pursuant to Section 27.2 of the Budget Act of 1979 do not continue into the budget year, an additional 0.2 personnel years are available in the budget year.

Output	1978-79	1979-80	1980-81
Locations audited .....	189	210	210
Cases reviewed .....	19,900	23,500	23,500

Expenditures .....	8.6	9.7	15.5	\$242,545	\$277,000	\$442,272

## b. The Determination of Ability to Self-Insure and the Maintenance of Security Deposits

When an employer applies for permission to self-insure, special emphasis is placed on the solvency of the employer, accident prevention, and his ability to fulfill his obligations under the Workers' Compensation Law. If the application is approved, the applicant is required to post a deposit which can be called in the event of insolvency. Revisions of deposits are, for the most part, based on annual reports which the self-insurers are required to submit.

Because reductions made pursuant to Section 27.2 of the Budget Act of 1979 do not continue into the budget year, an additional 0.2 personnel years are available in the budget year.

Output	1978-79	1979-80	1980-81
Number of self-insurers .....	1,335	1,450	1,525
Number of employees under self-insurance .....	1,735,000	1,900,000	2,100,000

Expenditures .....	7.8	7.8	8	\$189,217	\$221,606	\$225,504

DEPARTMENT OF INDUSTRIAL RELATIONS—*Continued*

## c. Claims Audits, Public Entities

The Labor Code mandates that the Director of Industrial Relations audit public employers other than the State of California to ascertain that injured employees receive promptly all workers' compensation benefits to which they are entitled.

*One field representative is proposed in the budget year for increasing workload in auditing self-insured public entities. Salary savings expected from this position is expected to be 0.1 personnel year.*

Output				1978-79	1979-80	1980-81

Expenditures.....	0.7	2.8	3.7	\$19,364	\$219,610	\$257,819

## II. CONCILIATION OF EMPLOYER-EMPLOYEE DISPUTES

## Program Objectives and Description

The objectives of the program are to protect the entire economy of the State and the well-being of employees in all categories by preventing or minimizing work stoppages, business interruptions, or the interruption of public services. It is the objective of the Conciliation Service to accomplish this on a voluntary basis by making skilled professionals available to disputing parties with the objective of achieving settlements that are within the means of those concerned and that prevent an adverse effect on the economy.

## Authority

The program is authorized by Section 65 of the California Labor Code, the labor provisions of the various Transit District Acts of the Public Utilities Code, the Meyers-Milius-Brown Act, the Educational Employment Relations Act, and local legislation deriving from these acts and the Agricultural Labor Relations Act.

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81

## a. Mediation and Conciliation of Employer-Employee Disputes in the Private Sector and Agriculture

This element includes the conciliation and mediation of labor disputes in the private sector and agriculture, representation determination in situations where federal or State statutes do not apply. It also includes factfinding arbitration, and preventive and advisory conciliation to facilitate negotiations without direct involvement.

*Because reductions made pursuant to Section 27.2 of the Budget Act of 1979 do not continue into the budget year, an additional 0.1 personnel years are available in the budget year.*

### III. PREVENTING, SETTLING, ADJUDICATING, AND ADMINISTERING DISPUTES UNDER WORKERS' COMPENSATION LAWS

## Program Objectives and Description

The Division of Industrial Accidents is a court of limited jurisdiction with exclusive constitutional and statutory powers to settle disputes between workers and employers or insurance carriers arising from work injuries. Referees hear and decide disputed claims on the basis of oral and written evidence. Notices issued by employers to injured workers concerning claimed benefits are monitored to forestall disputes, if possible. Establishment of minimum fees for physicians avoids other disputes. Rehabilitation plans for industrially injured employees are approved and enforced.

Objectives of the program are to: (1) prevent, settle, or adjudicate expeditiously, inexpensively, and without encumbrance of any kind, work-connected injury claims; (2) approve, coordinate, and enforce plans designed to rehabilitate injured workers to their most effective level of employment.

## Authority

Article XIV, Section 4 of the Constitution of the State of California and Divisions 1, 4 and 5 of the Labor Code.

## DEPARTMENT OF INDUSTRIAL RELATIONS—Continued

## a. Preventing, Settling, and Adjudicating Disputes under Workers' Compensation Laws

Special calendars such as pretrial, settlement, and conference are used to expedite the resolution of issues; disputes involving more complicated and complex legal matters are adjudicated by a formal hearing. Referee teams assisted by medical examiners and permanent disability rating specialists are assigned throughout 23 district offices to accomplish these procedures.

Twenty-two positions—five workers' compensation judges, five senior legal stenographers and twelve limited term office assistants II—are proposed in the budget year for the Conference Program and to reduce backlog. Total cost of these positions will be \$574,451 (General Fund). Because reductions made pursuant to Section 27.2 of the Budget Act of 1979 do not continue into the budget year, an additional 7.7 personnel years are available in the budget year.

Output	1978-79	1979-80	1980-81
New filings .....	114,426	123,580	133,466
Declaration of readiness to proceed .....	141,854	159,444	179,215
Dispositions .....	183,387	200,075	218,282
<b>Input</b>	<b>78-79</b>	<b>79-80</b>	<b>80-81</b>
Expenditures .....	606	569.4	599.1
	\$18,025,177	\$19,142,979	\$21,499,266

## b. Monitoring Promptness and Adequacy of Benefit Notices and Payments

The program promotes prompt payment or notice to injured workers regarding the status of their cases and, when they are in doubt, directs them to sources of information. Copies of notices involving benefit payments and of letters concerning nonpayment or reasonable delay are monitored. Promptness and accuracy of payment are promoted by publishing the comparative ranking of performance of first payment of claims by employers and insurance companies; this stimulated competition among employers and insurance carriers is aimed at improving performance.

Because reductions made pursuant to Section 27.2 of the Budget Act of 1979 do not continue into the budget year, an additional 0.1 personnel years are available in the budget year.

Output	1978-79	1979-80	1980-81
Benefit notice forms and letters processed .....	620,690	682,759	751,034
Clarification requests .....	18,284	20,122	22,134
<b>Input</b>	<b>78-79</b>	<b>79-80</b>	<b>80-81</b>
Expenditures .....	2	1.8	1.9
	\$140,298	\$151,859	\$157,531

## c. Collection of Nondependency Death Benefits

Under this program, the division collects the industrial death benefit from the employer or insurance carrier where the deceased employee leaves no surviving dependents. Emphasis is placed upon encouraging voluntary payment by the employer or carrier when the death is clearly industrial and reasonable search discloses no surviving dependents. Where questions of industrial causation or dependency exist, proceedings may be initiated by the division before the Workers' Compensation Appeals Board to obtain a decision on the division's possible entitlement to the benefit. Labor Code Section 4706.5(c) provides that revenue received is for support of the Subsequent Injuries Program.

Because reductions made pursuant to Section 27.2 of the Budget Act of 1979 do not continue into the budget year, an additional 0.1 personnel years are available in the budget year.

Output	1978-79	1979-80	1980-81
Notices of employee death received .....	552	565	584
Actual payments received .....	93	69	81
Amount of death benefits received .....	\$2,002,527	\$1,500,000	\$1,700,000
<b>Input</b>	<b>78-79</b>	<b>79-80</b>	<b>80-81</b>
Expenditures .....	1.2	1.8	1.9
	\$30,315	\$54,689	\$56,665

## d. Supervising the Rehabilitation of Disabled Workers

The Division of Industrial Accidents is required by Labor Code Section 139.5 to maintain a rehabilitation bureau to ensure the provision of rehabilitation benefits for injured workers. The Rehabilitation Bureau administers a reporting system for rehabilitation services, approves rehabilitation plans, and resolves disputes involving issues of rehabilitation and related benefits.

Nineteen positions—eight workers compensation assistants and eleven office assistants II (typ)—are proposed in the budget year for increased workload. Legislation is being sought to enable this program to recover the cost of reviewing rehabilitation plans. In anticipation of such legislation the proposed new positions are budgeted to be funded from reimbursements (\$367,619).

The salary savings expected from these positions is 0.3 personnel years.

DEPARTMENT OF INDUSTRIAL RELATIONS—*Continued***Output**

	1978-79	1979-80	1980-81

Expenditures.....	44.3	56.9	75.6	\$1,166,425	\$1,755,000	\$2,215,838

**e. Providing Workers' Compensation Benefits to Injured Workers of Illegally Uninsured Employers**

The Uninsured Employers' Fund (UEF), established by Labor Code Sections 3715-3729, provides workers' compensation benefits to injured workers whose employers are illegally uninsured.

The UEF Claims Unit of the Division of Industrial Accidents investigates, adjusts, and pays claims against the Uninsured Employers' Fund. The unit is also responsible for filing lien claims against illegally uninsured employers as well as collection of those claims with the assistance of the Attorney General's Office.

*Because reductions made pursuant to Section 27.2 of the Budget Act of 1979 do not continue into the budget year, an additional 0.2 personnel years are available in the budget year.*

**Output**

	1978-79	1979-80	1980-81

Expenditures.....	8.5	13.1	13.3	\$215,095	\$386,353	\$529,711

**f. Providing Information and Assistance on Workers' Compensation Benefits**

The Information and Assistance Program was created by the addition of Section 139.6 to the Labor Code which requires the Division of Industrial Accidents to establish a continuing program of information and assistance concerning the rights, benefits and obligations of the Workers' Compensation Law to employees and employers subject thereto. The goal of the Information and Assistance Program is the avoidance of unnecessary litigation and the concomitant reduction in time and costs to injured workers, their employers and to the taxpayers of the State of California.

*Because reductions made pursuant to Section 27.2 of the Budget Act of 1979 do not continue into the budget year, an additional 10.4 personnel years are available in the budget year.*

**Output**

	1978-79	1979-80	1980-81
Information on workers' compensation questions .....	74,000	96,200	130,500
Assistance on workers' compensation cases .....	146,000	186,200	207,000
Review of claims denied .....	11,000	13,300	17,200

**Input**

Expenditures.....	13.4	24.3	24.7	\$337,968	\$715,547	\$752,957

**g. Reviewing Adjudication of Disputes under Workers' Compensation Laws**

The Workers' Compensation Appeals Board (created by Section 110 through 138.2 of the Labor Code) reviews decisions of referees for errors of fact and law, occasionally decides cases directly (on a nonappellate basis) when justified by special circumstances, acts on petitions for disqualification of referees, acts on petitions for exhumation and autopsy, regulates the adjudicatory process, punishes for contempt, determines who may represent parties in the adjudicatory process, and participates as a party in the appellate review process. The goal of this program is to assure that disputes are resolved fairly and in accordance with law.

*One Legal Counsel II is proposed for twelve months in the budget year as Special Counsel to the Chairman to handle a growing contempt and disciplinary case load. The salary savings expected from this position is 0.1 personnel years which would normally increase personnel years to 41 for 1980-81. Because reductions made pursuant to Section 27.2 of the Budget Act of 1979 do not continue into the budget year an additional 0.7 personnel years are available in the budget year.*

**Output**

## DEPARTMENT OF INDUSTRIAL RELATIONS—Continued

## IV. THE PREVENTION OF INDUSTRIAL INJURIES AND DEATHS TO CALIFORNIA WORKERS

## Program Objectives and Description

To ensure safe and healthful working conditions for all California working men and women, this program enforces safety and health standards, investigates the causes of occupational deaths and injuries, and assists in encouraging employers to maintain safe and healthful working conditions by providing research, information, education, and training in the field of occupational safety and health.

## Authority

Labor Code: Division 1, Chapter 6 and 6.5, and Division 5, Part 1 through Part 8, inclusive.

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81

i. Cal/OSHA Program Office .....	4.8	4.9	4.9	119,295	146,013	156,441

## a. California Occupational Safety and Health

This element conducts safety and health compliance inspections under the California Occupational Safety and Health Act by engineers and industrial hygienists for the purpose of bringing about corrections of unsafe practices in all places of employment through the enforcement of State health and safety laws, rules, regulations, and standards.

This element also conducts special studies of target industries and initiates compliance actions in the case of violations.

There is a special unit which oversees use of carcinogens in industry and conducts education on carcinogens.

One pharmacology specialist, one epidemiologist, one staff services manager I, one associate industrial hygienist, and one stenographer are proposed as administrative adjustments in the current year and as permanent positions in the budget year to provide staff for a technical and research development unit. Eleven associate industrial hygienists, two research analysts II and one clerical position are proposed in the budget year as part of the Governor's interagency program for the control, monitoring, and emergency response to conditions created by the manufacturing, storage, transportation, and spillage of toxic substances.

These positions will permit the Department to intensify its efforts to control and eradicate the harmful effects of toxic substances in the workplace. With these positions the Department will be able to initiate health inspections, establish a 24-hour toxic alert system and provide more timely response to complaints of health hazards in the worker environment. Total cost of these increases will be \$569,414 of which \$284,707 will come from the General Fund and \$284,707 will come from Federal funds.

Nineteen associate industrial hygienists and supporting personnel currently assigned to investigate complaints of carcinogenic exposure are being integrated into full health compliance activities to facilitate better efficiency and economies.

The salary savings expected from these positions is 0.7 personnel year which would normally increase personnel years to 412.7 for 1980-81. Because reductions made pursuant to Section 27.2 of the Budget Act of 1979 do not continue into the budget year, an additional 1.8 personnel years is available in the budget year, bringing the total to 414.5.

\$108,790 of which \$54,395 is federal match, is included in the current year as a special item of expense in anticipation of claims resulting from the passage of AB 1300 which permits an employer to recover costs if it is found that a citation was the result of arbitrary or capricious action.

## c. Safety of Employees While Using or Repairing Elevators, Escalators, Aerial Passenger Tramways

This element involves conducting inspections of elevators, aerial tramway (ski lifts) equipment, movable amusement rides, and construction personnel hoists by safety engineers specializing in this work. This program also calls for related consultation, equipment approval, plan review, accident and complaint investigation, education, and safety code reviews. Fees are charged for inspection work and deposited in the General Fund.

*Because reductions made pursuant to Section 27.2 of the Budget Act of 1979 do not continue into the budget year, an additional 0.9 personnel years are available in the budget year.*

## Output

## d. Safety of Employees from Radiation

This element involves conducting safety compliance inspections under the California Occupational Safety and Health Act and the Atomic Energy Act of 1954 (as amended).

These inspections are performed to cover precicensing inspections of radiation users, follow-up inspections, complaints, accident investigations, the development of proposed standards, and the monitoring of contract county programs.

*Because reductions made pursuant to Section 27.2 of the Budget Act of 1979 do not continue into the budget year, an additional 0.1 personnel years are available in the budget year.*

DEPARTMENT OF INDUSTRIAL RELATIONS—*Continued*

## e. Safety of Employees from Pressure Vessel Failure or Malfunction

This element involves conducting field inspections of pressure vessels by safety engineers specializing in this work. The program also entails the shop inspection of new pressure vessels.

Related to this field inspection program are the section's permit-issuing activities along with consultations, plan review, accident investigation, education, and code review (boiler and fired pressure vessel safety orders, and unfired pressure vessel safety orders). Fees are charged for inspection work and placed in the General Fund.

*Because reductions made pursuant to Section 27.2 of the Budget Act of 1979 do not continue into the budget year, an additional 1.1 personnel years are available in the budget year.*

## f. Occupational Safety and Health Appeals Board

The Occupational Safety and Health Appeals Board is a quasi-judicial body (appointed by the Governor) empowered to settle disputes arising out of citations and civil penalties issued to California employers found to be in violation of health and safety codes by the Division of Occupational Safety and Health. Appeals from employers are heard by administrative law judges employed by the three-member board and written decisions are filed within 30 days after hearings. If any party to a hearing is dissatisfied with the decision of the administrative law judge, he may petition the Board for reconsideration. If a party is still dissatisfied after reconsideration, he may appeal to superior court.

*\$144,210 of which \$72,105 is federal match, is included as a special item of expense in anticipation of claims resulting from the passage of AB 1300 which requires the awarding of costs to an employer where it is determined that a safety or health citation was issued as a result of arbitrary or capricious action.*

*Because reductions made pursuant to Section 27.2 of the Budget Act of 1979 do not continue into the budget year, an additional 0.4 personnel years are available in the budget year.*

## g. Occupational Safety and Health Standards Board

The Occupational Safety and Health Standards Board has responsibility to adopt, amend, and repeal occupational safety and health standards, assuring as much as possible safe and healthful working conditions for California workers. The Board's objectives are to adopt reasonable and enforceable standards at least as effective as those promulgated by the federal OSHA program.

The Board also has the responsibility to grant or deny variances from adopted standards. Permanent variances requested by employers are granted by the Board if it determines that the methods used by the employer will provide equivalent health and safety to his employees as if he complied with the standard. Any employer or other person adversely affected by the granting or denial of a temporary variance from the Division of Occupational Safety and Health may appeal to the Board within 15 working days. Also, any interested person may propose new or revised standards or any other item concerning occupational safety and health to the Board.

The Board has primary responsibility for development of Occupational Safety and Health Standards in October, 1978 from the Division of Occupational Safety and Health.

*Because reductions made pursuant to Section 27.2 of the Budget Act of 1979 do not continue into the budget year, an additional 0.1 personnel years are available in the budget year.*

## DEPARTMENT OF INDUSTRIAL RELATIONS—Continued

## h. Cal/OSHA Consultation Service

This element provides on-site consultations—both safety and health—to all private-sector employers, at their request, to assist them in complying with government-imposed safety and health regulations. California recognizes the need to assist employers in achieving voluntary compliance with Cal/OSHA safety and health regulations through on-site consultations and employer/employee education as an alternative to correction of unsafe practices through enforcement/compliance. In addition, a need exists for greater understanding by employers of their obligations under the Federal or State OSHA Acts to encourage voluntary compliance. The interpretation of complex standards and the ability to recognize hazards pose difficulties for employers, particularly small business employers, who often lack the financial resources to utilize private consultants to assist them in understanding their obligations under the Act.

In addition to the 7(c)(1) contract which provides for 90 percent federal funding—10 percent State funding, the Cal/OSHA Consultation Service supervises ten staff persons funded 50/50 under the 23(g) grant (shown in Element a). This allows on-site consultations to be performed at the request of public agencies and also provides for the development of a training and education program for employers/employees. Employer/employee education and training is a vital activity in assisting employers to voluntarily comply with health and safety laws and to protect employees from job-related injuries and illnesses. In addition, it allows employers to effectively train their own employees.

Two management services technicians are proposed in the budget year to effect a telephone solicitation and scheduling program. The salary savings expected from these positions is 0.1 personnel year which would normally increase personnel years to 83.5 for 1980-81. Because reductions made pursuant to Section 27.2 of the Budget Act of 1979 do not continue into the budget year, an additional 1.3 personnel years are available in the budget year, bringing the total to 84.8.

## i. Cal/OSHA Program Office

The Cal/OSHA Program Office assists the Director of the Department of Industrial Relations (Designee for California's Occupational Safety and Health Program) in maintaining liaison between the State Program and Federal Occupational Safety and Health Program. The office prepares and coordinates reports dealing with program activities, coordinates State standards activities with federal requirements and assists in coordination of various functional elements within the State program.

## V. ENFORCEMENT AND PROMULGATION OF LAWS RELATING TO WAGES, HOURS, CONDITIONS OF EMPLOYMENT, AND LICENSING AND ADJUDICATION

## Program Objectives and Description

This program is to protect, foster, and develop the economic well-being of approximately 9,000,000 California workers. The absence of fair and reasonable labor standards results in inequitable and adverse working conditions for employees. The objectives are (1) the promulgation of Industrial Welfare Commission Orders which establish minimum wages and standards for hours and working conditions; (2) the enforcement of the Industrial Welfare Commission Orders and Labor Code sections; (3) the hearing, determination, and collection of wage claims, and (4) the licensing of farm labor contractors, industrial homeworkers, and talent agents.

## Authority

State Constitution, Section 1, Article XIV; Labor Code: Division 1, Chapter 2; Chapter 4, Section 95; Division 2, Part 4, Chapter 1; Division 2, Part 10; and Division 2, Part 6.

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81

b. Wages and standards enforcement .....	388	383.3	390.4	10,567,461	12,183,346	12,826,591
c. Special programs—licensing, adjudication, and workers' compensation insurance enforcement .....	25	23.4	24.7	885,383	960,364	1,030,272
d. Cal/OSHA anti-discrimination enforce- ment .....	3.7	7.9	8.1	118,885	296,537	308,617

## a. Promulgation of Labor Standards

The Industrial Welfare Commission has the authority and the responsibility for establishing minimum wages and working conditions. The Commission must review its orders at least every two years and the Commission must fix a new minimum wage whenever the federal rate exceeds the rates set by the Commission.

<b>Input</b>	<b>78-79</b>	<b>79-80</b>	<b>80-81</b>	<b>1978-79</b>	<b>1979-80</b>	<b>1980-81</b>
Expenditures.....	5.1	2.8	2.8	\$128,531	\$80,401	\$85,965

## b. Wages and Standards Enforcement

Provisions of the Industrial Welfare Commission Orders (which establish minimum wages and standards for hours and working conditions) and wage sections of the Labor Code are enforced by investigations, citations, and hearings, with criminal prosecutions as a last resort. Disputed or unpaid claims are determined by hearing and the filing of judgments with the Superior Court. *One special investigator is proposed in the budget year for enforcement of new requirements for produce unloaders in accordance with AB 3267 (Chapter 585, Statutes of 1978). The salary savings expected from this position is 0.1 personnel years which would normally increase personnel years to 384.2 for 1980-81. Because reductions made pursuant to Section 27.2 of the Budget Act of 1979 do not continue into the budget year, an additional 6.2 personnel years are available in the budget year, bringing the total to 390.4.*

<b>Output</b>	<b>1978-79</b>	<b>1979-80</b>	<b>1980-81</b>
Proceedings opened .....	55,592	57,000	59,000
Proceedings closed .....	56,597	57,000	57,000
Permits and licenses issued .....	14,283	15,000	15,000

<b>Input</b>	<b>78-79</b>	<b>79-80</b>	<b>80-81</b>	<b>1978-79</b>	<b>1979-80</b>	<b>1980-81</b>
Expenditures.....	388	383.3	390.4	\$10,567,461	\$12,183,346	\$12,826,591

## c. Special Programs—Licensing, Adjudication, Uninsured Employers' Fund, and Workers' Compensation Insurance Enforcement

Through the review of applications, contracts, and fee schedules, the Labor Commissioner as the regulatory authority may issue licenses to talent agents, farm labor contractors and participants in industrial homework. Formal hearings are held if a license is denied. The Labor Commissioner may issue rules and regulations to safeguard the public interest and can deny, suspend or revoke a license for causes set forth in the Labor Code. Routine inspections of premises, farm labor buses, and agriculture fields are made continuously to insure adequate health and sanitation facilities and to protect minors from hazardous employment.

*One senior special investigator is proposed in the budget year to help process the backlog of license applications for talent agencies. The salary savings expected from this position is 0.1 personnel year which would normally increase personnel years to 24.3 for 1980-81. Because reductions made pursuant to Section 27.2 of the Budget Act of 1979 do not continue into the budget year, an additional 0.4 personnel year is available in the budget year, bringing the total to 24.7.*

<b>Output</b>	<b>1978-79</b>	<b>1979-80</b>	<b>1980-81</b>
Controversies settled .....	29	50	60

## VI. PROMOTION, DEVELOPMENT, AND ADMINISTRATION OF APPRENTICESHIP AND OTHER ON-THE-JOB TRAINING

### Program Objectives and Description

To develop a maximum of on-the-job training opportunities in the State's industrial economy through apprenticeship and other on-the-job training programs. The State's youth, minorities, women, and veterans require an increasing number of job training opportunities in order to enter the skilled labor market.

The Division of Apprenticeship Standards develops apprenticeship and other on-the-job training programs in the private and public sectors (including correctional institutions) to assist industry to develop a trained labor force and also ensures equality of opportunity in apprenticeship and other on-the-job training.

The Division monitors and enforces state and federal regulations that cover the employment of apprentices (California Plan for Equal Opportunity in Apprenticeship) and also enforces state codes dealing with apprentices on public works. The Division also inspects, develops, and approves training establishments under contract with the United States Veterans Administration as authorized by Labor Code Section 3090.

### Authority

Labor Code Chapter 4, Division 3, and Chapter 1, Division 2, Sections 1777.5 and 1777.6

b. Veterans' benefit training.....	17	10.2	10.3	489,721	564,890	528,715

### a. Promotion, Development, and Administration of Apprenticeship and Other On-the-Job Training

The Division, as the staff for the Administrator of Apprenticeship and the California Apprenticeship Council (CAC), carries out the requirements of the Labor Code and the rules and regulations established by the CAC. These activities include: the development and expansion of on-the-job training programs with both the public and private employers; the development of apprenticeship in nontraditional occupations with special emphasis on health care services occupations, culinary crafts, electronics industry and the field of mental health; the enforcement of Section 1777.5 of the Labor Code requiring contractors to employ one apprentice for every five journeymen on public works contracts; providing more training opportunities for inmates and wards of correctional institutions to extend to the outside labor market after their release; and cooperation with other State agencies such as Youth Authority and Vocational Rehabilitation.

One project director, one program manager, one apprenticeship consultant, one accountant and one senior stenographer were extended through December 31, 1979 to continue development of a program for Licensed Psychiatric Technicians.

One project director, one apprenticeship consultant, one full-time stenographer and one half-time stenographer were extended through June 30, 1980 to continue development of apprenticeship programs for agricultural workers.

One secretary was administratively established in the current year (through December 31, 1979) for clerical support for the New Initiatives Program.

Ten positions—five apprenticeship consultants, two senior apprenticeship consultants and three office assistants II (typing)—are being administratively established in the current year and are proposed in the budget year for an interagency program with the Employment Development Department (\$281,544). These positions, limited to December 31, 1982, are to increase the training program which integrates classroom instruction with entry level and career worksite training for youth and the economically disadvantaged.

Eight positions—five apprenticeship consultants and three office assistants II (typing)—are eliminated in the current year and budget year. These positions were included in the 1979-80 Governor's Budget for an interagency agreement with the Employment Development Department (for a training program for youth); the Final Change Book did not reflect deletion of these positions, although funding ultimately was withheld.

An increase of 0.3 personnel years in 1980-81 is attributable to the fact that reductions pursuant to Section 27.2, Budget Act of 1979, are for one year only and do not continue into the budget year.

## DEPARTMENT OF INDUSTRIAL RELATIONS—Continued

## Output

## Promotion, Development, and Administration of Apprenticeship:

	1978-79	1979-80	1980-81
Number of active apprentices .....	42,331	45,200	47,000

Expenditures .....	120.1	128.9	119.7	\$3,820,271	\$4,301,192	\$4,125,428

## b. Veterans Benefits Training

The Division of Apprenticeship Standards under a continuing contract with the United States Veterans Administration promotes, inspects, approves, and monitors for compliance in accordance with VA regulations those training sponsors offering job training to Vietnam veterans. Through the Division's inspection and approval of training establishments, eligible Vietnam veterans receive training allowances.

Currently, there are over 1,800 training establishments approved with more than 3,500 veterans enrolled and receiving supplemental training benefits.

Three apprenticeship consultants and one stenographer are eliminated in the current year and budget year due to reduced funding from the Veterans Administration. Because reductions made pursuant to Section 27.2 of the Budget Act of 1979 do not continue into the budget year, an additional 0.1 personnel years are available in the budget year.

## Output

## VII. LABOR FORCE RESEARCH AND DATA DISSEMINATION

## Program Objectives and Description

Continuing expansion of the California work force requires urgent ongoing statistical and research information to provide an understanding of on-the-job safety and health as well as economic and industrial developments in both the private and public sectors.

The objectives of the program are to provide data for use in planning and executing safety programs; to measure the effectiveness of accident and illness prevention efforts in the work place; to provide accurate information pertaining to industrial relations from an impartial source on short notice; and to guide legislative and administrative decisions by State and local government. These objectives are met through the occupational injuries and illnesses statistics and industrial relations research programs which provide information on wage rates, working conditions, fringe benefits, work injuries, occupational diseases, industrial disputes, industrial relations practices, cost-of-living, and other studies related to labor.

## Authority

This program is required by the Labor Code: Division 1, Chapter 7, Sections 150-156; Division 2, Part 4, Chapter 1, Section 1202; Division 2, Part 7, Chapter 1, Article 2, Sections 1773.1-1773.8; Division 5, Part 1, Chapter 2, Sections 6409-6413.5; Public Utilities Code, Sections 465-467.

## DEPARTMENT OF INDUSTRIAL RELATIONS—Continued

## a. Occupational Injuries and Illnesses Statistics

To provide data on the incidence, severity, and trend of occupational injuries and illnesses, the Division of Labor Statistics and Research conducts an annual *Occupational Injuries and Illnesses Survey* among California employers. Conduct of the survey is mandatory for any state with an approved state plan under the Federal Occupational Safety and Health Act.

Supplementing the annual survey, the Division compiles statistics on the causes of occupational injuries and illnesses based upon individual injury reports filed by employers and physicians. Accident factors coded and analyzed include accident type, agency of injury or illness, nature of injury, part of the body affected, age, sex, and occupation of injured worker, county of occurrence, and industry. Data are used to pinpoint when, where, how, and why work-connected accidents or illnesses occur and are presented in a series of quarterly, annual, and special reports.

Under the California Occupational Safety and Health Act, the Division assumed jurisdiction over employer record keeping required by the act, including responsibility for promulgation of regulations, printing and distribution of forms and employer education regarding record keeping.

The Division of Labor Statistics and Research is party to grant agreements providing for 50 percent federal funding by the United States Department of Labor for all phases of the occupational injuries and illnesses statistics program.

Two research analysts I and one office assistant II are proposed in the budget year for the Occupational Disease Statistics Unit for statistical capability for processing occupational health data as part of the Governor's interagency effort for response to hazardous conditions and emergencies created by the manufacture, storage and transportation of toxic substances. Support for these positions will come from the General Fund (\$30,220) and Federal Funds (\$30,219).

The salary savings expected from these positions is 0.2 personnel years which would normally increase personnel years to 50.9 personnel years for 1980-81. Because reductions made pursuant to Section 27.2 of the Budget Act of 1979 do not continue into the budget year, an additional 0.8 personnel year is available in the budget year, bringing the total to 51.7.

## Output

Quantifiable output of the occupational injuries and illnesses statistics activity are shown below. The statistics the Division compiles, which serve to pinpoint accident and occupational disease factors and to measure prevention progress within various industries, are used by individuals responsible for giving direction to and implementation of occupational injury and illness prevention programs, both in government and private industry. Statistics alone cannot prevent accidents and exposures; but prevention efforts are successful only if based upon knowledge of past experience, and the work injury and illness statistics represent a source of such knowledge.

	1978-79	1979-80	1980-81
Number of reports distributed .....	14,230	23,000	25,000
Number of information requests .....	830	900	950
Number of employers' reports of lost-time injuries or illnesses received .....	368,000	370,000	370,000
Number of elements coded from employers' reports .....	2,606,300	2,806,100	2,713,300
Number of doctors' first reports of occupational injuries or illnesses processed .....	1,915,000	1,250,000	100,000

Expenditures .....	42.3	48.1	51.7	\$1,109,216	\$1,487,899	\$1,624,010

## b. Industrial Relations Research

The industrial relations research element carries out statistical and analytical activities designed to provide information that is of use in stabilizing collective bargaining relationships. This element maintains a reference file of both private and public sector collective bargaining agreements which provide the basis for most reports. This element also gathers information needed to make prevailing wage determinations for public works and for janitorial services in public utilities in accordance with Section 1773 of the Labor Code and Section 465 of the Public Utilities Code; conducts a biennial census of union membership; and, performs research on industrial relations and labor economics topics as required.

(b) One research analyst I and one statistical clerk are proposed in the budget year to accommodate increasing workload in the Public Sector Contract Analysis Unit. The salary savings expected from these positions is 0.1 personnel year which would normally increase personnel years to 19.2 personnel years for 1980-81. Because reductions made pursuant to Section 27.2 of the Budget Act of 1979 do not continue into the budget year, an additional 0.2 personnel year is available in the budget year, bringing the total to 19.4.

## Output

Output consists of information on provisions of collective bargaining agreements, wage rates, prevailing wage determinations, and other industrial relations subjects. This information is summarized in published reports and in unpublished compilations used to answer specific requests.

	1978-79	1979-80	1980-81

## DEPARTMENT OF INDUSTRIAL RELATIONS—Continued

## c. Data Processing

This element involves performing data processing systems design and analysis, programming, and generating computerized reports.

(c) One office assistant II position was administratively established in the current year and proposed in the budget year as a limited term position for clerical support for implementation of the computerized WCAB calendaring and case-tracking system. An additional limited term office assistant II position is proposed in the budget year for this purpose. (The personnel-years associated with these positions are displayed in Program X, Administration. Organizationally, the positions are distributed to Program VII.) Because reductions made pursuant to Section 27.2 of the Budget Act of 1979 do not continue into the budget year, an additional 0.3 personnel year is available in the budget year bringing the total to 41.

## VIII. THE PREVENTION AND ELIMINATION OF DISCRIMINATION IN EMPLOYMENT AND HOUSING

## Program Objectives and Description

The Governor's Reorganization Plan No. 1 abolishes the Division of Fair Employment Practices within the Department of Industrial Relations and creates the Department of Fair Employment and Housing within the State and Consumer Services Agency and the Fair Employment and Housing Commission within the Department. Detail discussion of existing fair employment practices program, will be found in the new department's budget presentation, reported in this presentation is the summary information of the department's operation for the 1978-79 fiscal year.

## Authority

Labor Code, Section 1410, et seq., and Health and Safety Code, Section 35700, et. seq.

## IX. LEGISLATIVE MANDATES

## Program Objectives and Description

Section 2231(a) of the Revenue and Taxation Code requires the State to pay local governmental units the costs of any new program or increased level of service of a program mandated by legislation enacted after January 1, 1973. Within the program area of the Department of Industrial Relations, there are four legislative mandates, all relating to workers' compensation. These mandates affect counties, cities, school districts, and special districts. These entities, as employers, are required to pay a higher amount for workers' compensation because of the four legislative mandates.

## Authority

Chapters 1021, 1022, 1023, and 1147, Statutes of 1973; Chapter 1494, Statutes of 1974; Chapters 1084 and 1086, Statutes of 1975.

Program Requirements	1978-79	1979-80	1980-81
Continuing program costs (General Fund) .....	\$19,544,712	\$22,141,937	\$22,141,937

## X. ADMINISTRATIVE SUPPORTING SERVICES

## Program Objectives and Description

Administration, under the guidance of the Director, formulates departmental policies and provides administrative services for the departmental programs through management analysis, fiscal management, personnel and training, reproduction services, and data processing. Legal and public information services are provided to the programs by staff in the Director's office.

Responsibility for administration of the Cal/OSHA plan rests with the Department of Industrial Relations as provided by statutes. The Cal/OSHA program office functions as liaison between the federal government and participants in the State plan. Its activities include overseeing progress on the developmental aspects of the plan, providing reports for federal evaluation of the plan's implementation, and coordinating State standards and activities with federal requirements.

One business services officer II for contract processing is proposed for fiscal management in the budget year.

Two staff counsels I and two senior legal stenographers are proposed in the budget year on a limited term basis handling cases at two selected workers' compensation appeals boards for evaluation of potential liability compared to actual payout. Costs for these positions will be \$119,994 (General Fund).

A half-time staff counsel I is proposed in the budget year from temporary help funds to provide hearing officer capability for apprentice complaints of discrimination and for occupational safety and health special orders.

One staff counsel II and one stenographer are proposed in the current year as administrative adjustments and permanently in budget year to reflect the transfer of collection of certain Division of Occupational Safety and Health accounts from the office of Attorney General to the Department of Industrial Relations.

One staff counsel III and one clerical position are proposed in the budget year to offset workload arising from the Department's participation on the toxic substances coordinating council.

<sup>1</sup> Expenditures included in Administration program

<sup>2</sup> Applies to employment only.

## DEPARTMENT OF INDUSTRIAL RELATIONS—Continued

Of these 9.5 positions, the 7.5 net additional positions proposed for the budget year would be expected to generate salary savings of 0.3 personnel year. This would normally increase personnel years to 147.8 for 1980-81. Because reductions made pursuant to Section 27.2 of the Budget Act of 1979 do not continue into the budget year, an additional 2.7 personnel years are available in the budget year, bringing the total to 150.5.

## INDUSTRIAL RELATIONS UNPAID WAGE FUND

This program permits the Labor Commissioner to collect any unpaid wages or monetary benefits due and unpaid to any worker in this State without an assignment from such worker. After seven years, if the Labor Commissioner has been unable to locate any worker for whom he has collected unpaid wages or benefits, the wages escheat to the State for deposit pursuant to the Unclaimed Property Law. This program is authorized under the provisions of Sections 96.6 and 96.7 of the Labor Code, which were added by Chapter 714, Statutes of 1975.

## WORKERS' COMPENSATION BENEFITS

### Compensation Insurance Fund

The California State Compensation Insurance Fund is a self-supporting enterprise created to offer insurance protection to employers at the lowest possible cost. This fund operates in competition with other insurance carriers, acting as a yardstick for the securing of fair premium rates for employers and fair treatment for injured employees. The fund is required by law to use the same rates and classifications established by the State Insurance Commissioner for insurers generally, and provides that the rates shall be only those sufficient to carry out the specific purposes stated in law.

Expenditure estimates for the budget year are based on the level of activity anticipated by the fund's management. Changes in economic conditions may result in corresponding changes in the various items of expense.

The budget data presented is information available as an annual operations report. As a public enterprise fund authorized by statutes, no budget detail is presented.

### SUMMARY BY OBJECT

#### STATE OPERATIONS

PERSONAL SERVICES	1978-79	1979-80	1980-81

TOTALS, EXPENDITURES (State Compensation Insurance Fund) * .....	\$65,867,298	\$78,800,000	\$84,000,000

### Subsequent Injuries

This program, authorized by Sections 4750-4755 of the Labor Code, provides benefits for permanent disabilities which arise from industrial injury to an employee who has suffered from a previous permanent disability.

Section 4706.5(e), Labor Code, provides that where there are no heirs of a deceased employee, or persons entitled to death benefit payment, such payment will be made to the State. These moneys are continuously available for payment of benefits and partially offset the need for direct General Fund support.

## Workers' Compensation Costs

The Labor Code (Divisions 4 and 4.5, Sections 3200-6148) mandates a complete system of workers' compensation for all employees, public or private, who incur injuries or illnesses that are employment-related. The following table provides data on actual and estimated workers' compensation expenditures by State agencies. This table is informational only. All workers' compensation expenditures are included in the individual agency budgets.

State agencies are either legally uninsured against workers' compensation liability or are insured by the State Compensation Insurance Fund (SCIF) pursuant to Section 11870 of the Insurance Code. Benefits paid by the uninsured agencies and insurance policy premiums paid by the insured agencies are shown below. Pursuant to Section 11871 of the Insurance Code, claims against uninsured agencies are adjusted by SCIF under a Master Agreement entered into with the Department of General Services. Adjustment costs and other administrative charges under the Master Agreement are also included below.

Additionally, the table includes Industrial Disability Leave benefits available under Chapter 374, Statutes of 1974, which may be elected in lieu of workers' compensation temporary disability benefits. Special disability benefits available under Section 4800 of the Labor Code to members of the California Highway Patrol and safety members of the Department of Justice are also highlighted.

## SUMMARY OF COSTS

	1976-77	1977-78	1978-79	1979-80 (est)	1980-81 (est)

# COMMISSION ON CALIFORNIA STATE GOVERNMENT ORGANIZATION AND ECONOMY

## Program Objectives and Description

The Commission on California State Government Organization and Economy was created by the 1961 Legislature and has responsibility for submitting reports of its findings and recommendations to the Legislature and to the Governor. The Commission is composed of two Senators, two Assemblymen and nine citizen members, five of whom are appointed by the Governor, with two each appointed by the Speaker of the Assembly and the Senate Rules Committee. The professional staff of the commission consists of an executive director, an assistant, a secretary, two governmental program analysts, and consulting staff retained for each project.

The objective of the Commission is to provide assistance to the Governor and the Legislature in promoting economy, efficiency, and improved service in the transaction of the public business in the various departments and agencies of the executive branch of State government.

The Commission pursues that objective by conducting studies on its own prerogative or at the request of the Administration or the Legislature and is authorized to examine in detail any department or agency of the executive branch of state government and make recommendations to the Governor and Legislature at such times as the Commission believes is appropriate.

## COMMISSION ON INTERSTATE COOPERATION

The Commission consists of seven senators, seven assemblymen and five officers of the State appointed by the Governor and one ex-officio, nonvoting member from the Commission on Uniform State Laws. It participates in the regional and national councils of state governments. Much of the work of the Commission is conducted through the Council of State Governments—an agency created, supported and managed by the states to facilitate their internal operations and their relations with each other and with other levels of government. As a joint agency of all the states, the Council makes available to them research materials and information on developments, problems and procedures in state government; staff services for regional and national meetings of state officials; and liaison and technical assistance in effecting cooperation among the states and with the federal government for the solution of interstate and federal-state problems.

### Program Objectives and Description

The objectives of the Commission are to carry forward the participation of this State as a member of the Council of State Governments, both regionally and nationally.

This item of expenditure is California's proportionate share of the cost of operation of the National Council of State Governments.

The amount budgeted for 1979-80 and proposed for 1980-81 is the difference between the total assessment of the Council and the amount of the National Governor's Conference which is budgeted proportionately in the Governor's Office and an amount for the National Association of State Budget Officers which is budgeted in the Department of Finance in the same manner as the Legislature has included the amount for the National Conference on State Legislators in the budget of the Senate.

## OFFICE OF ADMINISTRATIVE LAW

### Program Objectives and Description

Chapter 567 of the Statutes of 1979 creates the Office of Administrative Law (OAL) effective July 1, 1980.

The agency has the primary goal of consolidating, simplifying and reducing the number of administrative regulations in effect in the State of California.

To achieve this primary goal, OAL is delegated the following specific responsibilities and authority:

- Responsibility for codification and publication of California Administrative Code revisions.
- Responsibility for development of mechanisms and a five-year timetable for review of each of the 24 titles in the California Administrative Code.
- Responsibility for reviewing proposed administrative regulations to ensure conformity with certain specified criteria.
- Authority to disapprove and reject adoption of regulations that do not conform with the criteria.

*Existing law also provides that the Office of Administrative Law shall collect from each State agency for which services are provided reimbursement for its costs of providing services to that particular agency. Since such costs are largely dependent on the requirements of a plan to be developed by the Office of Administrative Law, the Governor's Budget proposes to initially authorize eight core-staffing positions to support program activities. When firm workload data and standards are developed, a detailed staffing proposal will be prepared and submitted to the Legislature.*

*In addition, the budget is proposing a separate augmentation item entitled, "Augmentation for Implementation of the Office of Administrative Law," to be allocated by the Director of Finance, as necessary, for costs associated with the implementation of this act.*

# AUGMENTATION FOR IMPLEMENTATION OF THE OFFICE OF ADMINISTRATIVE LAW

## Program Objectives and Description

Chapter 567, Statutes of 1979 (AB 1111), transfers the responsibility for adoption, filing, and publication of State regulations from the Office of Administrative Hearings in the Department of General Services to a newly created Office of Administrative Law (OAL). The bill provides that:

- Six months after the effective date, January 1, 1980, each agency shall transmit to the OAL a plan for the review of all regulations it is administering.
- The plan shall include the estimated annual cost of implementing the plan, time schedules for the orderly review of regulations and personnel required to evaluate all regulations.

- The Amount required to implement this section shall be included as part of the budget of each agency in the first Governor's Budget sent to the Legislature following the effective date of this section and shall be updated in each succeeding budget as appropriate.

At the time of preparation of the 1980-81 Governor's Budget the funding required in budgets of individual departments is not certain and an amount (\$294,000) sufficient only for core staff has been provided for the Office of Administrative Law. The law provides for various departments to reimburse the Office of Administrative Law for specified review services when the Office becomes operational July 1, 1980. In addition, the bill requires various departments to review all titles of the California Administrative Code, as to form and compliance with this act. There is every likelihood that additional funds will be required to support various departmental operations and the Office of Administrative Law when firm workload data and standards are developed.

Therefore, the budget proposes \$3,500,000 (General Fund \$2,000,000, special fund \$1,000,000 and \$500,000 nongovernmental cost fund) to be allocated by the Director of Finance for the costs to various State agencies for implementation of Sections 11346 through 11349.8 of the Government Code as amended by Chapter 567, Statutes of 1979.

## CALIFORNIA ARTS COUNCIL

The California Arts Council was established by Chapter 1192, Statutes of 1975. Major statutory mandates to this agency are:

- (1) To encourage artistic awareness, participation, and expression.
- (2) To help independent local groups develop their own arts programs.
- (3) To promote the employment of artists and those skilled in crafts in both the public and private sector.
- (4) To provide for the exhibition of art works in public buildings throughout California.
- (5) To enlist the aid of all state agencies in the task of ensuring the fullest expression of our artistic potential.

The eleven-member Council and CAC executive staff are appointed by the Governor. The Council establishes general policy and approves program allocations. Panels of experts independent of the Council advise the Council in each grants program.

Within each program, the Council seeks to promote the development of the state's broadly diverse cultures. The Council stresses the development of community-based cultural activities in rural areas as well as major metropolitan cultural centers. Most all Arts Council grants require that the grantee provide a match equal to the amount of the grant.

### SUMMARY OF PROGRAM REQUIREMENTS

### I. CULTURAL PARTICIPATION PROGRAMS

#### Program Objectives and Description

To bring dance, music, theater, visual arts, and other cultural enrichment experiences to schools, community organizations and social institutions for persons who would not otherwise be exposed to or participate actively in the arts, and to expand the use of the arts to educate, uplift, and heal.

To encourage all State and local agencies and institutions to provide facilities and resources necessary for cultural activities which benefit the clients of those institutions and the general public, and to provide employment for artists in public service jobs. The Arts Council provides information, consultation, and expertise to foster the development of such cultural programs.

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81

c. Alternatives in education .....	0.7	1	1.9	58,899	249,891	421,364

#### a. Artists in Schools and Communities

The California Arts Council assists local schools, area aging agencies, community art centers, and similar local public service organizations with the employment of resident artists in all arts disciplines. The artists teach, run workshops and demonstration classes, enhance aesthetic perception, and heighten problem solving activities, self expression and self esteem.

Staffing figures for 1980-81 include 0.8 personnel years for a Staff Services Analyst to manage grants, one personnel year due to elimination of salary savings from Section 27.2 of the Budget Act of 1979, and also a decrease of 0.2 personnel years which have been redirected to Program III (Direct Support to Artists). In addition, regular salary savings have been increased by 0.1 personnel years.

Output	1978-79	1979-80	1980-81
Participating schools and organizations .....	8	33	33

Federal funds .....				236,214	230,000	230,000

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

## CALIFORNIA ARTS COUNCIL—Continued

## b. Artists in Social Institutions

The California Arts Council assists social institutions (hospitals, prisons, and mental health facilities) with the employment of resident artists in all arts disciplines. The artists teach, run workshops and demonstration classes, to raise levels of self esteem through the creative expression of clients as well as encourage participation, expression and awareness.

Staffing figures for 1980-81 add 0.5 personnel years for a Staff Services Analyst to manage grants, 0.8 personnel years due to elimination of salary saving from Section 27.2 of the Budget Act of 1979, and reflect a decrease of 0.2 personnel years which have been redirected to Program III (Direct Support to Artists). In addition, regular salary savings have been increased by 0.1 personnel years.

Output	1978-79	1979-80	1980-81
Participating institutions .....	2	84	67
Participating artists .....	4	133	133
Estimated number of institutional clients served .....	400	13,333	13,333

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Administrative expenditures .....	0.8	1.2	2.2	\$12,567	\$61,231	\$76,151

General Fund .....				108,693	461,231	476,151

## c. Alternatives in Education

The Alternatives in Education Program is a research/demonstration program to build arts in education, curricula, to build suitable models, to examine the impact of the arts on learning and to expand staff development of school sites in artistic techniques. The first phase of the program was completed in FY 1978-79 and fully evaluated. The current phase will conclude in FY 1981-82.

Staffing figures for 1980-81 add 0.4 personnel years for a Staff Services Analyst to manage grants, 0.6 personnel years due to elimination of salary savings from Section 27.2 of the Budget Act of 1979, and reflect a decrease of 0.1 personnel years due to an adjustment in regular salary savings. In addition, \$150,000 in federal funds has been added to this element to augment the research program. Of this amount, \$135,000 has been redirected from Local Organization Development, and \$15,000 is an anticipated increase in federal funding.

Output	1978-79	1979-80	1980-81

General Fund .....				58,899	249,891	271,364
Federal funds .....				—	—	150,000

## II. ORGANIZATIONAL GRANTS

## Program Objectives and Description

To help local non-profit arts organizations strengthen their internal management, to employ professional artistic staff, and to extend their programs and performances more broadly to the general public.

To work with city and county cultural agencies to foster programs that establish and maintain local arts groups and employ artists in public service jobs.

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81

## CALIFORNIA ARTS COUNCIL—Continued

## a. Local Organization Development

The California Arts Council supports the diverse needs of non-profit arts organizations which have been in existence for at least three years by providing grants to enable programs to strengthen administrative and artistic capabilities, as well as to conduct specific arts programs of benefit to the communities. Project funds are matched on a one-to-one basis.

Staffing figures for 1980-81 include 0.5 personnel years for a Staff Services Analyst to manage grants and 0.6 personnel years associated with elimination of salary savings due to Section 27.2 of the Budget Act of 1979. In addition, \$50,000 in federal funds has been transferred from this program to Direct Support and Training for Artists (Program III) to implement a new program providing direct grants to artists, and \$135,000 in federal funds has been transferred to alternatives in Education for a research project.

General Fund .....	—	—	—	—	1,631,306	2,918,696			
Federal funds .....	—	—	—	—	250,000	65,000			

## b. Expanding Public Participation

The California Arts Council will provide support for non-profit arts organizations for projects which seek to develop new audiences or audiences not normally included in the arts and public participation in arts activities. Activities may include publicity, audience evaluation, ticket voucher programs, special adaptations for handicapped, and other groups that would otherwise not participate. Project funds are matched on a one-to-one basis.

Staffing figures for 1980-81 include 0.1 personnel years for a Staff Services Analyst to manage grants and 0.1 personnel years associated with elimination of salary savings due to Section 27.2 of the Budget Act of 1979.

General Fund .....	—	—	—	—	314,978	319,462			

## c. Touring Programs

The California Arts Council will provide support to local and regional non-profit touring companies for travel and related expenses incurred in presenting touring programs and performances in communities throughout the State. Programs are presented in schools, mental institutions, community centers, senior citizens' centers, and other public places. The California Arts Council provides technical assistance in arranging bookings, locating local program sponsors, and coordinating performances.

Staffing figures for 1980-81 include one personnel year for an Associate Governmental Program Analyst to supervise the Tour Coordinators, 0.2 personnel years for a Staff Services Analyst to manage grants, and 0.2 personnel years associated with elimination of salary savings due to Section 27.2 of the Budget Act of 1979.

Federal funds .....	—	—	—	269,802	300,000	300,000			

## d. Support to Prominent Organizations

The California Arts Council will fund prominent organizations to assist them in maintaining and expanding their community services programs, including: performances in schools and community agencies; discount tickets for senior citizens, low income and handicapped persons; training of young artists; and other essential programs of benefit to the general public.

Staffing figures for 1980-81 include 0.4 personnel years for a Staff Services Analyst to manage grants and 0.4 personnel years associated with elimination of salary savings due to Section 27.2 of the Budget Act of 1979.

Output	1978-79			1979-80			1980-81

## CALIFORNIA ARTS COUNCIL—Continued

## e. Technical Assistance

The California Arts Council will offer technical assistance to organizations and individuals through the following subprogram elements:

a) Short Term Technical Assistance Program—This element supports professional consultancies to organizations including but not limited to the following types of assistance, fund-raising, grants-writing, management training, marketing, bookkeeping or accounting, etc.

b) Regional Technical Assistance Program—This element supports consortiums or service organizations in a regional construct which provides assistance in local/regional workshops or cooperative resource sharing.

The short term assistance is to groups or individuals dispensed at the state level, while the regional assistance is dispensed through regional consortiums and is generally assistance shared by groups or organizations in a region.

Staffing figures for 1980-81 include 0.1 personnel years for a Staff Services Analyst to manage grants and 0.1 personnel years associated with elimination of salary savings due to Section 27.2 of the Budget Act of 1979.

Output	1978-79	1979-80	1980-81

## III. DIRECT SUPPORT AND TRAINING FOR ARTISTS

## Program Objectives and Description

Grant awards in this program are intended to enable individual artists to complete works in progress and create new works of art; to help support and develop creative talent; and to assist artists in implementing projects which are innovative and beneficial to their communities.

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81
Ongoing administrative costs .....	—	0.1	0.5	—	\$4,221	\$15,080

General Fund .....	—	29,221	33,574
Federal funds .....	—	25,000	25,000

## b. Direct Support to Artists

Beginning in 1980-81, the Arts Council will provide grants directly to artists for projects that are judged to be worthy of support based on merit and artistic excellence. In developing this program, the Council will be working closely with the California arts foundation community, from which it will solicit \$100,000 in grant funds to match \$50,000 in Federal grants funds and \$50,000 in General Fund grants.

Of the 0.6 personnel years in administrative time required for the program, 0.4 has been redirected from Cultural Participation Programs, and 0.2 is for a new Staff Services Analyst to assist in grants management.

Output	1978-79	1979-80	1980-81

Reimbursements .....	—	—	100,000

## CALIFORNIA ARTS COUNCIL—Continued

## c. Maestro-Apprentice Program

The Arts Council proposes to re-establish the Maestro-Apprentice Program in 1980-81 after a favorable evaluation of a pilot program in this area which was funded in 1977-78. The Maestro-Apprentice Program will pair eight experienced master artists and craftsmen with eight young artists to provide apprenticeship training. Stipends of \$8,000 will be provided to each maestro and \$2,000 to each apprentice. Maestro-apprentice interactions will be documented on film or video for evaluative and educational purposes.

The budget year reflects 0.6 personnel years for a Staff Services Analyst to manage grants.

Output				1978-79	1979-80	1980-81

Totals, Maestro-Apprentice Program (General Fund) .....	—	—	0.6	—	—	\$130,481

## IV. STATEWIDE PROJECTS

## Program Objectives and Description

To encourage and enhance communication among artists, and between artists and arts organizations, governmental agencies, and the general public. Statewide organizations receive support to provide services to cultural institutions, individual artists, and the general public.

The Arts Council will work with federal, State, and local agencies to provide information, resources, and technical and support services for community arts organizations, provide employment for artists, and expand public participation in cultural programs.

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81
Continuing administrative expenditures .....	2.9	5	5	\$42,969	\$423,145	\$454,710

e. Interagency arts coordination .....	—	—	5.4	—	—	272,319

## a. Grants Evaluation and Public Arts Program Documentation

Monitoring and evaluation of all grants programs is essential to assure accountability and to assess results. Dissemination of the outcomes of evaluation is essential to assure that desirable programs are replicated and ineffective projects terminated. In order to maximize the impact of arts programming in all publicly-supported agencies, proposed existing programs must be evaluated and documented. These programs include public schools, juvenile and adult justice facilities, mental health and developmental disabilities programs and public housing.

Staffing figures for 1980-81 add 0.4 personnel years due to elimination of salary savings from Section 27.2 of the Budget Act of 1979.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Administrative expenditures .....	2.3	1	1.4	\$26,383	\$60,600	\$71,649
Grant expenditures .....	—	—	—	73,860	169,600	169,600
	2.3	1	1.4	\$100,243	\$230,200	\$241,249

## b. Information and Services Division and Grants

The California Arts Council acts as a resource center and statewide agent for informational arts research, interpretation and reference. It houses a multi-media resource center and develops informational products for dissemination to the arts community, press and general public.

The California Arts Council identifies and develops funding and service resources at city, county, state and federal levels as well as with corporate and non-profit entities.

The program also provides a monthly statewide newsletter and statewide directories and registries of artists and arts organizations.

Staffing figures for 1980-81 add three personnel years to improve information services and 0.1 personnel years due to the elimination of salary savings from Section 27.2 of the Budget Act of 1979. In addition, 1980-81 staffing figures reflect a 0.1 personnel years decrease due to adjustment of regular salary savings.

Output				1978-79	1979-80	1980-81
Newsletter circulation .....				—	60,000	60,000
Input	78-79	79-80	80-81	1978-79	1979-80	1980-81

General Fund .....				44,721	89,734	94,152
Federal funds .....				18,317	—	—

## d. State/Local Partnership

In an effort to decentralize its grants programs for the arts, the Council is proposing to establish a State/Local Partnership Program in 1980-81 which will provide arts planning and coordination grants to each county (total: \$696,000), as well as program grants based on population and local arts support (total: \$1,321,000). The program will be staffed with five positions and will open a Los Angeles field office for more effective service to Southern California residents. The proposed program structure is patterned after the National Endowment for the Arts' Federal/State Partnership Program. Program objectives are to:

- Develop a mechanism to decentralize other California Arts Council programs;
- Facilitate more effective local planning and coordinate that planning with state programs;
- Encourage arts programs in rural and suburban areas;
- Expand private sector support for the arts;
- Prevent duplication and overlap between federal, state, and local program funds; and
- Stimulate the local arts economy.

Output	1978-79			1978-79	1979-80	1980-81
Participating counties .....				—	—	35
Organizations assisted .....				—	—	350

Totals, State/Local Partnership .....	—	—	5	—	—	\$2,180,585
General Fund .....				—	—	2,180,585

## e. Interagency Arts Program

A new Interagency Arts Program is proposed in 1980-81 with 5.4 personnel years to coordinate various arts programs in other State departments with policies and objectives of the California Arts Council. The program will:

- Promote the employment of artists in both the public and private sector;
- Exhibit art works in public buildings; and
- Enlist the aid of all state agencies in ensuring the fullest expression of artistic potential in the State.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81

Totals, Interagency Arts .....	—	—	5.4	—	—	\$272,319
General Fund .....				—	—	198,053
Reimbursements .....				—	—	74,266

## V. ADMINISTRATION

The Arts Council administers its program by providing program support services in the following areas: grants maintenance, contract and fiscal control, evaluation, personnel, program planning, and Federal funds use allocation. The Council's staff works with other state agencies in planning for and operating interagency cultural programs. The Council's staff also provides information services through its newsletter, various cultural impact studies, and directories or registries of artists.

In the budget year, 2 personnel years have been added to strengthen the Council's financial management, 6.5 personnel years have been added to net administration totals due to elimination of salary savings from Section 27.2 of the Budget Act, and 1.3 personnel years have been dropped due to adjustment of regular savings.

# CALIFORNIA PUBLIC BROADCASTING COMMISSION

## Program Objectives and Description

The California Public Broadcasting Commission was created in 1975 by Chapter 1227 as an independent agency of State government with a mandate to develop and support a statewide policy to foster the growth and development of public radio and television services to the people of California. Nine of its eleven members are appointed from the general public by the Governor, the Senate Rules Committee, and the Speaker of the Assembly. The Superintendent of Public Instruction and the Director of the California Postsecondary Education Commission serve as ex officio members.

The Commission's activities include (a) making grants to public broadcasting stations for improvement of operations and facilities, (b) providing interconnection service for California public radio and television stations, (c) making grants for the development, production, and acquisition of public broadcast programming, (d) conducting research and demonstration activities relating to public broadcasting, and (e) conducting long range planning on public broadcasting and public telecommunications development in the State. As set forth in statute, the Commission, in fulfilling its responsibilities, works closely with its radio, television, and instructional advisory committees and must utilize existing public broadcasting facilities to the maximum feasible extent. The statute further stipulates that "all decisions affecting the content and scheduling of such service are the sole responsibility of each licensee and shall be free from improper interference. Currently, the Commission makes grants to public television and radio stations throughout California for: statewide news and public affairs programming, humanities programming, and general operational support.

As a result of Chapter 1086, Statutes of 1979, the Commission is charged with making a report to the Legislature prior to April 15, 1982 concerning the effects of the deregulation of cable TV subscriber rates upon consumers and the telecommunications policy of the State. The Commission is also charged with encouraging local and State government and education use of cable channels and making a report to the Legislature concerning such use by January 1, 1983.

To carry out this program, one limited-term Telecommunications Analyst has been added in 1980-81 with 0.1 position of salary savings.

In addition, the Commission has identified a need to review and evaluate its grants program. A limited-term Program Review Analyst is proposed for this review in 1980-81.

Other adjustments in 1980-81 include the addition of 0.3 position associated with Section 27.2 of the Budget Act of 1979, and a reduction in salary savings to achieve a more equitable funding for the Commission's salaries and wages resulting in a further increase of 0.3 positions. In addition, the grants program has been augmented by (1) \$8,000 to begin subtitled of the Commission's television programming as an aid to the deaf and by (2) \$34,332 to offset inflationary costs in public broadcasting grants.

# COMMISSION FOR ECONOMIC DEVELOPMENT

## Program Objectives and Description

The Commission was created by Chapter 1230, Statutes of 1971. This law, which went into effect March 4, 1972, provides that the Commission shall consist of 17 members: the Lieutenant Governor as Chairman, ten public members appointed by the Governor (only six of whom may be of the same political party), three Senators appointed by the Senate Rules Committee, and three Assemblymen appointed by the Speaker.

The enabling legislation specifically provides that the Commission shall: (1) make recommendations concerning legislation affecting the economic development of the State, (2) consider programs to further the economic development of the State, study laws and programs of other states relating to economic development and confer with governmental officials and representatives of business and industry and any other persons or organizations interested in the promotion of economic development, (3) appoint advisory committees. Chapter 168, Statutes of 1977, removed the June 30, 1977 expiration date on the life of the Commission, making it a permanent body. *Two temporary help positions have been converted to one permanent SSA position for a net decrease of one personnel year during 1980-81. In addition 0.4 positions which were reduced in 1979-80 as a result of Section 27.2 are restored in the budget year.*

## COMMISSION ON STATE FINANCE

## Program Objectives and Description

The Commission on State Finance was created by Chapter 1162, Statutes of 1979 (SB 165) effective January 1, 1980. The Commission consists of seven members or their designees: the President pro Tempore of the Senate, the Speaker of the Assembly, the Senate Minority Floor Leader, the Assembly Minority Floor Leader, the Director of Finance, the State Controller, and the State Treasurer.

The Objective of the Commission is to aid the Legislature and the Governor in establishing an appropriate, timely and coordinated fiscal policy for the State by providing the Legislature, the Governor, and the public with forecasts of state revenues, current year expenditures, and the surplus or deficit at least 4 times a year.

To carry out its duties the Commission is empowered to examine the records of State agencies, hold hearings and contract for studies and reports.

Unless extended by future legislation, the Commission will expire as of July 1, 1984.

Eight positions and associated funding are being transferred from the Department of Finance during the current year to assist the Commission in carrying out its duties.

## MILITARY DEPARTMENT

The Military Department provides a military organization trained and equipped to support the Constitution and to protect life and property during periods of civil emergency and natural disaster and furnishes trained units for federal mobilization and for State missions as required by the Military and Veterans Code or as directed by the Governor.

The Department is organized into a command element, a special staff, and a joint staff in order to accomplish the command and management responsibilities of the Commanding General. Staff activities serve both the Army and Air National Guard and include personnel, recruiting, information, administrative services, training, logistics, and resource management. The California Cadet Corps, although funded separately, is assigned to the command element and receives direction and guidance from the Commanding General through the Chief of Staff. The Department is organized in general accordance with Department of the Army and Department of the Air Force staffing patterns. Full-time personnel of the Department are State active duty, State civil service or federal civil service employees.

## I. ARMY NATIONAL GUARD

## Program Objectives and Description

The objective of the program is to manage Army National Guard units, personnel, supplies, and equipment in order to maximize the readiness of those forces when required for federal missions in the military defense of the United States or for state missions in support of civil authority.

The Army National Guard consists of 161 company-size units allotted to the State by the Department of the Army. The Military Department, in turn, stations those units at locations deemed best suited to insure their readiness and availability to perform state and federal missions. The current authorized strength of the Army National Guard is 20,638 officers and enlisted personnel.

The following adjustments have been made to both the current and budget years: 1) An additional 16 federally-reimbursed positions were authorized for the Los Alamitos Armed Forces Reserve Center effective January 1, 1980, as a result of a comprehensive cost analysis study conducted by a joint team with representatives from the National Guard Bureau, U. S. Army Forces Command and the Military Department; 2) Twelve additional federally-reimbursed temporary help positions were added to the Camp Roberts staff in order to accommodate the additional usage of the installation's firing ranges, training and maneuver areas, barracks and mess halls, by Army National Guard units due to the planned phase out of Fort Irwin on or about 1 July 1981. 3) Five federally-reimbursed positions have been continued until September 30, 1980, in order to accommodate the administrative overhead requirements generated by the U.S. Army Battalion Rotation Program at Fort Irwin.

In addition, thirteen reimbursed positions have been established for the Oakland Guard Program in the current year; nine of these positions will continue into the budget year until September 30, 1980. There is an increase of 10.3 personnel years in 1980-81 resulting from the restoration of one-time Section 27.2 reductions in the current year.

## a. Training

California Army National Guard units utilize training programs established by the Department of the Army, and train under the general supervision of Active Army personnel. Units are inspected frequently by National Guard and Active Army officers to assure attainment and maintenance of readiness objectives. Complementing unit training, more than \$1,461,000 in federal funds are available in fiscal year 1979-80 to support the attendance of California Army National Guard personnel at federal military schools.

## MILITARY DEPARTMENT—Continued

## b. Logistics

Over one-half of the federal funds provided to support the Army National Guard are to provide the supplies, equipment, and maintenance required for training and operations conducted in furtherance of readiness objectives. Camp San Luis Obispo is a state-owned installation which serves as the primary logistical base for receipt, storage, and distribution of federal supplies and equipment. Camp San Luis Obispo, together with Camp Roberts and Fort Irwin, are major outdoor training areas that are utilized year-round by the National Guard, Army Reserve and Active Army forces. Camp Roberts, Los Alamitos Armed Forces Reserve Center and Fort Irwin are federal installations licensed to and operated by the Military Department with 100 percent federal funding support. Fiscal Year 1979-80 federal funding will approximate \$8.1 million.

Army National Guard units and equipment are housed in 119 training bases (armories). Local maintenance support is provided at 39 organizational maintenance shops, with higher echelon maintenance accomplished at seven support facilities. Over 90 percent of the state funds provided to support the Army National Guard Program are directed toward logistical activities.

## c. Command Support

This element provides command direction and policy guidance for the program. Primary activities include the issuance of directives and coordination of training and logistics; supervision of training and determination of readiness levels; and contingency planning and operational control over elements ordered into State service during emergencies.

## d. Personnel

This element establishes standards for administrative and personnel practices. It develops policies, procedures, and standards for management of personnel and other records. It administers military personnel systems, including procurement, assignment, payment, promotion, retention, separation, and retirement of Army National Guard personnel.

## II. AIR NATIONAL GUARD

## Program Objectives and Description

The objective of this program is to manage personnel and other resources so as to maximize the readiness of trained and equipped air forces when required for federal or State missions.

The Air National Guard consists of an air defense unit at Fresno, a tactical airlift unit at Van Nuys, an air rescue and recovery unit at Moffett Field (relocated from Hayward in January, 1980) and a tactical air support unit at Ontario. Additionally, communications units are located at North Highlands, Van Nuys, Hayward, Compton, Costa Mesa, and Los Angeles. All of these units are allotted to the State by the Department of the Air Force. The authorized strength of the California Air National Guard is 5,223.

*There is a net reduction of 2.5 positions in 1980-81 in this program resulting from a transfer of three positions to Program III (Office of the Commanding General) to better align the existing staff complement with the workload and the restoration of 0.5 person years of one-time Section 27.2 reductions made in the current year.*

## a. Training

Plans are developed and maintained for employment of Air National Guard forces in support of state government during emergencies and federal mobilization in accordance with national war plans. Support plans include airlift, communications, and other specialized support. Operations is responsible for the control and management of resources committed to these missions and the implementation of training and flying schedules. Training is conducted utilizing USAF technical schools and on-the-job training. Maintenance of skills is accomplished by correspondence courses and actual job experience. Each individual performs training a minimum of 63 days per year and proficiency is assured through periodic individual and unit testing conducted by regular Air Force advisors.

## MILITARY DEPARTMENT—Continued

## b. Logistics

The federal government provides virtually all supplies, equipment, transportation, subsistence, and support services necessary for training, deployment, and commitment of the Air National Guard. Major tasks are procurement, issuance, and control of repair parts, administrative supplies, uniforms, fuels, meals, ammunition, mobilization stockpiles, housekeeping, and the highly technical maintenance of over \$140,000,000 worth of aircraft, 800 wheeled vehicles, and modern mobile radio, teletype, and radio relay equipment. The State of California operates and maintains nine Air National Guard facilities under a contract with federal reimbursement for a major portion of the costs. The federal government also provides funds for major and minor capital outlay, repair projects, and runway crash fire protection. Construction activities are administered by the Military Department.

## c. Command Support

This element performs all functions of command to insure achievement of program objectives. Primary tasks include development of long-range plans and programs concerning state military requirements, determination of current requirements, and analysis of current operational capabilities of 48 California Air National Guard organizations.

## d. Personnel

This element develops and implements personnel policies and systems, and accomplishes the procurement, selection, appointment, enlistment, commissioning, assignment, classification, reporting, promotion evaluation, separation, and discharge of Air National Guard personnel; establishes criteria and procedures for maintenance of personnel records; and provides services including the development and publication of policies concerning correspondence, records, files, reports, libraries, processing of security clearances, and the safeguarding of classified information.

## III. OFFICE OF THE COMMANDING GENERAL

## Program Objectives and Description

The objective of this program is to provide executive leadership, policy direction, and administrative services prerequisite to successful accomplishment of department objectives. The Commanding General exercises direct command over the State military forces until such time as those forces have been mobilized under federal authority.

An amount of \$284,081 from the General Fund is added to the Military Department in order to develop and implement an Electronic Data Processing system in the Office of the Commanding General. The system will provide current information and factual data to increase responsiveness and achieve maximum economics in the employment of State Military Forces during periods of emergencies and disasters. The system also will provide a focal point, at the headquarters level, where State data input can be merged systematically with data received from Department of Defense agencies, to create a reciprocal relationship and to balance current requirements with available resources, and to provide means by which federally supported EDP programs can be correlated with operational and administrative responsibilities of the Commanding General. The staff proposed for this program includes permanent authorization of one position which has been administratively established in the current year and two additional permanent positions. An additional increase of 5.2 personnel years in 1980-81 results from the restoration of 2.2 personnel years of one-time Section 27.2 reductions made in the current year and the transfer of three personnel years to this program from Program II (Air National Guard).

## a. Command Management

This element determines overall departmental policies, exercises general guidance and direction over departmental activities, and provides administrative services, to include recruiting and retention, publication and distribution of publications, personnel services for all full-time State and federal employees in the department, maintenance of all official records required for State purposes, legal and inspector general services, procurement of supplies and services, public information, data processing, property accounting, and fiscal accounting and control.

## MILITARY DEPARTMENT—Continued

## b. Military Support to Civil Authority

This element develops the policies, plans, and procedures that will assure the timely, orderly, and effective response of State Military Forces when called into State service by the Governor due to domestic emergency or disaster, or when called or ordered into federal service.

Resource data, capabilities of military forces, and policies and procedures governing the employment of military personnel and other resources in support of civil authority are continuously reviewed. Liaison and coordination is maintained with federal, state and local agencies to assure mutual understanding and unity of purpose and action when State Military Forces are called upon to support the emergency needs of civil authority.

The California Specialized Training Institute, located at Camp San Luis Obispo and operated by the department, provides training to civilian and military personnel in civil emergency management operations, officer survival and internal security, school security, and aspects of terrorism.

The 1980-81 budget proposes a change in funding for the Institute, which has been funded approximately one third from the Peace Officer Standards and Training (POST) Fund and two thirds from the Law Enforcement Assistance Administration, which will continue the POST funding but provide the remainder from tuition from the participants in the training courses.

## IV. MILITARY RETIREMENT

## Program Objectives and Description

This program provides retirement benefits, similar to those provided by the federal military services, to persons who entered state active duty prior to October 1, 1961 and have served 20 or more years, at least 10 of which have been on state active duty. All other state employees are covered by the Public Employees' Retirement System. Currently, there are 49 retirees receiving benefits under the Military Retirement Program. Two additional retirements are anticipated during 1978-79. This will leave four individuals yet to retire under this system.

## VI. FARM AND HOME LOAN PROGRAM

## Program Objectives and Description

This program is known as the California National Guard Members' Farm and Home Purchase Act of 1978. The Act was effective as of January 1, 1979. The objective of the program is to provide members of the California National Guard who are enlisted members, warrant officers, or commissioned officers of the rank of captain or below and who serve a six-year obligation, the opportunity to acquire farms and homes with low interest loans. Funds for loans will be raised through the issuance of revenue bonds, the sale of which will be authorized by the State Treasurer. An amount of \$2.5 million has been appropriated from the General Fund (Chapter 583, Statutes of 1979) for the purpose of creating the Supplementary Bond Security Account within the California National Guard Members' Farm and Home Building Fund of 1978 as backing for the revenue bonds issued.

## MILITARY DEPARTMENT—Continued

The \$2.5 million will be repaid to the General Fund from revenue bond proceeds. The administration of the program is vested in the Military Department; however, all administrative functions, except eligibility determination, has been assigned to the Department of Veterans Affairs with the administrative costs of the program payable from revenue bond proceeds.

## PUBLIC UTILITIES COMMISSION

The objectives of the Public Utilities Commission are:

1. To provide the public with the lowest reasonable rates for services by utilities, and transportation companies.
2. To make certain that utilities and transportation companies render adequate service and have sufficient facilities to meet the needs of the public.
3. To ensure that the public has stable, efficient utilities and transportation services by controlling and limiting entry into the field to those applicants with financial responsibility and demonstrated capability to render adequate service.
4. To promote public safety and accident reduction by establishing and enforcing safety regulations for utility and transportation companies, as well as for railroad highway grade crossings.
5. To determine the just compensation for the acquisition of utility or transportation company property by political subdivisions.

## SUMMARY OF PROGRAM REQUIREMENTS

I.	Energy Policy Formulation .....	27	\$1,724,727
II.	Transportation Energy Efficiency .....	15	501,382

## I. REGULATION OF UTILITIES

## Program Objectives and Description

Utilities in California have been granted exceptional powers and privileges by the State, including exclusive service areas, which preclude customers from obtaining service from others. State regulation is necessary to protect the public interest and ensure fair and impartial rates as well as adequate service facilities rendered by stable, financially responsible companies. Regulatory controls have also been established to promote the safety of employees, customers, and the public at large.

The objective is to provide the public with adequate and safe utility services at the lowest reasonable rates.

Twenty-eight positions are currently authorized for the LNG Task Force through June 30, 1980; of these, twenty-three are proposed to continue through December 31, 1984. Total cost of the LNG Task Force in the budget year will be \$1,485,727 (reimbursements).

To permit the Commission to provide the leadership necessary for energy conservation/policy the Commission's appropriation from the State Energy Conservation and Development Account in the General Fund will be increased by \$1,724,727 in the budget year. This augmentation provides \$750,000 to permit the Commission to engage consultants when specialized skills are needed and \$974,727 to support 27 positions for a variety of conservation/policy projects.

To offset workload increases in the regulation of utilities, eight new positions are proposed in the budget year. Total cost of these new positions will be \$242,193 (General Fund).

## Authority

California Constitution, Articles XI and XII; Public Utilities Code, Division I, Regulation of Utilities.

d. Safety .....	34.7	33.7	33.7	1,144,200	1,280,882	1,361,765

## PUBLIC UTILITIES COMMISSION—Continued

## a. Regulation of Rates

The Commission's responsibility for the establishment and maintenance of reasonable rates for utility service is accomplished by making intensive studies of cost of service, cost of plant, earnings, and financial analysis which are entered into evidence at public hearings. Similar studies are made to form the basis for negotiated rate settlements and reductions. The Commission's attorney represents the people of the State of California and the Commission in all proceedings involving any questions under the Public Utilities Act and any order or act of the Commission. The Commission participates in rate and certification proceedings before federal regulatory commissions and in the courts.

Six positions have been established in the current year and will continue into the budget year for special studies under the Public Utilities Regulatory Policies Act of 1978. Funding for these positions is provided by the United States Department of Energy.

Nineteen positions are proposed in the budget year to permit the Commission to assume a more active role in the development and implementation of energy use and conservation policy. Six of these positions have been established in the current year pursuant to contracts funded by the California Energy Commission. The PUC's efforts in this area will be further augmented in the budget year with an additional \$375,000 for engaging consultants.

In response to increases in the workload associated with the regulation of utility rates, 6.5 positions are proposed in the budget year. These workload adjustments include: 2 positions for water utilities; 1 position for reviewing energy cost adjustments; 2.5 positions for communications utilities of which 0.5 has been established in the current year; and 1 position to respond to consumer complaints.

## Input

	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures .....	276	270.5	289.5	\$8,119,000	\$9,219,373	\$9,808,175

## b. Service and Facilities

Utility services are regulated through Commission orders issued as a result of investigations, studies, and public hearings related to the adequacy of service and facilities. A large part of new facilities are financed through the issuance of stocks or bonds which require Commission authorization prior to issuance.

With a continual growth in the general population and the number of customers in the State, the number of service connections and the related activities of maintaining adequate service and facilities will also continue to expand.

Eight positions are proposed in the budget year to permit the Commission to provide additional leadership in the formulation of energy conservation methods. Three of these positions have been established in the current year pursuant to contracts funded by the California Energy Commission. The PUC's efforts in this effort in this area will be further augmented in the budget year with an additional \$375,000 for engaging consultants.

One position is being deleted permanently starting in the current year due to workload adjustments. In the budget year two positions currently working on a limited term project will also be deleted.

One position is proposed in the budget year to offset increases in consumer complaints.

## Output

	1978-79	1979-80	1980-81

Expenditures .....	81.9	77.9	81.9	\$2,625,900	\$2,903,644	\$3,553,360

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

## PUBLIC UTILITIES COMMISSION—Continued

## c. Certification

Before utilities can exercise any rights or privileges of franchise, they must obtain certification that public convenience and necessity require their exercise of these rights.

New or existing entities file applications for certification of public convenience and necessity to construct or extend facilities to areas not previously serviced. The processing of the applications involves studies and investigations covering financing programs, operations, and reasonableness of initial rates.

The number of decisions issued gives a reasonable measure of output and shows how utility service is being reviewed for the benefit of the consuming public in California.

Output	1978-79	1979-80	1980-81
Decisions issued .....	122	127	129
Proceedings completed, environmental impact .....	14	9	11
Out-of-state gas supply projects completed .....	4	6	5
Ex parte decision drafts completed (hydraulic) .....	28	25	25
Conservation, semi-annual reports reviewed .....	16	16	16

Eleven positions currently authorized for the LNG Task Force are limited to June 30, 1980. Under the Commission's current plan for monitoring construction of the LNG facility, six positions are proposed to continue through December 31, 1984, and five positions are not proposed to continue beyond June 30, 1980.

One position is proposed in the budget year to facilitate certification of applications submitted under the Safe Drinking Water Bond Act.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures .....	57.6	54.3	50.3	\$2,139,000	\$2,878,318	\$2,355,276

## d. Safety

The safety element of the Commission's regulation of utilities program is divided into two components: gas safety and electric safety.

In its endeavor to meet the objectives of this element, the Commission establishes minimum standards for the construction, operation and maintenance of utility plants to promote the health and safety of employees and the public.

Accident reports and other utility reports are made to ensure that these standards are maintained. This is accomplished through field investigations, tests of utility plants, and examination of methods of construction, operating procedures, and maintenance; and public hearings where appropriate.

On July 31, 1978 the Commission granted a conditional permit to Western LNG Terminal Associates to construct and operate an LNG Facility.

Output	1978-79	1979-80	1980-81
Gas Safety:			
Number of accident reports prepared .....	366	370	375
Number of field investigations conducted .....	205	240	250
Number of gas holders (gas storage) .....	74	74	74
Number of gas holders inspected .....	73	74	74
Electric Safety:

Totals .....	34.7	33.7	33.7	\$1,144,200	\$1,280,882	\$1,361,765

## II. REGULATION OF TRANSPORTATION

## Program Objectives and Description

State regulation has been necessary to provide the general public with a stable, efficient, and dependable transportation and warehouse system, at a reasonable rate. This regulation ensures freedom from destructive rate wars, financially irresponsible operations, curtailment of service, and inadequate routing and scheduling. In addition, this regulatory program provides that safety standards are met in railroad and other transportation and warehousing operations, as well as at railroad highway grade crossings.

Pursuant to Chapter 1195, Statutes of 1979, the Commission must develop a transportation energy efficiency plan for California's highway carriers. In the budget year, fifteen positions are proposed to enforce the transportation energy efficiency plan and ensure that every rule, order and decision of the Commission is compatible with the provisions of such plan. Support for these fifteen positions is budgeted from the Transportation Rate Fund (\$376,036) and the proposed Energy and Resources Fund (\$125,346).

Six positions have been established in the current year for enforcement of Federal railroad standards pursuant to Chapter 758, Statutes of 1979. These positions are proposed as permanent in the budget year with funding to come from the General Fund (\$90,251) and Federal Funds (\$90,250).

Two positions have been established in the current year for rapid transit safety. One of these positions is authorized through June 30, 1981. The other position is presently authorized through June 30, 1980, and is proposed as permanent in the budget year to be funded from reimbursements (\$37,698).

d. Safety .....	45.7	44.4	44.4	1,458,500	1,733,080	2,011,048

## a. Regulation of Rates

Appropriate charges to the public for transportation and warehouse services are accomplished through the establishment and maintenance of minimum rate tariffs for for-hire carriers of freight and by requiring common carriers and warehousemen to construct and file with the Commission their schedule of rates and charges in accordance with the rules established by General Orders of the Commission. The Commission holds public hearings at which studies of costs, revenues and expenses are received in evidence to assist the Commission in determining the reasonableness of the rates the public is required to pay.

The Commission's attorney represents the people of the State of California and the Commission in all proceedings involving any questions under the Public Utilities Act and any order or act of the Commission. The Commission participates in rate cases before the Interstate Commerce Commission and rate violation and other enforcement cases in the courts.

Pursuant to Chapter 1195, Statutes of 1979, the Commission will establish 1.8 positions in the current year for developing a transportation energy efficiency plan. In the budget year 8.8 positions are proposed through June 30, 1981 for implementation of the plan.

A reallocation of administrative and other centralized services will precipitate a reduction of 1 personnel year in the budget year.

Output	1978-79	1979-80	1980-81
Formal proceedings completed .....	780	765	765
Special tariff docket filings processed (property) .....	232	230	230

Expenditures.....	244	232.2	238.2	\$6,963,790	\$7,793,737	\$8,581,375

## b. Service and Facilities

Formal proceedings are filed requesting changes in the level of service of all classes of transportation companies. Special studies are made in connection with these proposed changes. The studies test the economic justification or reasonableness of the proposed service change. The studies include investigations, reports, and testimony at Public Utilities Commission hearings on adequacy of bus services; and review hearings on proposals of railroads to discontinue passenger trains before the Public Utilities Commission and Interstate Commerce Commission.

The control and supervision of financing practices of carriers are essential because of the effect of such practices on capital costs and the availability of capital funds, both important elements in providing adequate service at reasonable costs to the customers. Commission authorization is required for security issuance and such related matters as transfers of utility properties, mergers, and consolidations for the purpose of assuring sound, well-balanced financing and capital structures.

Pursuant to Chapter 1195, Statutes of 1979, the Commission will establish 0.5 positions in the current year for developing a transportation energy efficiency plan. In the budget year 2.7 positions are proposed through June 30, 1981 for implementation of the plan.

Output	1978-79	1979-80	1980-81

Expenditures.....	20.7	20	22.2	\$650,151	\$728,071	\$802,216

PUBLIC UTILITIES COMMISSION—*Continued*

## c. Licensing

Carriers must obtain a certificate for authority to operate as a for-hire carrier or warehouseman in California. Before obtaining authority to operate, they must establish ability and reasonable financial responsibility. For-hire carriers must deposit public liability and property damage insurance with the Commission. Interstate motor carriers are required to register their interstate operating authority with the Commission.

After issuance, carriers' certificates and permits are subject to suspension, reinstatement or revocation for failure to comply with statutes and Commission orders. Activities related to carrier licensing are: analyses of applications for financial responsibility, insurance coverage, and nature and scope of proposed operations; hearings related to certificate applications; and enforcement of licensing requirements.

Applications to operate as a public utility carrier are analyzed to determine compliance with the Commission's procedural requirements, reviewing draft decisions by the examiners, preparing operating authorities in appendix form and monitoring the mandatory requirements contained in the decisions that issue from these proceedings.

Pursuant to Chapter 1195, Statutes of 1979, the Commission will establish 0.7 positions in the current year for developing a transportation energy efficiency plan. In the budget year 3.5 positions are proposed through June 30, 1981 for implementation of the plan.

Output	1978-79	1979-80	1980-81

Expenditures .....	150.8	147.8	150.6	\$3,692,700	\$4,130,003	\$4,571,132

## d. Safety

The safety element in the regulation of transportation program is divided into two components: railroad safety and grade crossing safety.

The railroad safety component is concerned with promoting the adoption and enforcement by railroads and rapid transit systems of safe and efficient operations and maintenance practices and facilities, and the compliance by such carriers with Commission and special orders and State law principally for the promotion of efficiency and safety of operating and nonoperating employees and the public. The grade crossing safety component involves requiring installation of automatic protection devices or the construction of overpass or underpass structures to promote safety at railroad-highway grade crossings.

In the railroad safety component of the safety element, accidents are investigated and causes analyzed for corrective action by the railroad in an accident prevention program. Inspections and surveys involving safety, health and comfort of employees, passengers, customers, and the public are made. These cover railroad rolling stock, main track areas and industrial track areas, repairs, maintenance and operation, and building and bridge construction.

In the grade crossing component, the Commission promotes or orders the installation of automatic protection devices, or underpasses, or overpasses at dangerous railroad-highway crossings. Inspections are made of crossings to determine accident potential and whether cities or counties and the railroads should be required to install automatic protection devices or whether existing protection, if any, should be improved. In addition, complaints from the public regarding unsafe conditions at grade crossings are investigated by this activity. Investigations are conducted of accidents at railroad crossings and for the authorization of new crossings and spur tracks or alterations of existing crossings. Studies are made of the need for the construction of grade separation structures. As vehicular traffic increases with the growth of California, there will be a greater need for improved grade crossing protection and for grade separations to replace grade crossings that have reached their limit capacity to handle the vehicular traffic interspersed with delays caused by train movements.

Two positions have been added to the rapid transit safety unit in the current year. One of the positions will continue through June 30, 1981. The other position is limited to June 30, 1980; however, the position is proposed as permanent in the budget year.

Six positions have been established in the current year for enforcement of Federal Railroad Standards. These positions are proposed as permanent in the budget year.

**e. Just Compensation**

The Public Utilities Code provides that upon petition of a political subdivision, the Commission shall determine the just compensation for the acquisition of a transportation company's property. The need would arise should a political subdivision desire to acquire a transportation company's property but be unable to negotiate compensation with them. Upon receipt of such a request, the program involves valuation, depreciation, appraisal, and financial studies of transportation company property, and placing such studies in evidence through testimony and exhibit at public hearings. After the hearing, the Commission finds and fixes a single sum to be paid for the properties. If the Commission finds that severance damages should be paid, the just compensation for such damages is found and stated separately.

**Output**

No work is planned in this element until a political subdivision of the State makes a formal request for such services.

**III. ADMINISTRATION****Program Objectives and Description**

The objective of this program is to provide the divisions with administrative support through fiscal, personnel and training, electronic data processing, business services and other management functions. Activities in this program also consist of the following: (1) to consolidate management and program and formulate policy and program development, (2) to assist the legal, financial and technical staff in maintaining divisional objectives, (3) to evaluate workload for identification of deficiencies in program requirements, and (4) to provide a liaison between the public and the utilities for the resolution of consumer complaints.

*The Commission received a COD grant to establish 9 positions in the current year. The grant is not continued into the budget year.*

## COMMISSION ON THE STATUS OF WOMEN

## Program Objectives and Description

The Commission on the Status of Women works toward maximum participation of women in California society.

The Commission was originally created by Chapter 1378 of 1965, continued by Chapter 854 of 1967, and by Chapter 721 of 1969. Chapter 541 of 1971 continued the Commission without a termination date, extended its areas of concern, and added action projects and consultive functions to its mandate.

The Commission examines all bills introduced into the Legislature which affect women's rights, maintains an information center on current needs of women, with its resources available to government agencies and private groups and individuals, and gives consultive assistance to organizations working on local levels to assist women. Emphasis is on legislation, education, employment and counseling.

Legislation provides for a 17-member commission, consisting of the Superintendent of Public Instruction, the Chief of the Division of Industrial Welfare, three Members of the Assembly and one public member appointed by the Speaker of the Assembly, one public member and three members of the Senate appointed by the Senate Committee on Rules, and seven public members appointed by the Governor. Chapter 382 of 1973 provided for staggered four-year terms for public members, commencing July 1, 1974. *The 1980-81 Budget proposes a one-time increase of \$5,050 for a Family Law publication and a needs assessment update for women. One new position is also proposed to be funded from existing resources. This coupled with the completion of an IPA grant (0.1 py) on July 31, 1979 and the one-year Section 27.2 reduction during 1979-80 (-0.3) results in a 1.2 personnel year increase for the budget year.*

## INTERGOVERNMENTAL BOARD ON ELECTRONIC DATA PROCESSING

*During its deliberations on the 1978-79 Budget, the Legislature deleted all support for the Intergovernmental Board on Electronic Data Processing, consequently, no funds have been budgeted for support of the Board in 1980-81.*

*In the 1978-79 fiscal year, a \$10,000 Emergency Fund allocation was provided for the Board to liquidate all outstanding obligations.*

## Program Objectives and Description

The primary objectives of the Board were to: (1) facilitate the establishment of efficient, cost-effective, practical systems for intergovernmental flow of information required to conduct government business, (2) see that development and implementation of needed systems is undertaken, (3) see that there is true coordination with all levels, and (4) see that the methods used achieve an integration of the best design ideas available from every level and incorporate the best features from currently operating systems, systems under development and implementation, and systems in the design phase.

## NATIVE AMERICAN HERITAGE COMMISSION

## Program Objectives and Description

The Native American Heritage Commission was created by Chapter 1332 (AB 4239) Statutes of 1976. On June 21, 1977, the Governor, with the advice and consent of the Senate, appointed nine Commissioners and an Executive Secretary, all of whom are California Indians. The Commission is the single governmental unit legislatively mandated to preserve and enhance Native American heritage and to protect California Indian historic and cultural resources located within the State.

The specific powers and duties of the Commission include identifying and cataloging places of special religious or social significance to Native California tribes; making recommendations to the Legislature relative to the protection and preservation of cultural and historic resources; taking action to ensure access to sacred sites for Native Americans; making recommendations to the Department of Parks and Recreation and the California Arts Council relative to Indian matters; where necessary, bringing legal actions to prevent severe or irreparable damage to sacred or sanctified places; establishing working relationships with various State and federal agencies and departments; and, participating with State agencies in any negotiations with federal agencies relating to the protection of Native American sacred places located on federal lands.

The major objectives of this program are as follows:

1. To develop and publish operating procedures and regulations for all Commission activities including the conduct of cultural resource survey and inventory, public hearings, investigations, and appeals.

2. To establish intergovernmental relations. Fulfillment of the Commission's functions and obligations is a continuing program requiring swift reactions to, or participation with, the actions of other State, federal, or regional agencies. Because of the unique fiduciary relationship which exists between Native Americans and the federal government, it is important for the Commission to work with federal agencies.

3. To conduct a review of current statutory and administrative protections applicable to cultural and historic properties with recommendations for amendment or consolidation.

4. To engage in continuous proceedings calculated to protect cultural or historic resources from severe or irreparable damage. This involves on-site inspection and investigation, public hearings, project redesign or mitigation recommendations, and, where necessary, initiating appropriate legal action through the Attorney General's Office.

5. To develop public awareness and information programs designed to educate the public about the State's important and fragile non-renewable cultural resources. This program will be accomplished primarily by printed literature and visual displays.

6. To conduct a survey and inventory of cultural resources and historic properties which are significant to Native Americans and are located on public land within the State. The data recovered by this program are intended to facilitate long-range planning by State and federal project proponents. Without this program a project undertaking may have to be delayed or reassigned because of its impact on a significant cultural site. This program will preserve valuable cultural resources while avoiding costly construction delays.

The 1980-81 budget includes \$23,470 for one new position, a State Archaeologist I, for a two-year limited term to complete the mandate of Chapter 1332/76, which requires identification and categorization of Native American sacred lands.

MOTION PICTURE COUNCIL

Program Objectives and Description

The objective of the Council is to prepare and implement a program to promote the production of motion picture films, and other motion picture and television film products within the State of California.

The council will:

- 1. Prepare and distribute appropriate promotional materials pointing out desirable locations within the State of California for the production of motion pictures.
- 2. Prepare and distribute appropriate promotional materials which illustrate and stress the advantages and possibilities of filming within the State of California those scenes and/or films which are ostensibly set elsewhere.
- 3. Assist film companies in securing permits for location filming, and offer other appropriate services connected with motion picture production.
- 4. Under the provisions of the law appointing the Motion Picture Council the sole permit-granting authority for commercial filmmaking use of State-owned or State-operated properties, refining the mechanisms for granting such permits, and implement this program.
- 5. Facilitate cooperation from local government, State and Federal Government agencies and private sector groups in the location and production of motion pictures in the State of California.

The Motion Picture Council will perform these duties as an economic development office of State Government.

The council was established in the Governor's Office as of January 1, 1976.

Chapter 1395/76 provides the Motion Picture Council with the authority to establish fees for the use of State-owned property for the purpose of making commercial motion pictures. These revenues are to be used as reimbursement to operating departments for their actual additional costs and for support of the council.

Chapter 962, Statutes of 1978, appropriated \$40,000 from the General Fund to the Department of Economic and Business Development for use by the Motion Picture Council. This amount is covered within the reimbursements detailed in this budget for 1979-80. The Council will be self-supporting in 1980-81 through the collections from fee revenue. During 1980-81 \$35,000 is included for a mini-computer for site location data and one personnel year has been added to handle the administrative needs of the Council. This coupled with the conversion of 1.2 temporary help to 1 permanent clerical personnel year results in a net increase of 0.8 personnel years in 1980-81.

## CALIFORNIA HORSE RACING BOARD

### Program Objectives and Description

The purpose of the Board is to regulate pari-mutuel wagering for the protection of the betting public; the promotion of the horse racing and raising industries; and, the maximization of tax revenues for the State of California.

In 1933 the electors of the State of California adopted a constitutional amendment which created the California Horse Racing Board. It provided for the regulation and the safeguarding of existing racing and wagering so as to assure the State of California an income from racing and to guarantee to the public an honest and correct return on monies wagered.

The measure, in order to get the support of the people, wrote many safeguards into the law and gave complete jurisdiction and supervision over all racing activities to the State of California acting through the California Horse Racing Board, a five-member commission appointed by the Governor. Whereas previously racetracks had acted autonomously and the stewards had complete and final authority over all meetings, the California law transferred this authority to the commission. The law also gave the Board wide discretion in rulemaking powers and pursuant to these powers the board passed rules establishing the authority of the stewards but making the stewards strictly and completely responsible to the Board for all their actions.

The California Horse Racing Board supervises all race meetings in the state where pari-mutuel wagering is conducted. Principal activities of the Board are directed toward:

- Protection of the betting public;
- Licensing of racing associations;
- Sanctioning of every person who participates in any phase of horseracing;
- Designating racing days and charity days;
- Acting as a quasi-judicial body in matters pertaining to horseracing meets;
- Collecting the state's lawful share of revenue derived from horseracing meets;
- Enforcing laws, rules and regulations pertaining to horseracing in California.

The state's revenue from horseracing is principally derived from fees based upon a percentage of the pari-mutuel wagering pools, breakage and unclaimed tickets. Additional revenue is derived from licenses issued to horse owners, trainers, jockeys, grooms and others, and from fines and miscellaneous sources. The present tax rates range from 1.00 to 7.45 percent on the total amount wagered at the race tracks.

Estimated revenues for the 1980-81 fiscal year will amount to \$142 million of which approximately \$17 million is appropriated for the Fair and Exposition Fund, \$1,250,000 to the Standardbred Sires Stakes Fund Account, \$750,000 to the Wildlife Restoration Fund, and \$122 million to the General Fund.

### Authority

Section 19b of Article IV of the State Constitution and Sections 19400 through 19664 of the Business and Professions Code.

e. State stewards program .....	13	13	13	-	-	-

### Output

Primarily, the workload of the Board is determined by the number of racetracks operating and the number of racing days allocated. This is directly related to the Horse Racing Law, Chapter 4, Division 8, Business and Professions Code. The projected workload is shown in the following tables:

	77/78	78/79	79/80	80/81
Number of nights .....	411	477	455	455
Number of days .....	524	526	553	578
Totals .....	935	1,003	1,008	1,033
Number of occupational licenses issued <sup>1</sup> .....	22,073	23,909	25,200	26,700
Collection of fees .....	\$592,330	\$1,435,152	\$818,135	\$830,000
Disciplinary hearings:				
Ejected patron cases .....	39	35	40	40
Licensee penalty cases .....	75	84	90	100
Totals .....	114	119	130	140

<sup>1</sup> Effective January 1, 1979, 3 yr. licenses were be issued in lieu of one year. Revenue will increase substantially in the 1981/82 fiscal year.

## CALIFORNIA HORSE RACING BOARD—Continued

## a. Licensing

It is essential, in order to protect both the public and the industry, that the Board be aware of every individual participating in horseracing. The licensing of each participant establishes such a control.

Input	1978-79	1979-80	1980-81
Expenditures .....	\$153,832	\$215,925	\$229,500
Personnel years.....	9.5	11.2	11.2

## b. Enforcement

Strict compliance with the detailed rules is required in order to establish a preventive control and a protection to the betting public and the State's interest.

Racetrack investigators, who represent the California Horse Racing Board, inspect racing operations for compliance with the rules and regulations of the board, seek the ejection of undesirables from racing enclosures, and keep the board informed of all racing matters.

Input	1978-79	1979-80	1980-81
Expenditures .....	\$419,241	\$505,743	\$538,266
Personnel years.....	10	13	13

## c. Administration

Administration includes the California Horse Racing Board, which consists of five members appointed by the Governor for four-year terms, and the administrative staff which is responsible to the Board for budgeting and accounting, supervising the licensing and enforcement activities of the Board, and administering the increasing number of appeals.

Input	1978-79	1979-80	1980-81
Expenditures .....	\$261,652	\$326,460	\$332,550
Personnel years.....	6.3	9	9

## d. California Standardbred Sires Stakes Program

Chapter 1148, Statutes of 1976 provided for the establishment of a standardbred sires stakes program to encourage breeding of horses in California. This is to be accomplished through increased purses and special races supported by an additional one percent takeout and distribution of breakage from harness racing meets. A five member committee, appointed by the board chairman, advises the board on the administration of this program.

Input	1978-79	1979-80	1980-81
Expenditures .....	\$295,049	\$641,603	\$780,000
Personnel years.....	1	1	1

## e. State Stewards Program

Chapter 1080, Statutes of 1977 provided that the board contract with all stewards at racing meets. The board assesses each racing association for the pay and fringe benefits for the stewards and overhead for this program.

Input	1978-79	1979-80	1980-81
Totals, Expenditures .....	\$745,500	\$750,000	\$770,000
Reimbursements .....	- 745,500	- 750,000	- 770,000

## BOARD OF OSTEOPATHIC EXAMINERS

## Program Objectives and Description

The Board of Osteopathic Examiners exists as a result of its 1922 Initiative Act. It sets and enforces standards of licensure for California Osteopathic Physicians and Surgeons, conducts examinations, investigations and initiates disciplinary proceedings.

Through this process, the Board assures that recognized standards of treatment and practice are maintained by its licentiates, thereby protecting and assuring the people of California osteopathic physicians of high caliber.

*In budget year, \$6,176 is proposed for the purchase of a word processing system.*

## BOARD OF CHIROPRACTIC EXAMINERS

### Program Objectives and Description

The Board of Chiropractic Examiners was established by the Chiropractic Act of California, an initiative measure passed by the voters in 1922. The Act assigned to the Board the primary responsibility of assuring the consumers of California that providers of chiropractic services are adequately trained and meet the minimum standards of performance for each treatment. Through licensure, continuing education, and disciplinary processes, the Board insures that recognized standards of treatment and practice are maintained by licensees, approves and regulates eleven (11) chiropractic schools in the U.S. and Canada, reviews complaints, investigates possible violations of the Chiropractic Act, and polices unlicensed activity.

The Board is an independent agency under the direct supervision of the Governor's Office.

One senior special investigator position is added in the current year and the budget year to replace investigative services provided under contract with the Department of Consumer Affairs in Southern California. An additional expenditure of \$12,000 for extraordinary legal services cost is included in the current year along with a deficiency allocation of \$5,796. In the budget year, \$15,905 is proposed for the purchase of a word processing system.

### Program Requirements

	1978-79	1979-80	1980-81
Board of Chiropractic Examiners (State Board of Chiropractic Examiners Fund) ....	\$282,751	\$351,445	\$367,756
Personnel years .....	3.8	5.2	5.2

### Authority

Chiropractic Act of California adopted in 1922.

### Output

1. The number of applicants who do not successfully complete the examination and who are therefore denied a license until they can demonstrate the necessary knowledge and skills.

2. The number of complaints investigated which result in license revocations and suspensions.

# BOARD OF PILOT COMMISSIONERS FOR THE BAYS OF SAN FRANCISCO, SAN PABLO, AND SUISUN

The Board of Pilot Commissioners for the Bays of San Francisco, San Pablo, and Suisun is responsible for providing qualified pilots for vessels entering or leaving those bays. The three-member board is appointed by the Governor and administers the program of licensing and regulating pilots by conducting examinations and acting on disciplinary complaints. The Board maintains an office in San Francisco staffed with one full-time secretary to provide support to the five-member Pilotage Rate Committee, which is appointed by the Governor and recommends pilotage rates to the Legislature.

# SANTA MONICA MOUNTAINS COMPREHENSIVE PLANNING COMMISSION

## Program Objectives and Description

The Santa Monica Mountains Comprehensive Planning Commission was created by Chapter 1327 (AB 163), Statutes of 1976. The Commission consisted of the following fourteen members: The Director of the Office of Planning and Research, one member of the Board of Supervisors of Los Angeles County, one member of the Board of Supervisors of Ventura County, one authorized representative of the Mayor of the City of Los Angeles, one member of the Los Angeles City Council, one elected representative from the City of Thousand Oaks, eight members of the public, four of whom and the Executive Director were appointed by the Governor, two by the Committee on Rules of the Senate and two by the Speaker of the Assembly.

The specific duties of the Commission included making a detailed study of all the characteristics of the zone which are specified in the final report of the Ventura-Los Angeles Mountain and Coastal Study Commission, including a study of land capabilities and the private and public short- and long-term costs and benefits related to probable and possible changes in the density or intensity of use of land within the zone. Upon the basis of such studies, the Commission prepared a comprehensive and specific plan, which is in the process of being implemented by local government for the conservation and development of the zone. The regional plan included the following elements: a land use plan; a transportation plan; a conservation plan; a recreation plan; a public services and facilities plan and an economic element. The final report of the Commission has been submitted to the Governor and the Legislature.

Chapter 230 (AB 2377), Statutes of 1978, extended the final report submission date from July 1, 1978 to February 1979 and appropriated \$150,000 from the General Fund to provide for continued funding. The Commission and its staff terminated August 31, 1979. Item 187.5, Budget Act of 1979, provided \$35,000 to fund the Commission's final months of operation. Item 187.5, Budget Act of 1979, also provided the Resources Agency with \$49,000 to oversee follow-up work and approval of the final report by various local and Federal entities.

Chapter 1087, Statutes of 1979 (AB 1512) established the Santa Monica Mountains Conservancy Program as the state entity promoting the implementation of the regional plan.

## Authority

Title 7.75 (commencing with Section 67450) of the Government Code.

# CALIFORNIA INFORMATION SYSTEMS IMPLEMENTATION COMMITTEE

## Program Objectives and Description

The State has established policies regarding electronic data processing which to be effective must be expeditiously implemented. The Committee's objective is the formulation of recommendations regarding appropriate legislative and executive actions in order to expeditiously implement the State's electronic data processing policies.

The Committee consists of the Secretary of Business and Transportation, Secretary of Health and Welfare, Chairman and Vice Chairman of Assembly Committee on Ways and Means, and Chairman and Vice Chairman of Senate Committee on Finance, Director of General Services, Director of Finance, Chairman and Vice Chairman of the Joint Legislative Budget Committee, and Chairman and Vice Chairman of the Joint Legislative Audit Committee.

In its role as a focal point, the Committee reviews electronic data processing policies set forth in Sections 11700 through 11784 of the Government Code and makes recommendations for appropriate change.

The Committee develops procedures for the implementation of policies for protecting the privacy and confidentiality of records and the rights and privacy of the individual as established by law.

The Committee reports to the Legislature and Governor each year the recommendations made and procedures adopted for implementing the conclusions derived by the Committee.

The Committee's personal services budget shows the addition of one-half personnel year of temporary help in both the current and budget years to more accurately reflect the historical spending pattern of the Committee.

## COMMISSION ON PEACE OFFICER STANDARDS AND TRAINING

The objectives of the Commission on Peace Officer Standards and Training (POST) are to raise the level of competence of California peace officers and to provide such other services to local law enforcement as are authorized by law. To accomplish this, the Commission establishes minimum standards of physical, mental, and moral fitness for the recruitment, selection and training of peace officers. The Commission on Peace Officer Standards and Training apportions revenue received from assessments on criminal and traffic fines to local jurisdictions to reimburse them for a portion of the cost of training peace officers.

IIA. Research and Evaluation Bureau .....		6	233,382
III. Assistance to Cities and Counties .....		-	901,222

### I. OPERATIONS DIVISION

#### Program Objectives and Description

The objectives of the Operations Division are to:

1. Coordinate efforts to increase the effectiveness of law enforcement personnel by developing education and training courses to meet needs identified through planning; to provide quality control and adequate scheduling of such courses; to assist police agencies to meet training and career development programs; and to render other related miscellaneous services to enforcement agencies and training institutions.
2. To solve specific administrative or operational problems related to management or operational techniques and procedures of local law enforcement agencies.

#### Standards and Training

Education and training courses are organized at local community colleges, four-year colleges, universities, police academies, and other institutions to meet the needs of peace officers. Courses offered are categorized as recruit officer, supervisory, middle management, advanced officer, executive development, and a wide variety of technical and special courses.

Consultants from this division establish the basic criteria that must be met for each of these courses before commission certification. Advice and assistance is given to local educators and police trainers in preparing these courses and training plans.

Periodic field inspections are made to insure that instructors, coordinators, and trainers are adhering to established course outlines and are meeting all instructional standards. Failure to meet the educational and training standards may be cause for revocation of course certification. Implementation assistance is provided to local agencies to obtain the best results from available training programs.

#### Authority

Section 13503, Penal Code.

#### Management Services

Management Services solves specific administrative or operational problems related to management of operational techniques and procedures of local law enforcement agencies. Three major counseling services are provided to local jurisdictions upon request:

1. Special surveys consisting of the review and analysis of specified topics.
2. Selected studies and special services which provide limited and specified counseling services.
3. Staff assistance to insure prompt and effective implementation of survey recommendations.

The conduct of these counseling services usually includes the preparation of a written analysis of problem solution. Surveys are normally handled by POST staff members. However, in some instances, analysis of unusual problems or implementation of survey recommendations may entail the temporary employment of special consultants. The results of crime prevention programs are being integrated into the counseling services provided.

Inspections are conducted to determine if law enforcement agencies of jurisdictions receiving state aid are adhering to adopted standards for selection and training, and implementation assistance is provided in raising the level of competency through the selection and training process.

The procedures used by a jurisdiction to select and train law enforcement personnel are audited and a counseling service to improve the methods employed in this administrative process is provided. If the result of the inspection reveals operational or structural defects, a program is provided to insure compliance. Those police personnel in departments selected to conduct background investigations of newly recruited officers are counseled and trained as necessary. A minority recruitment program has been functionally integrated as part of the field services provided by the Operations Division.

#### Authority

Sections 13512 and 13513, Penal Code.

## II. ADMINISTRATION

## Program Objectives and Description

The objective of Administration is to execute the commission's policies and assure the organization's compliance with State regulations. There are two elements included within Administration: Executive and Support Services which provides overall guidance to the commission and the Center for Police Management which provides research assistance to solve problems identified by local law enforcement and POST.

## Executive and Support Services

The administration staff, under direction of the executive director, provides staff services, formulates directives, and analyzes newly introduced legislation for fiscal impact and programmatic implications. It also provides research assistance to other organizational units, word processing center services, library services, graphic arts services and initiates special projects and provides direction and control over the local assistance programs so that the commission's overall objectives may be realized in the most efficient and economical manner possible.

When an employee performing police tasks completes a certified course, a claim is submitted to POST by the employing jurisdiction for reimbursement of the money expended in training the person. Upon receipt, the claim is checked to insure that the course is certified in the amount and for the number of hours claimed, and for arithmetical accuracy. Correct and valid claims are forwarded to the Controller for payment. Various statistical reports are also prepared for management use and for the commission.

Applications by officers for professional law enforcement certificates, accompanied by college transcripts, certificates of course completion, and other supporting documents are reviewed to determine eligibility for a certificate and level of proficiency of each applicant. An appropriate certificate is completed and mailed to each qualified applicant.

*Seven positions were administratively established in 1979-80 to develop job-related employee selection standards and are supported by a Federal grant. Six of these positions will be continued on a permanent basis in the budget year to form a Research and Evaluation Bureau. It is expected that this Bureau will enhance the effectiveness of the peace officer training program by establishing procedures for systematic and quantitative assessment.*

## Authority

Section 13500, Penal Code.

## Center for Police Management

The Center for Police Management was administratively transferred from the Operations Division in February 1979.

There is a continuing need for research into management problems confronting local law enforcement agencies. This research is necessary so that law enforcement can more effectively carry out its responsibility for maintenance of public order and protection of life and property. The quality and effectiveness of local law enforcement service is directly related to the effectiveness of management. Many agencies have turned to POST as a resource center for guidance and assistance in resolving specific police management problems.

In concert with other POST organizational elements, the center for police management provides management research assistance and develops and implements workable solutions to selected research projects identified by local law enforcement and POST.

Written publications dealing with the "how to" aspects of problem solution involving the most pressing police management questions or problems often result from this cooperative effort.

## III. ASSISTANCE TO CITIES AND COUNTIES

## Program Objectives and Description

The enforcement of laws and the protection of life and property without infringement on individual liberties is one of modern government's most pressing problems. Carefully selected, highly trained and properly motivated peace officers are important factors in the solution of this problem. To encourage and assist local law enforcement agencies to meet and maintain minimum standards in the selection and training of law enforcement officers, financial assistance is provided to those cities and counties which qualify for State aid for peace officer training. Each jurisdiction participating in the program is reimbursed from the Peace Officers' Training Fund in proportion to the number of officers who qualify for reimbursed training.

## Authority

## OFFICE OF CRIMINAL JUSTICE PLANNING

The Office of Criminal Justice Planning provides staff support to the California Council on Criminal Justice; coordinates planning efforts by private, state and local agencies in the criminal justice system; and administers federally-funded grants to those agencies in accordance with the plans they develop under federal and state guidelines.

The California Council on Criminal Justice has responsibility for setting broad policies and priorities for effective use of available grant funds to aid in the control and prevention of crime. That responsibility includes the review and approval of the annual comprehensive state plan as well as review and approval of grants funded under that plan. Twenty-one regional planning units coordinate planning activities, review and recommend proposals and monitor grant activities within their jurisdictions.

### I. PLANNING AND OPERATIONS

#### Program Description

This program contains the functions of planning, evaluation, monitoring and technical assistance. Planning entails analysis of crime and delinquency, the criminal justice system and related data to determine how grant funds can most effectively be used to deal with the problems that exist. This takes the form of an annual criminal justice plan as required by the Law Enforcement Assistance Administration. Evaluation entails a systematic analysis of grant programs and projects to determine if the activity funded had a causal relationship to reducing or controlling crime. Evaluations indicate what works or doesn't work and what should be encouraged or discouraged in subsequent years. Monitoring informs the office of whether a project is performing in accordance with its contractual obligations. Technical assistance is the staff help provided by OCJP to grantees on carrying out projects and encouraging the use of methods which have proved successful.

Products from these efforts include a State Criminal Justice Plan, program evaluation reports, project monitoring reports and an implemented technical assistance plan.

Four positions have been added to the current year, effective January 1, 1980 and are continued for the budget year. Two of these are being established to conduct a Federal project on the coordination of Victim/Witness Assistance Centers. The other two positions, one in the Evaluation Unit and one in the Program Development Unit, result from the conversion of contract personnel to permanent positions. In the budget year another position will be added to the Victim/Witness Program, and one currently established limited term position will be continued for the Career Criminal Prosecution Program.

## OFFICE OF CRIMINAL JUSTICE PLANNING—Continued

## II. ADMINISTRATION

## Program Description

This program provides executive leadership and basic management services—council liaison, personnel, accounting, business services, budgeting, grant processing and fiscal monitoring as well as technical guidance on legal, fiscal and affirmative action questions.

The budget year reflects the reduction of two (2) limited term positions for the Joint-Funded Multi-Service Youth and Family Service Program, AB 965. The limited term position established in the current year for the GMIS Program has been continued on a permanent basis for the budget year and one (1) fiscal position is being abolished effective January 1, 1981. Ten audit positions have been transferred from the Department of Finance to continue to perform fiscal and compliance audits previously conducted by the Department of Finance. The audits are required by the Federal Government. In addition, the budget year reflects the restoration of one (1) person year resulting from the one-time Section 27.2 reduction in the current year. Two positions are proposed for the budget year to staff the Advisory Council on Drug Abuse; these positions will be limited to June 30, 1981.

## III. CRIME RESISTANCE TASK FORCE

## Program Description

The Crime Resistance Task Force, created by the Governor in Executive Order No. B-30-77 and statutorily provided for in AB 2971 has as its primary objectives to encourage citizen involvement and cooperation with police in local crime prevention programs throughout the State; and, to assist agencies and community groups in the development of such programs. The Executive Order directs OCJP to serve as the staff support agency for the Task Force.

## IV. STATE AND PRIVATE AGENCY AWARDS

## Program Description

The Omnibus Crime Control and Safe Streets Act, as amended in 1976, sets the maximum percentage of the block grant funds available which may be awarded to state agencies and private organizations. For Fiscal Year 1979-80 the maximum was 26.7 percent. Notification of this "variable pass-through" percentage is usually distributed to all states in August or September of the fiscal year affected. The CCCJ is providing 73.3 percent of block grant funds to local jurisdictions.

Program Requirements	1978-79	1979-80	1980-81

## V. LOCAL PROJECT AWARDS

## Program Description

The Omnibus Crime Control and Safe Streets Act, as amended in 1976 provides a minimum percentage of the total block grant awarded to California which must be made available to units of local government or to combinations of local government. The minimum pass-through for 1979-80 was 73.3 percent based on the direct expenditures (excluding federal and State funds) by local governments on the criminal justice system during Fiscal Year 1977-78. The allocation to local units of government exceeds the minimum for the current year.

Chapter 713, Statutes of 1979 increased the penalty assessment on felony fines which is expected to result in an increase in the Indemnity Fund of \$3,000,000. The new legislation also provided authority for legislative appropriation of one-half of the annual revenue in the Indemnity Fund to the Office of Criminal Justice Planning for grants to local centers providing services to victims and witnesses of crimes. For 1980-81 it is proposed that \$3,000,000 be distributed from this fund to local victim/witness centers. The budget year also reflects an increase in local grants to counties for the Career Criminal Prosecution Program from \$2,165,000 to \$3,200,000 and additional allocation of \$250,000 to the Community Crime Resistance Program.

## Program Requirements

## STATE PUBLIC DEFENDER

## Program Objectives and Description

Chapter 1125, Statutes of 1975, authorized the appointment of a State Public Defender who may employ such deputies and others as necessary to effectively represent those entitled to representation at public expense. The State Public Defender has established offices in Sacramento, San Francisco, and Los Angeles and contracted with Appellate Defenders, Inc., a nonprofit San Diego corporation, to provide a statewide capability to represent indigents in the State and federal appellate courts.

The primary objectives of the State Public Defender are to represent any person who is not financially able to employ counsel in the following matters:

(a) An appeal, petition for hearing or rehearing to an appellate court or petition for certiorari to the United States Supreme Court or a petition for executive clemency from a judgment relating to criminal or juvenile court proceedings;

(b) Petitions for an extraordinary writ or action for relief relating to a final judgement of conviction or wardship;

(c) Proceedings after a judgement of death;

(d) Proceedings in which an inmate of a State prison is charged with an offense where the County Public Defender has declined to represent the inmate;

(e) Any proceeding where a person is entitled to representation at public expense.

The enabling legislation specifically provides that the State Public Defender: (1) may employ such deputies and other employees and establish and operate such offices as he may need for the proper performance of his duties, (2) may contract with county public defenders, private attorneys, and nonprofit corporations, (3) may enter into reciprocal or mutual assistance agreements with the board of supervisors of one or more counties to provide for exchange of personnel, (4) shall formulate plans for representation of indigents in the Supreme Court and in each appellate district, and (5) may represent any person who is not financially able to employ counsel in any proceeding where a person is entitled to representation at public expense.

The Legislature has mandated the State Public Defender to represent indigents at hearings to extend their commitments as a mentally disordered sex offender (MDSO) (Chapter 164/77) or as a person found not guilty by reason of insanity (NGI) (Chapter 1114/79). Six (6) positions are added for this purpose and three (3) clerical positions are added for workload. Funds necessary to contract with Appellate Defender's, Inc., have been eliminated and the function has been transferred to the Judicial budget. One-time Section 27.2 reductions of 3.6 positions in 1979-80 are being restored in the budget year. In addition there is a salary savings increase of 0.4 in the budget year.

## ASSISTANCE TO COUNTIES FOR DEFENSE OF INDIGENTS

### Program Objectives and Description

Section 987.6 of the Penal Code provides that the State shall pay to the counties an amount not to exceed 10 percent of the amount actually expended by counties in providing legal assistance to indigents charged with violation of State criminal law or involuntarily detained under the Lanterman-Petris-Short Act, Division 5 of the Welfare and Institutions Code. The subvention in the amount of \$775,000 represents the traditional level of State assistance to counties for public defenders.

Section 987.9 of the Penal Code provides that indigent defendants in capital cases may request the court for funds for payment of investigators, experts, and others for the preparation or presentation of the defense in capital cases. The subvention of \$1,000,000 represents the estimated amount to reimburse counties for their costs related to the act.

## SUBVENTION FOR GUARDIANSHIP/CONSERVATORSHIP PROCEEDINGS

### Program Objectives and Description

The purpose of this budget is to provide for state reimbursement of the costs to counties resulting from the enactment into law of AB 1417 (Chapter 1357, Statutes of 1976).

Chapter 1357, Statutes of 1976 substantially revised the law regarding procedures for the establishment of guardianship and conservatorships in instances where an adult person by reason of advanced age, illness, injury, mental weakness, intemperance, addiction to drugs or other disability or other cause is unable to properly care for himself or his property.

This budget contains \$1,835,989 in allowance for those provisions of Chapter 1357, Statutes of 1976 which require:

1. Court appointment of legal counsel for indigent persons for whom guardianship or conservatorship is sought.
2. Court appointment of legal counsel for indigent persons who wish to petition the court for termination of guardianship or conservatorship proceedings, for restoration to capacity or for removal of an existing guardian or conservator.
3. Court appointment of an investigator to interview a proposed ward or conservatee who is unable to attend a court hearing where the determination of the need to appoint a guardian or conservator is made.
4. A court investigator to review each guardianship or conservatorship one year after its initiation and biennially thereafter.
5. A trial by jury when demanded by a person for whom a guardianship or conservatorship is proposed.

### Program Requirements

	1978-79	1979-80	1980-81

## PAYMENT TO COUNTIES FOR COSTS OF HOMICIDE TRIALS

Sections 15201 through 15203 of the Government Code provide that the State shall reimburse the costs incurred by counties for homicide trials where the cost is in excess of the amount of money derived by the county from a tax of five cents (\$.05) on each one hundred dollars (\$100) on the property assessed for purposes of taxation within the county.

Chapter 1413, Statutes of 1978 augmented Item 393 of the Budget Act of 1978 by \$500,000 for payment of Sutter County's costs for the retrial of Juan Corona.

Chapter 1003, Statutes of 1979 augmented Item 417 of the Budget Act of 1979 by \$1,200,000 for payment of projected current year costs for the Hittson case in Siskiyou County, the Corona case in Sutter County, and the Rodriguez case in Yolo County.

Program Requirements	1978-79	1979-80	1980-81

## ADMINISTRATION AND PAYMENT OF TORT LIABILITY CLAIMS

### Program Objectives and Description

Chapter 1681, Statutes of 1963, established law governing the liability and nonliability of the State for tort actions of its officers and employees. This act also established rules governing the extent of duty of the State to pay judgments and to indemnify its employees.

In the past, the State has assumed liability for all losses up to \$5 million and has purchased insurance covering losses from \$5 million to \$50 million. The State's general insurance policy was discontinued in 1977-78 based on a benefit/cost study made by the Department of Finance. A small number of agencies with unique liability problems are covered under special insurance policies.

The amounts of settlements and awards vary, sometimes significantly, from year to year depending upon the cases in litigation and the amounts estimated to be awarded in each instance. The budget is expected to cover those expenses which can reasonably be anticipated.

Section 948 of the Government Code provides that the head of any State agency, upon recommendation of the Attorney General, may settle, adjust or compromise any pending action with approval of the Director of Finance. Current administrative policy provides a delegation of Finance's approval authority to the Attorney General for actions not exceeding \$15,000. Additionally, administrative policy provides that claims up to \$50,000 approved by the Director of Finance are paid from the appropriation in the Budget Act, while claims exceeding \$50,000 are paid through special appropriation legislation. It is noted that the Department of Transportation is not subject to the provisions of Section 948 of the Government Code and consequently handles tort actions related to its program independently of the Attorney General and the Director of Finance.

In the interest of providing the Legislature a more comprehensive statement of statewide costs for the tort program, the budget format includes a consolidated display of tort-related expenditures. All program expenditures are reflected in the department or agency budgets in which the costs are incurred.

This format arrays the various statewide costs in one location in the Governor's Budget. Specific action on various elements in the tort program can be addressed through the departments which are appropriated funds for administering and paying tort liability claims.

Program Requirements	1978-79	1979-80	1980-81

## BOARD OF CONTROL

Pursuant to Government Code Section 13900, et seq., there is in State Government the State Board of Control. The primary objectives of the Board of Control are:

1. To consider and settle claims against the State in an orderly and impartial manner and reduce the number of items requiring legislative review or judicial adjudication.
2. To provide equitable allowances to State employees for travel, relocation expenses and other reimbursements specifically assigned to its jurisdiction.
3. To protect the public against arbitrary or capricious acts of State agencies in the procurement of supplies and equipment.
4. To reduce State expenditures and increase operating efficiency through utilization of State employee suggestions by recognizing those employees for acts exceeding normal job responsibilities.
5. To compensate innocent victims of violent crimes for documented financial loss associated with the crime.
6. To compensate local jurisdictions for additional financial burdens caused by a state mandate.

### Authority

Government Code Sections 905.2, 912.8, 11031, 11270, 13920, Penal Code, Revenue and Taxation Code, Code of Civil Procedure, Welfare and Institutions Code, Education Code, Health and Welfare Code, Military and Veterans Code, and others.

### I. ADMINISTRATION

#### Program Objectives and Description

The General Activities program does not have any full-time employees and payroll services is not able to correctly charge fractional time to different programs; therefore, all personal services must be paid from one program fund. Additionally, all operating expense funds designated to General Activities may just as accurately be designated to Administration. To more accurately control the fiscal aspects of the Board of Control, the two programs, Administration and General Activities, have been combined into Administration.

The administrative function provides direction to the Board of Control staff in response to the tenor set by the Board; serves as liaison between the Legislature and the Board; provides personnel and budget services to all programs under the jurisdiction of the Board of Control; and acts on behalf of the Board in matters specifically delegated by the Board.

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81
Totals, Administration (General Fund) .....	6.1	5.3	5.3	\$247,135	\$157,661	\$208,272

### II. MERIT AWARD BOARD

#### Program Objectives and Description

Effective utilization of the innovative resources of state employees for achieving greater economy and efficiency in conducting state business requires an organized system for soliciting and evaluating employee suggestions. This program is administered by a five-member Merit Award Board appointed by the Board of Control. Activities include coordinating and promoting the program; giving guidance and assistance to all departments; reviewing suggestion evaluations to assure complete, accurate and objective reports; notifying employees of the status of their suggestions; developing standards and policies for the conduct of the program; and administering awards for superior accomplishment and sustained superior accomplishment as well as medals for valor.

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81
Totals, Merit Award Board (General Fund) ..	4.3	5	5	\$89,010	\$127,796	\$131,364

### III. VICTIMS OF CRIME

#### Program Objectives and Description

This program indemnifies those citizens who are injured and suffer financial hardship as a result of a crime of violence, or who sustain damage or injury while performing acts which benefit the public. The victim of a crime of violence, a citizen performing an act beneficial to the public, or any person dependent upon the victim or citizen for support may file a claim with the State Board of Control. Eligibility is determined by the Board of Control as authorized by Chapter 1144, Statutes of 1973, after an investigation of the claim is conducted by the staff.

The transfer of staff from the Department of Justice to the Board of Control as mandated by Chapter 636, Statutes of 1977, has been accomplished.

The courts have been responding to the requirements of Chapter 1122, Statutes of 1977, and are collecting fines, penalty assessments, liens and restitution from perpetrators of crimes. Chapter 713, Statutes of 1979 raised the fines and penalty assessments and it is estimated that as a result, an additional \$4,000,000 will be collected in Fiscal Year 1980-81 which will be deposited into the Indemnification Fund. Of this amount, \$3,035,000 is budgeted for the Office of Criminal Justice Planning's purposes for victim/witness assistance centers. 5.8 personnel years have been proposed for 1980-81 to decrease the backlog and to meet the increase in claims workload.

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81
Totals, Victims of Crime .....	36.3	58.9	64.7	\$728,931	\$1,435,482	\$1,633,018
<i>Reimbursements .....</i>				<i>728,931</i>	<i>1,435,482</i>	<i>1,633,018</i>

## BOARD OF CONTROL—Continued

## IV. GOVERNMENTAL CLAIMS

## Program Objectives and Description

The overloaded condition of the courts and the increasing number of claims filed against the state make it essential that as many claims as possible be settled by administrative action. This function receives, processes and investigates all claims for money or damages against the State. Tort liability claims approved by the Board of Control are paid from funds appropriated for that purpose. All equity claims approved by the Board are referred to the Legislature for payment under an omnibus claims bill.

In the past, the Departments of Justice and Transportation have been billed annually for their claims which are adjudicated by the Board of Control.

During 1979-80 one personnel year in temporary help has been established in response to Chapter 1204, Statutes of 1979. This legislation appropriates \$25,000 to the Board of Control for one year only to review local agencies' claims for extraordinary costs they had incurred in 1978-79 in providing law enforcement services. \$1,000,000 is also provided for the payment of these claims. 3.9 personnel years have been proposed for 1980-81 to meet the increase in governmental claims workload.

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81

Reimbursements .....				90,053	46,766	74,214

## V. LOCAL MANDATED COSTS

## Program Objectives and Description

This program receives and processes all claims from local jurisdictions claiming increased expense attributable to legislation or executive orders. Parameters and guidelines are established by the Board of Control following its determination that a mandate exists. Claims approved for reimbursement of state mandated local costs are submitted twice a year for legislative appropriation.

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81

# INDEMNIFICATION OF PRIVATE CITIZENS

## Program Objectives and Description

This program indemnifies those citizens who are injured and suffer financial hardship as a result of a crime of violence, or who sustain damage or injury while performing acts which benefit the public.

The victim of a crime of violence, a citizen performing an act beneficial to the public, or any person dependent upon the victim or citizen for support may file a claim with the State Board of Control. Eligibility for an award is determined by the Board of Control after an investigation of the claim by the staff of the State Board of Control as authorized by Chapter 636, Statutes of 1977. This chapter transferred the total responsibility and funding for the administration of this program from the Department of Justice to the Board of Control effective January 1, 1978. Awards may not exceed \$23,500 for each claimant, including a maximum of \$10,000 for loss of earnings, \$10,000 for medical expenses, and \$3,000 for rehabilitation services and attorneys' fees up to 10 percent of the award or \$500, whichever is less.

The courts have begun to respond to the requirements of Chapter 1122, Statutes of 1977, and are collecting fines, penalty assessments, liens and restitutions from perpetrators of crimes. In addition, Chapter 713, Statutes of 1979 further raised the fines and penalty assessments and it is estimated that this will produce an additional \$4,000,000 in 1980-81 for deposit in the Indemnification Fund. Of this amount \$3,035,000 is budgeted for the Office of Criminal Justice Planning's purpose for victim/witness assistance centers. It is therefore anticipated that \$6,060,000 will be recovered in the 1980-81 fiscal year which will be deposited in the Indemnity Fund.

## Program Requirements

**STATE BAR OF CALIFORNIA**

**Program Objectives and Description**

The administration of the State Bar of California is handled by the 21 member Board of Governors, including six public members who are not lawyers. In addition, there is an examining committee with two nonattorney members and one or more disciplinary boards, each with two nonattorney members. Chapter 304, Statutes of 1977 (AB 234) provides that the public members of the Board of Governors, examining committee, and disciplinary boards shall receive \$50 per day for each day actually spent in the discharge of official duties, not to exceed \$500 per month.

## TAX RELIEF

A significant portion of the State's annual budgeted expenditures are allocated for tax relief. Tax relief programs were initiated in the late 1960's as a response to the growing concern with the burden of taxes on certain groups of taxpayers. In an effort to mitigate the impact of property taxes, the Constitution was amended to provide homeowners a partial exemption against the value of their residences. In response to assertions that the property tax on inventories was stifling economic activity, businesses were given a partial exemption for inventories. The State provided subventions in the amount of actual property tax revenue loss to reimburse cities, counties, school districts, and other local taxing jurisdictions for these programs. In 1967 the Senior Citizens' Property Tax Assistance program was established to provide direct assistance to low income elderly homeowners based on the income and property tax of a claimant. In 1972 the State began to partially reimburse cities, counties, and school districts for revenue losses due to Williamson Act contract assessed value reductions.

In 1972, substantial increases were made in two major tax relief programs, Homeowners' Property Tax Relief and Personal Property Tax Relief. At the same time, the Renters' Tax Relief program, which provided an income tax credit or refund to qualified renters based on income, and State reimbursements to local jurisdictions for revenue losses from future sales or property tax exemptions were instituted.

The Senior Citizen Renters' Tax Assistance program was established in 1976. Effective in 1977-78, this program provided low-income elderly renters a cash payment based on the claimant's income and a statutory equivalent for property taxes paid.

Article XIII A of the California Constitution (Proposition 13) was approved by the voters in the June 1978 election. This Article limits property taxes to 1 percent of market value and also limits growth in market value to 2 percent per year, unless the property is sold or transferred. This reduced the State's costs in most property tax relief programs by about 50 percent, the same level of relief provided to property owners.

In 1978, the Renters' Tax Relief program was expanded to include welfare recipients, the disabled became eligible for the Senior Citizens' Property Tax Assistance and Senior Citizens Renters' Tax Assistance programs, regardless of age, and the benefits of the Senior Citizens Renters' Tax Assistance program were increased.

Several bills modifying the tax relief program were enacted in 1979. Chapter 1150 (AB 66) totally exempted business inventories and altered the method of reimbursement. Chapter 1207 (AB 276) increased the benefits of the Renters' Tax Relief Program. Chapter 1075 (AB 581) modified the Open Space Program to provide equity in conjunction with Article XIII A of the California Constitution.

Today the State is the major local property taxpayer in California. State payments for the tax relief programs total approximately 18 percent of local property tax revenue.

### SUMMARY OF PROGRAM REQUIREMENTS

	1978-79	1979-80	1980-81
I. Senior Citizens' Property Tax Assistance.....	\$71,006,493	\$24,500,000	\$27,000,000
II. Senior Citizens' Property Tax Deferral Program.....	1,462,000	4,200,000	4,500,000
III. Senior Citizen Renters' Tax Assistance.....	5,313,918	44,000,000	48,000,000
IV. Personal Property Tax Relief.....	211,341,669	210,525,000	466,725,000
V. Homeowners' Property Tax Relief.....	336,931,063	338,000,000	344,000,000
VI. Subventions for Open Space.....	12,905,683	14,000,000	14,000,000
VII. Payments to Local Government for Sales and Property Tax Revenue Loss.....	5,571,451	2,329,500	817,100
VIII. Renters' Tax Relief.....	133,801,979	383,000,000	418,000,000
IX. Substandard Housing.....	-	107,817	125,000
TOTALS, PROGRAMS ( <i>General Fund</i> ).....	\$778,334,256	\$1,020,662,317	\$1,323,167,100

### I. SENIOR CITIZENS PROPERTY TAX ASSISTANCE

The State provides financial assistance through a system of direct reimbursements for portions of property taxes paid by low-income California residents 62 years of age and older who own and occupy their own homes. The percentage of assistance is inversely related to household income. Assistance for the year 1976-77 was granted to senior citizens having total household income of \$10,000 or less. The level of assistance ranged from 4 to 96 percent of the amount of property taxes paid on the first \$7,500 of assessed value.

Chapter 161, Statutes of 1976, liberalized the assistance schedule and increased the assistance range. Chapter 1060, Statutes of 1976, substantially expanded assistance levels by providing for 96 percent assistance at \$3,000 income to 4 percent assistance at incomes of \$12,000. Chapter 1060 also increased the maximum assessed value on which assistance is calculated from \$7,500 to \$8,500.

Chapter 569, Statutes of 1978, provided that totally disabled persons qualify for this program, regardless of age. This provision was effective with claims filed in 1979 for the 1978-79 fiscal year.

In 1978-79, there were 280,459 claimants in this program, with an average amount of assistance of \$252. For the current and budget year, an estimated 230,000 claims will be filed. The average amount of assistance is estimated to be \$105. About 7,200 of the claims are filed by disabled homeowners, with an average amount of assistance of \$125, which is \$21 higher than the average claim per senior owner. The reduced cost of the program and the lower average assistance paid result from the reduced property tax payments after enactment of Proposition 13.

#### Program Requirements

	1978-79	1979-80	1980-81
Continuing program costs.....	\$71,006,493	\$24,500,000	\$27,000,000

## TAX RELIEF—Continued

## II. SENIOR CITIZENS' PROPERTY TAX DEFERRAL PROGRAM

Chapter 1242, Statutes of 1977, established a property tax deferral program, commencing with 1977-78 property taxes, for California residents 62 years of age or older who own and occupy their own homes and who had household income of \$20,000 or less for calendar year 1976. For succeeding years, the income limit will be adjusted to reflect changes in the California Consumer Price Index. The income limit is estimated to be \$25,600 for the budget year.

Chapter 576, Statutes of 1978, expanded the deferral program to persons whose principal residence is located on real property for which the person holds a possessory interest for a term of 45 years or more.

The following table shows the costs of the Senior Citizens' Property Tax Deferral Program.

	1978-79 Actual	1979-80 Estimated	1980-81 Estimated
Costs:			
State Controller .....	344,710	\$391,479	\$358,418
Franchise Tax Board .....	60,000	60,000	60,000
Deferral Provided .....	1,462,000	4,200,000	4,500,000
Interest on Assistance <sup>1</sup> .....	1,370,000	2,050,000	2,230,000
Total Costs .....	\$3,236,710	\$6,701,479	\$7,148,418
Repayment of Assistance (includes interest) .....	2,971,200	3,000,000 <sup>2</sup>	3,500,000 <sup>2</sup>
Sale of Property .....	—	165,000	250,000

Program Requirements	1978-79	1979-80	1980-81
Continuing program costs .....	\$1,462,000	\$4,200,000	\$4,500,000

## III. SENIOR CITIZEN RENTERS' TAX ASSISTANCE

Chapter 1060, Statutes of 1976, established an assistance program for low-income renters who are at least 62 years old. Chapter 569, Statutes of 1978, expanded the benefits and included the disabled, regardless of age. Increasing the benefits to current recipients costs thirty million dollars in the current and budget year and expanding the program to include the disabled costs eleven million dollars. Assistance is based on a percentage assistance schedule and the property tax equivalent was raised from \$220 to \$250. Assistance ranges from 96 percent to 4 percent, but the maximum income was raised from \$5,000 to \$12,000 and the maximum percentage assistance is paid on incomes up to \$3,000 rather than \$1,400. The maximum assistance is \$240, up from \$211, and the minimum is \$10, not \$9. The definition of household income is the same as under the Senior Citizens' Program for homeowners. Rented premises are defined as premises rented and occupied by the claimant as the principal place of residence during the fiscal year for which assistance is claimed. There are proration provisions for individuals renting less than a full year; and if a claimant owns a home part of a year and rents part of that year, he can file for either senior citizen assistance programs, but not both. The program is administered by the Franchise Tax Board.

In 1978-79, there were 79,253 claimants in this program, with an average amount of assistance of \$67. The expanded program in the current and budget year will have an estimated 255,000 claimants, with an average amount of assistance of \$171. About 55,000 of the claims will be filed by disabled renters with an average assistance of \$195, \$30 higher than the average claim per senior renter.

Program Requirements	1978-79	1979-80	1980-81
Continuing program costs .....	\$5,313,918	\$44,000,000	\$48,000,000

<sup>1</sup> Interest cost determined by using average earning rates of Pooled Money Investment Account.

<sup>2</sup> Includes property tax assistance offsets to postponements of liens.

## TAX RELIEF—Continued

## IV. PERSONAL PROPERTY TAX RELIEF

Beginning in 1969–70 the State provided reimbursement to local governments for the property tax revenues lost as a result of the fifteen percent exemption of business inventories and livestock as well as special reimbursements for motion picture films and wine and brandy. The exemption was increased to thirty percent in 1970–71, to 45 percent in 1973–74 and up to 50 percent in 1974–75 and thereafter.

Chapter 282, Statutes of 1979, made a one-time reduction in reimbursements for 1979–80 of \$21 million for cities and \$17.4 million for counties. The reduction will be made in proportion to subventions received. This was part of the local fiscal relief bill for long-term implementation of Proposition 13 of 1978.

Chapter 1150, Statutes of 1979, eliminated the business inventory tax and changed the method of reimbursing local governments beginning in 1980–81. The 1980–81 reimbursements will be equal to the 1979–80 business inventory and livestock reimbursements based on a \$4.00 tax rate and increased by the change in the California Consumer Price Index and population (average daily attendance for school districts). This will increase budget year costs by approximately \$175 million.

Costs for the individual program elements are as follows:

Program Requirements	1978–79	1979–80	1980–81
Continuing program costs .....	\$211,341,669	\$210,525,000	\$466,725,000
Business inventory .....	207,863,696	207,000,000	460,000,000
Livestock .....	2,456,829	2,500,000	5,700,000
Motion picture film .....	971,734	975,000	975,000
Wine and brandy .....	49,410	50,000	50,000

## V. HOMEOWNERS' PROPERTY TAX RELIEF

In order to reduce the property tax burden, the California Constitution exempts homeowners from paying taxes on the first \$7,000 market value of their principal place of residence. Statutes require the homeowner to occupy the dwelling on the property tax lien date of March 1 if it is to be classified as the principal place of residence. The Constitution also requires the State to reimburse local governments for revenues lost due to the homeowners exemption. There are just over four million homeowners that participate in this program.

Program Requirements	1978–79	1979–80	1980–81
Continuing program costs .....	\$336,931,063	\$338,000,000	\$344,000,000

## VI. SUBVENTIONS FOR OPEN SPACE

Article XIII, Section 8 of the California Constitution permits land under enforceable restrictions for open space uses to be assessed at other than market value based on its restricted use. The State provides financial assistance to cities, counties and school districts to partially defray the loss of property tax revenues. The subvention amount is determined by the type of land under contract. The three types of land which qualify under the program are urban prime, other prime and nonprime.

Totals reflect payments to cities and counties only. School district subventions are funded by Chapter 292, Statutes of 1978, and Chapter 282, Statutes of 1979.

Chapter 1075, Statutes of 1979, provided that land under open space contracts may be assessed under Section 110.1 of the Revenue and Taxation Code, if that value is less than the capitalization of income method of valuation. State payments will only be made on parcels where the value is based on capitalization of income.

Program Requirements	1978–79	1979–80	1980–81
Continuing program requirements .....	\$12,905,683	\$14,000,000	\$14,000,000

## TAX RELIEF—Continued

## VII. PAYMENTS TO LOCAL GOVERNMENT FOR SALES AND PROPERTY TAX REVENUE LOSS

Chapter 1406, Statutes of 1972, as amended by Chapter 358, Statutes of 1973, provided for state reimbursement of local property and/or sales and use tax revenue losses resulting from statutes enacted after January 1, 1973. This represented an attempt to eliminate the future erosion of the local government tax base in light of the property tax rate limitations imposed on local government by those statutes.

Expenditures for 1980-81 result from the enactment of the following statutes:

(1) Chapter 16, Statutes of 1973 (Blind veterans) .....	\$20,000
(2) Chapter 1165, Statutes of 1973 (Wildlife habitat contracts) .....	45,000
(3) Chapter 456, Statutes of 1974 (Business records) .....	5,000
(4) Chapter 1467, Statutes of 1974 (Documented vessels) .....	275,000
(5) Chapter 961, Statutes of 1977 (Surviving spouse of disabled veterans) .....	46,000
(6) Chapter 878, Statutes of 1978 (Medical alert tags) .....	2,800
(7) Chapter 1273, Statutes of 1978 (Expanded disabled veterans program) .....	38,000
(8) Chapter 1276, Statutes of 1978 (Increased disabled veterans benefit) .....	140,000
(9) Chapter 765, Statutes of 1979 (Nonprofit library organizations) .....	2,200
(10) Chapter 1048, Statutes of 1979 (Senior citizen boarding home meals) .....	13,100
(11) Chapter 1160, Statutes of 1979 (Mobilehomes) .....	230,000
Totals, Expenditures .....	\$817,100

## Program Requirements

	1978-79	1979-80	1980-81
Continuing program costs .....	\$5,571,451	\$2,329,500	\$817,100

## VIII. RENTERS' TAX RELIEF

Chapter 1406, Statutes of 1972, established the program to provide tax relief to qualified renters. For taxable years beginning January 1, 1973, renters received an amount from \$25 to \$45 depending on their adjusted gross income, with maximum relief at incomes of \$8,000 or more. For taxable years beginning January 1, 1976 the relief scale was modified to a flat \$37 regardless of the amount of a renters' adjusted gross income.

This program is administered through the Personal Income Tax Program, with the Renters' Credit being claimed as a refundable tax credit. The Personal Income Tax Account is reimbursed for revenue loss due to the Renters' Tax Relief Program. Chapter 569, Statutes of 1978, expanded this program to include welfare recipients.

Chapter 1207, Statutes of 1979, increased the renters' credit from \$37 per qualified renter to \$137 for married couples, head of households and surviving spouses; and to \$60 for all other renters. This increases expenditures by \$228 million in the current year and \$248 million in the budget year.

It is estimated that 2.3 million single renters, 1.5 million married renters and 0.6 million other renters will participate in this program in the budget year.

## Program Requirements

	1978-79	1979-80	1980-81
Continuing program costs .....	\$133,801,979	\$383,000,000	\$418,000,000

## IX. SUBSTANDARD HOUSING

Chapter 238, Statutes of 1974, provided that if a taxpayer derived rental income from substandard housing, no deduction for interest, taxes, depreciation or amortization paid in conjunction with such substandard housing shall be allowed under the Personal Income Tax or Bank and Corporation Tax Law. The state retained the revenue derived from this provision.

Chapter 1286, Statutes of 1978 provided that revenue derived from this provision shall be allocated to the cities and counties where the substandard housing is located.

## TAX RELIEF—Continued

## SHARED REVENUES

The primary objective of the Shared Revenue program is to maintain the fiscal strength of the various governmental entities throughout the State. This is accomplished by the apportionment of special moneys collected by the State to local government on the basis of statutory formulas.

Program Requirements	1978-79	1979-80	1980-81
Totals, Shared Revenues .....	\$1,084,029,135	\$1,210,413,000	\$1,292,022,000
General Fund .....	207,616	225,000	225,000
Special funds .....	1,032,391,410	1,158,243,000	1,239,847,000
Federal funds <sup>†</sup> .....	51,430,109	51,945,000	51,950,000

## SUMMARY BY OBJECT

## RECONCILIATION WITH APPROPRIATIONS

## EXPENDITURES

## LOCAL ASSISTANCE

## APPORTIONMENT OF LIQUOR LICENSE FEES

Ninety percent of liquor license fees collected by the State are distributed to cities and counties in proportion to the amount collected in each city and county. The payments are made in October and April of each fiscal year. (Section 25761 of the Business and Professions Code.)

	1978-79	1979-80	1980-81
To cities .....	\$11,545,518	\$11,660,000	\$11,775,000
To counties .....	2,532,962	2,560,000	2,585,000
Totals, Apportionment of Liquor License Fees ( <i>Alcoholic Beverage Control Fund</i> ) .....	\$14,078,480	\$14,220,000	\$14,360,000

## APPORTIONMENT OF HIGHWAY PROPERTIES RENTAL RECEIPTS

Twenty-four percent of the rent collected on leases of land held for State highway purposes shall be paid to each county based on their pro rata share of total rental receipts. The Board of Supervisors determines the amount each taxing agency shall receive; except that if the rental property is located in a city, the city shall receive one-half of the allocation for that property. (Section 104.6 and 104.10 of the Streets and Highway Code.)

To counties ( <i>State Highway Account, State Transportation Fund</i> ) .....	\$4,140,855 <sup>1</sup>	\$2,075,000	\$2,080,000
---	--------------------------	-------------	-------------

## APPORTIONMENT OF OFF-HIGHWAY LICENSE FEES

A four dollar fee is imposed on every off-highway motor vehicle, in addition to registration fees, in-lieu of all taxes levied on value for State or local purposes. Fifty percent shall be paid to the counties and cities and counties based on population and fifty percent shall be paid to the cities and cities and counties based on population. The payments shall be made in July and January of each fiscal year. (Sections 38230 and 38240 of the Vehicle Code.)

To cities .....	\$276,155	\$210,000	\$230,000
To counties .....	276,155	210,000	230,000
Totals, Apportionment of Off-Highway License Fees ( <i>Off-Highway License Fee Fund</i> ) .....	\$552,310	\$420,000	\$460,000

## SHARED REVENUES—Continued

### APPORTIONMENT OF FEDERAL RECEIPTS FROM FLOOD CONTROL LANDS<sup>f</sup>

Apportionment of moneys received from federal government for lands acquired for flood purposes. Receipts are prorated to the counties in which such lands are located:

	1978-79	1979-80	1980-81
To counties ( <i>United States Flood Control Receipts Fund</i> ) .....	\$283,594	\$285,000	\$290,000

### APPORTIONMENT OF FEDERAL RECEIPTS FROM FOREST RESERVES<sup>f</sup>

Apportionment of moneys received from federal government as state's share of receipts from forest reserves in California. Receipts are prorated to counties in which such forest reserves are located:

To counties ( <i>United States Forest Reserve Fund</i> ) <sup>f</sup> .....	\$49,613,260	\$50,000,000	\$50,000,000
---	--------------	--------------	--------------

### APPORTIONMENT OF FEDERAL RECEIPTS FROM GRAZING LAND<sup>f</sup>

Apportionment of moneys received from federal government for grazing land in California. Receipts are prorated in counties in which such grazing lands are located:

To counties ( <i>United States Grazing Fee Fund</i> ) <sup>f</sup> .....	\$151,427	\$160,000	\$160,000
--	-----------	-----------	-----------

### APPORTIONMENT OF FEDERAL POTASH LEASE RENTALS<sup>f</sup>

Apportionment of moneys received from federal government for potash lands in California. Receipts are prorated in school districts (*Special Deposit Fund*)<sup>1</sup>

	\$1,381,828	\$1,500,000	\$1,500,000
--	-------------	-------------	-------------

### APPORTIONMENT OF MOTOR VEHICLE LICENSE FEES

A license fee is imposed annually on vehicles at a sum equal to two percent of the market value based on a depreciation schedule. The revenues, except for trailer coach fees, are paid monthly, as follows: a) fifty percent shall be paid to the counties and cities and counties based on population and b) fifty percent shall be paid to the cities and counties based on population. Trailer coach fees are distributed based on situs as follows: a) if the trailer coach is located in a city; the fee is equally split between the county, city and school district, b) if the trailer coach is located in an unincorporated area, the fee is equally split between the county and school district (Sections 11003.4 and 11005 of the Revenue and Taxation Code.)

To cities .....	\$248,857,830	\$304,000,000	\$323,000,000
To counties .....	248,846,974	304,000,000	323,000,000
To counties, trailer coach fees .....	53,159,909	42,000,000	44,000,000

Totals, Apportionment of Motor Vehicle License Fees (*Motor Vehicle License Fee Account, Transportation Tax Fund*) .....

	\$550,864,713	\$650,000,000	\$690,000,000
--	---------------	---------------	---------------

### APPORTIONMENT OF CIGARETTE TAX

Thirty percent of the 10 cent per package cigarette tax is apportioned to cities and counties. The money shall first be divided between cities and counties (includes cities and counties) based on their share of the local one percent sales tax. Each county shall receive its respective share. The city money shall be allocated as follows: a) fifty percent based on sales tax and b) fifty percent based on population. The disbursement is made monthly. (Section 30462 of the Revenue and Taxation Code.)

To cities .....	\$66,177,671	\$66,350,000	\$67,700,000
To counties .....	15,112,160	15,150,000	15,300,000
Totals, Apportionment ( <i>Cigarette Tax Fund</i> ) .....	\$81,289,831	\$81,500,000	\$83,000,000

### APPORTIONMENT OF HIGHWAY CARRIERS' UNIFORM BUSINESS

#### TAX FEE

A fee of one-tenth of one percent of gross operating revenue is imposed upon all companies or persons owning or operating motor vehicles engaged in the transportation of property for hire upon the public highways. The apportionments are made to cities and cities and counties based on population. Disbursements are made in February, May, August and November. (Section 4306 of the Public Utilities Code.)

To cities and cities and counties ( <i>Highway Carriers' Business License Tax Account, General Fund</i> ) .....	\$2,483,523	\$3,450,000	\$3,500,000
---	-------------	-------------	-------------

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

<sup>1</sup> A court order precludes payment of \$1,824,174 in 1977/78. Chapter 389, Statutes of 1978 allows for this apportionment plus the normal apportionment in 1978/79.

## SHARED REVENUES—Continued

## APPORTIONMENT OF TIDELAND REVENUES

Apportionment pursuant to Section 6817 of the Public Resources Code 1 percent of the revenues received from tide and submerged lands, to a maximum of \$75,000, to each city or county having within its boundaries such lands granted to it by the State in which the State has reserved the rights to the mineral deposits. This revenue must be used for commerce, navigation, fisheries, protection of lands, or for beaches and the coastline. (*General Fund*) .....

1978-79	1979-80	1980-81
\$207,616	\$225,000	\$225,000

## APPORTIONMENT OF MOTOR VEHICLE FUEL TAX FOR COUNTY ROADS

An amount equal to the revenue derived from 1.625 cents per gallon tax under the Motor Vehicle Fuel License Tax Law is apportioned monthly among counties for maintenance of county roads. Payments are made for engineering costs, administrative expenses, snow removal, and heavy rainfall and storm damage. The majority of the money is apportioned based on number of registered vehicles and miles of maintained county roads. (Section 2104 of the Streets and Highways Code.)

To counties ( <i>Highway Users Tax Account, Transportation Tax Fund</i> ) .....	\$181,823,957	\$181,551,000	\$183,451,000
---	---------------	---------------	---------------

## APPORTIONMENT OF MOTOR VEHICLE FUEL TAX FOR CITY STREETS

An amount equal to the revenue derived from .725 cents per gallon tax under the Motor Vehicle Fuel License Tax Law is apportioned monthly to cities for maintenance of city streets. Payments are made for engineering costs, administrative expenses, and snow removal; however most of the revenue is distributed to cities based on population. (Sections 2107 and 2107.5 of the Streets and Highway Code.)

To cities ( <i>Highway Users Tax Account, Transportation Tax Fund</i> ) .....	\$80,589,409	\$79,655,000	\$81,789,000
---	--------------	--------------	--------------

## APPORTIONMENT OF MOTOR VEHICLE FUEL TAX FOR COUNTY ROADS AND CITY STREETS

An amount equal to the revenue derived from 1.04 cents per gallon tax under the Motor Vehicle Fuel License Tax Law is apportioned as follows: (a) \$400 per month to each city and city and county, (b) \$800 per month to each county and city and county, (c) \$30,000 per month to the Bicycle Lane Account in the State Transportation Fund. The remainder shall be based on registered vehicles in each county, with the county receiving the percentage of the revenue equal to the share of assessed value in the unincorporated area of the county. The remainder is apportioned to cities in the county based on population (Section 2106 of the Streets and Highways Code.)

To counties and cities ( <i>Highway Users Tax Account, Transportation Tax Fund</i> ) .....	\$116,568,332	\$116,372,000	\$118,207,000
--	---------------	---------------	---------------

## FINANCIAL AID TO LOCAL AGENCIES

The revenue attributable to the higher tax rate imposed on banks and financial corporations is deposited in the Financial Aid to Local Agencies Fund starting in 1980. Allocations from this fund are made to cities and counties in June and December of each year based on population and AFDC caseload. (Section 26483 of the Revenue and Taxation Code.)

To cities and counties (Financial Aid to Local Agencies Fund) .....	-	\$29,000,000	\$63,000,000
---	---	--------------	--------------

## TOTALS, EXPENDITURES

<i>General Fund</i> .....	\$1,084,029,135	\$1,210,413,000	\$1,292,022,000
<i>Special funds</i> .....	207,616	225,000	225,000

## FEDERAL REVENUE SHARING

The State and Local Fiscal Assistance Act of 1972 (General Revenue Sharing) was enacted with an appropriation of approximately \$30.2 billion for distribution to State and local governments over the five-year period January 1, 1972, to December 31, 1976. The Act was designed to give State and local governments financial aid which could be expended on local priorities.

State and Local Fiscal Amendments of 1976 (P.L. 94-488) provide funding of \$25.5 billion for the period from January 1, 1977, through September 30, 1980. No substantive changes were made to the allocation formula.

The allocation of General Revenue Sharing among the recipient State governments for each entitlement period is made according to statutory formulas using data on population, general tax effort, income tax collections and income.

Federal revenue sharing receipts and interest earned thereon are required by the federal statute to be deposited in a trust fund and expended in accordance with State laws. These funds are reserved until appropriated by the Legislature. Amendments of 1976 require recipient governments to hold public hearings on proposed uses of funds. For 1980-81, \$276,200,000 is proposed to be expended for the support of the State Supplementary Aid Program for Adults (SSP).

During 1979-80, the State will receive the last two quarterly payments of Entitlement Period 10, and the first two quarterly payments of Entitlement Period 11. During 1980-81 the last two payments of Entitlement Period 11 will be received. Extension of the Revenue Sharing Program beyond its September 1980 expiration date is being considered by Congress. Estimates of receipts from the federal government for 1980-81 are based only on the current program.

### SUMMARY BY OBJECT RECONCILIATION WITH APPROPRIATIONS

State Urban and Coastal Park Bond Act of 1976 .....	280,000,000	125,000,000	155,000,000	25,000,000	80,000,000

##### II. Future Bond Acts Subject to Electorate Approval

Parklands and Renewable Resources Bond Law of 1980 <sup>1</sup> .....	\$495,000,000	-	\$495,000,000	-	\$80,000,000
---	---------------	---	---------------	---	--------------

In addition to the above issues, there are other State of California general obligation bonds. The State School Building Aid Program appears functionally under the education section of the budget. The California Water Resources Development Bond Fund Program, the San Francisco Harbor Improvement Bond Financial Program, the Small Craft Harbor Improvement Bond Financial Program, the Veterans Farm and Home Building Fund of 1943 Program, the Home Construction and Rehabilitation Bond Law of 1977, and the Housing Finance Bond Law of 1977 are public service enterprises which have their own revenues to finance their respective debt service expenditures.

<sup>1</sup> Subject to electorate approval June 3, 1980.

## PAYMENT OF INTEREST ON GENERAL FUND LOANS

Due to monthly fluctuations in receipts and disbursements, temporary loans are occasionally required to provide cash in the General Fund when disbursements exceed collected revenues and any cash balance from the previous month. Such loans are made under the provisions of Government Code Section 16310.

The General Fund's needs for temporary loans is also increased by the temporary loans which it must make to other funds, mainly under the provisions of Government Code Section 16351. The 1978-79 fiscal year ended with \$42 million loaned to the Health Care Deposit Fund (for amounts owed by the Federal Government and counties for the Medi-Cal Program). During the 1979-80 fiscal year, monthly loan authorizations are made to the Health Care Deposit Fund to be withdrawn as needed. The 1979-80 fiscal year will end with estimated loans outstanding of \$20 million. Similarly, the 1980-81 fiscal year will end with estimated loans outstanding of \$25 million to the Health Care Deposit Fund.

It is anticipated that temporary loans from special funds will be required for a few weeks in March and April of 1981. However, because no interest is charged or paid on any transfer authorized by Government Code Section 16310, exclusive of the Pooled Money Investment Account, except as provided therein, an amount for interest cost is not included in the budget for 1980-81.

Included in this presentation are statements of cash flow and statement of accounts payable and receivable for the past year, the current year, and the budget year, as required by Government Code Sections 12020 and 12021. Neither the cash receipts nor cash disbursements agree with the revenues and expenditures presented elsewhere in the budget because for cash flow purposes, it is necessary to adjust the budget data for cash collected by the agency but not yet received by the State Controller and for the net accrued revenues and expenditures included in the budget. For the 1978-79 and the first five months of the 1979-80 fiscal years, actual data have been obtained from the monthly cash condition reports compiled by the State Controller's office. The receipts and disbursements for the last seven months of 1979-80 and the 1980-81 fiscal year are estimated by projecting monthly receipt and disbursement patterns adjusted to reflect the various changes in statutes and administrative actions not included in these monthly patterns. The 1980-81 fiscal year estimated cash flow takes into consideration the revenue and expenditure measures reflected in this budget. Any changes made subsequent to the budget as presented or statutes enacted which change revenues or expenditures will have an effect on the estimated cash flow and any interest cost.

The borrowing capacity from special funds included in the cash flow statements has been estimated as of the end of each month. The normal cash flow for the funds available for borrowing has been considered but still remain subject to large fluctuations.

WORKING CAPITAL ADVANCES

COOPERATIVE PERSONNEL SERVICES REVOLVING FUND

Chapter 838, Statutes of 1973, established the State Personnel Board Cooperative Personnel Services Revolving Fund and transferred to the revolving fund \$125,000 from the General Fund. Repayments are made annually.

COUNTY FORMATION REVOLVING FUND

Chapter 465, Statutes of 1978, transferred \$300,000 from the General Fund to the County Formation Revolving Fund. The State Controller is authorized to make loans from this fund to County Formation Review Commissions.

Repayment, with interest, is due the fund within one year of the date on which the issues of county formation are voted on by the people.

## HEALTH BENEFITS FOR ANNUITANTS

### Program Objectives and Description

This program provides health protection for retired employees. It began on January 1, 1962, with an employer contribution of \$5.00 per month toward the cost of a basic health plan. Since then, major medical plans, Medicare, and plans supplementing Medicare have been developed.

Premium rate increases by insurance carriers for the 1979-80 fiscal year required an increase in the maximum employer contributions to maintain the average 100/90 level. Monthly contribution maximums were increased to \$43 for a single enrollee, \$79 for an enrollee and one dependent, and \$102 for an enrollee and two or more dependents by the Budget Act of 1979.

*The increase in the 1980-81 budgeted amount reflects projected increases in the number of annuitants.*

### Authority

Title 2, Division 5, Part 5, Government Code.

### Program Requirements

	1978-79	1979-80	1980-81
Health protection for annuitants .....	\$25,082,474	\$29,836,000	\$33,033,000

### Output

The cost for annuitant's benefits is based on the following average number of annuitants covered from each retirement system:

Retirement System	Number of annuitants			Cost by system		
	1978-79	1979-80	1980-81	1978-79	1979-80	1980-81
Judges' .....	381	410	428	\$243,661	\$273,000	\$332,000
Legislators' .....	83	90	98	55,146	61,000	66,000

## PROPOSITION 13 FISCAL RELIEF FOR LOCAL GOVERNMENT

Proposition 13, a constitutional amendment providing significant property tax relief in California, was passed by the voters on June 6, 1978. As a result of the constitutional amendment, the property tax revenue of local governments was reduced approximately \$7 billion in 1978-79. This created an environment of potential fiscal instability that threatened to disrupt the delivery of health, education, and other vital public services such as police and fire protection. To ensure the orderly delivery of services during the 1978-79 fiscal year legislation was enacted (Chapters 292 (SB 154) and 332 (SB 2212), Statutes of 1978), which provided \$4.4 billion of fiscal relief to local governments and school districts and established a \$900 million emergency loan program.

Chapter 282, Statutes of 1979 (AB 8), was enacted to provide a long-term plan for financing local government at a cost of \$4.9 billion in the current year and \$5.4 billion in the budget year. A portion of the school property tax is shifted to cities, counties, and special districts to provide sufficient revenues for their operation. The amount shifted is based on the block grant amount in Chapter 292 of 1978. It also provides for long-term school finance for K-12 and a two-year financing program for community colleges.

The measure provides county fiscal relief for certain health and welfare programs. The significant provisions include permanent State assumption of the county shares for the State Supplementary Program (SSP) and Medi-Cal. Other major provisions reestablished a local share in AFDC grants and county administration. The State also assumed a substantial share of the funding for county health services.

Chapter 282 contains a deflator mechanism whereby the total cost of the bill will be reduced if insufficient State funds are available in future years.

### Authority

Chapter 292, Statutes of 1978 as amended by Chapter 332, Statutes of 1978.

Chapter 12, Statutes of 1979.

### SUMMARY OF PROGRAM REQUIREMENTS

I. Aid to Counties .....	\$424,220,467	-	-
II. Aid to Counties—Health and Welfare .....	(1,078,400,000)	-	-
III. Aid to Education—K-12 .....	(2,191,000,000)	-	-
IV. Aid to Community Colleges .....	(260,000,000)	-	-
V. Aid to Cities .....	220,795,591	-	-
VI. Aid to Special Districts .....	190,200,764	284,708	-
VII. Local Agency Emergency Loan Program .....	116,000	-	-
VIII. Local Agency Indebtedness Loan Program .....	30,000,000	-	-
TOTALS, PROGRAMS ( <i>General Fund</i> ) .....	\$865,332,822	\$284,708	-

### I. AID TO COUNTIES—General Revenue

#### Program Description

In 1978-79, the State provided counties with a block grant to replace a portion of reduced property taxes. This amount was allocated based on pro rata property tax loss. The allocation made to any county was reduced by one-third of the county's general fund reserves in excess of five percent of total 1977-78 revenues.

Chapter 282 provided a long-term funding source for counties effective in 1979-80. The county "base" property tax allocation is increased by the amount of 1978-79 block grant, adjusted for changes in the State funding of certain health and welfare programs. This amount is shifted from the schools' share of the property tax. The bill also provided a one-time reduction of business inventory exemption subventions to counties in 1979-80 of \$17.4 million.

#### Program Requirements

	1978-79	1979-80	1980-81
Totals, Aid To Counties ( <i>General Fund</i> ) .....	\$424,220,467	-	-

**PROPOSITION 13 FISCAL RELIEF FOR LOCAL GOVERNMENT—Continued****II. AID TO COUNTIES—Health and Welfare**

The State assumed the costs to the counties for Health and Welfare programs in 1978–79 as follows:

1. All county costs of the State Supplementary Program (SSP).
2. All county costs of Aid for Dependent Children (AFDC) other than Boarding Homes and Children's Institutions (BHI).
3. Ninety-five percent of the non-federal share of grant costs for providing children with foster care (BHI).
4. All county costs for administration of AFDC, food stamps, and child support collections.
5. All county costs for Medi-Cal.

Chapter 282 provides a permanent and total buyout of the county share of the following programs beginning in the current year:

1. State Supplementary Program
2. Medi-Cal
3. Aid for the Adoption of Children (AAC)
4. Work Incentive Program (WIN) Expenses

It also provides a partial buyout of the following programs:

1. AFDC grants—89.2% of the non-federal costs.
2. AFDC special needs—89.2% of the non-federal costs
3. Boarding Homes and Institutions—95% of the non-federal costs through December 31, 1983
4. Aid to the Potentially Self Supporting Blind (APSB)—84% of the county administrative costs
5. County Health Services—\$3 per capita plus 50% of the remaining county costs
6. Child Support Enforcement Program—incentive payment increased from 12.75% to 15.0% until December 31, 1980.

The bill also provides that the State will pay 50 percent of county administrative costs of AFDC (pre-Proposition 13 share.) The State will also fund 50 percent of food stamp administrative costs rather than limiting county costs to \$21.5 million.

Details on these programs and other provisions of Chapter 282 are discussed in the individual program budgets of the Health and Welfare Agency.

	1978-79	1979-80	1980-81
Expenditures .....	(\$1,078,400,000)	-	-

**III. AID TO EDUCATION K-12****Program Description**

In 1978–79, State apportionments were increased and certain other education programs were reduced. This additional funding was provided to K-12 school districts and county superintendents of schools to ensure that programs continue through the 1978–79 fiscal year at a level representing a statewide average 10 percent reduction from anticipated pre-Proposition 13 levels. The allocation basis used also is consistent with the expenditure equalization requirements of the Serrano case and results in programs of lower spending school districts being reduced by an average of 9 percent and high spending school districts being reduced by an average 15 percent.

Chapter 282 provides that the 1978–79 revenue for school districts be calculated, equalized and inflated at an average of 8.6% for the 1979–80 fiscal year. The current law declining enrollment adjustment is retained and districts are guaranteed a 2% increase in total resources over the prior year.

For 1980–81, inflation adjustments will range from \$85 to \$150 per ADA dependent upon the district's 1978–79 base revenue limit. The current law declining enrollment adjustment is maintained. In addition, the bill creates several new State programs to fund Capital Outlay for K-12 school districts.

Details on the funding of school districts are presented in the Department of Education budget.

**Program Requirements**

	1978-79	1979-80	1980-81
Totals, Aid to Education K-12 (General Fund) .....	(\$2,191,000,000)	-	-

**IV. AID TO COMMUNITY COLLEGES****Program Description**

Community college districts were provided \$260 million in fiscal assistance in 1978–79. These funds allowed community college districts to maintain their programs through 1978–79 with a statewide average reduction of 15 percent from anticipated pre-Proposition 13 levels.

This funding was not allocated by average daily attendance, rather it was allocated as a block grant to community college districts. The block grant funding process allowed the locally elected community college district governing boards the necessary flexibility to meet community education priorities while also eliminating low priority courses and programs.

Chapter 282 provides for the recalculation of 1978–79 Community College revenue bases, which are then equalized and inflated an average of 8.9 percent for the 1979–80 fiscal year. Growth in Community College ADA over the 1978–79 level is funded at two-thirds the statewide average revenue per ADA, and loss in ADA over the 1978–79 level is deducted at two-thirds the statewide average revenue per ADA. Special allowances are provided for urban and small rural colleges to compensate for excess costs. For 1979–80, each district is guaranteed at least at 4 percent but no more than 8 percent increase in total revenues. For 1980–81, the statewide inflation increase is 7 percent or the California Consumer Price Index increase for calendar year 1979, whichever is smaller.

Details on Community College funding are presented in the Board of Governors of the California Community Colleges Budget.

**Program Requirements**

	1978-79	1979-80	1980-81
Totals, Aid to Community Colleges (General Fund) .....	(\$260,000,000)	-	-

PROPOSITION 13 FISCAL RELIEF FOR LOCAL GOVERNMENT—*Continued*

## V. AID TO CITIES

## Program Requirements

In order to partially offset revenue losses, \$250 million of fiscal relief was provided to cities in 1978–79. The distribution of these funds was based on each city's share of the statewide property tax loss for all cities. The allocation made to any city was reduced by one-third of the city's general fund reserves in excess of 5 percent of the city's total 1977–78 revenues.

Chapter 282 provided a long-term funding source for cities effective in 1979–80. The city "base" property tax allocation is increased by 82.9 percent of the 1978–79 block grant amount. This amount is shifted from the schools share of the property tax. The bill also provided a one-time reduction of business inventory exemption subventions to cities in 1979–80 of \$21 million.

## Program Requirements

	1978–79	1979–80	1980–81
Totals, Aid to Cities ( <i>General Fund</i> ) .....	\$220,795,591	—	—

## VI. AID TO SPECIAL DISTRICTS

## Program Description

Special districts were provided \$125 million of fiscal relief. These funds were distributed to multi-county districts, city-subsidary districts and to county boards of supervisors for special districts in their counties based on the pro rata share of property tax loss. The county boards of supervisors had the authority to allocate the funds to special districts in their counties within the guidelines of Chapter 292.

Chapter 332 required the Department of Finance to allocate a separate appropriation of \$37 million to special districts to fund their unmet needs. Chapter 332 provided that the allocation should follow the criteria established in Chapter 292, and that the funds allocated shall not cause a district's 1978–79 share of the State bail-out and property taxes to exceed 96.3 percent of the 1977–78 property tax receipts.

The criteria used to make the allocation followed the guidelines set forth in Chapters 292 and 332. These Chapters provided that the highest priority for allocation of funds shall go to districts which provide public safety services, specifically fire and police protection. Any county that allocated all of its share of the \$125 million to fire or police districts and still had unmet fire or police needs was allocated the requested amount for the special fire or police districts in that county. The full amount requested was also allocated to multi-county and city-subsidary fire and police districts. This initial allocation accounted for \$27.2 million of the \$37 million available.

The remaining \$9.8 million was allocated on a pro rata basis to all other critical unmet needs of districts that met the following criteria:

1. Provide public safety or health protection.
2. Are highly property-tax dependent.
3. Are unable to levy nonproperty taxes or user fees.

The districts identified as meeting these criteria were those that primarily provide police and fire protection, flood control and levee maintenance, lighting, and mosquito and other pest abatement. The funding requests for districts which primarily provide these services were used to determine the pro rata share for each county's special districts, multi-county districts, and city-subsidary districts. The county boards of supervisors were given the authority to allocate the funds for special districts within their counties.

Chapter 12, Statutes of 1979, provided \$30 million for certain special districts. The allocation was based on requests received for Chapter 332 funds for library, mosquito and other pest abatement, park and recreation, flood control and levee maintenance, lighting, and garbage disposal districts.

## Program Requirements

	1978–79	1979–80	1980–81
Totals, Aid to Special Districts ( <i>General Fund</i> ) .....	\$190,200,764	\$284,708	—

## VII. LOCAL AGENCY EMERGENCY LOAN PROGRAM

## Program Description

In the fiscal cycle of local governments, a significant portion of annual revenues are received in December and April. Monthly expenditures are required at a relatively even pace throughout the year. To balance the cash inflow against outflow requirements, many local governments borrow by issuing Tax Anticipation Notes during the early months of each new fiscal year. With the uncertainty and the potential for fiscal instability that accompanied Proposition 13, there was no assurance that loans would be available from the traditional sources. The Local Agency Emergency Loan Fund (LAELF) created by Chapter 292 provided an alternative source of cash flow loans that would be available in the event that traditional sources could not be relied upon. All loans were to be repaid during the 1978–79 fiscal year and the balance of LAELF was returned to the General Fund on June 30, 1979.

## Program Requirements

	1978–79	1979–80	1980–81
Local Agency Emergency Loan Program ( <i>General Fund</i> ) .....	\$116,000	—	—

## VIII. LOCAL AGENCY INDEBTEDNESS LOAN PROGRAM

## Program Description

The Local Agency Indebtedness Loan Fund was created by Chapter 292 to prevent defaults on nonvoter approved debt incurred by local agencies prior to the passage of Proposition 13. Nonvoter approved debt is typically incurred by redevelopment agencies that issue tax allocation or Lease Revenue Bonds to finance redevelopment projects. The property tax increment derived from the project area or revenues generated by leasing facilities within the project area are pledged for the payment of principal and interest. Proposition 13 abolished the tax increment used to repay nonvoter approved debt and potentially disrupts the flow of lease revenues in those cases where other local agencies lease facilities in project areas. Local agencies can obtain a loan, to be repaid within three years, to finance 1978–79 fiscal year debt service requirements on nonvoter approved debt. Chapter 282, Statutes of 1979, extended the availability of loan funds to June 30, 1980.

**I. EQUITY CLAIMS**

**Program Objectives and Description**

Otherwise known as the 'omnibus claims bill,' this program includes all claims approved by the three-member Board of Control and referred to the Legislature for payment. The program provides an equitable procedure for the payment of the following categories of claims:

(a) For which no appropriation has been made or for which no fund is available but the settlement of which has been provided for by statute or constitutional provision.

(b) For which the appropriation made or fund designated is exhausted.

(c) For which settlement is not otherwise provided for by statute or constitutional provision.

The provision which directed the State Board of Control to submit special appropriation measures on a quarterly basis (Chapter 622, Statutes of 1974) was amended by Chapter 182, Statutes of 1976 to require such measures to be submitted at least twice during each calendar year.

Current year estimated expenditures reflect Chapters 957 and 1046, Statutes of 1979 appropriation amounts.

## II. MANDATE CLAIMS

## Program Objectives and Description

This program includes all claims approved by the five-member State Board of Control for reimbursement of local agencies or school districts pursuant to Section 2231 or 2234 of the Revenue and Taxation Code for costs mandated by the state. These claims are limited to the following:

- a) claims that the Controller has incorrectly reduced;
- b) claims against chaptered bills or executive orders that resulted in costs, yet contained provisions making inoperative Section 2231 or 2234 of the Revenue and Taxation Code;
- c) claims against chaptered bills that resulted in costs, yet, contained neither a provision making inoperative Section 2231 or 2234 of the Revenue and Taxation Code nor an appropriation to reimburse for such costs; and
- d) claims against executive orders that resulted in costs, yet no funds were appropriated for such costs, and such executive order did not contain a provision making Sections 2231 or 2234 inoperative.

## Authority

Revenue and Taxation Code Sections 2250-2255.1.

STATE-MANDATED LOCAL PROGRAMS

Chapter 1406, Statutes of 1972, (SB 90) first established the statutory requirement for the State to reimburse units of local government for all costs mandated on them by the State. Such costs may result from either legislative acts or executive regulations which impose a new program or demand an increased level of service in an existing program. The "SB 90 Law" also requires the State to reimburse local government for any revenue losses which result from legislation which either exempts certain property from taxation or reclassifies such property and thereby reduces sales, use or property tax revenue. The approval of Proposition 4, the "Gann Initiative" at the November 6, 1979 election elevates this program of reimbursing State-mandated costs to a constitutional requirement. The Initiative is silent, however, on the issue of reimbursing revenue losses.

Since the inception of this reimbursement program in 1973, the Legislature has enacted approximately sixty statutes (exclusive of those which establish new superior court judgeships and provide a block grant therefor) in which a State-mandated local program was acknowledged and funded. Most of the programs established by these statutes are ongoing and their estimated costs for 1980-81 are included in the appropriate program areas elsewhere in this budget. However, in order to display the total cost of the SB 90 program so that all interested parties are fully aware of its financial magnitude, this budget presentation has been developed.

In the 1979-80 Governor's Budget, four problem areas were cited and discussed. Since those problems have not been satisfactorily resolved, they are again mentioned here.

1. There appears to be a lack of a defined process for evaluating the need to continue previously mandated activities, i.e., the absence of a "sunset provision" in mandated legislation.

2. The Board of Control, as a result of recent amendments to the SB 90 law, currently has the authority to review all local government claims for reimbursement whether there is or is not disclaimer language in the statute. The Legislature no longer has the ability to determine which level of government should bear the costs of a particular piece of legislation.

3. Another area of concern is the inability of the State to recoup or offset savings or program reductions mandated on local government. For example, recent legislation transferred the mailing of election materials to voters from local government to the Secretary of State. This shift created a savings to local government of approximately \$1.3 million. There is no way, under the SB 90 law, to reflect this windfall savings to local government as an offset against the State's costs.

4. Still another problem is legislation which, during its passage through the Legislature, is alleged to contain no mandate, to have no cost, to have offsetting cost/savings or otherwise to have no fiscal impact on local government, yet later the Board of Control determines the legislation contains a mandate and, perhaps, costs as well. Some examples of this type of legislation, along with the amounts budgeted to reimburse local governments in 1980-81, are listed below:

Chapters 89 and 1398/74, School sick leave credit .....	-	-	\$18,000,000
Chapter 593/75, July duty for teachers.....	-	-	1,000,000
Chapter 961/75, School collective bargaining .....	-	-	10,000,000

The following table, "State Funding for Mandates by Fiscal Year", illustrates the recent rapid growth and associated costs of the SB 90 reimbursement program. The amounts shown represent the actual cash disbursements by the State Controller's Office in the fiscal year indicated without regard to the year in which the state mandate originated.

State Funding for Mandates by Fiscal Year (in \$1,000's)								
	1973-74	1974-75	1975-76	1976-77	1977-78	1978-79	1979-80	1980-81
LEGISLATION								
Mandated Programs .....	\$2,955	\$16,743	\$9,680	\$18,356	\$45,297	\$48,749	\$96,631	\$166,622 <sup>1</sup>
Revenue Losses .....	-	2,594	4,779	5,158	5,529	5,572	2,435	942
Subtotals .....	\$2,955	\$19,337	\$14,459	\$23,514	\$50,826	\$54,321	\$99,066	\$167,564
Allocation of prior year's funding (\$64.2 million) .....	-	-	-	-	(6,244)	(29,000)	(29,000)	-
Executive Regulations .....	-	-	-	-	-	-	2,126	2,955
Totals .....	\$2,955	\$19,337	\$14,459	\$23,514	\$50,826	\$54,321	\$101,192	\$170,519
Potential Cost of Board of Control Awards .....	-	-	-	-	-	-	-	55,800
Totals .....	\$2,955	\$19,337	\$14,459	\$23,514	\$50,826	\$54,321	\$101,192	\$226,319

<sup>1</sup> Includes \$64.2 million in non-recurring costs related to prior years' funding for Board of Control awards.

STATE-MANDATED LOCAL PROGRAMS—*Continued*

## I. MANDATES INCLUDED IN OTHER BUDGETS

## Program Objectives and Description

The amounts shown in this program are for information purposes only as they are appropriated in each related program budget. For example, the program requiring the destruction of marijuana records pursuant to Chapter 952/76 is presented and funded in the budget for the Department of Justice. The aggregate of all such programs is presented in the following table:

## PROGRAM DEPARTMENT

<i>Chapter/Year</i>	<i>Description</i>			
JUDICIAL		1978-79	1979-80	1980-81
Chapter 1287/76—Small Claims Court Pilot Project .....		\$187,988	—	—
Chapter 1355/76—Compensation to Justice Court Judges.....		22,045	\$55,000	\$57,750

STATE-MANDATED LOCAL PROGRAMS—*Continued*

## Authority

Revenue and Taxation Code Sections 2229, 2230 and 2231(a)

Totals, Legislative mandates .....	\$54,321,334	\$101,191,794	\$105,850,385
Less amounts shown in other budgets.....	<u>— 54,321,334</u>	<u>— 101,191,794</u>	<u>— 105,850,385</u>
Net Totals, Legislative Mandates .....	—	—	—

Through its December, 1979 meeting, the Board of Control has determined that State mandates exist in sixteen chaptered bills and two executive regulations, none of which provide funding. Parameters and guidelines under which all affected local jurisdictions may file claims for reimbursement have been or are currently being developed. The following table describes the bases of four of these claims and contains an estimate, based primarily on previous "Chaptered Bill Reports on Local Mandate Legislation", of the amounts needed to reimburse local costs incurred between January 1, 1978 and June 30, 1981. The table also indicates whether the legislation included a disclaimer or whether it was silent on the SB 90 issue because the Legislative Counsel's Digest reported that there was no State mandate in the bill.

Funding for all claims ultimately approved by the Board in accordance with their parameters and guidelines will be requested in subsequent Board-sponsored SB 90 claims bills.

Chapter	Description	Estimated Cost
Disclaimed Legislation:		
Chapter 1215/74	School attendance review boards	\$15.5 million
Chapter 978/76	Bilingual education	\$23.2 million
"No Mandate", per Legislative Counsel's Digest:		
Chapter 1275/75	Eminent domain	\$7.5 million
Chapter 1146/75	Animal euthanasia	\$6.0 million
Subtotal		\$52.2 million
Estimated cost of remaining fourteen awards		3.6 million
TOTAL		\$55.8 million

## II. MANDATES NOT OTHERWISE FUNDED

## Program Objectives and Description

There are some State-mandated programs, however, which have no precise parallel at the State level or involve unique funding issues. These programs are, therefore, presented in this budget.

## Program Requirements

	1978-79	1979-80	1980-81
Mandates not otherwise funded .....	—	\$4,305,000	\$64,668,670
General Fund .....	—	<u>4,305,000</u>	<u>64,668,670</u>

## Program Elements

a. Costs of preparing split property tax roll.....	—	1,145,000	—
b. Deficiencies in prior appropriations .....	—	(424,935)	424,935
c. Special statewide election .....	—	3,160,000	—
d. Prior year costs attributable to Board of Control awards .....	—	—	64,243,735
Chapter 89/74—Retirement credit.....	—	—	(29,023,818)
Chapter 1398/74—Retirement credit.....	—	—	(8,244,727)
Chapter 593/75—Jury duty .....	—	—	(2,000,000)
Chapter 961/75—Collective bargaining.....	—	—	(24,975,190)

## a. Costs of Preparing Split Property Tax Roll

Chapter 24, Statutes of 1978 (SB 1) required county assessors to begin immediately to determine those properties common to both current and prior rolls and to separate and identify those properties which would be subject to tax as owner-occupied dwellings (i.e., splitting the roll) if Proposition 8 would have been approved by the voters. The Act authorized county assessors to submit claims to the State Controller for reimbursement of costs incurred by them prior to July 1, 1978 in preparing the split roll. The Act further stated that if Proposition 8 was not approved by the voters, every section in the Chapter (except the section which authorizes the assessors to submit claims to the State Controller) would be repealed on June 7, 1978.

Based on claims submitted to the State Controller by forty-nine of the counties and on information solicited from the nine other counties, \$1,145,000 was requested in the 1979-80 Governor's Budget and included in the 1979 Budget Act.

## b. Deficiencies in Prior Appropriations

October 31, 1978 was the statutory deadline for local entities to file claims with the State Controller for reimbursement from the 1978 Budget Act of 1978-79 costs resulting from funded State mandates. The Controller reported that claims filed as of that date exceeded the amounts appropriated by \$424,935. Pursuant to Section 2236 of the Revenue and Taxation Code, the Controller proportionally reduced all timely claims and notified the Department of Finance and the chairmen of the Legislature's fiscal committees of the deficiencies. Funds were provided in Item 434(c) of the 1979 Budget Act for this purpose and have been transferred to the deficient appropriations and reported as estimated expenditures there.

Complete information on the amount of any deficiencies in 1979 Budget Act appropriations for local mandate reimbursements is not currently available. However, in the expectation that some of these appropriations may not be sufficient to pay all valid claims filed, funds equal to those required to meet 1978-79 deficiencies are requested in this item. As information is made available, adjustments to the budget amount may be requested.

STATE-MANDATED LOCAL PROGRAMS—*Continued*

## c. Special Statewide Election

Chapter 193, Statutes of 1979 (SB 217, Robbins) required that a special statewide election be conducted on November 6, 1979 to decide on a number of proposed constitutional amendments. Although it was recognized that this legislation constituted a State-mandated local program, no funding was included therein. Instead, Item 434 of the 1979 Budget was augmented by a total of \$4,820,000 for this purpose with \$3,160,000 being designated to reimburse county election costs and \$1,660,000 for costs incurred by the Secretary of State. The latter amount has been transferred to the Secretary of State's budget support item and is reported in that budget.

## d. Prior Year Costs Attributable to Board of Control Awards

The recent enactment of Chapters 419, 1137 and 1201 of 1979 has provided partial funding for four awards on SB 90 claims by the Board of Control. The bases for those awards were:

- (1) Chapter 89/74 which required school districts to give their certificated employees retirement service credit for unused sick leave. Although the legislation included a "costs/savings" disclaimer, a subsequent report by the Auditor General revealed that costs far exceeded savings. The Board of Control approved claims totaling \$5,976,182 from various school districts for 1977-78 costs and funding in this amount was provided in Chapter 1201/79.
- (2) Chapter 1398/74 which provided the same retirement service credit for classified employees and also contained a "costs/savings disclaimer. Partial funding of 1977-78 claims (\$1,755,273) was also provided in Chapter 1201/79.
- (3) Chapter 593/75 which removed the exemption of teachers from jury duty and contained neither an appropriation nor a disclaimer and did not therefore, receive a full fiscal review by the Legislature. The additional costs of hiring substitute teachers incurred by school districts in 1977-78 (\$628,536) was funded by Chapters 419 and 1137/79.
- (4) Chapter 961/75 which established collective bargaining in school districts and included a "no new duties" disclaimer. Claims from only six school districts totaling \$24,810 for 1977-78 costs were approved by the Board of Control and funded by Chapter 1137/79.

Funding for the 1980-81 costs of these four programs is included in the appropriate program budgets as follows:

Chapter 89/74	Department of Education	\$14,000,000
Chapter 1398/74	Public Employees' Retirement System	4,000,000
Chapter 593/75	Department of Education	1,000,000
Chapter 961/75	Department of Education	10,000,000
<b>TOTAL</b>		<b>\$29,000,000</b>

However, there is no statutory provision which addresses the method for providing funding for the remaining 1977-78 costs or for the 1978-79 and 1979-80 costs incurred by school districts. In order to allow the Legislature to specifically address this issue, funding for these programs in the three years cited is requested in this budget. The estimated costs of each program is presented in the following table:

	1977-78	1978-79	1979-80	Totals
Chapter 89/74 .....	\$1,023,818	\$14,000,000	\$14,000,000	\$29,023,818
Chapter 1398/74 .....	244,727	4,000,000	4,000,000	8,244,727
Chapter 593/75 .....	—	1,000,000	1,000,000	2,000,000
Chapter 961/75 .....	4,975,190	10,000,000	10,000,000	24,975,190
<b>Totals .....</b>	<b>\$6,243,735</b>	<b>\$29,000,000</b>	<b>\$29,000,000</b>	<b>\$64,243,735</b>

## AUGMENTATION FOR EMPLOYEE COMPENSATION

### Program Objectives and Description

The objectives of the augmentations for salary increase and employee benefits are to maintain salary and benefit equity for State employees as compared to prevailing compensation paid to other public and private employees.

Chapter 1159, Statutes of 1977, and Chapter 744, Statutes of 1978 provide for a collective bargaining process to reach compensation decisions for certain Civil Service and Related and employees of the California State University and Colleges, Hastings College of Law and the University of California. The Public Employment Relations Board has the authority to establish employee bargaining units. The bargaining unit certification process is underway.

Chapter 192, Statutes of 1979 (SB 91), provided for a one-time payment to State employees. Payment of this compensation is currently subject to court decision. The 1980-81 budget contains \$427,184,000 for state employees compensation increases. These funds will support increases in salaries, benefits and terms and conditions of employment negotiated during the collective bargaining process.

### SUMMARY OF PROGRAM REQUIREMENTS

	1978-79	1979-80	1980-81
I. 1980-81 Employee Compensation Program .....	-	-	\$427,184,000
II. Civil Service and Related .....	\$30,017,666	\$563,689,000	-

### Other 1980-81 Employee Compensation

The emergence of collective bargaining is expected to expand the number of issues subject to negotiation each year. The following table summarizes the estimated amounts for these other non-salary employee benefits.

	Estimated 1980-81 Amounts (millions)	
	Increased Benefit	Total
Merit salary adjustment .....	\$57.6	\$57.6
Health benefits .....	-	144.6
Retirement contributions .....	-	716
OASDI contributions .....	8	171.8
Vacation .....	-	229
Holidays .....	-	147.7
Sick leave .....	-	124.1
Non-industrial disability insurance .....	-	12.5
Unemployment insurance .....	-	13
Workers' compensation benefits .....	-	62

Expenditures in 1980-81 for currently authorized staff benefits (not including merit salary adjustments) for Civil Service and related employees will be approximately 31 percent of salaries and wages before any new salary increases or benefits are enacted. Additionally, the equivalent of 13 percent will be provided in the form of vacation, sick leave and holidays.

### I. 1980-81 EMPLOYEE COMPENSATION PROGRAM

With the identification of bargaining units not yet settled and representation elections not scheduled, collective bargaining may not occur in time to impact this budget. Therefore, \$427,184,000 has been included in the 1980-81 budget to provide funding for all State employees for salary and related benefit increases, including increases in health benefits and any other benefits and terms and conditions of employment.

AUGMENTATION FOR EMPLOYEE COMPENSATION—*Continued*

## II. CIVIL SERVICE AND RELATED

## General Description

The Budget Act of 1978 provided funds to pay health benefits premium increases and maintain employer contributions, averaging 85% of premiums for employees and 60% of premiums for employee dependents. Chapter 844/78 increased employer contributions to an average of 100% of premiums for employees and 90% of premiums for employee dependents.

Chapter 1180/78 increased the retirement contribution for miscellaneous members of the Public Employees Retirement System.

The Budget Act of 1979 provided for a two-part salary increase. The first part was a 7% salary increase, the second part was an average of 7.5% with a \$100 per month minimum for all civil service employees except California Highway Patrolmen who were granted a 20.6% increase. It also provided for maintenance of health benefits at the average 100-90% ratio.

## Input

	1978-79	1979-80	1980-81
Expenditures and Allocations.....	\$30,017,666	\$563,689,000	-

## III. UNIVERSITY OF CALIFORNIA

## General Description

Chapter 844/78 provided for increased health benefit contributions for academic and non-academic employees approved by the Board of Regents. Chapter 1180/78 appropriated \$7,000,000 to the University of California for increased retirement benefits for academic and non-academic employees.

The Budget Act of 1979 provided for a two-part salary increase. The first part was a 7% salary increase, the second part was an average 7.5% with a \$100 per month minimum.

It also provided for maintenance of health benefits at the average 100-90% ratio.

## Input

	1978-79	1979-80	1980-81
Expenditures and Allocations:			
Totals.....	\$13,755,500	\$137,477,000	-

## IV. STATE UNIVERSITY AND COLLEGES

## General Description

In 1978-79, academic and non-academic employees of C.S.U.C. received increased retirement contributions provided for by Chapter 1180/78 and health benefit increases included in Chapter 844/78.

The Budget Act of 1979 provided for a two-part salary increase. The first part was a 7% salary increase, the second part was an average 7.5% with a \$100 per month minimum.

It also provided for maintenance of health benefits at the average 100-90% ratio.

## Input

	1978-79	1979-80	1980-81
Expenditures and Allocations:			
Totals.....	\$10,043,769	\$131,762,000	-

## V. JUDICIAL

## General Description

Statutory salary provisions for judges and justices of courts of record are included in Government Code Sections 68200 to 68203.

Chapter 1018, Statutes of 1979, provided that salary increases for judges, effective July 1, 1980, and July 1 of each year after shall be equal to the average percentage salary increase for the current fiscal year for State employees, not to exceed 5 percent.

Under Government Code Section 18004, salary adjustment for employees of the courts are approved by the Chairman of the Judicial Council. Salary adjustments for these employees are generally consistent with adjustments granted to civil service employees, and are budgeted with civil service increases.

## RESERVE FOR CONTINGENCIES OR EMERGENCIES

Funds are required by various State agencies for unforeseen contingencies or emergencies for which no appropriation or an insufficient appropriation has been made. Amounts as required are allocated to the various agencies by the Department of Finance based upon the determination of need. Beginning with the 1978-79 fiscal year, reserves for contingencies or emergencies were added to the Budget Act by the Legislature to place a ceiling on the amount of deficiency authorizations the Director of Finance may issue to augment special and nongovernmental cost funds. These items specifically prohibit the use of the authority in Section 11006 of the Government Code with the exception of the Service Revolving Fund. General Fund loans are authorized to meet the needs of programs which would be curtailed due to delayed receipt of reimbursement, revenues or other financing.

Program Requirements	1978-79	1979-80	1980-81
Totals, Expenditures (Unallocated).....	—	\$3,414,654	\$4,500,000
General Fund .....	—	1,099,613	1,500,000
Special funds .....	—	1,385,401	1,500,000
Nongovernmental cost funds .....	—	929,640	1,500,000

In the 1978-79 fiscal year, a General Fund deficiency appropriation was approved in the amount of \$11,000,000. A deficient appropriation of \$2,600,000 will be submitted for the General Fund to finance required allocations in the 1979-80 fiscal year. Additional allocations may necessitate supplemental funding in a special deficiency bill for special and nongovernmental cost funds. This budget reflects \$1,099,613 (General Fund), \$1,385,401 (special funds) and \$929,640 (nongovernmental cost funds) available in the 1979-80 fiscal year to meet unforeseen contingencies or emergencies. These amounts are reported as expenditures in the 1979-80 fiscal year in this section of the budget. It is proposed that \$1,500,000 be appropriated for the 1980-81 fiscal year for each of the funding sources. The authorization to make temporary loans from the General Fund is proposed to be continued at \$2,500,000 for the 1980-81 fiscal year.

The detail below includes allocations for emergencies or contingencies from the General Fund, special funds, and nongovernmental cost funds and loans from the General Fund. All of these allocations are shown as available funds in each applicable agency budget.

### DETAIL OF ALLOCATIONS IN AGENCY BUDGETS STATE OPERATIONS

#### Legislative/Judicial/Executive

Legislative:	1978-79	1979-80	Fund
Legislative Counsel Bureau:			
To fund unanticipated costs incurred for temporary help necessary to meet demands of the Legislature, a result of legislation and opinions resulting from Proposition 13.	\$150,055	—	General
Judicial:			
To fund unanticipated costs of the Commission on Judicial Performance resulting from special hearings .....	—	\$325,000	General
Contributions to Judges' Retirement Fund:			
Provide additional funds due to the increase in the number of judges retiring .....	45,483	—	General
Executive:			
Governor's Office:			
To provide funding to meet the unanticipated increased costs associated with the printing of the Governor's Budget .....	—	130,000	General
Office of Emergency Services:			
To provide supplemental funding for the Federal Personnel and Administration Program .....	—	183,000	General
State Controller:			
To establish a locator unit to locate owners of unclaimed property .....	41,623	—	Unclaimed Property
Secretary of State:			
To purchase ballot paper and cards for use in November 1978 elections .....	(350,000)	—	General (loan)
To cover voter pamphlet printing expenses resulting from more initiatives qualifying for the June 1980 primary than originally anticipated .....	—	240,673	General

#### State and Consumer Services

Department of Consumer Affairs:			
To provide funding for personnel pursuant to language included in Item 103, Budget Act of 1978 .....	68,230	—	Consumer Affairs
Consumer Advisory Council:			
To provide funds for Council meetings, sufficient clerical assistance to prepare reports and correspondence, and hold public hearings in conformance with the Council's mandate .....	—	9,386	General
Board of Registered Construction Inspectors:			
To provide necessary funds to allow the Board to become a functioning licensing entity .....	—	58,352	Construction Inspectors Registration Board
Cemetery Board:			
To finance on-going support operations of the Board .....	—	(65,000)	General (loan)

**RESERVE FOR CONTINGENCIES OR EMERGENCIES—Continued**

	1978-79	1979-80	Fund
<b>Franchise Tax Board:</b>			
To fund increased workload in Senior Citizens' Property Tax Relief Program and extended benefits to disabled persons and cost of reprinting employer booklets created by Chapter 569, Statutes of 1978 .....	807,000	—	General
To provide funds to allow for a 60 percent response level for telephone assistance in the Board's toll-free information center .....	—	247,000	General
<b>Department of General Services:</b>			
To provide support staff to implement the portable classroom program as provided by Chapter 282, Statutes of 1979 (AB 8) .....	—	180,000	State School Building Aid
To provide staff to implement the State School Deferred Maintenance Program as provided by Chapter 282, Statutes of 1979 (AB 8) .....	—	(60,000)	General (loan)
<b>Public Employees' Retirement System:</b>			
To cover increased State Controller charges for processing health benefit deductions .....	—	132,000	State Employees' Contingency Reserve
<b>State Teachers' Retirement System:</b>			
To provide for increased rent resulting from relocation .....	133,248	—	Teachers' Retirement
<b>Business and Transportation</b>			
<b>Stephen P. Teale Data Center:</b>			
To fund expansion of facilities .....	432,610	—	Stephen P. Teale CDC Revolving
<b>Department of Transportation:</b>			
To provide for salary continuance of the Director of the Department .....	17,135	—	State Highway Account, State Transportation
<b>Traffic Adjudication Board:</b>			
To provide initial funding because federal funds could only be obtained on a delayed reimbursement basis. ....	(300,000)	—	General (loan)
<b>Department of Motor Vehicles:</b>			
To fund costs for increased requests for bicycle licenses .....	—	14,414	State Bicycle License and Registration
<b>Resources</b>			
<b>Department of Forestry:</b>			
Funding for emergency fire suppression costs .....	8,300,000	—	General
To fund increased expenditures for additional legal fees, investigator time, and administrative hearings for revocation of forester licenses for the Professional Foresters Licensing Program .....	—	36,037	Professional Forester Registration
<b>Department of Fish and Game:</b>			
To fund a deficiency in pro rata charges .....	115,918	—	Fish and Game
<b>Department of Parks and Recreation, Division of Exposition and State Fair:</b>			
Provide for increased advertising costs incurred by Cal Expo in preparation for the 1979 State Fair .....	—	52,366	General
To partially offset reduced revenues anticipated due to loss of spring racing days (harness meet) .....	—	72,000	General
<b>Education</b>			
<b>Department of Education:</b>			
To fund additional security guards and night personnel at state special schools .....	111,835	—	General
<b>University of California:</b>			
To finance the current year over-enrollment of 2,563 FTE general campus students as authorized by Section 28.7, Budget Act of 1979 .....	—	1,248,000	General
<b>Hastings College of Law:</b>			
For payment of a compensation insurance claim owed in the death of a Hastings' employee .....	—	18,275	General
<b>Youth and Adult Correctional Agency</b>			
<b>Department of Corrections:</b>			
To fund unbudgeted inmate salary increases, price increases, and population growth .....	—	258,360	Correctional Industries Revolving
<b>General Government</b>			
<b>Department of Food and Agriculture:</b>			
Provide immediate implementation of fumigation treatment of diseased beehives .....	17,086	—	Agriculture
<b>Commission on Government Organization and Economy:</b>			
To fund unforeseen costs to complete projects initiated during 1978-79 .....	26,947	—	General
To provide funds for a Civil Service Commission study. ....	65,000	—	General

RESERVE FOR CONTINGENCIES OR EMERGENCIES—*Continued*

## PROPOSED DEFICIENCY BILLS

In addition to the deficiencies funded from the reserve for contingencies or emergencies (Budget Act appropriation and as augmented by a deficiency bill), certain deficiencies are proposed to be funded from other special appropriation bills. The detail below represents a consolidated listing of all deficiency bills proposed for the 1979–80 fiscal year. This display is an informational display only; expenditures are reflected in departments' detail budgets and the above amount.

DETAIL OF CURRENT YEAR DEFICIENCIES  
STATE OPERATIONS

	<i>Amount</i>	<i>Fund</i>
<b>State and Consumer Services</b>		
Department of Consumer Affairs:		
Board of Accountancy:		
To provide necessary funds to offset increased costs of rent and examinations .....	\$53,903	Accountancy
Bureau of Collection and Investigative Services:		
To provide necessary funds to allow for the expansion of the Bureau's enforcement program and to allow the Bureau to mediate complaints .....	70,922	Private Investigator and Adjuster
Board of Landscape Architects:		
To provide necessary funds to allow the Board to administer the National Exam for Landscape Architects in June 1980 .....	24,000	Board of Landscape Architects
Board of Funeral Directors and Embalmers:

<sup>1</sup> An augmentation appropriation for special and nongovernmental cost funds may also be required in a special deficiency bill.<sup>2</sup> May include selected and other bond funds; refer to detailed list of allocations.

## AUGMENTATIONS FOR PRICE INCREASES

This budget provides funds for allocation by Executive Order of the Department of Finance to fund anticipated price increases which are not included in individual departmental budgets. In 1978-79, \$10,650,000 was provided for the costs of OASDI, unemployment insurance and uniform allowances.

Chapter 2, Statutes of 1978, extended unemployment insurance benefits to part-time and intermittent State employees in response to federal legislation. Federal funding was available on a phase-in basis and was terminated in 1978-79. Since this is a relatively new program, with no experience upon which departments could base 1979-80 budget requests, funding was provided in this item. Chapter 357, Statutes of 1978, requires that unemployment insurance costs for county and district fairs be funded in the Budget Act; \$800,000 was included in this special fund item to support these costs.

In 1980-81 funds are proposed for the provisions of Chapter 1036, Statute of 1979 (increases in retirement contributions), Chapter 663, Statutes of 1979 (increases pregnancy disability benefits) and unemployment insurance. Unemployment insurance funds are not included in individual departmental budgets as a reliable experience rate has not been established. These funds will be allocated to departments by Executive Order as individual needs are identified.

### SUMMARY BY OBJECT RECONCILIATION WITH APPROPRIATIONS STATE OPERATIONS

#### General Fund

APPROPRIATIONS	1978-79	1979-80	1980-81
Budget Act appropriation .....	\$5,698,000	\$7,500,000	\$6,218,000

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

## UNALLOCATED CAPITAL OUTLAY

## Project Planning

Appropriations for project planning provide for allocations to agencies for the purpose of securing sound cost estimates for future projects. These allocations are included in this budget as expenditures.

## Increased Cost of Construction

Existing law provides specific appropriations for the Director of Finance to augment capital outlay projects upon approval of the State Public Works Board. These augmentations are made when a capital outlay project cannot be undertaken because the estimate exceeds the amount available, bids received are in excess of the estimate, or acquisition costs for real property are in excess of the appropriation. Savings from completed projects are transferred to these appropriations and are available by law for reallocation.

This Unallocated Capital Outlay Budget provides the summary presentation of the allocations made from Section 16409 of the Government Code, General Fund.

The expenditures from allocations are included in individual agency budgets. That part which has not been allocated but which is estimated to be needed for further allocations is included here as an expenditure. For those allocations which are made from fund surpluses pursuant to Government Code Section 16352 rather than the specific appropriations cited above, the allocations are reflected only in the individual agency budgets.

## Project Inspection Charges, Public Works Employment Act, Title I

The 1979-80 budget act appropriated funds for project inspection charges incurred on Title I, PWEA projects that have been disallowed by the Economic Development Administration of the U.S. Department of Commerce. Funds will be allocated by the Department of Finance to cover expenditures for project inspection on Title I projects that have been or will be disallowed at the time of the close-out audit for the various grants. No expenditures are anticipated in the 1980-81 fiscal year.

## Fund Conditions

Fund Condition Statements which are not identified to a particular program are also reflected in this budget.

## SUMMARY OF PROGRAM REQUIREMENTS

	1978-79	1979-80	1980-81
Project planning .....	\$160,805	\$447,295	\$300,000

## STANDARD FOOTNOTES

**Fund Titles, Sources or Descriptions****(State Operations, Local Assistance and Capital Outlay)**

<sup>a</sup> From State Construction Program Fund unless otherwise indicated.

<sup>b</sup> From General Fund unless otherwise indicated.

<sup>c</sup> Selected Bond Fund expenditures that are included in overall expenditure totals. These bond funds include:

Health Science Facilities Construction Program Fund  
Recreation and Fish and Wildlife Enhancement Fund  
State Beach, Park, Recreational and Historical Facilities Fund of 1964  
State Beach, Park, Recreational and Historical Facilities Fund of 1974  
State Clean Water Fund  
State Construction Program Fund  
California Safe Drinking Water Fund  
State, Urban, and Coastal Park Fund (Bond Act of 1976)  
California Coastal Conservancy

<sup>d</sup> Bond Fund expenditures from other than selected bond funds are not included in overall expenditure totals.

<sup>e</sup> Non-Governmental Cost Fund revenues and expenditures are not included in budget totals.

<sup>f</sup> Federal Funds and expenditures therefrom are not included in budget totals.

<sup>f1</sup> Federal Funds (Public Works Employment Act of 1976, Title 1).

<sup>g</sup> From Capital Outlay Fund for Public Higher Education, unless otherwise indicated.

<sup>h</sup> Energy and Resources Fund.

<sup>i</sup> Non-State Funds and expenditures therefrom are not included in budget totals.

<sup>j</sup> Departmental costs relating to budget year salary increase and employee benefits proposals had not been determined when this fund condition statement was prepared. Therefore, the budget year amount shown for surplus available for appropriation has not been adjusted for such potential expenditures.

**Purpose of Expenditure****(Capital Outlay)**

## CLASSIFICATION OF FUNDS IN THE STATE TREASURY

Revenues and expenditures in the program budget and the summary schedules reflect the activities of many separate funds. Schedules 4 and 5 provide a complete list of these funds. The Index lists those funds for which Fund Conditions are included in the budget and references the page number. General Fund and Special Fund expenditures represent the cost of government and are included in budget totals; and along with selected Bond Funds, are included in the overall expenditure totals.

**GENERAL FUND**—Used to account for all revenues and activities financed therefrom which are not required by law to be accounted by any other fund. Most state expenditures are financed from the General Fund. Normally, the only difference between the General Fund and the other governmental cost funds is the restriction placed on the use of revenues of the other governmental cost funds.

**SPECIAL FUNDS**—Consists of governmental cost funds used to account for taxes and revenues which are restricted by law for particular functions or activities of government. The funds included in these classifications are primarily for the regulation of businesses, professions and vocations; transportation; law enforcement and capital outlay.

*General Fund Special Accounts*—Legislatively created accounts or dedicated revenues within the General Fund. Moneys credited to such accounts may be used only for the purposes specified in the legislation. As a result of Chapter 942, Statutes of 1977, these special accounts are treated as special funds and revenues and expenditures are included in the special funds totals in the summary schedules of the budget. They are therefore excluded from the General Fund Unrestricted revenues, expenditures, reserves and balance available.

**OTHER FUNDS**—See Schedule 5 for a list of funds which do not represent a cost of government. Expenditures from these funds are not included in the budget totals. They consist of moneys which were derived from sources other than general or special taxes, licenses, fees or other state revenues. Included are receipts from the Federal Government, funds created for accounting purposes, receipts from sale of lands, or moneys held in trust. These funds are segregated into the following classifications:

*Working Capital and Revolving Funds*—Funds created to finance internal service activities rendered by a state agency to other state agencies or to local governments for which charges are made at cost. The charges are reflected as expenditures in the budget of the agency receiving the commodity or service.

*Public Service Enterprise Funds*—Self-supporting activities operated by the State for the benefit of the public. Funds are derived from charges to those who use the service and no support is derived from taxes, licenses or other state revenues.

*Bond Funds*—Used to account for the receipt and disbursement of proceeds from the sale of bonds and to finance projects for which the bonds were authorized. Expenditures are considered a cost of government at the time interest payments are made and as the bonds are redeemed.

*Retirement Funds*—Moneys held in trust by the State for retirement benefit payments.

*Trust and Agency Funds*—Funds holding moneys in trust pending disbursements to trustors, moneys received from the Federal Government to be expended for specific purposes, and other funds which do not derive their sources from taxes or other state revenues, or are in the nature of transitory funds created for the convenience of accounting receipts or disbursements which are not necessarily revenues or expenditures.

**SELECTED BOND FUNDS**—Included in the overall expenditure totals of Schedules 1, 3 and 7 for budget purposes are expenditures from the following funds:

Health Science Facilities Construction Program Fund.

Recreation and Fish and Wildlife Enhancement Fund.

State Beach, Park, Recreational and Historical Facilities Fund (of 1964).

State Beach, Park, Recreational and Historical Facilities Fund (of 1974).

State Clean Water (Bond) Fund.

State Construction Program Fund.

California Safe Drinking Water Fund.

State, Urban, and Coastal Park Fund (Bond Act of 1976).

California Coastal Conservancy

<b>TOTALS, ALL GENERAL OBLIGATION BONDS</b> .....			<u>\$10,680,203,000</u>	<u>\$1,320,000,000</u>	<u>\$3,259,733,000</u>	<u>\$6,100,470,000</u>

<sup>1</sup> The state school building issues debt service payments are partially refinanced with funds of the borrowing school districts over a 30- to 40-year repayment period as prescribed by statutes.

<sup>2</sup> The California Water Resource Development Bond Act, the San Francisco Harbor Improvement Acts, and the Veterans Bond Acts are public service enterprises which have their own revenues to finance their respective debt service expenditures.

<sup>3</sup> Callable on and after July 1, 1951, by lot.

<sup>4</sup> Callable on and after July 2, 1955, by lot.

<sup>5</sup> Callable on and after January 1, 1941, by lot.

<sup>6</sup> Chapter 70, Statutes of 1972, authorizes a reduction in the amount of bonds from \$1,000,000 to \$853,000, and also authorizes a reduction of the San Francisco Harbor Improvement Act of 1913 bonds from \$10,000,000 to \$9,450,000 to eliminate the unsold, unissued bonds and thereby report unsold bonds as zero accountability.

<sup>7</sup> The Harbor Development Bond Law of 1958 includes an authorization of \$50,000,000 for San Francisco harbor development and \$10,000,000 for the development of small craft harbors as provided by Chapter 103, Statutes of 1958, First Extraordinary Session.
